It is interesting to note that, in St. Louis, KPLR-TV, channel 11, has chosen to stay independent rather than pick up a full-fledged network affiliation. Back around 1978, ABC was trying very hard to dump KTVI in favor of KPLR-TV, out of disgust with KTVI's then-lackluster news performance under Newhouse ownership.

I was sorry to hear HJ has died. I used to listen to his show on WSGW
790, Saginaw, MI. The show was unique, and was a forerunner of "modern"
syndicated talk, albeit non-political. If I recall, the show lost its
affiliation with Mutual, as its audience's age averaged 80+ and those
demos were not in demand by advertisers. A syndicated deal was tried but
it didn't fly.
"Florida.....Georgia....Alabama.........hello.....hello....hello....well..
..nooooobody there." Herb Jepko, circa 1977.

Enjoyed listening to Herb when Mutual picked him up, briefly, in the
1970's. This was right before they picked up Larry King, I believe.

>>

Chris,

Yes, it was grandfathered in. They are one of two Michigan High powers. In
fact, WBCT was 500kw until a few years ago (WJFM). The other Michigan
mega-power is WOMC, Detoroit.

I'm NOT doggin' WBCT at all, but a couple of engineers from Lansing a while
back mentioned that WBCT's tower is either in a terrible location, or their
bays aren't the best (Horizontal? Or something like that, I'm not a engineer
obviously and I sound like a mental case). They had mentioned WBCT's signal
could even do better. That's hard to imagine though after hearing them
nearly everywhere in Michigan, including in my fillings.

I would think the worms near their site stay warm in the winter!

I'd add one thing to Dan Karpelman's post; beautiful music was a popular format among programmers a decade or so ago, but the experience of WHO-AM 's FM sister station illustrates why many changed: when I was working in the Des Moines market, (not there but at a competitor) they were doing great with the format, but found its strength was also a big drawback. Everybody listened to KLYF-FM, or at least had its beautiful music ON, at the office especially, as free Muzak.
But it was so successful as a "wallpaper" format, that nobody paid attention! Enough people remembered to list it in their ratings books, but nobody paid attention to the ads, and sponsors hated THAT.
They changed, to a more contemporary format though still pretty easy, so people would pay attention to what they were tuning in, and listen to what they were playing between the songs.

Source record: 32684

Reply-To: stellastar@aol.com (StellaStar)

Was riveted today by the news of bombing of the Federal Bldg in
Oklahoma City, and being on the road away from TV, heard audio clips from
radio KTOK and (can't find my notes) KGOU, maybe.
Question: is this the kind of event which can/should/did spark EBS
activation? Did it?
Would love to hear tales of broadcasters' response. When I worked in
a competitive newsroom, we used to spring into action and volunteer
overtime when a big disaster came up. The excitement level, despite the
serious nature of events, inspired us to adopt the nickname (in-house
only, obviously) of "the News Ghouls" as we rushed to scattered points to
do live reports. Reporters DO understand the serious nature of tragic
events, I think, but also feel the listeners' desire for information
that's accurate and up-to-date.
Everywhere I went today, people were asking each other for the latest
news on the bombing. Somebody will, no doubt, bash "the media" for telling
the tale and showing the pictures; but you can't tell me fast response and
full disclosure are worse than hushing up the facts as old Soviet-Bloc
nations (and many would-be amateur editors here) would have done.
Comments?

I would be interested in hearing about non-news/talk stations' coverage of the federal building bombing in Oklahoma City, in and out of OKC.

We are a Rock station that offers news only in the morning, but we did hourly updates on the story all day, switching to periodic reports after 7pm. (Roughly whenever there were new developments; about every 90- to 120-minutes.)

Does your station have a set procedure for dealing with tragedies of this nature?

This afternoon, I tuned into WXYC FM, which sends their audio
over the internet. I used a TCP/IP-PPP connection, along with
an application called MAVEN, which runs on the Macintosh, and
uses the MAC's built in 'Sound Manager"

The copy of MAVEN I got was from the WXYC library on their home page,
so it ws configured to activate my ppp connection, and then connect
to the WXYC audio stream. It was all pretty painless, since I already
had the TCP/IP-ppp stuff running with Netscape on my MAC: all I had
to do was access the WXYC home paage and cruise around until I found
MAVEN, and downloaded it.

The audio quality was surprisingly good, btw.
-----> this is a real-time feed, right off their audio distribution
panel.

WXYC is the student operated FM, owned by the Universtiy of North Carolina
at Chapel Hill.

You can access their WWW page via: http://sunsite.unc.edu:80/wxyc/

>First of all, experience. Since a major amount of experience in the field
>would, of course, be a prerequisite , is sales, on-air, or
>engineering experience preferable for management abilities at an ownership
>level in a small market station?

I believe that if you manage a commercial station, you need sales experience. Your station will not survive with out aggressive and planned sales. On-air and engineering experience is good as well, you could hire someone to help you with these areas, but you have to be sure they know what they need to know and will give you reliable advice.

>Would 75 to 100k in financing get a moderate small operation off the ground,
>or, am I out of line?

100k at least. to finance your operation through several months of slow sales and still meet your payroll.

>And, finally, (before I loose your interest by rambling on), why can't I seem
>to get any information on broadcasting in the book stores or libraries that
>is less than twenty years old????? :)

this is too true and a problem. I like Broadcast Engineering to keep up with new tech. I would suggest getting in touch with your state broadcasting association. They sometimes keep a library, or could get you in touch with an adequate library/info. source.

Good Luck

Locky,
I keep hearing that, yet no one has a better solution other than to
let the jocks be free. What that says to me is that we should stop
trying to find out what the masses of listeners want and trust it to the
personal taste of some trendy jock.

No offense intended, but my challenge in broadcasting is to find
ways to entertain millions of listeners and make a buck, not to provide a
comfy place for broadcasters to work. If I can do both, that's great.

Rich

>
>Talk to you soon!!!
>
>

This is just my opinion as well. But, I don't think ANYTHING can be
over-researched. HOW the researched is used is a different story.

Many contributing factors:
^^^^^^^^^^^^^^^^^^^^^^^^^
Too many cooks, so to speak, can fragment the info too much.
Conducting surveys improperly hurts, of course.
Then there's the biased way of looking at the results.

There are so many factors to consider, that sometimes research can hurt
more than help. I remember a PD telling me that "Funky Town" tested well
and added it to the playlist. Unfortunately, they were a Rock-40 station
(in the 80's obviously). Well, the song DID test well with the core demo,
and had a high familuarity rating. Too him, that was good. But, he just
lacked better judgement of the style of music to test (again, my opinion).

I've heard of it being used too conservatively, also.

The biggest obstacle I had to overcome, moving from a jock to programming,
is finally realizing that our views (no matter how open minded we are) are
not the same views as the listener's. Our habits, lifestyle, tastes, and
personalities all vary as humans. Finding the common thread of music taste
for a certain type of demographic is no easy task and research is that tool
that helps to keep it all in focused... and boy is it easy to become un-
focused due to your own opinions.

I guess, case in point... We don't program for ourselves (then radio would
be all too hip for the common person, eh?). Most likely, you find radio
boring in your area, because they are not programming to your likes. It's
a never ending argument, but the thing to remember is... Radio is ALL opinion.

I'll cap it now before I get flamed.

I think - in America at least - we're seeing the backfire of over-researched radio. Some of the more successful new stations/formats rely more on guts, realizing that research is only as good as the questions you ask and the people you question. (And that it can be made to support whatever theory you espouse.)

The buzz lately is PAR and Alternative; both formats reignite the ingenuity, creativity and freedom that the progressive movement fostered in the early 1970s and rely more on listener input and programmer guts than established research methodology. (This is especially true for the PAR format.)

I have two thoughts concerning the abandoning of research - first off, you can't win when everyone is playing all the same well-researched songs. In a way, over researching has defeated itself. Secondly, most research only questions an infinitessimaly small portion of the listening audience - if it is even done in your city! That probably amounts to a sample smaller than the margin of error in your ratings reports! What use is that? It's certainly not enough to base my entire station on!

> that their numbers don't show up, matter, or what? thanks for the answer.

Answer..... Arbitron tracks public radio numbers, but keeps them out of the "book." They do, however, sell numbers to public stations and networks that have the money to buy them.

Some public stations do very well. If published, their numbers would be the envy of many commercial stations. In fact, the revenues of some public stations are also pretty respectable, especially considering that their sponsors are their listeners.

Add up the shares in your market's book, and look at the % by which they come up short of 100%. A big share of that number (which will run, say, 13%) is noncommercial radio.

IC>don't get me wrong, there is room for national syndicated shows like
IC>Rush, Tom, Jim -- and even Imus. But, let's not forget the roots of
IC>broadcasting, which belong in the communities they [should] serve.

Chris,
Actually, that's not true. The roots of radio are in networking.
Don't forget, radio was the TV of its day. It wasn't until TV came along
and forced radio to change that it turned to music and local DJ's.

When you break it down even further you have to note that even the
music isn't local. It was recorded somewhere else. I'm sure Whitney
Houston doesn't hop around from station to station to sing all those
songs live and local.

When I was at WICB-FM at Ithaca College, we had access to ABC Radio through the local ABC Radio affiliate. ABC has six different networks. The other station was affiliated with the Information Network, the main one. When I started at WICB, we were using the "Rock Radio" network, but when I became News Director, we switched to the "Direction" network. I believe the school receives it straight from the satellite right now. But when I was there, we had a line through the phone company from the satellite receiver at the other station to ours. We didn't have to pay ABC anything.

Interesting that no top 40 has come to fill the voids in Shreveport and Monroe. KTUX switched from rock 40 to AOR last year. KNOE-FM has been hot AC - or even AC - for the last couple of years. With KBIU-103.7 Lake Charles now rock 40, only KQID, KSMB-94.5 Lafayette, WFMF-102.5 Baton Rouge, KLRZ-100.3 Larose (Houma, although IDs with New Orleans), and WEZB-97.1 New Orleans are about it in the state these days.

Ending a period of operations without a PROGRAM DIRECTOR,
KDMX MIX 102.9 DALLAS welcomes aboard new program director
RUSS MORLEY. RUSS arrives in Dallas from his last position at
WRMF in West Palm Beach Florida. RUSS has just walked in the door
at Mix 102.9 - official start date WED 4/19/95.

When I asked Russ for news he told me that tomorrow morning, the
station is sending out crews to collect donations for the
OKLAHOMA CITY DISASTER FUND EFFORT. Teams will be in various
locations around DFW collecting cash for the RED CROSS from
7 until 9AM Friday morning 4/21/95.

GOOD LUCK RUSS and WELCOME TO DALLAS/FORT WORTH!

Longtime KFYI(910) News Director Ed Walsh has
returned from WOR in New York to take three
jobs in Phoenix. Walsh has been named
PD, ND, and morning show co-host with Bill
Heywood.
That last assignment displaces Shelly Jamison,
who had the job less than a year. Jamison was
previously teamed with Scott Drake at KOOL-FM(94.5).
They were let go in '93 and replaced by Lee
"Baby" Simms, who has since moved to afternoons
at KOOL-AM(960)
to make room for Danny Davis, Tony Mc
Graw and Beth Fox on the FM. Jamison is also
well-known for a 1989 Playboy pictorial("Broadcast
Nudes"), which pictured her as a Phoenix TV
anchorwoman and cost her the job she in fact
had at KTSP(now KSAZ)...a producer. Jamison
comes from a media family...mom is local restaurant
critic Elin Jeffords and stepdad is former KPNX-TV
anchor Phil Allen.

KHTC (K-Hits 96.9) has back-burnered its
3-month search for
a permanent afternoon drive host.
PD Joel Grey and production director Michael
Anthony are splitting middays while midday
talent Alan Cook continues to cover PM drive.
That arrangement is now considered indefinite,
but not permanent.
K-Hits showed market legend Steve Goddard
the door when it switched to 70's oldies on
November 28...and replaced Goddard with
weekender Phil Abbot. Abbot lasted a month
and is now doing weekends at KOOL-FM.
Goddard is still looking.

Jock DeJour: Monica Lowe, recently dismissed from morning duties at KRAK-FM (Country) returns to KQPT-FM (AAA) as PM Driver. Prior to Monica's country stint she hosted evenings at KQPT (The Point). Geoff Metcalf, whose contract recently was not picked up by "OJ" talk station KSTE vowed he'd be on the air out west "sometime soon." He was recently heard filling in at news-talker KPIX, San Francisco.

PD UPDATE: Mark Evans lands the P.D. gig at EZ's KNCI & KRAK (Country) Combos. He's wrapping up duties at Omaha's KXKT by Friday 4/21 to report to work in Sacramento the following Monday.

TRIBUNE BROADCASTING'S swap of KYMX(AC)/KCTC(Nostalgia) for two Henry properties in Denver has yet to be officially confirmed. A local paper reported the deal, but hasn't been able to find confirmation from any "official" sources. Still, the newly created AM Drive position at KCTC remains "on hold" in face of pending news or changes, or both.

TALK 650 KSTE was the only station to send a reporter to Oklahoma City in the wake of the recent bombing. Pat Davis (whos strings for other stations out west including KGO, San Francisco) followed a Sacramento Urban Rescue team, one of few in the nation activated to search the rubble for survivors/victims. As of this writing he was in his 30th hour with no sleep, but still filing some chilling reports from local search team members.

Canada doesn't have allocations for calls beginning
with "CB" . . . .

to which Ian King <ian@vortex.netbistro.com> replied:

Believe it. The CB** callsigns are allocated to the
Canadian Broadcasting Corporation by Industry Canada
(formerly known as the Department of Communications).

Under international agreement (from the ITU, I believe), calls beginning with "CB" are allocated to Chile, not Canada. I checked the World Radio TV Handbook once, and Chile does in fact use "CB" calls for some of its commercial broadcast stations. (I think they are all "CB" followed by two or three digits.)

There is supposedly some side agreement under which the CBC is permitted to use calls beginning with "CB". I assume this was a bilateral pact between Canada and Chile; I don't know if the ITU was involved too.

Material I got a couple of years ago from the Department of Communica-
tions (before it was renamed Industry Canada) stated that this agreement existed but supplied no details. I'm trying again to find the details, and I'll post them here if I manage to find them.

>
In the immortal words of Louis Armstrong, "Oh, Yeah!" The cellular companies _hate_ when that happens. Here in Northern California, the local FCC had a "friendly reminder" printed in the monthly newsletter of the area's frequency coordinating committee. They haven't been so accommodating in other parts of the country, slapping serious fines on traffic reporters and other broadcast types who used cell phones "up there."

It is OK to use it on an aircraft sitting on the ground, but I've always wondered, what if the aircraft is in flight but below the highest floor of your city's tall buildings? Since you can use cellular on a building's top floor or while standing on a mountain top, could you argue that using it at, say, 1200' is below either level, and therefore not harmful to the cellular system?

>seconds to say that. Heck read it now! It takes about 2 seconds!

In listening to two stations around here that do the 2-punch weather
bed/jingle combo, the funniest (but most uncomfortable) thing to hear
is when the jock starts adding all sorts of other BS in with the forecast...
and they run out of bed! So, you hear --

"Philly Forecaaaaaast!!"

"Today, we got sunny skies, and a high 0f 75...a BEAUTIFUL day to come out
and join us here at Six Flags Great Adventure!! We're right up here off
exit 7A
of the New Jersey Turnpike...there's lotsa cool new rides...so, come on out
and join us! We want to see you here!!!! ...And, right now it's 70 degrees!"

<silence>

"Q-one-oh-twooooooo!!!!"

I think stations that do that ought to just forget the end jingle...if the bed
runs out, the jock/board-op should just hit the first song in the music
set, and the jock should just SAY the name of the station at the end of
their whole long schpiel.

From: slutsky@tesla.njit.edu
Message-ID: <3n8sjv$n2j@vixen.cso.uiuc.edu>
Source record: 32563

Some comments from a listener with no stake in the radio business:

I have been amused by some of the nonsense about the City of License.
Take for example WYNY at 103.5 FM. They "city" of license is
Lake Success which is a bed room community in Nassau County, Long Island
just over the city line. Their ID is WYNY Lake Success - New York City.
They don't hide their city of license but say Lake Success quickly and
New York City slowly. Their transmitter is on the Empire State Buidling
with all the other NYC stations.

There was a discussion about this on one of the Commercial services, but
nobody new the answer. I remember 103.5 FM as WAPP and WTFM. Was it
ever WGLI-FM and licensed to Babylon, LI which is further from NYC?

What puzzles me is that Jersey City, NJ and Yonkers, NY with populations
of about 200,000 do not have radio stations licensed there while
much smaller suburban towns do.

Ok people in the radio business:

Do you think the City of License should be abolished?

Should the concept of City of License be abolished and "zones" based on
coverage maps be used instead?

Source record: 32564

Well, it's Thursday afternoon and finally the Sun is shinning
brightly over North Central Texas! Yesterday (4/19/95) we were
all following details of the Oklahoma City Bombing, and as if that
weren't enough, Tornadoes and Severe Thunderstorms struck our area
in the afternoon, and then returned again around 9PM.

Local network TV stations (4/5/8) did outstanding jobs keeping us
informed as to locations and severity of rumbling storms.

On the FM band, KISS-FM was again doing a good job of keeping
their listener's informed while maintaining most normal programming.

Where I felt the most informed was on the AM band. Through the
crackling static of AM, I listened mostly to KLIF 570 AM. They were
taking calls from people all over the metroplex as the storms were
actually occuring. It created a sense of community and co-operation
of information. (Except for the idiots who called in to say that it
was quiet in their neighborhood....duh, don't waste air time with
non-info!! I actually sensed that the moderator was baffled and
perplexed as to why these no-lifes called. I know that I was.)

KRLD AM 1080 Was doing a good job of local coverage, speaking w/local
weather and public safety personel. They took calls from listeners,
and tried to balance coverage of Oklahoma City at the same time.

I just wanted to post my gratitude for what was in my opinion,
a good job of keeping the public informed of dangerous weather.

Hi John...
A few alternate suggestions (and I guess we're all assuming
a full service CHR or hot AC format like the big monsters of the
60s used to be...)
Mornings---Don Imus, WNBC (at his best in the 70s, IMHO)
newsman-Chuck McCord, of course
Middays---9-noon, Danny Neaverth, WKBW
noon-3, Dan Ingram, WABC
(Neaverth's a morning man, Ingram best known
for afternoons, but they both had a lighthearted
touch that would work great middays on my
dream station)
On the news desk; Irv Weinstein, WKBW
Afternoons---Howard Stern, WNBC (he was at his best about
10-15 years ago); Robin Quivers on news
Nights---6-9 PM, John Landecker, WLS
9-midnight, Bruce Morrow, WABC
On news 6pm-midnight; Jack Swanson, WLS
You may not know all those folks, but trust me, this is a staff
that would get you #1 12+ and 25-54 in any market, anywhere, in
every daypart.
Bob Smith, middays WXXI-AM 1370 Rochester NY

3159. All The Dull Music Radio Plays

Newsgroup: rec.radio.broadcasting
Date: 1995-04-21 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <3n8sk6$n3m@vixen.cso.uiuc.edu>
Source record: 32567

ID> In reference to the continuing thread on "All The Dull Music
ID>Radio Plays"..... Maybe it's because of all the Dull Consultants
ID>radio has turned too. If PDs and GMs would program from the heart and
ID>enjoy this business for what it could be again, our listeners would
ID>WANT us to be part of their lives more than ever. We need more
ID>management leaders willing to take some chances to achieve great
ID>things. We need less owners willing to be happy with a small, target
ID>demo, nitpicky slice of the pie that will bring some limited income.
ID>Everyone is so afraid of programming a GREAT station for the masses
ID>because they're afraid they'll lose their tiny little homestead.
ID>Screw the homestead: explore the Frontier.

Corey,
At least you're not blaming Hillary for it.

Has anyone thought of blaming the record companies? I find the
dullness begins at the source with record companies recording only what
they feel is guaranteed to make a quick buck. What I hear being released
today has such an incredible sameness and formula sound that I can't
listen to three songs in a row without two of them having the same
rhythm track, the same orchestration and the same basic technical
mashing.

ID> RADIO is poised to capitalize on the MASS-APPEAL format again.
ID>We just need a few good men and women willing to walk the walk and
ID>talk the talk. Let's stop segmenting ourselves into oblivion.

I doubt that. From my vantage point, I see radio becoming more
fractionalized. There are so many signals in most markets that there is
no such thing as "mass appeal" anymore. It's niche formatting and a
modified "narrowcasting" that works today.

By it's nature there can be only one "mass appeal" radio station.
In New York, for instance, what would the other 80 stations do? When
advertisers buy 3 deep in a market, the remaining 77 stations would be
left scrambling for the few bankruptcy attorneys not booked to handle
the other 76.

Are you sure your feelings aren't based on an on-air personality's
frustration with not being able to play what you want? Every DJ who has
ever worked for me knew far more about programming than anyone else in
the universe. In most cases, the music they "knew" would work just
happened to be the music they personally liked.

Based on the ratings I received yesterday, New York's "mass appeal"
station is an Urban AC. WRKS ("Kiss") now dominates the market in all important

demos, particularly 25-54 with a 9.5 share. Somehow I doubt that would be your concept of a "mass appeal" station. A 9.5 share 25-54 in New York is an astounding figure. That rating wouldn't be possible just targeting Blacks. There have got to be huge numbers of whites and other ethnic groups listening, too.

They've done a brilliant job and the station sounds great, too.

Rich
Director - WOR Radio Network

3160. Re: All The Dull Music Radio Plays

Rob makes a great point about "gut" where programmers are concerned. It's too bad that the last time programmers were allowed to use their gut feelings was in the 60's, when great innovators like Bill Drake and Gordon McClendon shaped the future of the business for the last 25 years or so. Many of their innovations are what we refer to as "basics" today.

I'm fortunate that my GM and ownership trusts my "gut." We don't employ a consultant (though I'm getting ready to market my services as one to smaller market stations), and we do very little formal research. Our research more or less consists of being out in the community daily, listening to what our audience has to say. We know it when we have an unpopular daypart, we know it when we play a song our listeners don't like, and fortunately, we know it when we do something right. Why? Because communication is a two-way street. Our audience knows that they can always speak to someone in authority to voice their feelings. Results? #2 (17.3) persons 12+, #2 (18.5) persons 25-54 (both M-S 6am-Midnight) Middays, (that's me) #2 (18.5) 12+, #2 (21.1) 25-54, and (I gotta brag) #1 (50.0!) women 18-34 (Spring '94 Arbitron)

Yes, radio in the 90's is probably very over-researched, over consulted and the airwaves are micromanaged. PD's....get your nose away from the computer screen, get your ears away from the telephone and take a walk in your communities. Be a home-towner.

: nationwide talk show.

Funny how the mind plays tricks. In 1965 when I first heard Herb Jepko, I had thought he was in his 50s or 60s then, but he was only 34. Amazing because he had a smooth unhurried style, and always respectful of his callers.

I remember when he branched out and ran the program on several full-power stations. I believe he was on KRLA in Pasadena. The station did not have a newscast and there apparently was no late night air staff, so Herb tried to cover the news slot with some generic AP stuff off the wire in Salt Lake City which sort of generally applied to LA. Very odd.

Then Mutual picked him up, hoping to do nationwide what Herb had accomplished on a few high powered stations. Then some months later Larry King came along...

>

During the day of the bombing, I was glued to the television and
scanner for much of the morning. On my way into work, it seemed like
most of the OKC radio stations were covering the scene downtown live. Even
this morning, many of the non-talk stations (a CHR station, a C/W
station, and even the Rock station) were still mainly focusing their
programming around the clean-up and recovery and allowing listeners to
call in and share their experiences from Wednesday morning. A number
of other stations had returned to music, but gave frequent updates about
the news downtown as well as where people could go to contribute help.

It was a bit strange the morning of the bombing, when three of the radio
stations (who share a building with another FBI office) were evacuated
from their studios for an hour or two, including one of the main News/Talk
stations of Central Oklahoma, KTOK.

Erving Goffman, one of the few readable socialogists, was already
writing about news coverage in the 1960's, eg. ``Were your
mother's clothes actually on fire when she jumped from the window?''

I think the answer is to turn it off. The product, it helps to
remember, is the audience, not the coverage. I mean it helps you
turn it off.

If you want to read what good coverage might be, look at James Thurber's
very short story ``The Man on the Train.'' (in The Middle-Aged Man
on the Flying Trapeze, reprinted in 92 Stories, Wing Books, 1994, pp
280-283)

I'm not bashing the media; if anything, the audience.

IT>Internet. ABC Radio, for one has linked up with them as a partner. They
IT>have a WWW page; I'll post it when I can find it -- maybe someone out
IT>there has it or has visited the site?

Hanlon,
This is going to need a lot more work. The compression required for
that amount of audio hasn't been invented yet. Under current compression
standards that amount of audio would grind the Internet to a halt. I
tried to FTP 150k worth of files during prime time and it took over an
hour the other day. If you don't mind listening to a syllable at a time,
it'll work just fine. :-)

IT>Seems like this service would be great for folks in far away places to
IT>stay in touch with their favorite radio stations and shows (like me in
IT>Louisville, who pines for Stern, Imus, and WFAN!).

I've been talking with several companies who want to carry my

The FCC just finalized the rulemaking to allow this to happen--I
believe its effective at the end of May. As a result of this upgrade,
a couple stations are being moved to new frequencies (KEMM in Commerce-
Greenville, TX is moving from 92.1 to 103.3; I forget what the other
station is that's moving...).

In article jgallagh@interserv.com writes:

>I'm talking about canning broadcast announcers and replacing
>them with (frequently) younger people who are paid less.

If a station can get the same value from an employee that's younger, and fires them because of their age, they've broken the law. That prosecuted aggresively (I watched one of them - a completely unfounded case that was decided in the "old" employee's favor - trust me, the govt.'s on this one big time.)

If, however, they replace the announcer with someone who'll work cheaper, and provide the station with the same level of satisfaction (that's the STATION'S call, remember - they're the one doing business, risking their and their stockholders' capital) as long as they abide by agreements they've made, they're perfectly justified.

>If a major market station sells for say $ 15 million, I see nothing wrong
>with the FCC demanding that say 10% of the sales amount be set
>aside for severance pay to those fired because of the new
>ownership and/or format change.

Not the government's place to require something like that. Last I checked, the FCC's job was to ensure radio stations operated in the public interest, not to preserve announcer jobs. I've seen MANY MORE jocks fired because of their lousy attitudes than fired SIMPLY because of a change. It happens, but if they're doing their jobs well enough, management is most often all too happy to retain good employees. It's MUCH easier than hiring new ones. Quite frankly, many stations are sold at a loss of investment because they aren't winning. Why should the new owners be forced to underwrite other people's failures? Why should the sellers? They may already be taking a loss.

Now, in today's world of competitive duop'ing (a station buying a more successful competitor to put them out of business), it's a little less fair perhaps, but believe me, there is a HUGE market out there for people with successful track records and good attitudes.

>Radio is one of the few businesses where people are terminated for
>no cause on their part--and then replaced with others who do the same
>thing.

Obviously, something must be different, no one fires someone and goes through the hassle of posting, applicating, interviewing, documenting for EEO, training, etc...for no good reason. Cutting costs is a perfectly good reason to make a change. It's done all the time in all kinds of busnesses. If you're building gadgets out of widgets and find you can get the same widget from another factory for 25% less, and you're satisfied that it's as good a widget

(remember, YOUR call, not the employee's) why should you be required to keep buying the more expensive widget? Even if buying from the new company means your salesman from the expensive company gets laid off?

>I have no problem with a station that lays people off if the position is >permanently eliminated.

The point is, our country is about capitalism, not socialism or communism...It's not YOUR or MY call...It's the one risking the CAPITAL that makes the call. Furthermore, Radio is not coal mining. We don't need unions protecting us from 16 hour work days or unhealthy working conditions or company stores that charge us outrageous prices to keep us in a perpetual position of indentured servitude. If one doesn't like it, one can always do something else for a living!

Do companies make stupid mistakes? Yup. Do managers sometimes do cruel and inhumane things to their employees? Absolutely. I've seen heavily union concious shops and I've seen non-union shops. My experience is that the union mentality often results in a confrontational, bitter and angry environment. I remember seeing one where the FM was union and the AM wasn't. They both had the SAME MANAGEMENT, but the FM was a horrible, unhappy, angry place while the AM was the exact opposite. By the way, the AM was a big winner, the FM a big zero.

To get job security in this business, you can't turn to government, or unions, or anyone...You've got to make yourself irreplaceable by being the best at what you do. Talented people who work hard are very tough to replace.

Best,

Kevin

IP> Dr. Laura is currently the fastest growing radio talk
IP>show in America and is the talk of the town in the Hartford area.

Paul,
No offense intended, but it sounds like you've been reading their promotional literature. Laura can't hold a candle to the success of Dr. Joy Browne. I've had many stations tell me they compare Laura to Joy, saying "someday she'll be as big as Dr. Browne."

It'll be interesting to see if the show syndicates well. She may be successful on KFI where she follows Rush on the hottest Talk station in the city, but there's a big question as to her success on stations without that huge foundation. After all, Laura has been bouncing around Los Angeles for 15 years, or so. Only when she was surrounded by very strong programming on a dominant station did she show any growth.

When there were 5 shrinks in Los Angeles, Laura was #5. Not many affiliates are willing or able to provide that launch pad.

April 20, 1995

For Immediate Release:

30:60 Productions, a Twin Cities-based, radio production and marketing company, has opened its first Web site on the Internet's World Wide Web. "The Radio Marketing Page" teaches the Web's 38 million users about radio's role in growing a business.

"The Radio Marketing Page" also showcases some of 30:60 Productions' multimedia and radio production capabilities.

"30:60 Productions provides sound for use in radio/TV and multimedia presentations so what better way than the Web to demonstrate our ability," says Scott Bourne, president of 30:60 Productions. "Clients can download sample audio clips and pick up copywriting tips, radio statistics and other information from our Web site."

30:60 Productions is the first audio marketing company to launch a site on the World Wide Web.

Point your Web browser to: http://www.prgone.com/bus/radio3060/ to visit "The Radio Marketing Page." You'll need a browser such as Mosaic, Netscape, Cello or Lynx to take full advantage of "The Radio Marketing Page's" multimedia format.

For more information, call Scott Bourne at 612.898.1206 or send E-mail to Radio3060@aol.com.

: I don't care what the Arbitron ratings say.... there are TOO MANY
: Country formated stations in Dallas. We have 4 on the FM band, and a
: countless number of them on the AM band.

Country out sells all other formats 4 to 1. Look at the numbers, it simply is the most popular format nation wide. Just because you and your friends don't listen has nothing to do with radio formating.

The Radio owners did not invest millions of dollars to provide you with a wireless jukebox that plays your favorite music, what ever that might be.

If there was money in the other formats than there would be radio staitons compeating for that money. But in the South and West Country is King.

Consider yourself luckey that you have as much varitey as you do. I see every music format represented in your list.

As to new music, it's there, comming up several every hour. Even even the Classic Rock and Oldies stations play New Artist. Probably on 1 or 2 and hour but they do play them.

>fractionalized. There are so many signals in most markets that there is
>no such thing as "mass appeal" anymore. It's niche formatting and a
>modified "narrowcasting" that works today.

Well, I've never claimed to be a programmer. My thoughts are
from an Air Personality's viewpoint. I know we're
fractionalized...and I think a little too much. My experience at
stations is that the PD shoots for a very limited target...and then is
constantly trying to skew up or skew down to capture the next demo.
To quote a Dorito's commercial sort of....."I smell Insecurity!!!" I
suppose, deep in my heart, I know Mass Appeal is dead. I like the
thought of it, though, because of some great Mass Appeal stations I
grew up listening to. Alright, forget Mass Appeal. How about MORE
Appeal?

> Are you sure your feelings aren't based on an on-air personality's
>frustration with not being able to play what you want?

I'm pretty sure. I don't care WHAT I play. My "door" opens when the
song is over and I perform. I've worked all sorts of formats and it's
inconsequential.

> Every DJ who has ever worked for me knew far more about programming than
anyone else in
>the universe. In most cases, the music they "knew" would work just
>happened to be the music they personally liked.

As mentioned above, I don't claim the programming expertise...I
just have an opinion.
What I WOULD like to see are more PDs and MDs who will put a song on

the air because "it just sounds good!" or who will program an element because "it just sounds right." I think there's more room for that. I think there is plenty of room for more guts. I would like to see more programmers take some chances and rely less on consultants. I've worked with a LOT of consultants and NOT ONE has every agree with the other on basic issues. What does that say? Did I just work with the "wrong" ones? Or.....were they just irrelevant?

Well there you go Charlie, breaking another radio golden rule. Any
Consultant will tell you that it doesn't matter what your listeners
think. You should program your station by what 20 partisans have
said in a focus group in any other market but your own.

Seriously, stay with your gut and stay away from the cookie-cutter and
those phenomanal ratings will continue.

: ever worked for me knew far more about programming than anyone else in
: the universe. In most cases, the music they "knew" would work just
: happened to be the music they personally liked.

Yes, and every station manager *I* ever worked for thought HE knew
'what to play,' and if he didn't, he hired a consultant to tell him
what to play. It is really not about 'playing stuff' it is about
controlling the air staff, and this is where consultants come in.
They are that invisible expert that GM's lean on, who get paid
to help control the air staff. Consultant's lend credibility to
the process, and we all know that when an outside consultant comes
in, well, his opinions are taken very seriously. It is classic
management technique to use consultants in this way. It is reflective
of their own insecurity and inability to lead by letting go: they
lead by using tons of 'NO' rules, and consultants write the rules.

I am amused that the LEAST creative people in radio--the managers--
think they ARE creative enough to set stringent controls over
output. But, it's been this way for 'a hundred years' and will
not change much. Radio management has always laughed at the air staff
behind their backs, and considers the board people as just
those who get the commercials on, start music 'events,' read promos,
etc. Radio to them is not about creativity, but about numbers and
dollars. Nothing is going to change this.

Regards,
John O'Donnell

I just got a bill from US Healthcare for $597! My former employer,
WDRE\Underground Network, told me that monthly premiums were to be
$200. That is still high considering I'm on unemployment insurance.
US Healthcare just told me on the phone that I'm delinquent for
April. I told them that the bill for $597 was the first and only
time that I received any correspondence from them. But they
were firm and did not care. Pay or be cancelled! US Healthcare
added that WDRE did not take me off of their 'group' list and,
of course did not pay my April premium and, of course, did not
let me know that. So what I'm asking is if anybody knows of
a reasonably priced interim health insurance, short-termed, for
broadcasters who, like myself and several other former WDRE
employees, are between jobs. PLEASE: E-MAIL ONLY! Thanks.

>Those of us who worked with Herb will miss him. He gave us lots of good
>memories (and stories we would never be able to tell over the air).

I have to admit, I didn't know Herb was still alive. We ran Herb's "Nightcap" show at the first station I ever worked at (WSGW AM - Saginaw, Michigan - 1978).

With the way talk radio is now, it's kind of hard to believe that such a gentle, friendly show as Herb's ever existed.

He was truly one of a kind.

p.s. Anyone remember the Yucca plant ads that ran on the show?

I was an engineer at KSL in the early 70's. Herb's show was on overnight. All of those lines, "The Florida, Gerogia, and Alabama line is 801-.....) were the sales and misc. business lines at KSL during the day. About 10:00 PM, those lines would all light up as the night caps would start calling. He did his show from one of the studios and when I had the overnight shift, I would frequently go in and visit with him. He was a very plesan man, but, like all of us, he did have his "other side". He seemed to be dissapointed that, in spite of his success, his show was still thought of as just fill material to keep the station on all night.
He moved out of the KSL studios at one time and ran from his own studio he built up across town. When he did that, I built an automation system that would automatically play commercials and run station breaks when triggered by tones and clocks etc. It had a bunch of TTL logic IC's. These day, the circuit that I designed could easily be eliminated by a rather simple microprocessor, but building it and getting the bugs out of it was one of the funnest projects I have done. We called it the herb automation and I hear it is still on a shelf someplace in the "KSL museum of the strange things radio engineers have done"
Herbs death has brought back many memories.

One other thing...
Stations in other markets picked up Jepko's show
in the 1973-76 period; one of them was a station here in
Rochester, NY. They actually sent it to stations on lines that
didn't sound much better than standard 3 kHz phone lines,
at least for a while. This sort of informal syndication encour-
aged Mutual to pick up Jepko for a couple of years...but they
didn't get the audience they wanted. So they looked for a host
with an edge and a younger appeal...found Larry King at
WIOD in Miami (at the same time he was being courted by
KCMO in Kansas City with a lucrative offer)...and a star was
born.
Jepko, I think, went back to an ad-hoc network for a while
with some stations (especially in smaller markets) who didn't
care for King. (Used to still hear him on distant AMs even after
1978, for a time.) But Rochester and Buffalo went with King,
like most major markets, and found King had a positive carry-
over effect into morning drive. Anyone know how long Jepko
hung on, either in ad-hoc syndication or at KSL? Was he
still active and working in Salt Lake City when he passed away?
Can't say the Nitecap show ever appealed to me, and I don't
do that kind of talk show myself, but it did represent a gentler
time and a gentler approach to radio, and there was (and is) a
place for it. It might have done better in a daytime slot or on
cable.
Bob Smith, middays WXXI-AM 1370 Rochester NY

Your comment on "Florida....Georgia....Alabama....hello hello etc." was right on. I could actually hear him saying that when I read it. Not only was his show a pioneering effort, he used (by today's standards) primitive equipment...just selected lines from a multi-line set into a homebrew hybrid built by the KSL engineers. When Mutual picked up the show, my husband Ron (an engineer at KSL) built a box to decode the little "be-doop" tones they used to go to commercial breaks. The box used 30 or 40 TTL logic integrated circuits...of course, this was pre-microprocessors....
I did an overnight news shift and would shoot the bull with Herb from time to time. His memory for his callers was just amazing...he could hear the words "Hello, Herb?" and would automatically know who was calling....without the benefit of call screening!

Regards..

Doc Searls (searls@batnet.com) wrote:

: Height and vantage are just about everything on FM. Check out KCBS-FM on
: 93.1. They have by far the highest antenna, and it reaches places that
: are shadowed even to other stations on Mt. Wilson. I'd take KCBS-FM's
: 28500 watts at 3497 feet any day over KPFK's 112,000 watts at 2831 feet,
: even though KPFK's combination of height and watts makes it
: ("technically") the biggest FM station in the U.S.

I've heard KCBS-FM (when it used to be called KNX-FM and KKHR-FM) out in the Mojave as far away as Chiriaco Summit, which is about 90-100 miles from Blythe and the Arizona border on I-10. It was, in fact, the last Los Angeles FM station that I was able to hear driving away from Los Angeles in that direction.

However, it is not always height that counts -- or at least height as in being the highest. Southern California has frequent atmospheric inversions that create a layer that is the equivalent of a mirror at certain heights above the earth's surface. The inversion causes a change in refractive index that can, perhaps, best be understood by looking up through a fish tank at the surface of the water. If you look straight up, you can see out through it. But if you look at an angle, at some point, the surface appears to be a reflective mirror.

This inversion layer is often present, and frequently is *below* the height of FM and TV transmitting antennas in Los Angeles. This has little effect on reception near the transmitter. However, as you get farther away from the transmitter, the angle of the transmitted wave striking the inversion layer below eventually reaches a critical angle, and gets reflected upward into space, away from the earth. Thus, being up too high in Southern California can actually *inhibit* long-range reception of FM and TV stations, even when these stations are theoretically line-of-sight. On the other hand, stations *beneath* this inversion can sometimes be heard as strongly as local stations, hundreds of miles away. This phenomonen is called "ducting," because the inversion creates a duct, much like a microwave transmission line, preventing the radiation from escaping. Thus, instead of the strength of the signal falling off as the square of the distance from the transmitter, it actually falls off at a much lesser power than the square.

To further emphasize the importance of this effect, I *frequently* could hear KDB-FM in Santa Barbara from certain locations in San Diego, even though this distance is roughly 200 miles. In fact, from locations just north of UCSD near Torrey Pines, from a certain high point on the road near the cliffs, I used to be able to send rock solid signals from San

Diego to Santa Barbara from my 146 MHz amateur band transmitter using a 5/8ths wavelength antenna on the top of my car running one watt of power -- sometimes even *less*. Often, I would drive to this spot to talk to friends up there through repeater stations, in Santa Barbara. I could also sometimes talk to people up there directly, without going through the repeater, although I sometimes had to increase my power to as much as 25 watts to do this.

Of course, this was ducting at its best, because not only was there a reflecting layer just above the transmitter and receiver, but the path between Torrey Pines Park and Santa Barbara is almost entirely over conductive sea water. So when the inversion was in, this was almost like connecting a 200 mile long coaxial cable between the two locations. On the other hand, when the inversion was *not* in, or was at a different altitude, the transmission path was essentially dead between the two locations. Luckily for me, it was *often* in.

However, it also seemed that signals from Los Angeles (including FM stations) would come in better on the days that Santa Barbara was not coming in. Unfortunately, I didn't make any attempt to try to document this observation, but I would be willing to bet that others have also observed it, as well.

: I should mention that all these heights are "above average terrain," which
: is measured in 8 directions, from 2 to 10 miles from the transmitter.
: It's not elevation above sea level.

And this is significant. If you draw a circle around Mt. Wilson, you will discover that almost the entire northern 180 degrees of that circle encompasses high-altitude terrain in the San Gabriel Mountains where almost nobody lives. On the other hand, the southern half is much closer to sea level, and includes parts of the Los Angeles basin. (Actually, for 10 miles, you might only include the San Gabriel Valley.) This has the effect of making the heights above average terrain seem much lower than they *should* be -- at least in those directions where the expected audience actually lives.

In fact, Mt. Wilson is actually at an elevation of over 5700 feet above mean sea level, and most of the populated areas of Los Angeles (and, indeed, most of Southern California along the coast down to San Diego) are between sea level and 1000 feet. So in the direction of the population, the height of the antenna is actually very significantly understated by the height above average terrain.

Although I have no specific facts to back this up, I also wonder whether *differences* in height above average terrain on Mt. Wilson and other mountains in the San Gabriel Mountains above Los Angeles actually make much difference one way or another. The reason is that many of the reference points used to calculate HAAT for transmitters in those locations lie to the north in very rugged terrain. If you moved the transmitter about a mile from one point on a ridge overlooking the L.A. basin to another, it is quite likely that some of the northern reference

points will move from valleys to to mountain peaks or vice-versa. This could have a significant effect on the computer HAAT, while having zero practical effect on coverage area.

I believe that some stations near L.A. have actually used this fact to advantage. For example, in the '70's, KMAX-FM in Arcadia, a class A station, used to advertise that it was located high up in the San Gabriel Mountains. However, I believe that it actually had a *negative* HAAT. I believe another class A station in Redondo Beach around that time was able to play this trick to a lesser extent to put its transmitter on the northern face of the hills on Palos Verdes.

: Canada. We can only do transmission by phone. Supposedly it is illegal for
: us to use ANY wireless transmission in Canada.

Radio transmissions like an RPU shot across an International border are
illegal. It applies to any RF transmission intended to cross a border.
Now signals do cross the border but there are no US stations with their
Transmitter in another country broadcasting to the US.

: The question now is... Does this apply to Cellular phone? We were told
: Cellular transmission is ok (seems to be wireless?). Does the law extend
: to FM two-way radios? If our Canadian AND U.S. offices seperately applied
: for a two-way license, would it be legal? And then how about Digital RPU's
: on the 915 MHz band (like Quick Link) where they are not regulated by the FCC
: or CRTC (if I'm correct).

2-Ways are fine as long as the audio crosses the border by international
carrier. The Telephone company. See if you can license a 2-way in
Canada and connect it to the US staiton via Telephone lines.

Cellular would work becasue it's treated as a telephone, not a radio.

The 915Mhz Quick Link stuff is no longer available. THere has been a
change in the rules preventing them from operating inthe 900 mhz band.

Oooooh...it must have been slavery to work there! :) Come on! The talent, in many cases, should not be given *any* control over the creative aspects of the station. That's the PD's job! And there's nothing more painful to the ears than listening to the dude or dudette that's determined to be the next Stern, and constatnly fights with management to do so.

I'm the first one to want to do bits and schtick, but if it's not the patina the PD wants washed over his station, I accept that.

Don and Mike did it right...ya wanna do a great comedy show and the PD wants 10 in a row? Leave! Sit out your non-compete, then go work for people who 'get it'!

Just remember...every star on Broadway and in Hollywood (read that jock/talk host) is being directed by a director and a producer (read that PD). If their *interpretation* and *delivery* is excellent and they execute the format well, then they make everyone look smart.

>
> They laid off thousands of people...who were NOT replaced.

In the end...what's the net? Exactly the same. BTW...those people at IBM were given outplacement and between 4 and 18 week's salary. My best friend from high school was among them last summer.

> I'm talking about canning broadcast announcers and replacing
> them with (frequently) younger people who are paid less.

Really? I replaced Jack Bogut in Pittsburgh and was paid *more*. Also...and this is more to the point...he was pulling a 0.7 (A 25-54) in the morning, and had been trending down for three books, on a talk station that was outperforming him for the rest of the day. He is a legend, and one of my boyhood heroes. Do you think he complained? No...he went across town and worked on the MOYL station, where he's doign quite nicely.

Everything in life is a balance. Do you think that if those older, more expensive hosts were pulling in the ratings, they'd be let go? No...but someone replaced the Alan Freeds and the Johnny Hollidays of the world.

We need self starters and less self pity in this industry, not unions.

Continuing the discussion on the need for unions...

Major Market FM stations are routinely selling for $ 15-30 million.

Frequently once a station is sold, announcers who have been at
their jobs for years are let go as the new owners either change format
or just want to bring in new blood.

I have suggested that perhaps a certain percentage of the transfer
price (10%?) be set aside to cover severance pay, etc. to those with
seniority, (Let's remember the airwaves belong to the Federal Government
and the taxpayers were never paid for these frequencies, unlike
cellular phone frequencies).

Many people reading this newsgroup just shrug and say:" that's the
nature of radio...there's no job security...owners are crazy and do
what they want." etc.

Well of course, if you;'re not organized, and sit idly by, you will get blown
out and some younger person will be hired for your job at 1/2 the pay you've
been getting. Remember, the new management is probably heavily leveraged
with debt so they've got to cut operating costs to meet their mortgage payments.

If you think this is legal, see the recent court case of Lotus Development where
the employer was found guilty of his same thing and ordered to pay the "laid off"
person half a million in damages.

This type of thing happens in radio every day because announcers sit back
and take it.

I would suggest that airstaff members band together and do the following
when indiscriminate cutbacks (firings) occur:

1. Picket the station owners/directors' houses (bad for the neighborhood)

2. Call the advertisers and alert them to the situation

3. Band together with the sales staff and contact the advertisers

4. Read # 3 again and follow it.

If all the sales staff walked out with the announcers, many of these
indiscriminate firings would be quickly reversed as a station can
not survive long without cash flow. It would take far too long for
managers to hire all new sales staff and combat the negative
publicity which would surely follow in the print media.

Okay, maybe I missed the sarcasm if there is some in these posts. But
a week's severance per year of service isn't that good. How many people
in radio have been with the same station for more than 4 or 5 years?
That's not common really. So, 4 to 5 years would translate into 4 to
5 weeks of severance. That type of package is not uncommon in
non-union shops.

To join AFTRA in a major market costs about $800. So I would be paying
$800 to get possibly 2-4 weeks severance; which I would probably get
anyway. Plus, what if you've only been with the station for
a year? You'll walk away with 1 week's severance because of your
precious union. Now start thinking about that $800 you spent to get in.
There is way too much investment for really no return.

AFTRA is a lame duck and an incredible waste of money. The union does
nothing for you. If you're good, you'll always be in demand.

> 'liberal'".

People *should* be able to be fired at will! Where is there an argument against this? I'm not saying they shouldn't get treated with dignity and shouldn't get help in the form of severance and references (if warranted), but jeez! How many stories do we need to hear about unions getting so ingrained into the daily life of the worker that management can no longer tell someone (not ask, tell) to do something without the worker running off and crying foul?

I remember when I first came to Q107 (WRQX in Washington DC) to do mornings, I couldn't *record* on the tape decks in the studios. In fact, the record enable button was in a studio two rooms away where an engineer sat, and if I wanted to take a winner call, I had to get on the intercom and ask the engineer to start the deck remotely. *And* I had to do it within 45 minutes of the last break the engineer took. Talk about a spontaneous show!

NABET had even negotiated "wash time"...15 minutes at the beginning and the 15 minutes at the end of a 5 hour shift...to wash up! On the clock!

That day, I realized that being a liberal was not for me. *I'll* be responsible for my *own* success and failure, thank you...hard knocks and lucky breaks alike. I don't want to be beholden to anybody or anything, including legislation or collective bargaining. If I get screwed over by management, the first person i look to to find out why is *me*...they are not genetically predisposed to get rid of someone who is producing, gets along with co-workers, loves the business and gets ratings. 99% of the time, a "nonsensical" firing is for one of those reasons. And I'm not willing to waste my time worrying about the other 1%.

} Frequently once a station is sold, announcers who have been at
} their jobs for years are let go as the new owners either change format
} or just want to bring in new blood.
}
[...]

} Well of course, if you;'re not organized, and sit idly by, you will get blown
} out and some younger person will be hired for your job at 1/2 the pay you've
} been getting. Remember, the new management is probably heavily leveraged
} with debt so they've got to cut operating costs to meet their
} mortgage payments.

John:

While I buck the trend and tend to sympathize with the situation you mention, there is one thing worse than the idea of 'new blood' replacing old, seasoned talent. That is 'new microchips' replacing any talent. Automation is no longer a bank of tape decks or CD players. It is interactive and getting very slick. At this point I am more worried about people being replaced *totally* than I am about new blood taking over for old blood. In fact, I would support a move to offer new-talent a chance, since automation and satellite-feeds have created a very barren landscape for new, rough talent to get good.

Automation is rapidly becoming the standard. There is even (I have heard) an automated satellite service (talk about adding insult to injury...). With up-and-coming rules removing ALL barriers against multiple-station-same-market ownership, and the unattended operations rules, there will be a marked increase of robotic stations that have little or no human intervention beyond the sales staff. "Robo-Rock 105 ... We're not here ... But *you* are"!

So while we would all like to see more stability in radio, I believe that you are, in essence, concerning yourself with the *price* of gas, when it is *availability* that should be your biggest worry.

Hi Rob,

you said> And if you haven't earned the AFTRA minimum to qualify for benefits, you're screwed! They'll take your dues okay, but if you're unemployed, don't look for AFTRA's open arms.

Strangely enough, it was through the local AFTRA hotline that I learned about several gigs, some at stations that were not organized stations. Because the station called the local AFTRA office to let them know a position was available, I got a gig, even though it wasn't in an AFTRA shop. Pretty Cool. Just goes to show what can happen when people cooperate.

Slightly short notice, I guess, but readers in New England are encouraged to check out the "Let's Talk About Radio" show, Sundays at noon on WJIB-740 Cambridge-Boston, on April 23rd and 30th, for a two-part chat with WBZ overnight talker Norm Nathan. We taped the shows this week, and they're *fun*! Norm talks about his 51 years in the business and about the state of radio today...and more.

The shows repeat the following Saturday morning (April 29th and May 6 for the Nathan shows) at 9am on WKBR-1250 Manchester NH.

"LTAR" is a weekly hour-long show in which WJIB's owner, Bob Bittner, yaks about the state of the radio business with a panel that includes me, Peter George, and occasionally other members of the New England broadcasting community. It's easily one of the most unusual shows out there, on commercial radio at least.

If you're outside the reach of WJIB's mighty 250 watt signal, contact me and we might be able to arrange a trade for tapes of *your* local radio scene.

OK...now that some of the smoke has cleared, I can let everyone know a few things...firstly, we are all right...whatever that terms means...

Sherman has basically noted what happened. To add to that, Sailor Media was involved in a lease-purchase agreement to buy WIGO Radio utilizing owner financing until bank or other alternative financing could be obtained. The deadline necessary to obtain this was originally set for April 30th. The prior owners of WIGO, Allied Media of Waterbury, VT, got a 'better offer' in the form of Ring Radio's offer. Considering a few points...1>NO ONE has ever made such a fuss over a 1000 watt AM radio station anywhere in the US. Very few media congolomerates today own 1000 watt AM stations, and don't tend to make a fuss over them. 2> Ron Sailor was the only person in Atlanta to publically challenge the formation of the Atlanta Urban Radio Alliance (AURA) between Ring and Cox Enterprises...which could potentially ruin a $35 million deal. Easiest thing for a large animal to do to a mosquito that begins to annoy you...swat it.

We are in the process of moving out of our MLK Drive offices...and seeking other signals in the Atlanta Metro Area. We hope to be back on the air within 45-60 days. In the meantime, I am in search of a secondary job to help keep food on my family's table...if anyone has any suggestions, I would be happy to hear them. I will be continuing to provide information to the groups, and continue to remain on the net in the interim.

<shrug> WIGO's signal? One week ago, after we signed off Friday afternoon, the signal was very quietly reactivated and now simulcasts KISS 104 (WALR/104.7 FM). Why? They claim that there are lots of people in cars that they would like to reach but can't due to not having an FM radio...(never mind that our biggest liability was our signal strength...)

Peace & long life y'all...

M

22 KKGO-105.1 Classical 1.8 1.3
23 KWKW-1330 Latin 1.6 1.5
24 KLAC-570 Standards 1.5 1.7
25 KRLA-1110 Oldies 1.4 1.5

==========

A few notes:
1. KLVE took the top spot away from KLAX this quarter, as more
listeners seem to be switching from the more traditional Latin music,
to the more slickly produced Latin pop sound.

2. KNX is carrying the OJ trial gavel to gavel, which might explain
the decrease in ratings of the talk stations (KFI, KABC)

3212. NYC Radio Watcher's Report 4/21

Here's the latest ratings....

12+ Winter Ratings (Fall #'s):
1. WRKS-FM 7.4 (3.8)
2. WQHT-FM 5.4 (4.8)
3. WCBS-FM 4.6 (4.9)
4. WHTZ-FM 4.4 (4.2)
(tie). WSKQ-FM 4.4 (4.2)
6. WLTW-FM 4.1 (4.4)
(tie) WABC-AM 4.1 (4.7)
8. WINS-AM 4.0 (3.6)
9. WPLJ-FM 3.5 (3.8)
(tie) WCBS-AM 3.5 (3.5)

25-54
WRKS-FM 9.5 (3.5)
WCBS-FM 6.1 (6.5)
WSKQ-FM 5.6 (5.6)
WLTW-FM 4.7 (5.6)
WXRK-FM 4.7 (4.5)
WQCD-FM 4.7 (5.5)
WPLJ-FM 4.7 (5.0)
WMXV-FM 3.3 (4.1)
WBLS-FM 3.2 (4.4)

Morning drive: Stern, 7.4, followed by WINS, WRKS, WCBS-AM and rappers Dr Dre & Ed Lover at Hot-97.

Comments: The Emmis 1-2 punch came through--KISS-FM's new format was the big winner, with Hot 97 in 2nd. In 25-54, it seems like all the A/C stations took a hit from KISS-FM.

Over two dozen computer folk showed up on Tuesday, April 11th
for our 3rd Annual Broadcast Computer Users' Lunch Meeting.

Thanks to all of you who came. I really enjoyed seeing you and
I think we all had a good time.

For those of you that didn't make it, and just to make you a tiny little bit
jealous, let me mention that along with the opportunity to see those folk
we email, we had some super software to give away, along with a full
color propagation map from Communications Data Services (CDS) ...

Rules Service Company: A Set of the FCC Rules and Regs.
Pike & Fischer: A Set of the FCC Rules and Regs.
Parsons Software: Business Almanac (a CD with lots of legal software and
other business software)
It's Legal (a package to helps write contracts, wills, etc)
DacEasy: Instant Rolodex, a super phone/mailing list, dialer.
DacEasy Accounting for Windows (a CD with over $700 of software for
use by small business).
Grollier's: Grolliers Multimedia Encyclopedia.
Mindscape: The Grammy Awards CD (multimedia)
Microsoft: MS Office
MS Bookshelf
MS Encarta
MS Cinemania
Symamtec: Norton Utilities
Norton Desktop
Norton Anti-Virus

We thank all the fine companies that helped out, as well as Radio World for
assisting in paying for part of the lunch itself.

If you couldn't make it, don't dispair! We'll try again next year! Or,
...possibly ... in New Orleans ... we might start a fall tradition...

regards
barry

Boston has been one of the few major markets where country has never taken hold.

Thus it was quite a surprise a couple of years ago when two major Boston FM's changed format to country, or contemporary country if you will, within a very short period of time.

Well, the death knell is beginning to sound for one of them as rumors are flying that 105.7 (the Country Club) is getting ready to jettison the format in favor of:

a. 90's Album Rock

or

b. All News (on the fm dial)

A friend of mine in the record biz tells me they are already seeking record subscriptions from the labels in anticipation of a switchover.

This station used to be known as WVBF and has had a great stable of announcers over the years.

Morning team Loren and Wally are among the best in Boston and could conceivably fit into almost any format. I'm sure they would have been shocked a few years ago if you told them they would one day be playing country hits.

The station has a big clean signal that blankets all of eastern Mass, Southern NH, Cape Cod and even into R.I.

Looking for a major market announcing job??? get your resumes in!

Of course denials will follow.....which reminds me of the 60's when WNAC became the Big 68 WRKO.

WNAC was an old mainstream news/talk/info/ (your parent's station).

Bill Drake was hired to turn it into an 18-34 powerhouse.

Meanwhile, the airstaff was told by management: don't worry...nothing's happening... jobs are secure, blah blah blah.

While this reassuring was going on, technicians were installing new boards, fast-start cart machines, switches, etc while theese poor chumps were doing their daily shows.

Well of course D-Day arrived and one night they each got a phone call not to come in the next day.... and the rest was history (and the Hits Just Keep On Comin..."). I hope they got a few week's severance pay.

WRKO of course went on to earn zillions for RKO General until the parent ran into a little problem with bribing officals overseas and the FCC decided they might not be a fit operator of the public airwaves, and thus they lost Channel 7 TV. A "minority" owned firm wound up "stealing" (i.e., not paying fair market value) for channel 7's license.

This "minority" firm had a few minority shareholders who were puppets for Supermarket/real estate multi multi millionaire David Mugar. The puppets were soon bought out.

Iannace (iannace@aol.com) wrote:
: . . . Most of the NYC
: commercial FM stations are on the Empire State Building (with the
: exception of WPAT 93.1 and WYNY 103.5 which use the World Trade Center)
: . . .

Except that I believe WPAT and WYNY are not actually licensed to NYC. WPAT, I think, is licensed to Patterson, NJ, and WYNY is licensed to Lake Success, NY.

Back when the World Trade Center first went up, I recall reading an article about NYC television stations suffering reception problems. The suggested solution was to move the transmitters from the Empire State Building to the World Trade Center. But one little problem got in the way -- this was said to encroach upon the protection area afforded other stations nearby. In particular, the article said that some of the stations would be short-spacing Baltimore if they moved to the WTC.

Could it be that the reason NYC-licensed FM stations are still on the Empire State Building is because of the short-spacing problems that would be caused if they moved? Would that also explain why the stations up there now are, in fact, licensed to other cities?

Amen Brother!!!! That's exactly what I was talking about in my last post. Here's another story for you. I heard a jock do guest weather a few times. He would hit the weather bed and then for 6 seconds explain what he was doing. Then a few more seconds would be spent introducing the caller who was going to do the forecast. Then 30 seconds would be killed by the caller stumbling through the forecast. More often then not, the bed would run out and the caller would talk for at least 10 seconds dry. Then came the weather close.

Two punch jingles are bush league. They're a crutch. Just another opportunity for a jock to get lazy. It's great to hear a jock hit a post on a donut. It also keeps him/her ontop of the basics.

I just think it makes more sense and sounds slicker if you can punch out when your done with your "creative forecast" of sunshine and 70 for the next week. Why make someone say more if they don't need to or truly don't have to. The formula for succesful CHR radio stations is saying the most with the least amount of words. If a jock talks for a minute dry, then punches out....It's his fault and should be spoken to by the PD about how to perform a music intensive format. I wouldn't blame the jingle, thats silly.

I worked for Chuck a dozen years ago as a part time announcer and enjoyed the
experience. I left the statioon when I got my first P.D. job, but I learned a
lot.

I believe the Rules specifically state the reason for using the city of license...I am not able to quote, but it is something along the lines that the listener may be mislead (why, I don't know - obviously people are confused when they only hear the city of license once an hour if the city is not a large city and the station covers a larger city, and they here the city called out 5-10 times per hour).

: Anyone know the power limits for Mexican AM stations?

I don't think there are any limits. Most High power Mexican AM are in
the 150Kw to 250Kw range.

US FM stations were limited to 100Kw ERP in the late 50's or early 60's.
There are still Super Power stations out there. Some as high as 300 Kw ERP.

Have you tried it yet, Rich? It's not full fidelity, but it's a lot better
than you'd expect.

For everyone who is scratching their heads trying to figure out, based on
conventional compression techniques, how this is being accomplished,
don't. Just listen. Then, try and figure it out.

I need help to find a good PC-program for fast access and playing small WAV-files. It's going to be used a a jingle/signature-program. It has to have a clear and simple layout (like Fast Eddie). It also should be working as much as possible in a higher memoryarea than the first 640kB. This has to be used for network-application and our newsprogram. I will be grateful for any suggestions.

From: Fred Weinberg <72440.2577@CompuServe.COM>
Message-ID: <3nfgna$59a@vixen.cso.uiuc.edu>
Source record: 32452

KTRT-AM, Tulsa has entered into an LMA with the owners of KBIX-AM, Muskogee and KMUS-AM (silent) Muskogee. Both deals will end in a purchase.

On Monday, April 24, KBIX will begin simulcast with KTRT. We are using a bi-directional 56kbp line and Comrex codecs to strap the stations together as well as a Penril mux to get 2 Muskogee phone lines into our Tulsa studios so we can offer live, local talk to both cities out of one studio. There will still be some staff in Muskogee (40 miles south of Tulsa) and at least parts of two local shows a day from there. We did drop Rush and Ollie and some other national daytime stuff to make room for the local talk.

I think this is how LMA's and duapolies should be done and I'm putting my money where my mouth is.

KBIX is one of the older licenses in the nation, same call letters since it went on the air April 30, 1936. We're not sure what we'll do with KMUS yet but we'll put it back on the air real quick. I can't stand a quiet radio station.

The reasons for the deal were the usual. They couldn't make any money in Muskogee and we could leverage out Tulsa base. Our signals overlap slightly in South Tulsa. One of those am-am deals which makes sense.

AIRWAVES SPREAD SEEDS OF VIOLENCE
E. J. Montini
The Arizona Republic, Sunday, April 23, 1995
(C) Copyright 1995 The Arizona Republic

This was no foreign import. No evil contraband from abroad. Not this time. The hatred that blossomed in Oklahoma City was home grown. It was conceived here and planted here, fertilized with watery bile from the public airwaves.

Now the crop is in.

It's harvest time.

The astonishing thing is not that the bombing of the federal building in Oklahoma City might have been carried out by Americans, but that Americans find such a thing hard to believe.

We live in a country, after all, that has come to generate and sustain extremists. The kind of people now being investigated for the bombing in Oklahoma City.

Organizations that rail against the government or minorities or Jews aren't new. But never before have such groups been accepted so widely. And never before have they been so tacitly condoned--even nurtured.

Hate is a sorrowful weed.

It requires constant attention. The earth around it needs to be watered and culled. It needs shelter, lile a mushroom, growing best when kept in the dark.

The far flung seeds that have existed over the generations would take hold occasionally, but only in patches and only for a short time, though with the ugliest of yields.

A History Of Hate

You find it hard to believe Americans could plant a terrorist bomb knowing it might kill American children? Then you've forgotten Birmington, Ala. in 1963.

At the Sixteenth Street Baptist Church one Sunday, the children were changing into choir robes for the morining service. The chruch was a well-known staging area for civil-rights demonstrations, some of the first to take place in the country.

Hate had deep roots there. Crop yields were high.

When the bomb went off, it killed four little girls.

Even in those days, however, hate was less pervasive. And the purveyors of hate were not omnipresent, as they are now.

Turn on the radio. You'll hear from the hosts and callers that it's no longer enough to disagree with someone. You must dispise him. It's no longer enough that our opponent is wrong. He must be evil. What begins as conservatism explodes into radicalism.

It rains down from the sky.

It fertilizes.

Going To The Extreme

Doctors are murdered at abortions clinics.

Francisco Martin Duran, the man who took his assault rifle to the fense around the White House and tried to kill President Clinton, was an ardent fan of a hate-mongering host in Denver.

A radio host in Phoenix, Bob Mohan, suggested on the air that anti-handgun activist Sarah Brady should be taken to a veterinarian's office and "put down" line a dog.

Hate-talk won't drive a reasonable person to do such a thing. Even hate-talk tf a hate-mongering host in Denver.

A radio host in Phoenix, Bob Mohan, suggested on the air that anti-handgun activist Sarah Brady should be taken to a veterinarian's office and "put down" line a dog.

Hate-talk won't drive a reasonable person to do such a thing. Even hate-talk that goes on every day, every hour, every minute, every second.

But what about a person who's already unreasonable, already unstable, already groping around for some sort of reinforcement for his hatred and paranoia?

They preach hatred of the government, hatred of the president, hatred of those who support freedom of choice or gun control or human rights. Hatred and suspicion and anger.

They do it very well. Listen to Rush Limbaugh or Ken Hamblin or G. Gordon Liddy or Bob Dornan. Hate sells. Even better, at least for them, hate pays.

It also grows.

There's no great mystery here. We shouldn't be shocked or surprised that Americans are willing to perpetuate such evil against other Americans. There's been no leap in extremism.

It's risen slowly, gotten tall as a field of corn.

I don't know how much more it can grow.

I know this, however. A rain of errors preached over the airwaves is bound to produce a reign of terror on the ground.

It's springtime now. The crop is ready.

And in Oklahoma City, using bulldozers and cranes, picks, axes, shovels and bare hands, they dig in piles of concrete and steel, dirt and blood, reaping the harvest.

I'm a broadcast major, but I haven't learned everything yet.....

Anyone know the power limits for Mexican AM stations?

Here in Fayetteville, Arkansas, they come in booming loud and clear. I know this could be a result of propagation. I'm no expert, but I would say that they are putting out mega wattage.

And while we're at it.....is 100,000 watts the limit for U.S. FM stations now?

They
>have a WWW page; I'll post it when I can find it -- maybe someone out
>there has it or has visited the site?

The site is www.RealAudio.com I've been there and, to get a copy of the program that allows you to receive the audio, you have to become a full-fledged "beta tester." Since this is something I've never done and I'm on my way to starting a new job on 4/26 (Middays/Image Production at Rock 104, KHOP/Modesto-Stockton, CA [sorry, couldn't resist]), I'm not sure if I want to get involved with something like that. The software is supposed to go on sale to everybody over the Summer.

>Seems like this service would be great for folks in far away places to
>stay in touch with their favorite radio stations and shows (like me in
>Louisville, who pines for Stern, Imus, and WFAN!).

Absolutely. With the advent of the IPhone it became clear that we can send audio over the internet in real time. I was just waiting for someone to come out with something like this. Soon, hopefully, you'll be able to hear any radio station you want over the Internet- so, we'd better make those breaks good when we're on the air! :-)

Message-ID: <3nfgnm$5c3@vixen.cso.uiuc.edu>
Source record: 32458

Reply-To: wd8jeljim@aol.com (WD8JELjim)

I read in horror the story of WIGO here in the newsgroup. Unfortunately it is just another in a long line of such stories of the continued concentration of radio ownership-management in our larger cities.
I recently went to pick up a prize I won at a Louisville radio station. I went to the wrong office, (that one had FOUR radio station's call letters on it's door), the people there directed me to the correct station down the street. When I arrived there I was greeted by a sign on their door which had FIVE stations' call letters on it!!!! I guess that is great for efficiency of operations, but I just don't go for that kind of concentrated power.

[Moderator's Note: Get used to it, Jim. It is the wave of the future as the FCC and NAB get ready to lift ALL restrictions on broadcast ownership. I told you all this when Duopoly came in, but nobody listened then either... Bill]

You better believe she (and most others) do!

I'm don't know your background, Rich, but I can tell you that having both worked local and national, local is the heart of radio, and is the backbone of stations that carry syndicated programs. Ever WOR needs to keep a local flavor (and they do a good job at it) to keep successful.

}
} All in all, I trust machines more than I trust DJ's, and have designed our
} system around that fact.
}
} Sorry you are not impressed.

Frankly John, I *am* impressed with your technical prowess in
creating the Swedish system.

However, that having been said, I believe that it is a thought-system
like yours which is at the heart of the ruination and degradation of
the radio industry and many other industries as well. If fellows
like you had your way (and it looks as if you will in time) the only
people in radio would be the owners, the hardware/software
manufacturers (and their support people), and, maybe, the sales staff.
Although I am fairly well convinced that those in the "I trust the
machines more than the people" crowd would love to find a credible way
to eliminate even the sales staff if they could. After all, why pay a
commission if you don't have to, right? Isn't the bottom line the only
thing of importance.

What mindsets like yours fail to take into account is that there are
'people' on the other end, the receiving end, and they like listening
to other people. I know that you like to think of radio listeners as
demographics and rating points, but they are still people. Managers
that remember this fact and go the extra mile to think of the
listeners as people, tend to do better in the long haul.

Perhaps, Mr Schad, you envision that glorious day when all broadcasting is
run from a giant control center and people have only a choice between
your robot-rock and a couple of other similar unattended systems, and
therefore they WILL listen to a robot, or turn the box off completely.
Or perhaps you like the concept where the media box cannot BE turned
off at all? Imagine that, a totally captive audience for your
robot-revolution.

I hope that such a vision is never realized, although I am aware that
there are many, monied interests who would are actively perusing it,
and those people generally get what they want, mainly because the

public allows it.

} and I have never had a computer split town in the middle
} of the night, after writing a bad check on my best advertiser!

What a sad outlook you must have on humanity, Mr Schad. I am not saying that computer-aided broadcasting is bad. I am saying that the vision of a people-free system of broadcasting has implications that go way beyond the alleged 'bottom-line' rationale to a vision of Orwellian information and thought control which is frightening to me and dehumanizing to a nation.

I sincerely hope your vision fails and that people let you know that they prefer another person on the other end of their radio speaker. Although, sadly, I expect you and yours to, in time, convince the populace that the Robotized Radio is so much better than the flawed presentation of people. Look at how we are fooled in elections.. Yep, methinks you will eventually prevail.

Hey Brian ...

<<Some info on the DJ's that have been hired so far at WMRQ:

2 p.m. to 7 p.m. -- Race Bannon, formerly of WBOS Boston

7 p.m. to Midnight -- Gina Crash, formerly of WHFS in Washington

Jason Steinberg is the promotion director and is also working on-air, though I'm not sure which shift.>>

You apparently got your information about Jason from Matt Buckler's piece in the J-I. He was misinformed. Jason is the Promotion Director and does not have an air shift. I may use him in commercials but haven't done so yet.
Let me correct some other misinformation seen in the local press(Courant, J-I, and even the Advocate): P.D. John Knapp does not have an air shift, nor do I believe that he intends to. And, as you know, there is NO COMPUTER playing the music when there are no live jocks; John does use a computer program to help him track the music but on the air there are just CDs being played by HUMANS (whether they speak or not).

<<Seems to me people listen to a station for the personalities as much, if not more than the music they play. >>

Not Radio 104! People are listening for the MUSIC. If you saw the faxes and heard the comments on the listener line, that would be quite clear. There was significant sentiment expressed in those quarters against having DJs at all. I think having jocks who just say a few words about the music (and leave their life story out of it) is a nice compromise.
Besides, both Race and Gina are nice folks ... friendly, cooperative, no big egos ... which can sometimes be a nice change of pace at a radio station. <g>
Keep listening.

3244. NYC Radio Update 4/22

Newsgroup: rec.radio.broadcasting
Date: 1995-04-24 00:00:00 UTC
From: TRRadio@aol.com
Message-ID: <3nfgm9$55u@vixen.cso.uiuc.edu>
Source record: 32468

Here's some more details on the Winter book:

KISS-FM's 7.4 12+ rating is almost double what it scored in the Fall book, and it's the largest share for any station in NYC since WKTU led the ratings in the late '70's.

AM Drive:
1) WXRK (Stern) 7.7
2) WINS (News) 6.9
3) WRKS (KISS-FM) 5.7
4) WCBS-AM (News) 5.4
5) WQHT (Hot 97) 4.5
6) WOR (Gambling) 4.4
7) WHTZ (Lander) 4.3
8) WCBS-FM (Harrison) 4.1
9) WPLJ (Shannon) 3.8
10) WSKQ (Spanish) 3.6
11) WFAN (Imus) 3.5
12) WABC (Lionel) 3.3

PM Drive
1) WRKS (Kiss-FM) 7.5
2) WQHT (Hot 97) 6.0
3) WABC (Grant) 5.7
4) WCBS-FM (Bob Shannon)
& WLTW (Lite FM) 5.0
6) WHTZ (Z-100) 4.7
7) WPLJ (Allen) 4.5
8) WQCD (NAC)
& WSKQ (Spanish) 3.7
10) WINS (News) 3.1

As one of my co-workers put it, We got stomped by the 800 pound gorilla called Kiss-FM. They deserve alot of credit. WBLS, which just lost PD Quincy McCoy, fell to a 2.7 12+, which is their lowest point in years. WBLS also lost AM Driver Batt Johnson last week. Diana King joins Michel Wright in the morning slot, giving WBLS two women hosting the AM Drive show. Consultant Tony Gray is helping WBLS look for a new PD.

WINS' 30 anniversary as an all-news station drew a lot of newspaper ink this week. Feature stories in both the NY Daily News & NY Newsday. Quote of the week - WINS' Paul Smith, who's been with them since the beginning-- "The big worry (back in 1965) was that we wouldn't have enough news to fill the day. That never turned out to be a problem."

There's a familar radio voice on the Shea Stadium PA this year--Market Vet Del DeMontreaux will handle the PA chores for the Mets this season. DeMontreaux, a long time vet with WHN, WPAT & WYNY, now handles WQEW's evening shift.
Speaking of baseball, the Boys of Summer are back on the air--WFAN's Mets broadcasts will be handled by Hall Of Famer Bob Murphy in his 34th year as a Mets voice & Gary Cohen. Howie Rose handles the pre & post game. The Yankees have John Sterling and Michael kay back behind the mike in '95.

That's all from the Big Apple--

Tripp Rogers

3245. **AFTRA-What Management Doesn't Want You To Know**

Newsgroup: rec.radio.broadcasting
Date: 1995-04-24 00:00:00 UTC
From: tford1010@aol.com
Message-ID: <3nfgmb$566@vixen.cso.uiuc.edu>
Source record: 32469

Reply-To: tford1010@aol.com (Tford1010)

Hi Rob,

You Said> I'm curious to know how much you paid to get in
the union.

I joined in 1969 when the rate was a lot lower. The rate varies in each market. In DC/Balt it is now $750 I think, but we have one of the lowest initiation fees in the country for the size of the market.

You Said>I was a part-timer there and the only thing AFTRA could do for me was to
raise my $12 an hour rate to $18 an hour. I was working one shift a week.

Gee, I guess a 50% pay raise seems like a lot to me. The way the stations' contracts back here are usually written (and each one is different) the effort is to make sure that the company doesn't try to subvert the use of full-timers by the use of numerous part-timers. This is important since part-time employees aren't always covered by the health plan.

There are specific limitations placed on how much a part-time person can do, and when they cross that line they must be paid as a full-timer, even if it is for only a few days or a few weeks a year. The perosn who makes out best is the "standard fill-in person" who does most of the vacation and sick work. Their lives are abit crazy due to scheduling, but they usually make good money. Sometimes alomst as much as full timers.

The health insurance thing also varies from station to station. Some stations pay to the AFTRA H&R fund for the employees, others offer their own plan. The $7500 you spoke of usually applies to freelancers and those not covered by a station plan. At my last station I was covered by the company plan. The problem was, I would have been vested in 10 years and they terminated me after 8.5 years, so I lost any retirement benefit. The laws have been changed since then and partial vestment is now possible. At least that's what some experts have told me.

You Said>I've yet to see a real valid argument that's pro-union being posted. Any positives that have been posted can easily be torpedoed when you ask yourself "is it worth $800 to qualify for that"?. I haven't answered "yes" once.

I see the initiation fee as a one-time investment in my future. The things to think about when faced with the $800 are: The nice salary "offered" by management to incoming staff persons is usually AFTRA scale that has been hard fought over a long period of time. (In fact, if you have the determination, you could certainly bargain for more than scale). You also

usually get a lot more severence with AFTRA than without.

There are other elements that may be in each AFTRA station contract; things like vacation days, short turn around, limitations on the number of free appearances, nightime differential (10% boost for 12mid nite to 6am work) and fees for additional work that are covered.

These are things the new hire from a non-union shop seldom takes into consideration when "coming to the big city". Instead they see the bill for $800 and, not realizing that AFTRA was responsible for the nice new salary and benefits they will be getting, ask the question, " Gee, what did AFTRA ever do for me?"

Here's something else you'll never hear management talk about. As the members of an AFTRA shop get pay raises due to the contract, lower and middle management use the pay raises as a way to ask for their OWN raises.

In the freelance market, it is AFTRA scale that sets the mark for non-union performers. The higher the AFTRA scale, the more the non-union performer can ask. And, if a producer who is signatory to the AFTRA codes wishes to hire a non-union performer for an AFTRA production, the producer must may AFTRA scale. So, in the end, even the non-union performer benefits from the work that AFTRA does. Ironic, but true.

The AFTRA Freelance contracts also cover things like making sure you get paid on time and that you are paid residuals for work that is on the air for periods over 13 weeks.

In the best of cases, management and AFTRA work well together. I've heard of satisfactory contract negotiations being done in five minutes over the phone.

The worst AFTRA member is one who feels as though he/she was "forced" to join. Management usually instills that in the new hire. "Sorry kid, we really like you, but you gotta pay the union before you go on the air."

The best AFTRA member gets involved, and in doing so makes life better for themselves and for other AFTRA members.

All the words in the dictionary won't convince you. In the end, the thing about AFTRA is, either you get it or you don't.

Regards,

Ty Ford

San Diego Winter Book: [15th market]
12+ 6am-mid. Mon-Sun.

FALL 1994 WINTER 1995
KSON-FM 5.8 6.6 Country
KYXY-FM 4.5 5.4 Soft rock
KSDO-AM 5.2 5.3 Talk
XITZ-FM z-90 5.5 5.2 ex-XHTZ Urban
KKLQ-FM 4.7 4.5 CHR
KPOP-AM 2.7 4.1 70s
KGB-FM 3.8 3.9 Rock
KFSD-FM 3.3 3.8 Classical
KIFM-FM 3.1 3.8 NAC/Jazz
XETRA-FM 3.6 3.6 91X Modern
KBZT-FM 4.0 3.6 ex-KBZS Oldies
XETRA-AM 3.8 3.1 Sports
KFMB-AM 3.0 3.1 Full Service
KIOZ-FM 3.1 3.0 Rock 102
KMKX-FM 4.0 3.0 ex-KJQY 70-80's
KFMB-FM 2.7 2.5 Star
KCBQ-FM 3.1 2.5 70-80's
KCLX-FM 2.4 2.4 now-KKBH "Beach" 70s
KOGO-AM 1.4 2.4 Talk
XHRM-FM 3.0 2.3 "Flash" Mod. Rock
KNX-AM 1.1 2.2 LA news
KFI-AM 2.7 2.1 LA Talk
XHKY-FM 1.9 2.0 espanol
KOWF-FM 1.3 1.3 Country
KURS-AM 1.0 1.1 Spanish
KCEO-AM 1.0 1.1 Talk
XLTN-FM 1.5 1.0 Latin Fav.
KSPA-AM 1.4 1.0 Adult
XEMO-AM 0.8 0.9 Espanol talk
KPRZ-AM 0.5 0.8 Christain
KCBQ-AM 0.9 0.7 Oldies
KKOS-FM 0.4 0.6 AAA
KKBT-FM 0.0 0.4 LA Urban
XEPRS-AM 0.5 0.4 espanol
KSON-AM 0.5 0.3 Country AM

Shares:
Par Broadcasting: 9.9 [KKLQ, KOGO, KIOZ]
Nobel: 6.7 [XETRA-AM, XETRA-FM]
KFMB: 5.6 [KFMB-AM, KFMB-FM]
KGB/KPOP: 8.0

Coming on stronger: North County's KKOS: at 95.9 and 3.8kw, the station is slated to move to 95.7 and could up ERP to 25kw. This could happen by summer if the FCC/Mexico counterpart work the agreement out.

Slipping away: KFI's showing in the San Diego metro. Part of this could be the attention to the trial in LA that is carried by KOGO/KNX. Both those stations have improved in the books.

New show to KKBT, Los Angeles. This could be fall off because of XHTZ's lackluster ratings of Urban Contemp. radio.

Gaining ground: Last year KFMB looked like it was heading to the cellar with it's AM/FM combo. Now, the broadcast group has turned around with quality local, live talkshows, and is on the re-bound. The morning show of Hudson & Baurer's troubles seem to be over too.

Note new call letters of several stations.

Thanks to all who contributed to this effort!

Cosell was a terrific sportscaster.......you had to appreciate his honesty even if you found his style abrasive (which I did not).

BTW: It was a Dolphins/Patriots game during which Cosell broke the news of Lennon's death. He had the nerve to say that it put the game in perspective; i.e., not that important in the whole scheme of things. Pretty gutsy thing to say to the MNF crowd.

Hi Doc...
I saw in Bruce Morrow's bio, that he was holding down evenings at WINS after the payola scandal wiped Freed out, but Murray the K shoved him aside in turn (he says because of internal station politics, NOT ratings). He chilled out for a year in Miami, then came back to New York when WABC gave him the evening time slot he'd held on WINS. To read what he has to say, you'd get the impression it was no contest when the two men finally went head to head.
Not having been there at the time, I can't vouch for the objectivity or impartiality of Morrow's account. Of course, Morrow DID survive and thrive in the daypart for a decade and a half, while Murray the K was swept away 30 years ago in WINS' change to all news and had to re-invent himself as a pioneer AOR jock. If they'd been winning the CHR competition at the time, I suppose WINS would have been giving us all the hits for a lot longer instead of giving us the world every 22 minutes...

Some of these alumni landed in Washington DC.

Johnny Holiday after stints at WWDC AM, late '60s to mid '70s, and WMAL
where he did sports and sports talk, is now sports director at WWRC and
the voice of University of MD football and basketball.

Also the late Murray the K was heard for a time in the '70s at WWDC AM and
later at WHFS.

Hey Bill;

If radio stations can automate their sales in the future, they maybe we should develope a software package for potential advertisers to run on their PC's. We'd automate the advertisers' process in selecting a radio station to buy advertising time on. It would make the decision based on answers to Yes/No questions. Hell, we could even put it out as a 900 number service and make a fortune.

The PC and Mac versions would require a modem so you could connect to the database. It would have all the latest statistics on every radio station in the country, including the latest "books", demographics, formats, FCC license specifications for particular market geography, etc.

Questions would, of course, deal with target audience the client would want to reach and selecting sales approaches to get that audience. The computer would be so sophisticated that it could even come up with a promotion for a slam dancing club to an audience of fire and brimstone preachers.

However, there is more than the statistical approach. There are certain special circumstances that will always come up, and it is how that service is supported by the radio station that will determine an advertiser's satisfaction with the station. The special situation questions would be the final criteria and would include things like:

"Are there live announcers to read your copy?"

"Are there any announcers to write and record humorous copy for you?"

"Are there any announcers to do live, up to date tags?"

"If your store were to burn down or get flodded out,
a) Is there someone at the station who, by prearangement, could automatically stop your advertising the second a confirmed news report reached them?

b) Could you call the announcer at the station and with a prearranged verbal varification have your advertising stopped?

c) Would you have to call/page your sales rep to get it suspended, and then wait 4 hours until he can program it into the computer?

d) While lying all bandaged up in the hospital with 3rd degree burns on your hands, would you have to call an 800 number in Florida to try to have your advertising stopped?

e) Would you be pissed if told you had to get your cancellation in 48 hours in advance so they could get the programmer in to make the change? You should have known your partner would try to burn the business down for the insurance money and made the change then."

"It's Thursday and you have finally confirmed that a famous celeb will make a personal appearance at your establisment this Saturday. Would you be upset if you were told you had to ask for a tag to be read after your ad 48 hours in advance so they could get the programmer in to make the change?"

"Would you be even more upset if when you told them Saturday is 48 hours away they replied Friday, Saturday and Sunday were all the same?"

"The celebrity was supposed to be in NEXT Saturday, but he had to push it up to this week and you already had the station record a special ad with next weeks date. If, when you called that station they said they would run new ad a week early, but it still went on the air with the wrong date, would you be at least slightly annoyed?"

"The station is completely automated and has given you a telephone number and secret PIN number so you could change to alternate advertising or stop your commercials with a touch tone phone. Do you think you would bust a gut if all of a sudden someone hacked the computer and put your compeditors commercials on in your time slots, and you still had to pay the bill?"

"Do you think you would be sore if you found out the hacker was your 11 year old son who did the mischief because you wouldn't raise his allowance?"

"Would you want to commit suicide if you found out your 11 year old hacked the radio station's computer AFTER you started suing your

competitor, and now he was counter suing you for slander and seeking
10x your assets in damages?"

"Do you think you would be surprised if the full page ad you bought in
the High School's fund raiser program book was mentioned two weeks in
advance on the school's 50 watt NCE station during the polka show and
the next day 20 people came by to thank you for supporting the
school?"

"Would you be more surprised if 5 of them bought something from you,
and you're a Rolls-Royce dealership?"

3262. Australian Night Jock needed for phoner

Newsgroup: rec.radio.broadcasting
Date: 1995-04-24 00:00:00 UTC
From: TSJX72A@prodigy.com
Message-ID: <3nh1oe$o4b@vixen.cso.uiuc.edu>
Source record: 32486

I'd like to do a phoner with a DJ from Australia during the week of 4-24-95.
This is for my morning show..so, with the time difference, I'm thinking someone working the 7-midnight shift. A female would be best, but hey.. whatever.

If you're interested..please contact me at either:

TSJX72A@Prodigy.com or
Baxter@Busstop.com

on the internet.

Thanks!

Since the Empire State Building was the highest structure within the NYC Metro area until the 70's when the World Trade Center was constructed, I believe the Empire was the only logical choice as the best transmitter location. I suppose every corporation which owned an FM license in the metro NY area that could technically put it's tranmitter on the Empire and could afford to, did.

The FM station's city of license is basically irrelavent (technically speaking) other than the FCC distance requirement from the center of city coordinants to the actual transmitter location which is 8 to 10 miles for Class A's (3 or 6 kw at 328 ft or equiv.) and about 15 miles for Class B's (50 kw at 500 ft or equiv.).

Most of the NYC FM's have been on the air since the beginning of FM broadcasting. Hence the FCC rules have changed AROUND them. If you try to enforce say, the current FCC distance requirements many of NY's suburban Class A's (WDRE, WRTN, WFAS, WRGX and so on) would not be allowed to broadcast, since according to the FCC they cause harmful interference. But because they were authorized prior to the new rules (which I think changed in the early 1960's) they are "grandfathered", and allowed to operate. If these stations did not exsist today and you wanted to apply to operate on their frequencies with their current power levels the FCC would never grant you a license!

Short-spacing is indeed the reason for most NYC FM's not moving to WTC when its FM master antenna went on-line. I worked for WYNY until about two years ago, and WPAT back in the mid-eighties, so I've spent alot of time up in the antenna combiner room. The combiner, as originally conceived, was planned for many of the stations on Empire to make the switch to WTC; you can still see the input ports labeled "WCBS-FM", "WNBC-FM", and so on. But when the short-spacing problems came to light, many of the moves were cancelled.

Indeed, with the WQCD move back to Empire the only remaining commercial FM's on Empire are WYNY and WPAT. Previously, WPAT's transmitter had been on the Chrysler building. Until about three years ago WYNY actually operated from its own antenna on the south WTC tower just above the observation deck. We used a directional antenna at the time to protect two adjacent FMs in New Jersey - WPRB in Princeton and WNNJ in Newton. By an agreement between the three stations a few years back, WYNY was enabled to switch to the WTC master antenna and operate non-directionally as a full class B, while the other two raised power - so everybody made out on the deal.

I believe that WQCD still maintains an auxiliary transmitter site on WTC for emergencies. Also non-commercial stations WNYC and WKCR transmit from WTC.

IA>Except that I believe WPAT and WYNY are not actually licensed to NYC.
IA>WPAT, I think, is licensed to Patterson, NJ, and WYNY is licensed to Lake
IA>Success, NY.

That's sort of splitting hairs. Lake Success is the Long Island end of Queens and Patterson is just across the river. If WPAT were the same distance from Midtown, on the other side, it'd be in Brooklyn.

IA>Could it be that the reason NYC-licensed FM stations are still on the
IA>Empire State Building is because of the short-spacing problems that would
IA>be caused if they moved? Would that also explain why the stations up
IA>there now are, in fact, licensed to other cities?

No. The World Trade Center isn't the best antenna site. I was PD at WQCD (formerly WPIX-FM) and our midtown signal stank from the WTC. Now that they've moved back to Empire, it's great.

WHTZ (Z-100) is licensed to Newark. Always has been. It's the only station up there that's not licensed to New York, I believe. The spacing is determined by the antenna location, not the city of license.

Rich

They are on the World Trade Center. They were the first FM there, (right before becomming WAPP), but they were on their own mast on the south tower until only a few years ago when they migrated to the main antenna structure on the north tower.

> There was a discussion about this on one of the Commercial services, but
> nobody new the answer. I remember 103.5 FM as WAPP and WTFM. Was it
> ever WGLI-FM and licensed to Babylon, LI which is further from NYC?

No, it went on the air at 9AM on the first Saturday in June of 1963 as WTFM, the first full time FM-Stereo station in NYC. The entire complex was in Queens on the LIE/Horace Harding Expwy service road less than a half mile inside the city limit, the other side of which is Lake Success. Even though the transmitter was in the same building, it was remoted from the now deleted WGLI. Why? I have no idea except that a part owner of WGLI/WTFM was Will Reuman, who still owned WWRL/WRFM, a NYC licensed station, at the time.

> What puzzles me is that Jersey City, NJ and Yonkers, NY with populations
> of about 200,000 do not have radio stations licensed there while
> much smaller suburban towns do.

Early stations that were assigned to those cities moved to other locations, taking their frequency assignments with them. For example, what is WFAS in White Plains started, (with a different call), in Yonkers.

Notorious pirate, Alan Weiner, requested the assignment of 103.1 Mhz to Yonkers for a 3500 watt station. Although the FCC approved the idea, there was no way they were going to let him get the channel. They instead assigned a translater that the CE of WNEW wanted for Bergan Co. NJ. He only had to make sure the repeater would also serve Yonkers. That was accomplished by putting it on a tall building in Ft.Lee, NJ near the G.W. bridge and letting water conductivity and the back of the antenna hit the town. It does it quite well. That translater license has recently been changed to a Class D station license and is now known as Juke Box Radio.

I believe WAAT was originally assigned to Jersey City. They moved to Newark and eventually the station became WNTA, which operated from studios in NYC. When Republic Pictures/NTA decided to get out of Broadcasting, it became

WJRZ and moved lock, stock and barrel, to Hackensak. It is now WWDJ.

WOR is still technically assigned to Newark, but legally permitted to operate from NYC, so it need only ID as NY.

WKDM, the NYC, pay-as-you-go, AM station was originally WBNX and got it's start as a 100 watter for the BroNX. WWRL was originally licensed to Long Island City with 250 watts, as was W2XR, now WQEW. The station occupying 1330, WRVA, although piggy backing off WPAT in Paterson, NJ, is on a channel originally assigned to Brooklyn, the original WBBR. These stations, as you can see, were originally local stations for the counties they were located in. Since the counties make up NYC, the upgrade in power and citywide status they got in conjuction with NARBA in the 1940's, allowed them to give their COL as NYC.

Alan wrote:
....Back when the World Trade Center first went up, I recall reading an article about NYC television stations suffering reception problems. The suggested solution was to move the transmitters from the Empire State Building to the World Trade Center. But one little problem got in the way -- this was said to encroach upon the protection area afforded other stations nearby. In particular, the article said that some of the stations would be short-spacing Baltimore if they moved to the WTC.

Could it be that the reason NYC-licensed FM stations are still on the Empire State Building is because of the short-spacing problems that would be caused if they moved? Would that also explain why the stations up there now are, in fact, licensed to other cities?...

There are only 3 or 4 radio stations at the WTC. The problem you described affected TV stations more than radio. One interesting note--WCBS-TV Channel 2 moved their main x-mitter to the WTC and was planning to move their backup from the Empire State Bldg. early in 1993. Then, the WTC bombing occurred and management rethought the plan, since having the backup at Empire saved their butts.

WPAT's x-mitter is at their studios in Paterson. Where your x-mitter and antenna doesn't matter in reference to your city of license, as long as it's within the main signal strength of the station or a certain distance, I think.

Actually, I'm *for* the 2-punch deal...because, at one other station around
here, you can TELL they have it all on one cart -- because the jocks tend
to get cut off/drowned out by the 'whoosh' near the end...and it sounds just
as bad, if not worse. My whole view is that they should save the selling/
bragging about some live remote for a segue somewhere else in the hour...
and just do the, ummm, *WEATHER* when it says "Philly Forecaaaast!!!" or
"Philadelphiaaaa Weatherrrrrrrrr!!!!!!!" or "W-S-T-W Weatherrrr!!!!!!", just
to name a few I've heard. Or, they could just do the weather at the end
of the music set and can the whole "wild cart-chase".

Unfortunately, those "local" suburban stations are dying fast! When
I moved to the Dallas-Ft. Worth area 11 years ago, we were surrounded
by suburban and nearby rural stations, which were then serving their
local areas--most of them have been moved into the larger nearby market.
For example:
910 AM was KIKM, a Sherman-Denison Top 40 station when I moved to
Dallas; now it's a Spanish language outlet serving DFW
1600 AM was KTNS, a news-talk station licensed to Plano; now its a
Spanish language outlet serving DFW. This was one of two stations
serving Collin County, which is rapidly approaching a population]
of 300,000.
94.5 FM was KDNT, a country station ("Lucky 94.5") licensed to
Gainesville, and serving several communities in North Texas. Now
it's "The Edge", serving DFW.
95.3 FM was KWPL, an AC outlet licensed to McKinney, and serving
Collin County; it was converted to Spanish in an attempt to serve
the Dallas market. Since we'd already lost KTNS (above), that
left those of us in Collin County without any local service for
about five years (we now have a "local" station carrying SMN's
Real Country format, which is licensed to Howe, in Grayson County,
but primarily serves Collin County).
107.9 FM was KAND, an AC station that was the sole FM serving Corsi-
cana; now it's part of the "KICK-FM" Tejano multi-cast (3 FM and
1 AM) serving Dallas.
This is by no means a complete list, but you get the general idea--local
service to outlying areas is dying fast! Even when those areas could
be lucrative (Collin County is rapidly growing and has a very high
median income), serving the major metro is still more lucrative.
Realistically, I don't really know that anything can be done about
this--anyone who gets their hands on a station is naturally going to
try to maximize their value, and I'm sure I'd be no different.
I assume this trend is going on nationally, not just in Dallas. It
might be interesting to hear other folk's experience with this.

> Really excellent point! Product certainly determines purchase.

Nah, not really. I'm sure there's more new music available than anyone actually programming avails him/herself to. Much of it would be found locally if the programmers or jocks would/could let it be known they'd play new local cuts. Fact of the matter is, though, that this only happens in a handful of markets, with all the rest of the country watching the numbers to see what gets kicked up to the top of the list. Problem is, the quality and uniqueness of the music has nothing to do with it getting a market push. So come on, airplay moguls, if you can decide to play something new and different, I just dare you to ask for it locally. Be careful, you might just get what you want.

(Point of view expressed above comes from a composer who gets local sales, but for the life of him, cannot get local airplay)

Greetings.

IJ>I am amused that the LEAST creative people in radio--the managers--
IJ>think they ARE creative enough to set stringent controls over
IJ>output. But, it's been this way for 'a hundred years' and will
IJ>not change much. Radio management has always laughed at the air staff
IJ>behind their backs, and considers the board people as just
IJ>those who get the commercials on, start music 'events,' read promos,
IJ>etc. Radio to them is not about creativity, but about numbers and
IJ>dollars. Nothing is going to change this.

John,
I've run into some spectacularly creative managers. I've also run
into far more spectacularly un-creative air talents. Just because
someone can babble in front of a mic doesn't make them "creative."

Here we go with absolutes, again. I know very few management staffs
that "always laughed" at air talent. I don't. My station's owner
doesn't. In fact, we pay them astronomical sums of money and give them
tremendous freedom over their product. Of course, we hire incredibly
talented people who perform. Perhaps that's the difference.

IR>> Rob makes a great point about "gut" where programmers are concerned. It's
IR>> too bad that the last time programmers were allowed to use their gut
IR>> feelings was in the 60's, when great innovators like Bill Drake and Gordon
IR>> McClendon shaped the future of the business for the last 25 years or so.
IR>> Many of their innovations are what we refer to as "basics" today.

IR>Thanks!

Rob,

Don't thank him so soon. Actually, these guys probably invented radio consulting and research. Don't forget that Drake's stations all sounded alike. They all sounded great, but alike. Nostalgia is a wonderful thing, but it's not often accurate.

Both Bill and Gordon paid very close attention to what research they could get. What set them apart was their gut that told them how to implement the research they received.

IR>Well there you go Charlie, breaking another radio golden rule. Any
IR>Consultant will tell you that it doesn't matter what your listeners
IR>think. You should program your station by what 20 partisans have
IR>said in a focus group in any other market but your own.

IR>Seriously, stay with your gut and stay away from the cookie-cutter and
IR>those phenomanal ratings will continue.

What consultants are you dealing with?????? I've dealt with many. Not one has ever even muttered such a thing. I've consulted a number of stations and never said such a thing. If you ever hear such a thing from a consultant you should fire his butt in the next breath.

Rich

3274. The same dull music...

Newsgroup: rec.radio.broadcasting

I've read the number of responses to this general topic and thought I'd weigh in with my $.02---

I've been around for 18 years in this game of radio, and one thing has stayed the same--give the people good radio entertainment and they will listen. Whatever format of music, talk, news, etc. - Good radio sells and gets listeners. I agree with the premise too many radio programmers are too research oriented--R & R, Billboard and others are meant to be used as tools, not bibles to program music.
When I was MD and PD of an A/C radio station in the mid-80's, I listened to every single which came into the station and actually made choices based on my gut. I realy don't think that's being done anymore on a widescale basis.

The real reason-- The Radio Industry and Record Industry have become big business. It's the bottom line that matters, not the little guy--the listeners. If you want to see how much radio has changed, pull out the CBS-TV tape of '48 Hours' from a couple years ago when they looked at radio. That tells what goes on.

Thanks for letting me stand on the soapbox--

If you are really interested in broadcast radio in your own area, you might wish to get involved in the AIRWAVES "RadioWatcher" project.

We are currently asking for individuals who are either active in the industry, or are very much involved in the happenings around their town/city/community and would like to become recognized as a "RadioWatcher" for AIRWAVES.

As a RadioWatcher, you will be responsible for reporting the goings-on in your locale, and will be, in effect, a staff reporter for AIRWAVES. While anyone can write an article for the Journal, RadioWatchers will be considered the de-facto correspondent in a given city.

As a RadioWatcher, you will be asked to keep an eye and ear out for news and schmooze about the broadcasting scene in your market. You are asked to submit at least one report per month (more if you choose) and will be kept on file here at AIRWAVES as an official member of the press (for whatever good that might be).

The purpose of this program is to create a base of volunteer staff reporters who's job it will be to keep a steady flow of good information about various markets coming in to AIRWAVES. It does not mean that the pages of AIRWAVES are closed to any of the other posters in net-land. It is just a way to assure that the readers will have something good to read, when the more casual posters are not available.

Q: What do I need to do?

A: RadioWatchers are basically the same thing as reporters. To remain on the RadioWatcher program, you are expected to be involved with

radio in your market, either by profession, or by a strong personal interest. You will be asked to report on any interesting goings-on in and around your market. Such as format changes, station sales, interesting trends, market ratings, and whatever else seems appropriate. The depths to which you dig for information is up to you.

It is important, though, that you are a true fan of radio, and not merely a fan of one sort of format. Your reports can have personal commentary, but should be based on actual facts (as you know them) rather than how those facts match up with your personal opinions.

In general, we need good, solid reporters who will do the job based upon their love of radio, and desire for more exposure. AIRWAVES is not a profit making entity, and so salaries cannot be offered. If you are a budding journalism student, or a seasoned pro, this may be a chance for you to show your stuff to the world. Airwaves is read across the globe via the Internet, and is available to subscribers of CompuServe, GEnie, AOL and on a host of BBS systems, via email. Your input will not go unnoticed.

At least one of our more prolific reporters tells me that he receives much email in praise of his posts and has made many interesting contacts as a RadioWatcher. We have also been told that our RadioWatchers have broken stories long before the trades get a hold of them. Not bad for a bunch of voluneers, huh?

So if you are interested, drop me a line and tell me about yourself. I will be in touch by return mail. Those of you who expressed an interest in the past, are encouraged to get back in touch. Those of you who are already RadioWatchers, thank you and keep up the great work. As AIRWAVES expands, your contribution will be even more important.

Check out our ever-expanding web page - http://radio.aiss.uiuc.edu/`rrb/

The AIRWAVES Radio Journal (Formerly published as the Internet Radio Journal) is a periodic email digest dedicated to discussions of broadcast radio, from a professional and quazi-professional perspective. Subscriptions to Airwaves are free, and available via electronic mail (email). Subscription information follows later in this document.

In addition, all articles in AIRWAVES are ported to and from the Usenet newsgroup rec.radio.broadcasting (r.r.b) which was founded in April of 1992, as a means to further discussion of topics pertaining to 'domestic broadcast radio'.

By domestic, we mean broadcasts which are intended, primarily,for reception in the same country/nation in which they originate. AIRWAVES and rrb, are international in scope, and the term 'domestic' should not be taken to imply 'USA' or even North American. Readers in other nations are encouraged to participate.

```

```

Appropriate topics include (but are not limited to)..

) Formats and programming.
) Engineering & technical matters and interests.

) Community broadcasting.
) Pirate broadcasting (especially non-shortwave, domestic pirates).
) Legislation affecting the industry, and its 'offspring' industries.
) Technologies affecting the industry, and its 'offspring' industries.
) General station information. Who is going on and off the air, and why.
) Radio's historical and cultural significance.
) DXing (long distance reception) on the standard broadcast bands.
) Radio's current and future trends.
) Political and news coverage and its impact.
) Job openings and help to those seeking work in the industry.
) Information on equipment and techniques involved in transmission and reception of broadcast radio signals.
) The International Scene and how broadcast radio is shaping up in the various nations of the world.

****

One of the main goals of AIRWAVES/rec.radio.broadcasting is to act as a bridge between the radio broadcast professional, the listener, and those who are up-and-coming broadcast Professionals. Groups who often lack any real insight into each other's "world".

1) The radio professional. S)he lives *inside* the walls of radio. While dependent upon the listener (or more accurately the overall number of listeners) the Broadcast Professional (BP) is somewhat separated from the end user by virtue of his/her "point-to-multipoint" position. AIRWAVES offers the BP a glimpse into the real-world of the listener, un-filtered by consultants, ratings, trend-reports, trade pubs et-al. Sometimes that world is a little rougher than the broadcaster is used to, but that is the reality of 'the real world' sometimes. We do try to maintain a civilized environment, though, and filter out the most offensive brainless or off-topic posts (more on this below).

2) The radio listener. The listener is also in a similar (albeit inverse) position. The listener has relatively little actual input into radio programming. They often have only a vague idea of what makes a radio station tick. By communicating directly with broadcast professionals (and para-professionals) the listener gains some insight and understanding into the world of the broadcast professional.

3) The 'wannabe' broadcaster. AIRWAVES/r.r.b gives those with a strong interest (but little or no experience) in the industry the chance to interact with, those who have made it in the business. We also post resumes and 'help/positions wanted' ads for interested parties.

AIRWAVES/r.r.b is loosely moderated, as alluded to above.

Our philosophy of moderation is to 'err on the side of permissiveness'. We do not believe in censorship and never kill a post because We don't believe in the poster's opinions. We take great pains not to unduly

restrict dialogue or the poster's right to express him/herself, while
at the same time attempting to provide a professional-level
environment free of unnecessary noise (a daunting task).

Matters that may cause an article to be rejected, include...

* Articles which are not on (or reasonably near) the group's charter.

* Articles that are too long for submission as-is. We have a soft
limit of 8000 bytes (*kbytes) and a fairly hard llimit of 10,000 bytes
(10kbytes per article for the Digest. We will post longer files in
the newsgroup, but all sites may not carry longer items.

* Articles which are merely multiple repetitions of an identical answer which
has already been offered several times.

* Articles which contain 'miles' of quoted and multiple quoted text followed
by a few lines or less of original text. Please edit quoted text to a
minimum and try to adhere to the *50% rule*, that is 51 (or more)
percent of original text to 49 (or less) of quoted text.

* Articles that solicit for funds or contain blatant commercial content.

* Articles which are unwarrantedly offensive, abusive or contentious for the
sake of contention. Personal attacks and ridicule are considered such.
Discussion, even argument, of issues and opinions are welcomed and
encouraged. However personal attacks on individuals (no matter how
justified you might feel they are) are not part of our charter.

* * * * * * *

```
_ _ _____ ____ _

AIRWAVES has a program called RadioWatchers, which is open to any
readers who are interested. Basically RadioWatchers are volunteer
staff reporters who write about the goings-on in their market or area.

RadioWatchers are expected to maintain at least one posting per month,
more as news warrants. For a complete file on the RadioWatcher
program, send email to radiowatcher@airwaves.com and tell us
about yourself.

```

Archives of past Airwaves Radio Journals are kept for retrieval via
FTP, Gopher or via the Worlkd Wide Web. Below are the paths for
these archives.

FTP - radio.aiss.uiuc.edu /misc/rec.radio.b-cast/
Gopher - radio.aiss.uiuc.edu 7070
W.W.W - http://radio.aiss.uiuc.edu/~rrb/

AIRWAVES JOURNALS (and the previous incarnation as Internet Radio
Journals) are stored in sub directories, each with their own index file.
Our archive site also contains files from a couple of our
other lists, as well as some interesting information not published
in AIRWAVES/r.r.b. Most files are compressed, so if you are using
FTP, use the binary mode to transfer.

Our Web Site has many other radio/media and general links in addition
to the archives for AIRWAVES publications. Do check it out. Let
us know if you have any other interesting links for us.

We hope you enjoy the group. Remember, it is only as good as it's
contributors. So don't be shy :-). If you have a question, or answer,
even if you are not sure, post - post - post.

We are open to suggestions on how to improve this group.
Send them via e-mail to wdp@airwaves.com

Thanks to all who have, and continue to, participate.
We now return you to your regularly scheduled newsgroup :-).

-o-o-o-o-o-o-o-o-o-o-o-o-o-

OTR (OLD-TIME-RADIO) Newsletter Created

OTR, the electronic newsletter for folks who enjoy the hobby of collecting and listening to nostalgic radio programs is now online and accepting new subscriptions.

-o-o-o-o-o-o-o-o-o-o-o-o-o-

Some of the covered topics include (but are not limited to):

Lists of radio stations broadcasting OTR.
Lists and critiques of OTR tape vendors.
Contents of personal libraries / collections.
Offers to privately exchange recordings.
Critiques of individual or serialized programs.
Discussions about radio dramas / mysteries / adventures.
Hints on re-recording and preserving audio quality.

-o-o-o-o-o-o-o-o-o-o-o-o-o-

If you fondly reminisce about some of the programs you heard during the "golden age of radio", would like to learn more about programming on the "TV without a tube" that fascinated your parents, or would like to contribute your topical expertise, send in your subscription request now.

Are you interested in the "Modern Day" radio dramas and how they compare and contrast to the 'Golden Age" of radio? If so, then OTR is for you.

Subscribers will receive daily mailings of contributed articles in a digest format. OTR is a very ac tive and friendly place where the coffee is always hot and the information plentiful

-o-o-o-o-o-o-o-o-o-o-o-o-o-

To subscribe, send an email message in the following format:

To: otr-request@airwaves.com
Subject: SUBSCRIBE

<The body of the note is ignored by the server>

You will receive a 'welcome' message with even more information.

OTR is brought to you courtesy of Airwaves Media (wdp@airwaves.com)
and Lou Genco (lgenco@crl.com), who actually remembers some of the
original programs |-).

We have archives of past issues, available via the following means...

FTP SERVER - radio.aiss.uiuc.edu /misc/rec.radio.b-cast/OTR
GOPHER - gopher://radio.aiss.uiuc.edu:7070 <select OTR>
World Wide Web - http://radio.aiss.uiuc.edu/~rrb/history.html

3279. Some NYC antenna history (was: Re: CD 101 - NYC)

Newsgroup: rec.radio.broadcasting

> there now are, in fact, licensed to other cities?

It has nothing to do with that. It was all politics. The Port Authority
of NY/NJ, who built the World Trade Center, has absolutely no intention of
putting a transmitter tower on either of the tower buildings. They were
being pressured by the broadcasters, both directly, and via a lobbying
effort instituted by the broadcasters on the public. The FCC even got
involved and there was even a threat of a legal suit that would have
forced the P.A. to tear down the top 30 floors of both buildings.

The settlement was that the Port Authority put the antenna structure up,
paid for the move of ONLY the TV stations, and paid up the leases of the
stations at the Empire State Building. If a station wanted to move there
FM outlet, they would have to pay for it themselves and they would not be
let on the antenna structure, (it is not a conventional lattice tower but a
series of stacked steel renforced concrete cylanders).

To backtrack a bit, the original tower on the Empire State Building was
build by RCA and licensed to WNBT in the 1930's. It was built on top of
the dirigible mooring. When the TV assignments were finally setteled in
1946, WNBT allowed all the other TV stations to rent space there for their
antennas, EXCEPT WCBS-TV did not move on to the tower. I do not think this
was due to the politics of Mssrs. Sarnoff and Paley, but for the fact that
the antenna type for the channel 2 wavelength was too big to to fit on it.
WCBS-TV mounted their antenna below the tower on the sides of the sloping
part of the building. The design was unique in that it was a series of 4
bays of dipoles facing in each compass direction.

During this time, the only FM station on the tower was WRCA-FM. All the
others were either on the "slope" or on other buildings. Contrary to
popular belief, they were not on the Chrysler Building. CBS had used

Chrysler to do TV tests and the stainless steel facade of the building caused an untold number of pattern and VSWR problems. A number of the stations wereon the Channin Building, diagonally across the 42nd St. & Lexington Ave. intercection from Chrysler.

Sometime in 1964 or 65, a new tower was built over the old tower on Empire. As they moved up higher with the construction, each station they would have to dismantle would move to a temporary antenna on the observation deck. When it was all over, all TV stations were on the tower, including the 2 new UHF stations. Where the old WCBS-TV antenna was, a cirular grid antenna was built around the building. It was diplex fed as a common dual polarity wideband FM transmitting antenna by all the FM stations that had been transmitting previously from the building and from Channin. The construction of the Pan Am Building on 42nd St. had adversly effect the NW patterns of the Channin stations, just a few blocks away, so they were forced to move.

When the TV stations moved to WTC, this left a lot of room on Empire so the grid was scheduled for upgrading as an incentive. Each station would also get a spot on the tower for a backup antenna, (there had been failures of the grid in the past, and stations had to reduce power or stay off until it was fixed). Add the fact that someone in the real estate department at CBS had made a mistake and renewed the lease, CBS decided it should keep the FM and a backup TV transmitter there to justify the cost. (A decidely good move the day of the WTC bombing. They also have an easier time doing maintenance on the WTC facility, they don't have to go off the air.) WNBC-FM also had to stay, the FCC was draging their feet with reassiging a broadcast tower to a nonbroadcast entity, the building owners.

The only FM station to move from Empire to WTC was WPIX-FM, (now WQCD). However, there have been a number of problems operating from WTC, including power failures and the bombing. Since WPIX (TV) does maintain an intercity relay and a TV translater on Empire, they decided to move back there to be on an even keel with the other FM stations.

BTW, NCE station WKCR also migrated to WTC, but from the original DuMont tower on 53rd St. They were never on Empire.

How often does a forecast like that happen? It could also be an
opportunity to be "local" in some way.

> Why make someone say more if they don't need to or truly don't

i.e. McDonalds is hiring.

I guess it really comes down to production value on a station. One
point I made (and everyone forgot) is that I've never heard a clean
2nd punch. The jingle out never comes at a natural escape point in
the music, or it's totally off beat. It's funny because nobody seems
to put poorly edited or off beat jingles on their stations. So, why
should the weather jingle be different? Believe me, the jingle out
is glaring! For some programmers, that's okay. For me, it's gotta
be smooth.

Also and again, 2 punches are a crutch and another chance to be lazy.

If the FCC continues to loosen its requirements regarding news & community interest programming, then the "city of license" will indeed become an anachronism. It would be too bad, really, as I believe the Commission showed some (rare) forethought by reserving some frequencies for suburban city locations, thereby attempting to keep some radio "local", even in large markets.

I always thought that if a consultant, who only steps foot in your market 10-20 days out of the year, can tell you what is best for your radio station and audience, then YOU are not doing YOUR job. If you are an air-talent, supposedly communicating one-on-one with your audience, that is why you are bringing home a check each week.

Bobby

In a recent posting, John O'Donnell writes:

>Radio management has always laughed at the air staff behind their
>backs, and considers the board people as just thos who get the
>commercials on, start music "events", read promos, etc. Radio to them
>is not about creativity, but about numbers and dollars. Nothing is going
>to change this.

John,

I have been in similar situations before. Not every GM at every radio station runs his operation successfully, and to me, you're describing the GM at such an operation.

In his defense, being a "suit" is a big step. Thousands, even millions of dollars are on the line, and sometimes an owner makes a mistake in hiring a GM. I can't judge the case without more details about your operation, (and I wouldn't until I heard both sides) but maybe the wrong guy with the wrong attitude about what really makes this business happen..... (PEOPLE+good programming+realistic rates+marketing+creativity+a dash of whatever it is that makes your market tick= successful radio) is occupying the office. You can't make that judgement and you can't realistically do anything to make a change in THAT circumstance (see below)

In your defense, it sounds to me from your description of your music as "music events", that you might be at a satellite, or live-assist operation, maybe a start-up or part of a duopoly. Don't put me on my soapbox about other-than-locally oriented programming. I'd get booted for going on too long about why it eventually will not work against locally programmed, community oriented stations. It also sounds to me like you feel terribly unappreciated. Something can change this, and it's you. If you have the talent and dedication, you can change it by moving on to a better operation. Don't feel bad. We all put ourselves in less-than-ideal circumstances. And with enough motivation, we can get ourselves out of them.

GM's and Program Directors are NEVER going to agree on everything. If we did, one of us would be totally unnecessary. PD's and air talents are the same way.

I wish you much luck as you continue your career.

Charlie Ross

[deletion]

At the risk of being called a "whimp" in a public forum, I actually prefer having a list or at least a card-system that narrows down my options for what I'm supposed to be playing- having a computer in the studio running Selector is a good idea, too. That kind of structure in the music I'm playing allows me to go, "OK. I'm playing this next. There. Cued up. Done." Then, I can concentrate on my breaks more and focus on delivering maximum content/personality using the minimum amount of verbage.
The best breaks happen when you're prepared.

I've been in town almost a month...lot's of rock radio...not much soul on the radio... My job @ KZON is much the same as it was when I first started working @ KFOG creating awesome production bit for the radio. Although this is going to be my main job, around here expect the Idiot show to return! Time to put the hammer down!

For AM, it's hard to beat the SuperRadio III from General Electric, especially for the price: less than $50, at drug and department stores. And the SR3 is outstanding on FM, too.

You can also get SuperRadios that have been souped up (to receive SCA services, among other improvements) from
Bruce Elving
FM Atlas Publishing
Box 336
Esko, MN 55733-0036

Bruce publishes FM Atlas, a lovingly complete and very handy guide to all the country's FM stations, and FMedia, a newsletter for FM devotees. He's a good man who can also give you good advice, at least on the FM side.

For FM, the best bet is to get a directional FM antenna and put it up on your roof. Go to a good electronics supply store or TV store for that. Think of a good antenna as good fishing tackle, and the area above your house as the stream. The difference is amazing. With a very selective tuner, you'll get DC stations quite well, if your house isn't in a hole. Back in the 70's I used to listen to Richmond stations all the time (even DC stations!) with an old KLH tuner at my house in Chapel Hill, North Carolina. But the secret was my Finco FM-5 outdoor antenna. On some channels, I could receive, reliably, four different stations, each on the same channel, when rotating the antenna in each of their directions. Some were over 200 air miles away.

For receivers, I like the recent model Sonys, because they seem to have good immunity from overload by local stations (check Consumer Reports for details). But frankly, a lot of the older tuners and receivers with manual tuning did very well, or better -- because you could tune off-frequency to get away from the skirts of a strong local station. I especially like the generation of Yamaha receivers that had brushed metal fronts and wide slide-rule dials. My own is a CR-1040, an incredible signal-sucker. You might fine one used at a stereo store.

Good luck,

Doc

OK, so clear up a mystery for me... Did Herb keep file cards on the
callers so that when they called in again he could knowingly refer to
their kids by name or ask other detailed & personal things? I always
thought that's how he was able to be so intimate with them.

I remember hearing his show when I was a little kid, dx-ing the AM dial
overnight... KSL, WWL, others...

Herb cut a deal in the late 70's/early 80's to be distributed by a network that my law firm represented. I listened to Herb for a few nights, and couldn't believe the "family" that he had assembled, indeed, most of them in their 80's. As an example of what the show was like for those who are a bit too young to remember... Herb spent at least half his on-air time listening to tales of woe ... someone died, someone had surgery, someone's kids didn't come to visit... and, my special favorite, when someone would call from the hinterlands to play the piano or violin for Herb, on the air, of course. Seems most of them had the severe misfortune to "hit that one key note, and if you hit it, the phone automatically hangs up. Hate when that happens." The network vp finally told me the truth, "Herb gets tired of their playing, and that's his nice way of hanging up on them." Just so the younger readers can put this in perspective, and realize how much radio has changed, Herb was on Mutual Radio overnight during this period, and, as I recall, was replaced by a guy from Miami named Larry King.

} >better, at least for them, hate pays.
}
}
} I think it is really despicable when liberals attempt to use the OKC
} bombing as an excuse to rail against conservative radio talk show hosts
} as a group.

Jack:

Do you find it equally dispicable when conservative talkshow hosts
rail against all manner of progressive thought and denounce those who
hold such thoughts "as a group"?

Do you find it at all troubling when you listen to a fair, but
conservative program like Bohannon and hear caller after caller
advocating the bombing of some mid-eastern country because the
original news reports had suggested that the perperators were
mid-eastern in decent? Note I am not suggesting that Jim Bohannon
hjeld these views, in fact he refuted them, but a LOT of callers were
perfectly ready to "Kill innocent people' in retaliation for "killing
of innocent people"

} If a specific host has been making irresponsible statements
} that one thing, but let's not kid ourselves that there have never been
} irresponsible liberals

Does that matter? Are you saying that because there are irresponsible
liberals (and Lord knows that there are) that it excuses the right
from being responsible?

} Hate hold no particular political view, and you can
} find both right-wing and left-wing hate mongers.

True, but the right seems to be in control of the vast majority of the
talk radio stations at the moment. And I have never condoned hate
from the left. Political Correctness (as Rush has aptly caled
Political Cleansing) is a prime example of left-leaning intolerance.

} As far as I know, we don't even really know the politics of the people
} responsible for the OKC bombing. I wonder what the people who are starting
} to call for further restriction on our freedom of (political) speech would
} say if it were discovered that the terrortists were staunch Clinton
} supporters.

Clinton is among those calling for greater FBI powers.

} I just fear that we're on the verge of a knee-jerk reaction to OKC that
} will further erode our constitutional freedoms, and irresponsible articles
} like the one I'm replying to are fanning the flames for this.

I am not in favor of knee-jerk reactions either, Jack. But like it or not, knee-jerk reactions is exactly what Limbaugh et-al have been preaching all along. We can no longer disagree, we have to take sides, to dispise and even hate our political opponants. We must lump entire thoughs systems into one catagory. Limbaugh has used the word 'liberal' to lump everything he dislikes into one big trash bag for easy disposal.

Former FCC General Counsel Bruce Fein Hired By
Peoples Radio Network To Investigate Reckless Smears

WHITE SPRINGS, Fla., April 25 -- The People's Radio Network released the following statement today:

Because the national media is in a frenzy about the Oklahoma bombing, it is often rushing onto the air and into print with unsubstantiated allegations that are doing enormous harm. Some individuals have been falsely singled out as culprits. One Palestinian-American man and his family from Oklahoma City were severely harmed by a wrongful accusation. Other names of suspected culprits have appeared in the news and later dropped. Innocent reputations and lives are being ruined.

This drumbeat of blame has been increased by President Clinton's accusations that talk radio has somehow triggered the awful events in Oklahoma. THE WASHINGTON POST refutes the President's irresponsible argument most forcefully in an editorial that points out:

"Political speech may be inflammatory, mendacious and unwise to the point of spectacular stupidity. As such it can be denounced, refuted and shown up for what it is. But the implication that is also somehow an accessory to terrible crimes because of how it is processed by some deranged minds is just plain wrong. Individuals, alone and in groups, commit crimes. Guilt is not a class condition based on association or some ideas held in common or on stereotypes of some general category of person that one group or another detests...Let those remarkably competent federal law enforcement officials get on with the job of determining who should be booked for this crime. The rest of us should be resisting any inclination to indulge in charges of broad-based, diffuse, and unspecified culpability -- reflecting on how much damage succumbing to such an impulse has already caused."

An incorrect identification of FOR THE PEOPLE(R) was in an Associated Press story on April 22. Yesterday, we issued a correction on PRNewswire. Yet even in that short delay between the AP story and our correction, harmful stories did reach the air. One was on Pat Robertson's 700 Club National TV show April 24. It is reported to us that segments of the 700 Club were then rebroadcast in a newscast on a local Oklahoma TV station. Corrective actions are underway.

Our attorney is Bruce Fein, former General Counsel of the Federal Communications Commission. He is contacting both The 700 Club and

the local Oklahoma station. We will, of course, demand a rebuttal to any misrepresentations they make. If rebuttals are not forthcoming, we will take the matter to court.

The irresponsible way the national media and the President are casting blame for the Oklahoma City tragedy is breathtaking, and soon will be the focal point of well-deserved national criticism. In the meanwhile, we will do all that is necessary to make sure that anyone who falsely pulls us or our affiliates into this reckless whirlwind are held fully accountable.

Hello everyone!!!! I just wanted to say hi to everyone on one of
my favorite days of the year! April 25th, I celebrate another year.
Thanks to all of the DJ's in radio that have entertained me, and been
my therapy during the hard times. Somehow, TV has never been able
to do that for me. I could never do my homework w/TV.

Enough of that! I've been 29 a few times, and I think I'm gonna
do it again this year. Hello to Bill our illustrious MODERATOR!
Hello to any of the people in DFW radio that I'm trying to turn on
to the NET and especially the rec.radio.broadcasting newsgroup.
I'm thankful for HTML files, so now they can read some of the things
that I've posted about them. Especially Jeff Kaye - KDGE - he treats
Dallas/FW radio listeners to EDGECLUB94 every Saturday night.

'til the next juicy bit of DFW radio info comes along.......LATER

In previous post Scott Young asks:
>Does anyone know the name of the Program Director at WVIC in Lansing, MI.

What is their new nickname (they just went country right?)?
My best guess is PD= D.C. Cavendar, former program director of WKCQ in Saginaw, MI.
VIC is country, their nickname is WILD COUNTRY -- and they do shout it! :-)
tip : if you really need to know a pd or gm name, and don't mind white lies -- call the request line and say something like " hi, I really like what you guys are doing, and I want to send a letter to your (fill in the blank pd - gm - md - janitor) congratulating all of you. Who should I send it too? You can also ask for exact spelling, address et al, if you need it for tape ending purposes. This usually works best with the midday, evening or all night shift just cuz they have more time.

heykurtz@aol.com (HeyKurtz) wrote:

} It continues to amaze me how this line of discussion keeps turning up
} every few weeks. I'm not surprised that there are people who have
} negative things to say about consultants, researchers, GMs, PDs, or air
} talents...what dumbfounds me is how often contributors to this discussion
} "lump" individuals together into groups.
}
} It's very simple: There are some outstanding consultants, some good
} consultants, some fair consultants, some poor consultants, and some
} consultants who absolutely suck. The same can be said for researchers,

I think the point, Warren, that people are trying to make (some more skillfully than others) is that radio in America has stopped being run by the likes of those who we all revere as great, and who synthesized radio formats out of, literally, thin air (actually out of brilliance, brain power and perceptiveness). In the place of these giants of radio are those who refuse to rely on their own perceptions, but instead rely on faceless, often non-local data to program their stations.

I think that people are tired of the promulgation of 'one size fits all' radio, and are blaming that reality, rightly or wrongly, on the GM's and PD's who refuse to recognize the fact that research is not God. That research, at best, tends to turn people into numbers, into categories to be bought and sold.

When a PD cannot add a record to a rotation without reams of demographic and test data, then there is a problem. This is when many begin to accuse the consultants. It is not necessarily *consultants* who are the problem. As you said there are many excellent consultants. It is the mentality and attitude that we have come to rightly or wrongly call the "consultant attitude". This is the thing that I feel people are objecting to.

Radio *is* a business, we keep hearing. Yes it is, nobody can argue that point. Some have said that McDonalds is successful because all of its hamburgers taste the same from coast to coast. This is also (arguably) true. But no matter how hard they try to hide it, radio is MORE than a business. Successful radio must treat people as people, not merely demographics to be factored in.

I keep going back to the example of WLUP in Chicago. Everyone in the business said that such a format could not work... especially in a city like Chicago. But the visionaries at the LOOP went forward and it has succeeded monumentally. It has succeeded because it is local, in touch with the listeners, and it has filled a need for unusual,

non-standard programming. WNUA, Chicago's NAC outlet has also been wildly successful providing a format that has, until recently, been considered a quirky, non-mainstream format. They could have gone country, oldies, CHR or what-have-you, but the visionaries thought that a 'smooth jazz' format would work... and it did.. Now NAC outlets are going up like tents at a circus.

My point is that while research is good, it can be taken to a point where it becomes a monster, taking total control of the end product until it is the reason for the products existance and no move can be made without consulting the 'machine' for every last detail. Tomorrows radio geniuses will be confronted with a wall of 'research' telling them that the next "WABC" or WLUP" just cannot succeed because the research says what we need is another Hot AC.

Another negative side-effect of too-much-research is the demise of localization. Localization in radio is under attack from many fronts. Not only the infamous satellite feeds, but from over-researched playlists and formatics that can, and often do., remove most or all of the local flavor from an otherwise locally-produced radio station.

My conclusion is that research is not evil, in and of itself. However, radio needs more programmers willing to fly by their instincts, and to program their stations to serve their areas, not based on some demographic computer breakdown or the edicts of consultants, who often do not even live near the market. Radio needs more broadcasters with the guts to MAKE their thing fly, to once again serve *their* communities, and not to cave in to the generalizations of some high-priced research from afar.

From: nhmas@gauss.med.harvard.edu
Message-ID: <3njurv$rne@vixen.cso.uiuc.edu>
Source record: 32309

Fairbanks' WCLB 105.7(Boston's Country CLuB) has just announced the line-up
for its 3rd annual 'CLB-sponsored country festival which will take
place on Sat. July 22nd at Foxboro Stadium(home of NFL's NE Patriots)
in Foxboro,Mass. This will actually be the largest country music
show in the country this summer...

Of course that doesn't really stop them(WCLB) from dumping the format
before then. The show will go on with or without WCLB's involvement.
However, judging by the way they've promoting this event(on-air, mailing out
flyers, print ads,etc) I just can't see them messing with the format
until the fall...But then again, one thing that stands out about 105.7
is its history of format changes -- they probably hold a record in
that category in the Boston market...:-)

I think Fairbanks would probably try to sell 105.7 and let the new
owners worry about what to do with the present format...105.7 is
one of 3 remaining non-duopoly, primary Boston market stations[the other
two are WFNX 101.7FM and WODS 103.3FM]. I'm sure they'll have no
problem finding a buyer and getting the most money for the property...

Then you have Greater Media's WBCS 96.9FM whose GM announced back
in January that the station will give away $1million check to the
first person who calls in with the news of the upcoming format change.
[By the way, the bank check's expiration date is Jan 1st,1996.] The copy of
the check was faxed to all ad agencies in Boston. The message behind
this move was that WBCS no intention of giving away $1million any time
soon and the country tunes will keep spinning at 96.9 for a little
while longer...

Both stations' ratings are nothing to write home about -- mid to high 1's.

-Mark

Up & down the dial in the #40 market:

*First,something from Toronto:The Toronto Argonauts,who for many years made their radio home CFRB(1010,news/talk;The Source),have jumped down the dial. Starting this season,CHOG(640,CHR/talk middays;AM 640)is the new home for the Argos(or the Double Blue). As yet,no idea if the broadcast crew will be kept. Basically,it trades one 50 kw signal for another-which can both be heard in WNY. CFRB,however,has the rights to the Toronto Raptors,one of 2 new NBA teams debuting next fall(the other is the Vancouver Grizzlies). Also of note:Hamilton's CHML(900)is in its last year of a 3-year deal to air the Tiger-Cats games.

*Rocco Pendola left WGR last Sunday(4/16). He's now at Miami sports station WQAM(560).

*Confirming speculation that Tony Violanti reported on last week in his Buffalo News radio column,WWWS(1400,business/talk)will be switching to urban oldies in the near future. Online Tonight's David Lawrence wired me about it, so they'll be looking for another affiliate. As of yet,no idea if any staff (such as it is)will get blown out-or,for that matter,if it will be locally done.

*Speaking of Tony,he did a piece on my alma mater-WBNY(91.3). Recently, the station installed a new transmitter(which is located on top of Porter Hall,one of Buffalo State's dorms)and also hopes to increase the current 100 w of power that they currently have(plans are for the station to go to 500 w). Also,'BNY will be releasing a CD next month;titled "WBNY Alive on Air",it will feature local bands.(Two notes:this won't be the first CD the station's released-it released one in the late 80s with a number of tracks on it,none local. And take it from me-the old transmitter gave us a number of headaches, since it had a tendency to burn out in hot weather. The new transmitter has cleaned up the sound quite a bit.)

*Used to be that only WBEN and WMJQ(NewsTalk 930/Q102)were the only radio stations that put any money into ads for their stations. Not the case today. In addition to Q102(which has Dick Clark)and NewsTalk 930's(incidentally, the music in that commercial is now used on the station,three other stations are putting some money into ads.
WSJZ(Smooth Jazz 92-9)is doing ads that simply say,"Buffalo has a new radio station"(the last 3 words are on the screen)before going to clips of artists ranging from Sade to Dave Koz performing in front of the Buffalo skyline,after it was gone over with a palette of colors.
WJYE uses the morning duo of Joe Chille and Maryalice Demler in its ads (which,beyond that,seem out-of-town produced). Near the end,when one of the

people says it gives a kickstart to their day,it shows one of the two revving up a motorcycle,the other wincing.(You'll have to see which one it is.) WYRK just shows some of the artists it plays-nothing more.

*Some notes on how the Oklahoma City bombing was reported:
-WGR was the first to get to it on Wednesday,but gets a few points taken off for going to Bisons baseball.
-Though getting to it later,WBEN stayed with the story for most of the day,using its CBS affiliation to pick up the audio feed from Oklahoma City's CBS affil. It dropped Gary McNamara and Rush Limbaugh's shows to keep it on. (BTW,Tony Violanti gave high marks to 'BEN's coverage.)
-Toronto's CFTR(680 News)also made use of an audio feed-CNN's(easy,since 680 News is affiliated with them)and that was also good.

>Thursday there are no rumors that he knows of.

Before I say anything else, let me state that I work for WC _R_ B, not WC _L_ B, and I don't _know_ anything for sure about what may become of 105.7,

BUT

I was CE at WBOS in July 1983 when they went country. I knew about the format change a couple of weeks before it happened, but I wasn't supposed to--neither was anyone else on the staff. I remember hearing the station manager (who knew nothing about the change) tell clients who called that there was absolutely _no_ truth to them; WBOS was a rock station and rock it would stay. After all, he added, "I am the station manager. If we were going country I'd be the first to know."

A couple of days before the change he went to the general manager of co-owned WUNR(AM), who _did_ know about the imminent change, and said, "Everyone seems to think we're gonna go country. Maybe we should actually do it."

Two days later he was history, the AM manager was running his station, and we were playing Kenny Rogers records interspersed with ads for punk rock clubs.

You are quite correct about CBC affiliates not having CB** calls.
In fact, in a few cases the CBC has purchased affiliated stations, some
which still use the old calls. A few examples of this are:
CFPR Prince Rupert, BC CBC Radio
CFYK Yellowknife, NWT CBC Radio
CHFA Edmonton, AB CBC French Radio
CKSB Winnipeg, MB CBC French Radio

All of these stations are owned and operated by the CBC.

In other cases when CBC purchased affiliated stations, the calls
were changed to CB** calls:

CKLW-TV Windsor, Ont became CBET (CBC Television)
CFRG Gravelbourg, Sask became CBKF-2 (CBC French Radio)
C??? Saskatoon, Sask became CBKF-1 (CBC French Radio)

and, last year the CBC-TV (English) affiliates in New Brunswick were taken over by the CBC, the calls being changes to CBAT (Fredericton) and CBAT-x (the other stations).

This brings us to CJBC Toronto, which is in fact owned and operated by the CBC. The roots of this station go back to 1926, when the National Carbon Company started CKNC in Toronto. In 1933 the CRBC (Canadian Radio Broadcasting Commission) leased the CKGW Toronto transmitter plant from its owners, Gooderham and Worts (the distillers) and changed the call to CRCT. They were still in need of studios in Toronto, so in 1935 the CRBC purchased CKNC (studios and transmitting plant) from the National Carbon Company. As the CRCT transmitter (located in Bowmanville, 42 miles east of Toronto) was 5000 watts, and CKNC was only 100 watts, the CRBC continued to use CRCT, the old CKNC transmitter, now using the calls CRCY, being used as a standby. Shortly afterward, a powerful Mexican station started operations on the CRCT frequency (840 kHz), which made reception of the station difficult in Toronto at times. CRCY was pressed into service at that time. In 1936, the CBC took over from the CRCT. In 1937 they built a 50kW transmitter at Hornby, west of Toronto, called CBL, and returned CRCT to Gooferham and Worts (it never went on the air again. CRCY beccame CBY, and was the flagship station in the new Dominion network started by the CBC about 1943 as a second national English network. CBY was the only owned and operated station on this network, and it power was raised to 5 kW about 1944 and to 50 kW about 1948. Sometime in the 1940's however, the call was changed to CJBC, this the mystery. In the early 1960's the Dominion network ceased operations, and CJBC joined the French network. CJBC-FM (CBC French Stereo) only started a couple of years ago. The CBY calls were used for the Cornerbrook, Nfld. station starting in 1949 when Newfoundland joined Canada.

Gosh, if CJBC is not a CBC-owned station, the change in ownership must have happened just yesterday. At least all of my directories show it as still a CBC-owned station. Seeing those calls letters reminds me of how much I enjoyed listening to the station while pulling wintertime
all-night study sessions
at the University of Iowa in Iowa City. The station was English language in those long-ago days (we're talkin' 1958 or so, now) and the morning man, a fellow named Bruce Smith, started his fairly low-key wake up show, "Toast and Jamboree" at 5AM ET...4AM my time. Bruce was a perfect companion during those wee hours many, many, many years ago. He'd be at least 110 years old now, I guess. Anyone else remember the English CJBC or Bruce Smith for that matter? If you do, you're admitting to being an ancient :=). I haven't thought about mighty CJBC-860 in years.

Cheers.

CJBC was put together as the CBC ``Dominion Network'' outlet for
Toronto, back when the CBC first tried to operate two English
networks. That effort failed, and the station was recycled as the SRC
station for Toronto. More details on the second network efforts can
be had from the Knowlton Nash book.

3311. New home in shadow of AM transmitter tower

Newsgroup: rec.radio.broadcasting
Date: 1995-04-25 00:00:00 UTC
From: aa931@detroit.freenet.org
Message-ID: <3njus2$rnm@vixen.cso.uiuc.edu>
Source record: 32317

Reply-To: aa931@detroit.freenet.org (Jack Decker)

I am curious about something. I grew up across the street from the transmitting tower of AM radio station WGHN in Grand Haven, Michigan. Recently, I took a drive past my old home and was amazed to find that they had built a new home across the street, and practically underneath the AM station's tower, which is still there. I had always thought that towers couldn't be located in such a way that they could fall on any structure, and I am pretty sure this new home violates that (does the fact that the home was built after the tower make any difference?). Understand that I haven't actually taken a tape measure and measured the distance from the tower to the home, but I'd have a hard time believing that distance is shorter than the height of the tower.

I'm also pretty sure that the home is built over the top of the existing ground radials for the station. I remember accidentially pulling up a length of ground radial as a kid (I didn't know what it was at the time) and this house is right over where that radial was buried. I'd be surprised if some of the radials weren't damaged during the excavation for the home, but can't say for sure this is the case.

Anyway, I was just curious whether building a new home so close to an AM statio tower is permissible now. I know that *I* sure wouldn't want to live there; we had enough interference from that station (on everthing from our telephone and TV set to practically our toaster!) living across the road, and I wouldn't be surprised if the inhabitants of that home can hear the station via the fillings in their teeth! :-)

One other thought is that I have no idea who actually owns the home... would it make any difference if, for example, it belongs to the station's owner?

It continues to amaze me how this line of discussion keeps turning up every few weeks. I'm not surprised that there are people who have negative things to say about consultants, researchers, GMs, PDs, or air talents...what dumbfounds me is how often contributors to this discussion "lump" individuals together into groups.

It's very simple: There are some outstanding consultants, some good consultants, some fair consultants, some poor consultants, and some consultants who absolutely suck. The same can be said for researchers, GMs, PDs, air talents, station owners, salespeople, plumbers, power forwards, lawyers, center fielders, and just about anyone else.

IMHO, anyone who makes a point by making blanket statements about PDs or consultants is revealing just how simple-minded their arguement is.

Two basic problems in radio. The broadcasters the REAL BROADCASTERS have sold their properties to The Big Corporation who do nothing more than research, research, and more research. They approach radio as if they are making a new type of soft drink or figuring out what new color of M&M's (tm) (I like the Blue Ones!)

The other problem, too many under talented people (Wannabees) behind the mike and in management. I hear more people with no pipes and sense of timing today on the radio than ever before. I think they are there because they are cheap (it serves the bottom line culture of these big corporations that own these radio properties). They all do it, so, no one sation sounds any better in a market and they can get away with it and still make money. Hey at that point, turn on the satellite or go dark!

What made Top 40 successful in the 60's and 70's was that all kinds of music was played. Yeah there was a format but on most of the radio I listened to and I hear other people wax nostalgic about here is the kind of radio where the jocks (who had talent) had some leash and the music came first. Look, play the darn music from today and include music from the past and I mean back to the beginning of rock and roll. I for one would like to see a station liner that says something to the effect; " WE PLAY ALL THE HITS. YES ALL THE HITS FROM THE BEGINNING TO THE PRESENT. GET USED TO IT!" ....know what? It works! Something for everyone instead of this niche programming %$#&!!!??.

WHile we are on the subject, does anyone really believe that the stuff being released today is gonna make it into The Solid Gold Hall of Fame? Come on, be honest. I am talking about rock music specifically. It is being turned out faster than hamburgers. Maybe thats the third problem because alot of the music released today only appeals to males (..ahem, dare I say research proves this?!). Oh, well. Time to climb into my flame suit!!!...ah, ok, Flame Away!

OTR programs?
Q16. Is there a World Wide Web page (URL) or FTP address that I can
```

access for more info?
Q17. How do I subscribe to the OTR electronic newsletter?
Q18. Can I get archived copies of old issues of the OTR newsletter?
Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?
Q22. What is the best radio / antenna to get distant OTR stations?
Q23. Is there a group for modern radio drama ("new-time radio")?

Q1. What is "OTR"?
A1. OTR is an abbreviation for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the early 1950's. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures.

Q2. You haven't mentioned OTR music, why not?
A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. There is no restriction to discussing OTR music in the OTR Newsletter.

Q3. Where can I buy recordings of old radio shows?
A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from my OTR WWW page or FTP address listed later.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?
A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR newsletter to learn of their experiences, then check with potential vendors.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is ongoing, and is summarized at the archive site, and my FTP / WWW sites.

Q5. Are OTR shows rebroadcast? If so, where and when?
A5. Yes, several AM and FM radio stations, three satellite feeds and a shortwave station rebroadcast OTR. Check my OTR WWW page or FTP site for current info. If you learn of other sources, leave a note!

Julian A. Smith (jsmith@blues.epas.utoronto.ca), Frank Passage (passage@pluto.dss.com) and Bill Pfeiffer left the following information:

For AM listening, try the brand-new National Radio Club's _AM Radio Log, 15th Edition: Complete Listing

of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price range: $20.00]

For FM listening, I'd suggest Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at 800-248-4242 or +1 212 473 4668 voice, or +1 212 473 4626 fax. The address is M Street Corp., 304 Park Ave S Floor 7, New York, NY 10010 USA. costs $29.95 + p/h,

Those lucky listeners living near Boston can have a periodic update of local OTR programming by sending email to Noah Schaffer, at nschaff@k12.oit.umass.edu. Noah will send you monthly OTR & Radio Drama updates, including program titles and station/frequency/time data.

Q6. I remember a great show called (x). When was it aired?
A6. Check with subscribers to OTR newsletter, or look through the program database (WWW or FTP). Also see answer A14 below.

Q7. Are there any books about OTR?
A7. Yes, there are several books related to OTR. See my WWW page or FTP site for a list of some of them.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch <henry@g0gku.demon.co.uk> related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

Q8. Does anybody trade tapes of OTR shows?
A8. Yes. Check with subscribers to the OTR newsletter. We hope to get a database of private traders as well. Leave a note in the OTR newsletter if you want to trade, or send email to me if you

want your library to be listed in the on-line database.

Q9. What's this stuff about Copyright?
A9. The copyrights on most OTR shows have expired. A few copyrights have been renewed. Examples of the latter include The Shadow and some of Arch Oboler's productions. See my WWW site for both "common sense" and legal citations.

Q10. How can I get my local radio station to broadcast OTR programming?
A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us: "The days of radio being ruled by the artisians is over, and for some time now it has been in the hands of people who only look at the bottom line, so to reach them you must talk through public radio pledges, or through sponsors on commercial stations."

Q11. I have some old transcriptions and tapes, how can I make them sound better?
A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables and sound processing units that can dramatically improve old recordings. Their sound processing unit runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all their material at the following site: ftp.atd.ucar.edu. Log on with the usual anonymous then, your routine password. head on over to /pub/dat-heads/ You will find a wealth of info up there. All the digests to the current day, and mike faqs, as well as market postings on equipment. Highly

recommendable for anyone to get their feet wet in this
media. Happy taping

Q12. Are there any OTR clubs near me?
A12. Check the two club listings in my WWW page, and
leave a note in the OTR Newsletter asking about local clubs for
your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
A13. Sometimes broadcasts are dated according to their original
broadcast date, and sometimes according to a date on which they
have been rebroadcast. For instance, the Armed Forces Radio
Service rebroadcast many Mutual Radio transcriptions at a later
date. Your tape may be of one of these later dates. Alternately,
somebody might have made a mis-typopgoof.

Q14. Is there any place where I can get a complete listing of all the
episodes in a particular program serial?
A14. Some of the larger vendors / collectors may have this data. If
you find such a publicly available source, we can make it
available in the Internet OTR file repository.

Some of the OTR Newsletter subscribers have contributed Program
Logs for several well-known series. The logs are available at my
FTP/WWW site.

The "logs and publications" entry in my WWW page gives names
and addresses of several vendors of these items. It can be FTP'd
as sou_pub.otr. (Thanks to RadioJoe5@aol.com (Joe Coleman))

Jay Hickerson maintains several logs and lists, as well as -Hello
Again-, an OTR newsletter. Jay is the author of -The Ultimate
History of Network Radio Programming and Guide to All Circulating
Shows- (last supplemented in Oct 94). Jay's address is:

Jay Hickerson
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the
themes of OTR programs?
A15. Again, some vendors include this information with their
catalogs. If you would like to contribute your interpretations of
the themes, send them to the OTR newsletter for inclusion in one
of our databases.

Jim Widner has contributed some synopses / introductions to
various programs. They are on file at his and my WWW/FTP sites.

Q16. Is there a World Wide Web page (URL) or FTP address that I can
access for more information?

A16. Yes, there is a growing number of WWW sites, as well as FTP sites and a Gopher. Each site contains different information, so you might want to visit them all. The sites listed below are good places to start. If you learn of any other sites, I'd appreciate your informing me via email!

(1) My site (note change from earlier FAQs):

World Wide Web URL:
http://www.crl.com/~lgenco/otr.html

FTP:
Anonymous FTP to ftp.crl.com
directory: users/lg/lgenco

(2) AIRWAVES E-Publishing's Site (courtesy of Bill Pfeiffer):

FTP:
Anonymous FTP to radio.aiss.uiuc.edu,
directory: misc/rec.radio.b-cast/OTR.

GOPHER:
gopher radio.aiss.uiuc.edu 7070
(select "OTR")

World Wide Web URL:
http://radio.aiss.uiuc.edu/~rrb

For subscribers without normal FTP access, there is a FTP-by-mail server that will automagically send you a copy of the latest OTR FAQ. To receive a FAQ, send email in -exactly- this format (the case of the file name IS important):
To: lgenco@crl.com
Subject: Request otr.faq
(the body of the message is ignored)

Q17. How do I (un)subscribe to the OTR electronic newsletter?
A17. To subscribe, send email
To: old.time.radio-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: old.time.radio-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

Q18. Can I get archived copies of old issues of the OTR newsletter?
A18. Yes. The OTR Digests and Index are updated three times a week, and are accessible through the first two WWW pages mentioned above, or from the AIRWAVES anonymous FTP site mentioned above.

Q19. What is the best way to archive OTR programs?
A19. The most popular way seems to be reel-reel tapes, using each of the four tracks to record monophonically. Cassettes are generally

fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction.

Some subscribers have mentioned Talking Book tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind
1839 Frankfort Ave.
Louisville, Kentucky 40206
Tel. (502) 895-2405
Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to Visually Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines, Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

Q20. My old reels squeak. Why does this happen, and can I fix it?
A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725

Cardigan Court, Naperville, Illinois 60565-1202.
I am willing to help you preserve the sounds of
radio days gone by.

[Editor's note: Fred's method consists of a kit by which a
lubricating film can be automatically applied to the tape as it
is played. I tried it. Although temporary, it does indeed work!
I'd recommend it for those squeaky tapes that you wish to
re-record onto newer reels.]

Richard Fish <lodeston@bluemarble.net> also left this helpful
info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the
backing, or the binder compound used to stick the
magnetic particles to the plastic backing -- has absorbed
water from the air. The water molecules actually make
the tape expand a bit, so it doesn't fit the machined
tape-guides properly anymore; and they can interfere with
the lubrication impregnated into the tape; and it is
theorized they can even interfere with the polished
smoothness of the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the
formulation of the plastic backing and binder. In the
mid-70's, both 3M (Scotch) and Ampex, the two major tape
manufacturers, started experimenting with their formulas.
They thought they were introducing major improvements,
but instead created a tape much more prone to
hydrolization than anything had ever been. The problem
did not show up for years, and the formulas did not get
corrected until sometime in the mid-80's. Theoretically
any tape could get hydrolyzed over a long period of time,
especially if stored in a high-humidity situation, but in
practice most squeaky tapes were made (roughly speaking)
between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and
entreprenurially successful producer of radio drama in
the US today) gave me his formula and I've done it many
times now and it works:

Bake the tapes in a convection oven for 8 hours at 130
degrees Fahrenheit. It is entirely possible to bake a
tape twice if the first time doesn't do the trick. You
get about a three-week "window", sez Tom, before the tape
starts to re-absorb water. So the best deal is to bake
the tape and immediately make a copy. But if you forget
to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?
A21. An excellent place for discussions about antique radios,

phonographs and accessories is the rec.antiques.radio+phono newsgroup, created by Bill Robie. His FAQ may also be found at my WWW site.

The WWW site, "The Bellingham Antique Radio Museum" is also available through my WWW site, or directly via URL <http://www.pacificrim.net:80/~radio/> This site contains info and GIFs on old radio hardware, as well as soundclips (.au files) of OTR show intros. Well worth visiting!

(The Bellingham Antique Radio Museum is a private collection gathered over the past 20 years by Jonathan Winter.)

Q22. What is the best radio / antenna to get distant OTR stations?
A22. Several readers have been acclaiming the GE SuperRadio III as an excellent choice for picking up distant stations that carry OTR programming. Although the tuning dial has notoriously poor calibration, the sensitivity and selectivity seem superior to other radios. A SuperRadio FAQ is available at my WWW / ftp site.

-Some- readers have had good success with the Select-A-Tenna antenna advertised in several magazines, and the Grove Catalog. The S-A-T seems to be rather directional, and may eliminate off-axis interference. Ham Radio magazines sometimes carry information about small loop antennas for AM DX-ing.

Dan Hughes <dhughes@prairienet.org> left this note:

Several years ago one of the electronic magazines ran plans with dimensions and number of turns, etc to build one of these antennas. I have built several and I'm no mechanic. If you (or anyone else reading this) would like a copy of the article and plans, drop me a stamped, self-addressed envelope: Dan Hughes, P.O. Box 933, Urbana IL 61801.

If you are interested in AM Broadcast Band reception, and technical artlcles related thereto, send a SASE to the following address for their product catalog:

National Radio Club
Publications Center
PO Box 164
Mannsville, NY 13667-0164

Q23. Is there a group for modern radio drama ("new-time radio")?
A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you. Meanwhile, johnsd@logica.com (DJ) tells us that there's a new mailing list has been set up for anyone interested in the technical aspects of radio drama production. To subscribe to the new discussion list send a "subscribe radiodrama" message to

radiodrama-request@world.std.com.

3317. ADMINISTRIVIA: Use of Names on this group.

Newsgroup: rec.radio.broadcasting
Date: 1995-04-25 00:00:00 UTC
From: wdp@airwaves.com
Message-ID: <3nihpp$o7m@vixen.cso.uiuc.edu>
Source record: 32403

Hello All:

For those who are unaware, there was a group decision to require the use of 'real names' on rec.radio.broadcasting and its companion email publication AIRWAVES RADIO JOURNAL. This decision was made, by popular vote, in January of this year.

What this means is all posters to this forum must provide a real name someplace in their posting. If your site provides a real name in the "From: " header of your post, then you need do no more. If it doesn't provide such a name, or of you are on a site which assigns you an alias (such as AOL) then you need to add your real name in the signature portion of your post.

Current On-Air names are acceptable, provided they are accompanied by the station you are working at. Exceptions to this are on-air names which are well known throughout the broadcasting community. Also we make exceptions for those releasing sensitive information where their current employment may be at risk. In these cases, you still must provide a real name, but if you notify the moderator (ME) in your post, your name and/or address will be removed and a brief statement placed there stating that "the poster asked to remain anonymous".

Posts from anonymous re-mailers are not accepted unless arranged ahead of time.

This was done to increase the credibility level on this forum, and to give potential followup posters something to reply to other than "RadioGod@AOL.COM", or some other silliness. The original idea was that of Barry Mishkind, who moderates the Broadcast Echo on the Fidonet system and was overwhelmingly ratified by readers of this group.

Most 'nameless' posts are returned to the poster with a prepared text explaining why the action was taken. Short, simple requests for information, which have no 'real' name, are sometimes posted rather than go through the hassle of re-posting later.

Please, to get your post out faster, and to make my job (which can take well over 3 hours a day, sometimes up to 6) easier, include a real name in your post.

Thank You

* William Pfeiffer
* Moderator/Editor rec.radio.broadcasting/AIRWAVES

3319. Kansas City Radio Watch (24-Apr-1995)

Newsgroup: rec.radio.broadcasting
Date: 1995-04-25 00:00:00 UTC
From: transvox@interstate.net
Message-ID: <3nihpr$o7q@vixen.cso.uiuc.edu>
Source record: 32405

Written April 24, 1995

Over the past week in Kansas City radio:

* Kansas City's new smooth jazz station has a new set of call letters. KKCJ(FM) became KCIY(FM) last Friday, Apr. 22. The station is now using live announcers as well. KKCJ/KCIY had been running without announcers since its March 30 format change.

* Market leader WDAF(AM), "61 Country," is now announcing on the air that it is broadcasting in stereo. The station has been broadcasting in stereo for at least seven years, but has not publicized that fact in recent years. Kansas City's only other AM stereo station is MOR KFEZ(AM).

* WDAF's former program director, Don Crawley, has surfaced at an entirely different kind of station. According to the Kansas City Star, Crawley is now the morning host at classical KXTR(FM). Crawley, who most recently was the program director at WDAF's archrival KFKF(FM), is retaining his day job as director of music ministries for a downtown KC church.

* In AIRWAVES 1294, kcxl1140am@aol.com (KCXL1140am) complained:

>> how come is it we are constantly being neglected??
>> KCXL 1140 AM in Kansas City is new and fresh. especially when it comes to
>> the good time oldies. check us out. then report

A grep on my files for 1994 yielded the following:

msrradio.923:Defunct suburban station KCXL(AM) in Liberty is expected to
msrradio.923:KCXL will be an oldies station, with programming provided by
msrradio.928:KCXL (1140) remains off the air, despite announced plans to
msrradio.a07:Francisco Franco is still dead, and so is 500-watt daytimer KCXL.
rev1994.htm:* After a false start in September, daytimer KCXL(AM) made it back on
rev1994.msr:* After a false start in September, daytimer KCXL(AM) made it back on

In other words, in 1994 I reported on KCXL on Sept. 23, Sept. 28, Oct. 7, and in the 1994 year in review of Kansas City radio.

* Kudos to news/talk station KMBZ(AM), which was the only Kansas City radio station to send its own reporter to Oklahoma City after the bombing of the A.P. Murrah Federal Building. Longtime KMBZ staffer Dan Verbeck filed reports from Oklahoma City until his return to Kansas City this weekend.

[]>
> I think this is how LMA's and duapolies should be done and I'm
> putting my money where my mouth is.

Hats off to Fred for making creative use of ownership arrangements to create a stronger station!

I suspect duopolies and LMAs are not popular among many AIRWAVES readers. However, what you need to remember is that duopolies and LMAs are not intrinsically bad. They are just a tool. A tool becomes bad only if misused.

What Fred is doing is something that had been suggested for many years in my hometown market, Columbia, Missouri. Columbia's heritage full-service station, KFRU, was stuck with a kilowatt signal on a graveyard channel, 1400 kHz. Down the road 35 miles, in the state capital of Jefferson City, *its* heritage full-service station, KWOS, was stuck with a kilowatt on *its* graveyard channel, 1240 kHz.

Both stations were (and still are) locally owned and were well regarded. But by the late 70s, it was becoming clear that they were each quite vulnerable to increasing FM competition and competition from TV stations selling to a combined Columbia-Jefferson City market.

More than once I heard (even from our competitors and KWOS' competitors) laments that KFRU and KWOS couldn't join forces because of the strict rules against signal overlap then in place. If KFRU and KWOS could function as a single station, it could cover both the market containing the state university and the market with the state capital. It could really compete against the TV stations and get lucrative national ad money for a bigger combined market.

The longtime owners of each station retired. KWOS was sold to KJMO(FM) and is, for the most part, a relay of various satellite services. KFRU was sold to undercapitalized local owners who ran it into the ground. Fortunately, a Columbia bank held the loan and wanted to keep the station under local ownership. A very attractive set of terms enabled KARO(FM) (now KPLA) to buy KFRU in 1992, and the station has steadily rebuilt its reputation and its audience.

KFRU now networks a talk show and some University of Missouri sports events to KWOS!

The temporary decline of KFRU and the longer-lasting weakness of
KWOS could have been avoided if the duopoly option had been available to
both stations, whose owners in the early and mid 1980s were longtime
friends and would have been interested.

What about bigger markets? Take Kansas City. The record is mixed, sometimes
in the same group of stations:

* KFKF(FM) kept KKCJ(FM) prisoner in a redundant country format for three
years until *another* duopoly was formed. This new duopoly spun off KKCJ
to a new owner, who has brought "smooth jazz" to the market for the first time.

* Bonneville's purchase of KCMO(AM) allowed it to pool resources with
its news/talk mainstay KMBZ(AM). KMBZ has become a much better news station
as a result. Duplicate sports talk shows in the afternoon were eliminated.
The downside is that Bonneville can't figure out what to do with KCMO.

* Apollo's purchase of KUDL(FM) let it merge two befuddled adult-contemporary
stations into one stronger station, KUDL, while Apollo's original station in
the market, KMXV transitioned to contemporary hits with more high-energy
dance cuts than any station in Kansas City has dared play in a long time.

* A duopoly between KCNW(AM) and KBEA(AM) (now KCAZ) brought a children's radio
format to the Kansas City market.

The record, at least in KC, is mixed but more positive than negative, in
my opinion. In two cases, it's brought fresh formats into the market;
in another case, a much improved news/talk station was the result.

Yes, duopolies and LMAs can be abused (as in Atlanta). Realistically, though,
LMAs and duopolies are the natural result of allowing so many stations
to go on the air. There aren't enough advertising dollars to go around to
support all the stations on the air unless they can huddle for warmth and
share non-revenue-producing costs (back office, engineering, physical
plant). It's either that or let some stations go off the air entirely.
Then how many choices does THAT give you?

3321. Broadcasting and OKC Bombing

Newsgroup: rec.radio.broadcasting
Date: 1995-04-25 00:00:00 UTC
From: "M. Hale" <mh5260@cutter.ship.edu>
Message-ID: <3nihpt$o7t@vixen.cso.uiuc.edu>
Source record: 32407

I was listening to the radio today and during the news the reporter said that Preident Clinton is suggesting that broadcasters might be responsible for the Oklahoma City Bombing. I think that he was suggesting that the propogation of extremist views is continuing on the airwaves and people listen to this and begin to beleive, etc, etc.

I think this is somehat irresponsible for Clinton to say. Yes, there are people who worship the ground Rush broadcasts from just because he is Rush. And I know that a lot of other people take what extremists say as the word of truth because they don't know any better. HOWEVER, I would like to think that the majority of people have enough common sense to know what is right and wrong and to take this sort of stuff with a grain of salt.

I could be way off base with what Clinton meant, but this type of suggestion is a bit unfounded, I think.

Sincerely,
Mike

From: stellastar@aol.com
Message-ID: <3nihpu$o80@vixen.cso.uiuc.edu>
Source record: 32409

Amen, Ty. When I came to WOW, Omaha, I was told by co-workers that our pay was among the best in a non-union town because ALL staff got what the union had negotiated, whether we were members or not. That got my immediate gratitude, having been overlooked for raises plenty of times by previous employers who were used to hiring jocks grateful for work at any pay.
Since we were the only union shop in town, AFTRA offered a ridiculously low rate to join, hoping to retain its presence in the market. It amounted to what I would have paid for a community-college course, so I joined as part of my personal continuing education. Learned what it's like to work at a place where they have to ASK you to work overtime, got to watch a contract negotiating session (a bit overdramatic but fascinating) and had access to lots of industry information about the business in general.
Must admit, I went to inactive status upon making a move that was personally motivated rather than professionally. In a non-union market now, freelancers tell me there's a toss-up: do union work for great pay, or more work for less pay. It's a hard choice, but I'll never regret having joined as part of my passage to the Big Time markets.

If AFTRA is a lame duck, its because WE LET IT BECOME a lame duck. WE LET IT BECOME a weaker negotiator. WE LET IT BECOME a powerless enforcer. Being "good" isn't enough to keep you in demand anymore. Duop's and Trombo's make your chances of being "good enough" for the *corporate* ear slimmer with every transaction. WE sponsored this expansion out of our own pockets.

: Well, the death knell is beginning to sound for one of them as rumors are
: flying that 105.7 (the Country Club) is getting ready to jettison the format in favor of:

[some stuff deleted]

: John Gallagher/Boston

Rumors have been flying since both stations turned country. One week
you hear that WBCS 96.9 (Greater Media) is dropping the country format,
the next day WCLB 105.7 (Fairbanks Communication) will drop country. I
do know that both stations are stoubborn and don't want to "cave in".
Both stations have booked thier summer soncerts and sent out flyers
pushing them. WBCS has amoung others Blackhaw, and WCLB has Clint Black
as thier main attraction. If a station drops the country it would not
be before August.

A friend of mine works at WCLB in a management position, and as of
Thursday there are no rumors that he knows of. (Yes it is possible that
he knows something and is just not saying, but I tend to doubt that).
We will just have to wait and see what happens.

As for country not working in Boston, this remains a mystery to me. A
another freind of mine is the DJ for a club that spins country music one
night a week with line danceing and most of the time there is *NO* room
on the big dance floor. It may be that the country is only one of the
nights, but about 500-700 people go there each week. So why is the
country radio format suffering in Boston? If any one has the answer to
that I'm sure upper mangement at Greater Media and Fairbanks would love
to talk to you to get thier station far abouve the rest..

I have done enough babbling for one day.. I will leave you to your own
thoughts on this...

Andy

I was wondering if anyone had any further info on the holding of the CBY
call by CJBC?

I also recall that back in the '50s, CBL and CJBC were both CBC Radio
English outlets. In fact, I remember as a teenager, in the late 50s or
early 60s, that experiments were carried out with stereo transmission,
with each station carrying one of the stereo channels. The idea being
that you set up two receivers, (tube type in those days), and one on each
side of the room to give the stereo effect.

CJBC, then switched to a French outlet, in the 60s? Anyone recall this??

Also, I don't recollect the sale of the CBY and CJBC outlets as Rene
suggests in his response. Anyone have any further info??

Regards

Mike

I've seen the CBC-TV station in Vancouver (CBUT Ch2) ID itself but only at sign on and sign off.
Throughout the rest of their day they are just "CBC British Columbia". I suppose that this makes some
sense since they have repeaters all over the province and into the Yukon. From where I live I can also get
CBC radio and CBC stereo but have never heard them ID themselves any differently than the TV side.
20 years ago I drove across the Canada and distinctly recall listening to CBC radio in Saskatchewan, a
powerhouse that I could pick up just about anywhere that ID'd themselves as CBK.

I think we really do diagree on this one fellows. I think going into a laser whooosh from a music weather bed even sounds worse.

My true feeling is that a donut jingle is smooth, clean and is the TRUEST form of CHR presentation. Yeah you hear some trainwrecks, but the skill of hitting that post takes some time to develop. It's great when you do. I used to do it and I loved doing the weather.

Personally, I wouldn't put a two punch jingle on a top 50 market station. But that's me, the eternal perfectionist.

Geez guys...

Let's give up on this subject! We used talk up beds when we were an Urban leaning Top 40, but now that we are mainstream, we're rethinking the talk up beds. As far as jingles...they sound so lame on a 90's Top 40, but I'm a fan of the 2 - punch (sorry Rob), if they are produced correctly they will never sound choppy they will sound as natural as a donut...

Jeff--

BTW the weather in Tampa is the same 365 days a year! It's either Sunny or raining!

Yes, he was the man you loved to hate. That was Howard Cosell. I grew up enjoying the "acid tongued" Cosell in what ever sport he was able to "tell it like it is". In addition to his "signature", "Monday Night Football"... his antics outside of the broadcast booth were even more comical. His many visits to "The Odd Couple" series were priceless. His no-holes-barred attitude about the many dunderheads in sports humbled many an athelete. I remember his 13 week stint on ABC hosting a Saturday night entertainment show called.......(no fooling) "Saturday Night with Howard Cosell" in 1975. I was probably one of the 13 people who watched that show, regularly. I was sad to see it end. We all remember that awful night in 1980 when he announced on Monday Night Football that John Lennon had been murdered outside of "The Dakota" in New York with Yoko Ono at his side by some creep fan.

As a kid, I was really not much on the sports bandwagon. But, Howard made a fan out of me. And that's telling it like it is. As a fan, I salute him.

Howard Cosell did many great things in his long and distinguished career. Fighting for the rights of Jackie Robinson and Cassius Clay, condemning the brutal farce that boxing has become, and sticking with radio until he retired in 1992. But I think everyone will agree that his finest moment came when he showcased Lee Majors, Shamu the Killer Whale AND the Starland Vocal Band on his wonderful network variety hour "Saturday Night Live with Howard Cosell."

Message-ID: <3nihq7$o8a@vixen.cso.uiuc.edu>
Source record: 32419

Howard Cosell may be remembered by a lot of us for how he handled the John Lennon story on December 8, 1980 during the Monday Night Football broadcast. But he was a lot more than just the man who broke the story of John Lennon's death.

He actually pioneered the art of critical commentary in sports reporting, and brought a standard of relentless honesty and integrity to the air that influenced not only sports reporting, but all of broadcast journalism, even straight news. His most lasting legacy could have begun with his reporting of the tragedy of the Munich Olympics in 1972...when he assumed the role of straight news anchor and reporter, and did it brilliantly. It changed the style of ABC News forever. You can trace the development of the current look and feel of World News Tonight to the way Cosell and Jim McKay together covered that story live, hour after hour.

But Cosell also had a deeper influence on all of us. His honesty and courage, even willingness to place his career at risk for the sake of the truth, has inspired the best work of the whole generation of broadcasters who have gone after him. Most of us working in the business today never had the pleasure of meeting him...and some of those who did, will tell you he was not a man who suffered fools (or lazy men) gladly. I've been told by people who knew him, that he expected you to work just as hard, be as prepared, and be as honest and outspoken as he was---or else he didn't have respect for you.

But that's OK...maintaining tough standards for yourself, and demanding that others meet the same standards, is what leadership's all about. He was a leader in a business that needs them. Leaders sometimes step on tender toes, and don't get the appreciation they deserve until after they're gone.

>happened?
>
Sure do....

The Prescott translator is owned by Mike Ferguson. He's been rebroadcasting
us for about a year. I think KUPD is still in Prescott, but on a different
frequency.

Al Doherty, the owner of the Tuscon translator, approached us and offered to
rebroadcast KZON on his translator. He apparently got into some dispute with
KUPD. We consented, and he put us on down there. A couple of weeks later,
Doherty purchased the Flagstaff translator. We gave him permission to
rebroadcast us there as well.

Each translator operator is selling advertising in their city to defray the
operating costs (you're allowed one thirty second local insertion per hour).

KZON is allowing the operators use of one of its subcarriers to automate their
commercial insertion; they own and maintain the SCA equipment and are
responsible for selling and producing their commercials.

I work at a fox affiliated tv station in Hartford, Connecticut.

We could benefit by having a DAT machine, or the new Instant Replay hard disk recorder/cart machine from 360 Systems for music beds, and VO tags.

How do you feel about DAT for this use. I think it's fast enough.

Is Instant Replay a great thing, and worth $3k?

All responses appreciated,

I have a few pieces of equipment I want to know about, especially
from anyone who has used any of these items.

1. Tascam's BR-20 2 track open reel.
2. Denon's DN-650F compact disc player
3. Audioarts' R-16 console

On the Tascam open reel deck, is it simple and easy to access
the Bias/EQ calibration controls and is it easy to calibrate
overall? How is it's performance and reliability?

On Denon's CD player, any comments on performace, operation, etc...

On the Audioarts console, performance, operational, does it provide
jacks or wire terminals for the audio inputs/outputs as well as
remote start connectors (for fader start purposes)

Any additional comments, likes/dislikes of any of these items are
welcomed also. Anyone who has worked with any/all of these items,
is encouraged to respond. Please leave responses in e-mail only!!!
Respond to Robert573@dallas.relay.ucm.org

Also, if you have had a tremendous ammount of experience with any,
please indicate that in your e-mail. I may wish to field further
questions at a later time.

The station I work for is moving to a new facility later this year,
and I am doing some outside research for equipment. If you would like
to contribute any other equipment reviews for items not mentioned,
feel free to do so. Again I ask for response in e-mail, so as not
to clutter this publication any more than necessary.

Thanks!

Go find a good, sympathetic bookkeeper at your former employer's business operation. There's a program (I want to say COBRA for change of something something employment) that allows you to pay directly to the insurer to keep up your employer's insurance coverage for a generous period of time after you've quit. Though they may have screwed you by letting the time lapse, a nice number-cruncher deep in the personnel department may be able to find you a loophole or make excuses to the proper authorities.
I quit a disastrous attempt at sales at one station, kept up the insurance, and was able to go back on the same plan, employer-paid once again, when I was hired on the air at the same place a few months later.
Good Luck

IBOC Digital AM like htat used on KUSA-1660 in Las Vegas is Stereo. It's a full bandwidth 15 Khz Stereo. You can still operate in MONO AM will Transmitting the Digital Signal. However you cannot broadcast C-QUAM AM Stereo and Digital Stereo at the same time. But If you've got the Digital stereo who cares about C-QUAM.

50,000 watts. I know it sounds like more; that's because some stations
are directional, aiming specifically for a U.S. audience, and thus they
focus those 50kw into an array giving an effective radiated power of
150kw or whatever, same as the biggies in the U.S. do.

An article in the Wall Street Journal shows that Newt Gingrich is about to introduce legislation making it legal for foreigners to own stations in the USA. Since World War I when the Marconi interests were sold off to RCA the FCC has never allowed foreign interests to own broadcast stations. This is also the case in most other countries.

Readers will remember that Newt Gingrich also sponsored legislation allowing Murdoch's Fox network a payroll tax cut amounting to about $80 million.

Readers will further remember, that Newt Gingrich was the recipient of $4 million from Rupert Murdoch's Harper Collins publishers for a book containing the Constitution, various other public documents, and Newt's "personal observations" in it. So, now the conflict of interest people screamed about has come true.

} "M. Hale" <mh5260@cutter.ship.edu> Commented thusly...
}
} I was listening to the radio today and during the news the reporter said
} that Preident Clinton is suggesting that broadcasters might be
} responsible for the Oklahoma City Bombing. I think that he was
} suggesting that the propogation of extremist views is continuing on the
} airwaves and people listen to this and begin to beleive, etc, etc.
}
} I think this is somehat irresponsible for Clinton to say. Yes, there are
} people who worship the ground Rush broadcasts from just because he is
} Rush. And I know that a lot of other people take what extremists say as
} the word of truth because they don't know any better. HOWEVER, I would
} like to think that the majority of people have enough common sense to
} know what is right and wrong and to take this sort of stuff with a grain
} of salt.

I think that you are correct in saying that "The majority of people are..." however, it does not take a majority to carry out acts like this. it takes only a band of 'true believers' who are not too well wired.

Despite my disagreement with what is promulgated on much of talk radio these days (Not just Rush... he is the biggest player, not the only one) I cannot say that this *hate talk* (as Rich Wood so aptly calls it) is *responsible* for these acts. The perpetrators are responsible for their acts. However, the constant drum beat of scape-goat-ism, directing and focusing the anger of the populace at a 'group' or an 'ideology' as the reason for the problems they face, can and I believe does, give those already unstable and violence prone individuals in our country a feeling of group-think righteousness about their feelings that "[enter name of target group here] is responsible for the decline in [Morals, Jobs, Security, Civil Rights, Decency] in America, and must be stopped".

By celebrating the ideas that there is some external group (used to be the communists, now it is focused on illusory groups within our own culture) is 'responsible' for the problems we all face, it is easy to take blind hatred and direct it wherever one wants. It is very easy to persuade an already unstable mind that is looking for a scape-goat that [enter target group here] is the evil one and must be stopped.

No, Limbaugh (et-al) is not responsible for the problem. No he/they did not create the kooks in this world. But they have given a new-found sense of acceptance to the notion that someone *out there* is the villain. Whether that villain is the 'liberals' the

'democrats' the CIA or the Jews, matters little. It is a method of focusing public rage in certain directions.

I know I will get a dozen replies saying that "Talk Radio doesn't have the power..." . Why is it that we can accept the awesome power of propaganda from the (ex) Soviets or from Cuba, or from the Nazis of WW-II, but we shrug it off here in modern day America? Why is it that many of those who say that "talk radio doesn't have the power..." still assert that 'the liberal media' does have the power?

Propaganda DOES have power. It has the power to speak to a fringe minority and to give them a sense of acceptability, even a sense of martyrdom, righteousness and heroism for carrying out a strike against the "evil ones" who they have been told are the 'enemy of the people'. In cases where news is strictly controlled and biased (whether left or right leaning) the public's outlook and understanding is going to be skewed in one way or another. That is simple learning. US talk radio is not that pervasive to be in a league with Radio Moscow of the seventies, or Tokyo Rose. Todays propaganda is much more subtle. It never actually 'espouses' any violence... it may even give lip service to condemning it. But it speaks in subtle ways to those already pre-disposed to radical action, and gives a national forum of acceptance and tacit approval to those who would blame the worlds troubles on some 'group'.

} I could be way off base with what Clinton meant, but this type of
} suggestion is a bit unfounded, I think.

I think Clinton was right. Hate-talk is dividing our nation before our eyes and we cant even see it.

* William Pfeiffer

3346. WIVI, Eureka, IL & "Proud Mary"

Newsgroup: rec.radio.broadcasting
Date: 1995-04-25 00:00:00 UTC
From: ccarroll@nyx10.cs.du.edu
Message-ID: <3nihqj$o8q@vixen.cso.uiuc.edu>
Source record: 32432

Perhaps someone can explain this to me.

I was on a trip this weekend, with a few friends, from Madison, WI
to Urbana, IL (on Friday) and back (on Sunday).

Scanning through radio stations on Friday while driving down,
I found a station playing CCR's "Proud Mary." Good song, I
thought, and left the radio on that station.

Then they played it again.

And again.

Then they played a different version of "Proud Mary." (I think
it's Tina Turner, but I'm not sure. The one where the singer
announces at the start that she's going to start out "easy" and end
"rough.")

Then they played CCR's version again, at which point I got sick of
it and changed stations.

So driving back on Sunday, I came across the station--still playing
Proud Mary. This time I left it on, more out of curiosity than
anything else. I listened to this station for almost an hour.
(The other person in the car was asleep and didn't object, although
I probably scarred him unconsciously for life.) Eventually
the station faded out of range. But during that entire time,
they played nothing but Proud Mary; mostly the CCR version, or
sometimes the Tina Turner(?) version, and once in a great while
yet another version I didn't know.

The other odd thing is that during this entire time, there were no
commercials at all. They did occasionally broadcast station
identification--WIVI out of Eureka, Illinois. Also, they never explained
why they were doing this.

I did laugh at one thing. (This was more than half an hour after
I had been listening to it):

[Ring, ring]
"Hello?"
"Hi, could you play 'Proud Mary?'"

So, does anyone out there know what was going on?

BRAVO BILL!!!!!!!!! <not enough exclamation points available>

I am in the unfortunate position of loving radio and being a DJ at heart, but I get to build and sell automation systems. It is an unfortunate supply and demand situation. I gotta eat. Fortunately, I am pleased to say, console sales are at an all time high worldwide <at least for us> and that says to me that there are still DJs on the air.

Mark my words, please, I predict that networks and automation systems will eventually get hit with a backlash by consumers. I have friends, clueless about radio, who ask me about stations and sounds. They notice the automated stations. They notice the loss of local programming.

Automation can get a station on its feet, it can support a weak budget and it can run a station. BUT, it is not a radio station, IMHO, unless it has people on the air. Unless it has a DJ who flubs a mix and blushes on the air. Unless it has a news reader who flubs a line and falls off the mic laughing.

Please, don't get me wrong, I'll be happy to sell you an LPB SALSA automation system <blatant plug :-)> but I'm much happier to sell you a console for you on-air *staff*.

A good friend of mine in CA related a story of the horror he felt when he, the engineer, wheeled the new automation system into the on-air studio, knowing his friends would get canned. What can you say?

I kinda hate being stuck in this position. Quick, call the local college get some interns, anything, just get some people back in the studio!!

John Devecka
LPB <who is mentioned here only for reference>

ps. the guy who signs my check might get mad at the above statements. don't tell him, okay? thanks...

IO>someone replaced the Alan Freeds and the Johnny Hollidays of the world.

David,
Any air talent has to understand that, once on the air, they become
a product. No different than a toaster or breakfast cereal. If it sells,
they have a place on the shelf. If it doesn't, it gets replaced. Nothing
personal. That's a risk any performer has to accept.

Out here in the Bay Area a cursory listen to local talkshows indicates
that listeners aren't the least bit surprised the gun nuts went crazy. I
suppose in more conservative areas they might be looked upon as heroes.
There is much concern, however, that Clinton/Gingrich calls for increased
FBI powers and the resulting reduction in civil liberties is the wrong
thing to do.

IJ>not survive long without cash flow. It would take far too long for
IJ>managers to hire all new sales staff and combat the negative
IJ>publicity which would surely follow in the print media.

John,
Not likely. All this will do is add the sales staff to the unemployment lines. I could replace my sales staff in hours if I had to. Not because they aren't good, but because there are hundreds of people who would love the opportunity.

Personally, I don't give a damn what the print media says about me. Just spell my name right. I'm a firm believer in the concept that publicity, good or bad, enhances the ratings.

In most major markets, the air personalities make a great deal of money. My air talent makes anywhere from $175,000 to around $500,000. Add to that their percentage of the gross business done in their shows and you have people who don't attract much sympathy. Rumor hazzit that one network personality grosses $900,000 for 3 hours work per day.

Do you suppose the sales staff would rally 'round Howard Stern or Don Imus if they got canned? "Poor babies," they'd say. "How will they ever survive."

I'm afraid the real wimps in radio are the people who cuddle up to union security blankets and hide behind "the world owes me a living" attitudes.

I asked if you'd agree to a similar 10% severence requirement for people who sell their homes. You know, 10% to the kid who mows the lawn, the gardner, the paperboy, etc. After all, you're jeopardizing their security by selling the house. You didn't answer.

> > Rock On!
> > Pete

Pete....

If WINS mirrored KFWB, and there was some pressure to have all the stations
doing the same thing, the 22 minutes logo didn't begin until 1974.

At least, that was when the "new" Chuck Blore (cringing: I think) format
replaced the half hour format that was used until then.

Unfortunately, I can't find my old KFWB folder with the memos. If I do,
I'll try to put it up.

One more thing, and it is hard to know out here in the west: There are
different dates given in the various books, for the start of all news
at WINS. There was a 3/22/65, as well as 4/19/65.

Perhaps someone has the newspaper article to verify one or the other.
A reader on BROADCAST sent it to me once, but it was lost in the
"great crash of 1994"....

Today's letter comes from Paul Geary, who writes:

:>Cosell was a terrific sportscaster.......you had to appreciate his
:>honesty even if you found his style abrasive (which I did not).

As a teenager, I would occasionally visit the WABC Radio studios at 1330 Ave. of the Americas in NYC (Dan Ingram's uncle was a substitute teacher in my high school, so I had a cool "in").

One day I saw Howard Cosell coming through the 7th floor lobby. I introduced myself, then said something typically geeky like "Mr. Cosell, I think you're the best!" He replied "Yes, I am," without missing a beat, and walked away.

In retrospect, it seemed quite in keeping with his personality and image!

Cosell was a terrific sportscaster.......you had to appreciate his
honesty even if you found his style abrasive (which I did not).

BTW: It was a Dolphins/Patriots game during which Cosell broke the
news of Lennon's death. He had the nerve to say that it put the game
in perspective; i.e., not that important in the whole scheme of things.
Pretty gutsy thing to say to the MNF crowd.

Paul Geary, "Geary and Dunn," 5:30-9AM, 980 AM WCAP, Lowell, MA

WBCN Boston ran a tribute just after Lennon's death where they aired the
audition channel from Monday night football where the announcers are
arguing about whether to run the Lennon story or not. Howard argued against
it and then when the decision was made to run with it -- went on air and
really sold it. It really showed his professionalism.

Reply-To: ai227@detroit.freenet.org (Terry Carr)

I have accepted a position with RCS (Radio Computing Services) as MASTER CONTROL tech and installation specialist (phew), and will be exiting May 5.

This will leave an opening for an on-air Program Director. If you are interested, please send a tape, resume, and programming philosophy to:

Michael Boldt
WYSS-FM
1402 Ashmun Street
Sault Ste. Marie, MI 49783

PLEASE NO PHONE CALLS

WYSS (YES-FM) is a 26.5kw FM, Hot AC on the border of Sault Ste. Marie, Ontario and Michigan. It is rated by Arbitron in the Traverse City ADI and BBM (Canada's Rating Organization) twice per year.

The pay is good for the market size, and a PD has most control over the formatics. The PD will have many tools to work with from production to research.

WYSS just recently purchased a digital multi-track work station, a Yamaha Pro-mix 1 digital board and Minidisc capabilities.

Also New Hard drive studios are being installed from Dave Scott Studios.

Sault Ste. Marie is very small, beautiful, snowy, community oriented, old (3rd oldest city in the U.S.) and is growing very fast. If you like stability and scenery, as well as a good challenge, this may be your home.

WYSS is an equal opportunity employer. Females encouraged. Good Luck!

>}
I think President Clinton was reminding people that the freedom of speech carries some responsibilities along with rights. Using the "marketplace of ideas" metaphor, he reminded people that they should take individual responsibility to express their opposition to ideas they don't agree with. By not doing so, the opposing viewpoint goes unchallenged and can gain respectability. That is the whole idea of the marketplace, that through competition with other ideas, the best ones will win out and be commonly accepted. If those opposing arguments are kept under the rug, then the unopposed argument will gain more credibility.

The bottom line is that if we don't want the government to step in and tell what is right (which I certainly don't), then it is up to each one of us to speak out against things that are wrong. And I do believe killing people would fall into that category.

Probably what you were hearing was careless writing. Nothing I heard or
read suggested that Clinton said broadcasters were responsible. Your
interpretation is closer to what I heard. Radio news writing is so
condensed that, unless great care is taken, such misunderstandings easily
can occur.

The White House later also noted that the remarks were aimed at some
of the far-out shows that have been popping up on shortwave (shades
of "Red Lion").
:
: I think this is somehat irresponsible for Clinton to say. Yes, there are
: people who worship the ground Rush broadcasts from just because he is
: Rush.

The problem isn't with individuals, loudmouthed and ignorant as they may
be. The problem is with the overall programming of news and talk stations.
Their total output, in many cases, is skewed heavily to the right.
Moreover, that output is disrepectful or disdainful of other points of
view. There is no "agreement to disagree." If you do not agree with these
people, you are automatically wrong. That is not debate or discussion, that
is dogma.

Other points of view are inadequately represented or totally absent. The steady
hard-right drumbeat gives a false sense of consensus.

Also note that it's the people who don't bomb -- the fundamentalist
"Christian" haters -- who are so close to power they can taste it.
Those are the people of whom we should be scared. Note how many
radio stations *they* have.

Read Margaret Atwood's "The Handmaid's Tale" --
fiction that gets scarier by the minute.

Turn off your radio and think.

Eric Rager wrote:

: Oh, that's right. I keep forgetting that radio listeners are helpless
: little pawns in the host's hands.

It certainly appears that way. I was listening to KGO radio when they harped on Proposition 13, the first tax cut initiative. Knowing how people previously had voted for taxes to support things like schools, roads, etc, then hearing KGO (ABC is a major property owner in California) rail in favor of it, then see Prop 13 pass by a huge margin, makes me think that talk show listeners are as whacked as talk show viewers. Even today, 15 years later, KGO still takes pride in having passed Prop 13.

In a previous article, bobs@primenet.com (Bob Stahley) says:

> AIRWAVES SPREAD SEEDS OF VIOLENCE
> E. J. Montini

[..... much drivel deleted .....]

> They preach hatred of the government, hatred of the
>president, hatred of those who support freedom of choice or gun
>control or human rights. Hatred and suspicion and anger.
>
> They do it very well. Listen to Rush Limbaugh or Ken
>Hamblin or G. Gordon Liddy or Bob Dornan. Hate sells. Even
>better, at least for them, hate pays.

Seems to me that the whole point of this article was to foment hate for conservative talk show hosts. Even though I often don't agree with Rush Limbaugh, for example, I have never once heard him say anything that might be construed as encouraging anyone toward violence. Sure, he might encourage you to vote a certain way, but that's about it.

I think it is really despicable when liberals attempt to use the OKC bombing as an excuse to rail against conservative radio talk show hosts as a group. If a specific host has been making irresponsible statements that one thing, but let's not kid ourselves that there have never been irresponsible liberals (think about some of the anti-war protest groups in the '60's, who were decidedly liberal and decidedly capable of violence. Or what about the environment groups that spike trees? That is also a terrorist tactic on a smaller scale, and most environmentalists are political liberals). Hate hold no particular political view, and you can find both right-wing and left-wing hate mongers.

As far as I know, we don't even really know the politics of the people responsible for the OKC bombing. I wonder what the people who are starting to call for further restriction on our freedom of (political) speech would say if it were discovered that the terrortists were staunch Clinton supporters.

Please, I implore those of you in the broadcasting industry not to get caught up in any movement that would restrict freedom of political speech. Someday we will have a conservative president again and you might like to have the right to criticize him, too!

I just fear that we're on the verge of a knee-jerk reaction to OKC that will further erode our constitutional freedoms, and irresponsible articles like the one I'm replying to are fanning the flames for this.

Jack

Sedge Thomson's West Coast Live
San Francisco's Live Radio Show to the World
Show Schedule
1995 April 26

1. Overview:
2. We moved our Internet Facilities:
3. Dolby Surround Broadcasts:
4. The Upcoming Schedule:
4.1. April 29th:
4.2. May 6th:
4.3. May 13th:
4.4. May 20th:
4.5. Other shows to be announced.
4.6. July 1st:
5. True Fiction Magazine Internet Mail List:
6. Special Offers:
6.1. Internet Free Ticket Offer:
7. Downloading Additional Information:
8. How to Reach West Coast Live:

1. Overview:

This is the weekly schedule for West Coast Live, San Francisco's Live Radio Show to the World (actually just public radio). Each week we give away two free tickets to the live show by a drawing over the Internet. Read below for details.
Live shows are broadcast from the Cowell Theater at Fort Mason in San Francisco, at 10am Saturday mornings.

2. We moved our Internet Facilities:

NIC approved our domain name of wcl.org, so we have migrated from NETCOM to QuakeNet. We now have our own domain name, HTML home page, anonymous FTP, simplified e-mail addresses, and our Internet mail list.
For more information on QuakeNet, send a dummy e-mail note to;

INFO@quake.net

3. Dolby Surround Broadcasts:

As soon as Fort Mason installs their new mixing board, West Coast Live will be broadcasted in Dolby Surround. The new board has arrived and should be installed soon, very soon.

Listeners who are equipped with Surround decoders will be able to appreciate an audio experience similar to that of an audience member in the Cowell Theater.
For further information about Dolby, listeners are encouraged to telephone Dolby Labs., 8:30am to 5:30pm (Pacific) at (415)558-0200 or e-mail at:

info@dolby.com

Please mention West Coast Live when requesting information, and your name will go into a regular drawing for a Dolby Tee shirt!

4. The Upcoming Schedule:

The live shows have been selling out lately, so we've had to turn potential audience members away at the door. Please ensure your seat by calling the office at (415)664-9500 to make a reservation. The reservation phone is open 24 hours a day. Remember that the best seats go early.

4.1. April 29th:

The parking lot is expected to be crowded due to Cynthia Hobgood's birthday and the San Francisco Garden Show at Fort Mason, so arrive early to enjoy spacious parking and a cup of fine caffeine.

* Penelope Houston, singer.
* John Allen Paulos, author "A Mathematician Reads the Newspaper".
* Peter Finger, guitarist.
* Ginu Kamani, author of "Junglee Girl".

4.2. May 6th:

* Clarence Clemmons, the big guy from the E Street Band.
* Thomas Keneally, author of "Schindler's List" and "A River Town".
* Guerrilla Girls, masked female artists.
* Bonnie Loyd, the urban geographer.

4.3. May 13th:

* Adrian Legg, guitarist.
* Arlie Hochschild, author of "The Second Shift".
* Meredith Tromble with a view from the studio.

4.4. May 20th:

* Didgeridoo masters Stephen Kent and David Hudson.
* Pete Anderson, guitarist.
* Claire Peaslee, naturalist.

4.5. Other shows to be announced.

4.6. July 1st:

Celebrate Canada Day with West Coast Live at a special remote broadcast from the High Sierra Music Festival at Bear Valley, California. For more information concerning the festival call 800-594-9171. Early discount tickets are available.

* Guests to be announced.

5. True Fiction Magazine Internet Mail List:

True Fiction Magazine is now connected to the Internet with their own mail list. If you wish to be kept up to date on True Fiction Magazine tour dates and general discussion, send a dummy e-mail note to;

True_Fiction_Magazine-Request@netcom.com

6. Special Offers:

6.1. Internet Free Ticket Offer:

The first person who sends e-mail correcting a spelling error in this mail message will win two (2) free tickets to this week's live show. In case I don't make a spelling error, corrections to grammar will be accepted.

6.1.1. Rules:

The contest begins each week as soon as the moderator sends this notice to the West Coast Live Internet mail list.
Contestants must be subscribed to our Internet mail list.
The winner will be selected based on the time the entry was sent, and no later than 48 hours prior to the live show. In other words, at about 10:00am on Thursday.
The e-mail must be addressed to:

DRAWING@wcl.org

Entries are limited to one entry per person each week.
The winner will be notified by e-mail.
If the winner can't attend this week's show, the winner must assign the tickets to a couple of friends.
The moderator's selection is final.

7. Downloading Additional Information:

To receive an auto-reply containing information about West Coast Live and our Internet presence, send a dummy e-mail message to:

INFO@wcl.org

8. How to Reach West Coast Live:

A couple of SPFLD changes..

KZPF 92.9 is on the air from Ozark Missouri (about halfway between Springfield and Branson) with a satellite fed (Branson network, I think) country format. They were listed in the 93 M-street as a CP with 3kw at 328 feet. Signal is quite good throughout Springfield, but fades in the hills north of town. I have not gotten any reports as to its signal in Branson, but considering the mountains to the south it cannot be much better (of course I don't know how far south the antenna for the station is. The station calls its self "Springfield's Top Gun" The format is upbeat, and sounds quite good.

As mentioned before KWTO-FM (98.7 Springfield 100kw @ 600') is doing classic rock under the name 'The Buzzard'. Playing some fresh classic cuts, but it is still in transition from their old Rock-99 format. KWTO seems to be vying for the "revolving formats" award here. They have gone from rock to CHR to acoustic AAA to grunge AAA and now to classic rock, all in a little over a years time. Be nice if they would decide on something. KWTO is a tribo with KWTO-AM [Talk - Local and syndicated (Limbaugh/Bohannon/Williams/and others)] and KTXR EZ-listening AC. Owned by media giant Ken Meyers.

In response to KWTO's move, heritage rocker KXUS (US 97) has gone from their predictable "Dinosaur Rock" mix to a 'best of the old best of the new' format. Still sounds pretty much the same, though..

CHR Rimshot KHTO Hot 106.7 is doing a much better job lately. They have added a LOT of CHURBAN and dance as well as some decent air talent. Their 25kw @ 325' signal comes from Mount Vernon,. some 25 miles west of town. They call themselves KHOT, even though their calls are KHTO, which are mumbled at the top of the hour. KHTO is a duopoly with KZBE, a classic-hits outlet in nearby Pleasant Hope (50kw @ 500'). KZBE has made the quantum leap from 'good time rock and roll' to 'classic hits' (wow talk about taking chances) last month. Other than the addition of some sixties oldies, the sound is pretty much the same.

Boliver's KYOO (am 1200 1kw D) owner Mel Pulley supposedly has a CP for 99.1 with 25kw. Heard something on there today with an AC format and the positioner 'cool 99,1' but no calls. Signal is too weak to be from Boliver, which is some 18 miles to the North of Springfield.

Christian noncomm KWND (88.3 12kw @ about 500') was on the air with program tests a couple weeks ago. KWND (The Wind) was taken off the air because of some kind of legal problem with previous owners. No

word on when KWND will go back on the air full time.

Still nothing from dark KIDS (1340 1kw-U) radio. KIDS was a locally produced children's radio station which was taken dark by owner Jeanne Kramer last year after a rocky and some would argue, mismanaged 3 years on the air. Would be nice to see Radio AAHS pick this signal up. We could also use a full-time news outlet here.

That about sums up the matter.

* William Pfeiffer
* Moderator/Editor rec.radio.broadcasting/AIRWAVES

From cwhitman after a rocky and some would argue, mismanaged 3 years on the air. Would be nice to see Radio AAHS pick this signal up. We could also use a full-time news outlet here.

3367. Washington, D.C., Radio Watch

Source record: 32325

***** The ratings were just released on April 25. I have not yet seen them but will post them as soon as my source get them to me.

On Tuesday's Don & Mike show Don mentioned that WJFK dropped from 5th place overall to 16th--a huge drop for Infinity's "shock talk" station. The only WJFK show that didn't drop was Don & Mike's. In the 25-54 age group they're still number 1. With men aged 18+ they're also #1. And in Baltimore, they finally hit the number 1 slot with men 25-54 with a 7.6 share. They're also number 1 with men 25-34 with a 15.6 share. A far cry from D&M's first book at WJFK AM in Baltimore, where they only got a 0.1.

***** Many have commented, locally and nationally, on the President complaining about all the conservative talk show hosts who have been acting irresponsible lately. On the nationally syndicated G. Gordon Liddy show, Liddy described--in detail on the day of the blast, the kind of bomb he suspected was used in the Oklahoma mass-murder. He also described exactly how such a bomb is made.

On the day after the Oklahoma blast, he confirmed that he was indeed correct in his guess as to the type of bomb used. And once again he described how such a bomb is made. Later in the show someone faxed him a complaint stating how irresponsible it was of him to describe how to create a bomb. He then recapped "for those who weren't listening earlier" exactly what he said earlier in the show. So, three times in two days after the blast in Oklahoma, G. Gordon Liddy described in detail how one could make such a bomb. Illegal? Of course not. Irresponsible? I think so.

***** Business radio is coming back to Washington. On May 1 WCPT AM 730, which currently airs CNN Headline News audio, will become WBZS "Business Radio 730."

The station, owned by Viacom, has hired Steve Chaconas to be program director and morning host at the new business station. Chaconas comes from WPGC AM 1580 in Washington, which was pretty successful for Infinity broadcasting, but Infinity decided to switch format in January to test a new hip-hop format.

In addition to Chaconas, Joe Clark and Keith Archer, former WPGCers will be rotating the midday shift. And Stan Thomas, former assistant PD at WPGC-AM joined WCPT in the same position. He'll host the afternoon drive shift.

The new station will keep CNN news which will air at the top and bottom of each hour. Financial updates will air at :15 and :45.

And local stocks will be discussed at :26 and :56.

In AIRWAVES #1298 Mark Lennartz wrote:

Being "good" isn't enough to keep you in demand anymore. Duop's and Trombo's make your chances of being "good enough" for the *corporate* ear slimmer with every transaction. WE sponsored this expansion out of our own pockets.

There's some truth to this, but the real problem remains, too many stations! Look at a market like mine, with a metro population of about 350-thousand and at last count, at least 25 radio stations. (I can't keep track any more). Only the three or four biggest operations are making any significant money...all duopolies. More than half are losing money.

Here's what happened when our company got into the duopoly business. We bought a second FM, and put our AM on satellite 24 hours a day, losing all local programming except news. However, we took the second FM off satellite and hired an air staff for it. Result--a net increase of three fulltime and two partime jobs for the three stations.

It's all really simple. Union or no union, air talent won't make any money if the station isn't profitable. With the number of stations we have now, it is not possible to operate profitably without duopolies. The number of stations has increased much, much faster than the revenue available to support them.

Of course,duopoly wasn't the ideal solution. Ideally, the FCC would have simply let the weak stations go broke and go off the air, and then revoked the allocations. (Actually, the true ideal would have been that Docket 80-90 never existed and neither did all the AM's they shoehorned into the band to interfere with each another in the past 15 years). But as long as we have an FCC that cares more about how many times Howard Stern says "penis" than about keeping the spectrum in shape, I guess duopolies will have to do.

Even with duopolies, we have too many stations! If there's a gas station on every corner, no gas station makes a profit. If there's a radio station at every point on the dial--same story! This is, after all, a business. The proliferation of signals has turned broadcasting from a business that competed on service to one that competes on costs. That is never good for working stiffs--just ask anybody who works for Xerox in El Segundo, CA, where this week they're voting on a new union contract--20% pay cuts immediately and no raises for the next seven years, in order to keep the plant from closing.

< SNIP Discussion about Home close to AM Tower >

People build close to Radio Towers all the time then they complain about the inteferance problems. I doubt that are so close that the tower could fall on them. Tower heights can be deciving. A 250' tall tower look big from the ground looking up at it. But that same tower if layed out on the ground would not appear near as big.

As to building on the Radials. I would be real suprised that an AM station would allow anything built on the radials. That's in effect distroying the antanna system. I have seen things like parking lots built over the radials which distrowed the signal in that direction.

If anyone can tell me how to contact Bill Crawford, I would greatly appreciate it. This bio is from an out of
print book he co authored called "Border Radio", which documents the superpowered Mexican am stations
that broadcasted to the whole North American Continent in the 30s 40s, 50s, and 60s.

"Bill Crawford is producer of the syndicated radio show Asian
Communique. He is also a video producer, writer and former radio announcer.
Harvard-educated, he served his broadcasting apprenticehsip at an "easy
listening" station in Midland, Texas. He produced the music video "Gomer
Pyle is God" as well as news clips for MTV. He lives in Austin Texas."

The title page also mentions that the book
was first published by the Texas Monthly Press in Austin -- and the book
does read somewhat like magazine articles put together. I am hoping to locate some audio archives of XERF
from the 30s through the 60s.

I have a couple of programs that I wrote that I could modify for you. Send me some more information on just what you want the program to do. The fields are easily put together. What I need to know is if you want any special type of out put.

When I put the database together it automatically has search fields for Title, Artist, Length. If you want more than this please let me know such as show Titles by Length, or show Artists by Length.

Also let me know how I can get the program to you.

Hi William...Research is not always evil...I've seen people who've kept their jobs BECAUSE research said they were hot, when the conventional station wisdom (or management wisdom) was that the people in question stunk and should go. Research made management rethink their position and swallow their pride and go with the audience flow.

Also, good research is always locally based. It should always be the people in your community who are being surveyed. If the research company is using outside results, it just won't work. I've been through many research studies since I first came to Detroit in 1977 and they've all involved local samples. The belief then as now was that you can't trust the record trades for accurate information so you'd better do local research.

Now, what sometimes happens is that management will do their own take on the results. It could be that the PD personally believes that more music works while research is showing the opposite (usually research says the audience doesn't want to hear babbling DJs after 9AM <g>)or the PD hates a certain record or artist and will NEVER play them, no matter how good it/they perform in data.

These are all things that should be considered in this debate. I've been in radio 23 years and have found that the best research is usually accurate. And you can trust much of what it says...just be careful who is interpreting it and how it's used!

Gut reactions still happen, for those who have "golden guts". Golden ears will always help. But what we really need are more people with good radio in their head. Folks who know instinctively from experience what makes sense. They are too few and far between these days. I've seen many people come and go while I've been in town and I can count just on two hands the number of people I've encountered, out of hundreds I've worked with, who really had a clue.

> It'll be interesting to see if the show syndicates well. She may be
> successful on KFI where she follows Rush on the hottest Talk station in
> the city, but there's a big question as to her success on stations
without > that huge foundation.

No offense, Rich, but I think you've been reading your own promotional
literature too long. Fact is, in only 9 months Dr. Laura has risen to one
of the top 5 rated national talk shows on radio. She can be heard on
metro stations in 15 of the top 25 markets including: KFI AM/Los Angeles,
WJR AM/Detroit, KRLD AM/Dallas, WSB AM/Atlanta, KFYI AM/Phoenix, KFMB
AM/San Diego, KIRO FM/Seattle, and WTIC AM/Hartford-New Haven. In the
fall Arbitron book, her audience increased in all of the above-mentioned
markets where she was on for the full book (KFI, KFMB, KIRO and WTIC). In
the case of WTIC, she increased the A25-54 AQH in her timeslot by 80% , on
KIRO she doubled the A25-54 numbers and in KFMB, going head-to- head with
Rush Limbaugh, she took the station from a 3.0 share to a 5.9 share 25-54.

Dr. Joy Browne has done a very good job, over the years, but has never
attained the above-mentioned successes, and certainly not in a mere nine
months. In fact, according to our research, Dr. Laura not only has
surpassed Dr. Joy in ratings, but now the Dr. Laura Schlessinger Show has
more than two times the exact time audience as the Dr. Joy Browne Show.

Dr. Laura was featured on Friday 4/21 as the only guest on Oprah for the
entire hour and was profiled on Eye-To-Eye with Connie Chung in March
(where Connie called her "a cross between Rush Limbaugh and your mother").
Dr. Laura's appeal is in offering a relationship program based on family
values and personal responsibility and challenging her listeners to take
charge of their lives. ("Go Take On The Day" - Dr. Laura.)

I appreciate that the Dr. Joy program is a quality show to market, and
that Dr. Joy has been a positive addition to scores of radio stations
throughout the country, but I would request that, before you resort to

negative sales tactics that you please check your facts, first.

"I'll show you mine, if you'll show me yours!" :)

I worked for KFWB in the 70's and there was a long running "in-joke"
about the folks who continued to call and request records after the
format switch ... which they did for months.

"We'll have that on for your right after the news" was the stock reply.
We would joke about how, if they ever changed format back to music, they
had a lot of Elvis and Beatles requests upon which to make good.

And, no ... I don't (and didn't) have a beard.

3381. The Sad Tale of KWK St. Louis

Newsgroup: rec.radio.broadcasting
Date: 1995-04-26 00:00:00 UTC
From: transvox@interstate.net
Message-ID: <3nmhfq$n9n@vixen.cso.uiuc.edu>
Source record: 32339

To Midwestern radio history buffs, the O.J. Simpson trial is nuthin' compared to the legal proceedings that caused the owners of KWK in St. Louis to lose its license back in 1966.

Broadcasting magazine in its November 7, 1960 issue announced:

FCC invites KWK into its woodshed
Revocation hearing to study complaints about station contests

The Federal Communications Commission (FCC) had gotten complaints from KWK listeners about two "treasure hunt" contests promoted by the station.
According to the Broadcasting article:
Prizes in these contests, said the FCC, were not hidden until late in the contest period and "consequently it was impossible for any person to find the prize during a substantial portion of each period."

There were other accusations of fraud, including a charge that the station kept its special contest phone line busy on other station business about "half the time on regular station business," so contest winners wouldn't be able to call in within the allotted time to claim their prizes.
KWK's president, Andrew Spheeris, denied the charges. Spheeris and associates bought the station in 1958.
Three weeks later, KWK asked for an expedited hearing, saying, "this unprecedented proceeding has subjected Station KWK and its owners, employees and sponsors to the most adverse publicity ever inflicted upon a broadcast station." (Broadcasting, Nov. 28, 1960) By the time, the FCC staff had asked that the hearings be delayed from December to January.
Naturally, the American legal system proceeded at its usual blinding pace and the hearings finally started in September of 1961.
KWK general manager William L. Jones Jr. became the focus of controversy. Spheeris and associates said Jones had planned the contests without their knowledge.
In addition, KWK sales manager Don Hamel had said Jones ordered him to hide the prizes only hours before they were found, in one case during the last day of a contest, and accused Jones of ordering him (Hamel) to lie about it to Spheeris and FCC inspectors.
On the other hand, Jones said Hamel "volunteered" to hide the first prize, but he didn't remember when that happened. Moreover, Mr. Jones testified he talked with Mr. Spheeris about holding a treasure hunt. He said he knew "we discussed the problems of early discovery" and said "I know we

decided to hide it later in the hunt." (Broadcasting,
Sept. 25, 1961)

Jones told KWK attorneys that the first treasure hunt contract with sponsor 3-V Cola was for four weeks with no guarantee about when the prize would be found. But he could not remember any specific statements Spheeris might have made about hiding the prize late. Jones testified that when he learned an FCC investigator was coming to the station, he and Hamel "agreed to keep our stories the same," by saying the prizes were indeed buried the first day of the contest. During 1961, Jones said he talked to Spheeris numerous times about his worries concerning the contest. At one point, a secret meeting was set up in Milwaukee, where Spheeris, et al. also owned WEMP, but nothing ever came of it.

Spheeris testified that he learned of the late prize burial in March 1961 from Hamel and ordered an investigation. The FCC counsel introduced a subsequent letter that contained these written notations by WEMP's corporate secretary, "AMS [Spheeris] fed to gills with WLJ [Jones]. Thinks we should fire if FCC lawyers get together on Monday and decided he's fly in the ointment. Inferred has lied re time of capsule." (Ibid.)

After a hearing examiner initially decided not to revoke KWK's license, the commission voted for a recovcation in May 1963. The commission had established, in a case where the license of Los Angeles-area station KRLA had been revoked, that an absentee owner is to be held responsible for misconduct of a station manager.

Hearing Examiner Forrest McClenning had "found that the contests had been fraudulent, but that the KWK owners were not aware that they were so. Mr. McClenning decided that the fault lay with KWK's former vice present and general manager, William Jones Jr. (Mr. Jones died in May 1962)...." (Broadcasting, June 3, 1963)

After the decision, the FCC received more than 60 letters asking the commission to reconsider. Broadcasting also noted that Jones "was mistakenly reported as deceased in the June 3 issue." (Broadcasting, June 10, 1963)

According to the magazine report, "many of the letters suggested that it should be the former general manager who is punished and not the licensee." The Missouri House of Representatives also passed a resolution asking the FCC to reconsider, noting KWK had broadcast "frequent editorials since August 1961."

(Ibid.)

By that time, the ownership of KWK and WEMP in Milwaukee had passed into other hands, but they still had to deal with the revocation issue. KWK appealed the action to the District Court of Appeals in Washington, saying the station had not been given adequate warning before revocation procedures had begun.

At the hearing,

Mr. [Arthur] Solomon [KWK lawyer] said that there is "no evidence" that fraud occurred. He said the court had only the

commissions "naked assertion" -- no findings that could be reviewed. In his brief, he had also argued that the clues broadcast before the last day were so "vague" as to be meaningless and, therefore, could not have caused the public to look for the prize.
However, Judge [Warren] Burger referred to testimony given during the commission hearing that, on the last day of the second contest a "near riot" had occurred in the park where clues had indicated the prize was located. [I believe this was Forest Park -- MR] (Broadcasting, June 1, 1964)

The court upheld the FCC, the FCC refused to reconsider, and the U.S. Supreme Court declined to take the case. On April 5, the FCC invited applicants to apply for the frequency. Sixteen applicants responded. (Broadcasting, June 7, 1965)
One of them was WBEL, South Beloit, Ill., which asked the FCC to restrict KWK's nighttime coverage to eliminate severe interference from KWK (at 1380 kHz) on WBEL's 1390 kHz frequency. This may in fact have been the factor causing KWK's nighttime coverage to be severely curtailed after KWK went off the air altogether in 1973, as reported by me and others in AIRWAVES.
By February 27, 1966, a new corporation had acquired the station. Don Hamel reamined as general manager. (1967 Broadcasting Yearbook)
Vic-Way Broadcasting acquired the station in 1969 and by early 1973, it was off the air altogether.
After a four-year journey through the FCC, Doubleday Broadcasting was able to put KWK back on the air in November 1978 from two new sites, one in South St. Louis county for daytime coverage, one on Kaskaskia Island for nighttime coverage. The station, which previously had 5,000 watts fulltime, directional only at night, now was limited to 5,000 watts daytime, 1,000 watts nighttime, with separate day and night patterns.
Doubleday clearly saw that an FM partner was required for success in the market. Top-40 giant KXOK(AM) was clearly crumbling by that time, with FM progressive rocker KSHE(FM) and Top-40 upstart KSLQ(FM) growing steadily.
Doubleday bought nearby WGNU-FM, based in the Illinois part of the St. Louis metro area, in March 1979. Doubleday *wanted* to call the station KWK-FM, but made do with the "Stereo WK" slogan and calls WWWK(FM) until it won a court case fighting the FCC's denial of the KWK-FM call letters in 1982. (Broadcasting, Aug. 6, 1979; Sept. 10, 1979; Broadcasting Yearbooks for 1982 and 1983).
The KWK calls were lost when KWK-FM became WKBQ(FM) in 1988. Since 1983, KWK(AM) had the calls KGLD, KASP, WKBQ (!), and now KRAM.
The FM calls are no longer on the original 106.5 frequency, having been swapped with Zimmer Broadcasting's WKKX(FM) at 104.1 when Zimmer formed a duopoly with KASP, WKBQ, and WKKX on New Year's Day 1994.

>If WINS mirrored KFWB, and there was some pressure to have all the stations
>doing the same thing, the 22 minutes logo didn't begin until 1974.

WINS was the first station to switch to an all-news format. Group W (Westinghouse Broadcasting) then moved the format to other stations it owned ...KFWB in LA and KYW in Phila. Don't know the exact dates. There are a number of people in the company who claim to have come up with the phrase "You give us 22 minutes and We'll give you the world." Consultant Bill Scott
(formerly WINS and then Group W news director) claims he thought it up. He later took the phrase to the short life of Group W's Satellite News Channel. It was SNC that prompted Ted Turner to create Headline News. Turner later paid Westinghouse a huge chunk of money for SNC which then evaporated.

93.7FM in Fort Smith, Arkansas, (I forget the call letters) covered it all
afternoon on the day of the bombing. I think they had a live ABC(?) news
feed. I was in my car here in Fayetteville at the time and loved it.
Ended up listening to it most of the afternoon. I was very impressed by
their decision.

The obvious irony is that in today's radio environment, this would
be a niche format: "radio for people who like variety"! I wonder what
the target demo would be? Certainly, a lot of people who read this
news group would be potential listeners, but with some education, it
might be surprising who else would listen.
By the way, a station in Denison, TX (about 70 miles north of Dallas)
tried this for several months last year. The station was KDSQ, 101.7
FM, the only station in North Texas that played both Elton John & Rupaul's
version of "Don't Go Breaking My Heart" and Wing's "Band on the Run".
Unfortunately, the owners were not willing to invest in the station,
and it had serious transmitter problems for much of the time, so who
knows how well it could have worked...

3387. Quality Hate News

Newsgroup: rec.radio.broadcasting

It is interesting to see the thread bounce back and forth about which talk radio hosts have caused the most hate, and taken the most self-serving position after OKC.

However, there is a point buried in Wyatt Cox's Press Release.

Far too many news folk are so starved for a "beat" that they will broadcast anything, just to be first with the latest. The erroneous ID of Palestinians (singly or in multiples) is just one example. And whether or not some "official" said, implied, or otherwise hinted "arab" is not the issue.

Radio news ought to be more than the National Enquirer of the air.

Radio newspeople ought to get off their butts and learn facts, rather than rush to the mic with the latest AP item, or something they heard on a scanner.

Old Tucson's studios burned this week. The cause has yet to be determined. However, we have been told 40% was destroyed, 70%, 51%, 90%, all of it, and two-thirds. Estimates of dollar loss ranged all over the board.

Is it so important to be "first" that the facts are left behind? Why not wait for the fire to be put out before reporting on the extent of damage? Or is the statement "we'll bring you more information when we receive it" (often stated as "if more information comes in, we'll try to bring it to you") really saying "we've said what we were told, and we've got to go to lunch, so unless the wire services change the story, this is it."???

Why not wait until the perpetrators of a crime are solidly identified before asserting in your radio voice: "Police are looking for three arabs" or "middle eastern types". By the way, Jews are also "middle eastern types" ... and Persians fit as well.

As displayed this past week, a number of "public" figures ... even sheriffs will say anything to get media attention to their line of thinking. In Decker, MI, we see a "minister" among others, advocating a view that the government is lying all the time.

The media have the most potent power available. They can ignore gossip.

Yes, I already hear the replies: "We have a free press" "There was no malice intended" (One might recall a movie based on this premise) "We issued a correction".

Maybe those of you who broadcast material uncritically ought to start out your broadcast "It was suspected today that I beat my spouse and children in a drunken rage".

.... was that before or after you mooned your boss?

>} bombing as an excuse to rail against conservative radio talk show hosts
>} as a group.
>
>Jack:
>
>Do you find it equally dispicable when conservative talkshow hosts
>rail against all manner of progressive thought and denounce those who
>hold such thoughts "as a group"?

I think one of the major problem we have in communicating with each other
is that we tend to catagorize people, and encourage them to catagorize
themselves. For example, I consider myself as conservative on many issues,
but not on all. In fact, on a few issues I think the position taken by
the liberals comes closer to being the correct one. This means I really
can't belong to either camp, because I would hold some aberrant views
according to those in either camp.

So, yes, I am uncomfortable when either group shows total intolerance for
thoughts associated with the other group. I've personally felt the lack
of tolerance that goes along with thinking for onesself on any given issue,
rather than just buying the "party line" hook, line and sinker.

But what I was referring to as despicable was the idea that some would use
a tragedy such as the OKC bombing as a means to further their political
or social goals. For example, to try and somehow hang the blame for this
tragedy on all conservative talk show hosts, even though I suspect that
a majority of those hosts have never advocated violence against the
government, or anybody else for that matter.

>Do you find it at all troubling when you listen to a fair, but
>conservative program like Bohannon and hear caller after caller

>mid-eastern in decent? Note I am not suggesting that Jim Bohannon
>hjeld these views, in fact he refuted them, but a LOT of callers were
>perfectly ready to "Kill innocent people' in retaliation for "killing

>of innocent people"

Yes, I do find that troubling. Those people were jumping to conclusions, although it's worth pointing out that some of the major media people were also speculating about a possible middle east connection. In any case, every talk show seems to attract a few nut cases of this type. We can only hope that they are never elected to public office, or put in charge of a large stockpile of munitions!

>} If a specific host has been making irresponsible statements
>} that one thing, but let's not kid ourselves that there have never been

>} irresponsible liberals
>
>Does that matter? Are you saying that because there are irresponsible
>liberals (and Lord knows that there are) that it excuses the right
>from being responsible?

No, I'm just taking issue with the smear against all "conservative" talk show hosts, and pointing out that some liberal talk show hosts could be equally irresponsible. I'm NOT trying to excuse ANYONE who is actually acting irresponsibly, just saying that we shouldn't practice "guilt by (political) association" here.

>} Hate hold no particular political view, and you can
>} find both right-wing and left-wing hate mongers.
>
>True, but the right seems to be in control of the vast majority of the
>talk radio stations at the moment. And I have never condoned hate
>from the left. Political Correctness (as Rush has aptly caled
>Political Cleansing) is a prime example of left-leaning intolerance.

If the right is in control now, it's a very recent phenomenon, and I would say that the main reason it has happened is that people who hold conservative viewpoints do not feel that their views are being fairly or accurately represented by the major (television) media. So these people turn to radio for news and information, and station managers hoping to turn a profit are eager to accommodate them.

If you lumped radio and television together and simply called it "the broadcast media", then IMHO the left not only has control of the majority of the stations, but it has control of the most influential part of that media (television).

>} As far as I know, we don't even really know the politics of the people

>} to call for further restriction on our freedom of (political) speech would
>} say if it were discovered that the terrortists were staunch Clinton

>} supporters.
>
>Clinton is among those calling for greater FBI powers.

I realize that. And I'm not sure this is a good thing. Granted, I'd rather see the FBI have increased powers than BATF or a couple of other federal agencies that seem totaly out of control (IF some of the reports can be believed), but I'm also uncomfortable with the idea of giving up any more of our freedoms to the FEDERAL government. That, however, is probably a debate for another newsgroup, and in any case my mind's not firmly made up on this yet. I don't distrust the government as a whole the way some folks seem to, but I do feel that there is not enough accountability and review of previous actions among certain federal agencies. Perhaps the new congress will give some attention to the matter of over-zealous government agencies in the next year or two. On the other hand, we do need to be able to gather intelligence on the true terrorists among us. It's a very delicate balance; you don't want the laws so restrictive (against the government) that terrorists can operate with impunity, but you also don't want the government trampling on the rights of basically honest citizens.

>} I just fear that we're on the verge of a knee-jerk reaction to OKC that

>'liberal' to lump everything he dislikes into one big trash bag for
>easy disposal.

Well, that's one reason I don't personally much care to listen to Rush anymore. He gets an idea in his head and if you oppose him, you are just plain wrong and that is it! And I wouldn't like that treatment from any host of any talk show. But at least Rush takes calls from those who disagree with him, and is usually polite to them, unlike some local talk show hosts I've heard. I don't think Rush is really the problem, it's all the "Rush-wanna-bes" that don't quite have it down right. Rush is opinioniated but in a free society, you should have the right to hold an opinion and not have to back down on it just because it's not politically popular. I think there are much better talk show hosts than Rush, but (and here is the key) they are not as entertaining to listen to. One reason Rush has such a large audience is that whether you like what he's saying or not, he's not boring to listen to. I'm not sure that a "kinder, gentler" Rush would pull in the ratings, and in that case he wouldn't be on anywhere near the number of stations he's on now. This may make some statement about the taste (or lack thereof) of the American listening public, but for station managers and program directors, the size of the listening audience is all that really matters, and Rush pulls 'em in.

Didn't Rush try to use this tragedy for his own gain on the day after it happened, going into a tirade blaming liberals for the bombing? Man, what a hypocrite.

Ed Janik
--
In January, former vice president Dan Quayle spoke at a training conference of religious-right activists in Fort Lauderdale, whose theme was "Reclaiming America," and before the event began he stood at attention as the crowd of more than two thousand rose, faced a flag with a cross on it, and, with hands on hearts, recited in unison, "I pledge allegiance to the Christian flag, and to the Savior, for whose Kingdom it stands, one Savior, crucified, risen, and coming again, with life and liberty for all who believe."

Jack Decker (aa931@detroit.freenet.org) wrote:

: Seems to me that the whole point of this article was to foment hate for
: conservative talk show hosts. Even though I often don't agree with Rush
: Limbaugh, for example, I have never once heard him say anything that might
: be construed as encouraging anyone toward violence. Sure, he might
: encourage you to vote a certain way, but that's about it.

...in a continuing attempt to make sure this thread stays on r.r.b.
topics (rather than sociology as a whole)...

I agree with this statement. I am a very infrequent listener to teh RUSH
program, although I listened more frequently when I had the time. I'd
say I tune in to one or two shows of his every couple of weeks.

I'd characterize his rants as this:

1) The Clinton administration is bad for America because...[insert
insult/comedy here]
2) We need to send him a message by not supporting policy X
3) We need to defeat him and his like in '96!

I've never heard a rant of Rush's include anything about death, that a
person doesn't deserve to live, etc.

If someone does an evil act, and claims Talk Show Host X helped motivate
them, does that make Talk Show Host X in any way responsible?

Before you answer that, consider these:
1) Is Jodie Foster in any way responsible for the shooting of Ronald Reagan?
2) Is Heavy Metal music that contains direct references to death,
suicide, drugs, hating parents, etc. in any way responsible for the
suicides and occasional parent murders that occur?
3) Is Rap Music that condones violence responsible for violence?
4) If an evil person who commits an evil deed claims the Bible inspired
him to carry out an Apocalyptic plan, does that make the Bible inherently
responsible in any way?
5) Hate groups are more active on the Internet than on the talk radio
airwaves, is Internet somehow responsible for the Okla City bombing?
6) Is Bill Clinton's anti-Vietnam-War stand in the 60's somehow
responsible for the violent anti-war protests then?

My answer to the above is no. We must face our society's proddings with
our own character. These questions all hold parallels with many people's
reactions to this
tragedy. Evil people exist. Our society must prove that these people
are punished.

Bombings and tragedies have occured since the beginning of time (that includes the time before radio was invented :->) Let's blame the actual perpetrators for their crimes for once, instead of looking to Radio, upbringing, TV, music, etc. for accomplices.

As many liberals and conservatives have always said in opposing censorship: you can always change the channel. Let's avoid censorship of all kinds for Constitutionally protected speech on the radio.

David A. Kaye (dk@crl.com) wrote:
: Eric Rager wrote:

: : Oh, that's right. I keep forgetting that radio listeners are helpless
: : little pawns in the host's hands.

: It certainly appears that way. I was listening to KGO radio when they
: harped on Proposition 13, the first tax cut initiative. Knowing how
: people previously had voted for taxes to support things like schools,
: roads, etc, then hearing KGO (ABC is a major property owner in California)
: rail in favor of it, then see Prop 13 pass by a huge margin, makes me
: think that talk show listeners are as whacked as talk show viewers. Even
: today, 15 years later, KGO still takes pride in having passed Prop 13.

Prop 13 was a state-wide initiative. KGO is a NoCal station. KGO
probably didn't have ratings enough to "pass Prop 13". I'd like to think
that proponents of legislation such as Prop 13 can promote their cause
and convince people of the rightness of their cause without it being
likened to the Okla. City bombing.

The logic in the quoted paragraph above shows a relationship, but not a
truly causal one:

1) PROP 13 Initiative written, moderate/little support
2) KGO doesn't support PROP13
3) PROP 13 starts gaining momentum...
4) KGO begins supporting PROP 13.
5) PROP 13 passes

Your Conclusion: "It appears that the masses are mindless puppets in the
hands of talk radio." That is absurd.

If fact, given your statement that KGO changed it's position on PROP 13,
maybe Talk Radio is a helpless pawn to their listener's wishes!
Ahhh...but that would counter our President's theory.

[Direct from the wire (via clari.net). Draw your own conclusions.]

WASHINGTON (AP) -- Talk show host G. Gordon Liddy said Tuesday he gave listeners bad advice when he told them to shoot for the head if attacked by federal agents. Instead, he said, go twice for the body and then the groin.
Liddy declared ``I've never heard hate radio'' but steamed ahead with his provocative brand of talk after a broad attack by President Clinton on ``things that are said regularly over the airwaves.''
Liddy joined other talk show hosts in denying the anger voiced on some programs might drive people to perverse acts like the Oklahoma City bombing.
Last August, Liddy counseled ``head shots'' to respond to an encounter with agents of the Bureau of Alcohol, Tobacco and Firearms, because ``they've got a vest underneath.''.
...
Liddy also confirmed that at a family outing at a rifle range last July 4, he drew stick figures on targets and named them Bill and Hillary.
``Thought it might improve my aim,'' he said. ``It didn't. My aim is good anyway.

You may have caught my strong anti-censhorship views on this topic earlier. As a recap: I don't think talk radio should be blamed for "mind control" of helpless listeners.

That said, let me state how I think I should respond to "hate-talk" hosts. Examples follow:

Today, the LA Times quotes G. Gordon Liddy with the following quotes.

1. Liddy acknowledged that at a family outing, he drew stick figures on targets at a rifle range and named them Bill and Hillary. "Thought it might improve my aim" he said.

2. Liddy also expanded on his view that if agents of the BATF burst through the door, the suspects inside should shoot them in the head because "they've got a vest underneath." Liddy added that if a head shot doesn't work, "then shoot to the groin area"

What kind of staements are these? These are patently ridiculous! I never have listened to Liddy before, but I call on those who do to add to this thread and help us "shame" Liddy and the stations that carry him. If these quotations and summaries are out of context...well it would be hard to imagine them being, but please state that as well.

I think stations that carry garbage like that should receive no censorship, but SHOULD receive pressure from listeners and the free market (i.e. advertisers AND the poor ratings resulting from chaning the channel) to carry something a bit more decent. I dare say many Liddy listeners are for the same tactics to stop profanity, etc. on TV, so let's use the same tactics against such diatribe on the radio.

Anyone else have thoughts on Liddy?

What radio stations actually carry this guy? None in L.A. do. I think KOGO AM 600 out of San Diego does.

IS>> When you break it down even further you have to note that even the
IS>>music isn't local. It was recorded somewhere else. I'm sure Whitney
IS>>Houston doesn't hop around from station to station to sing all those
IS>>songs live and local.

IS>You better believe she (and most others) do!

IS>I'm don't know your background, Rich, but I can tell you that having both
IS>worked local and national, local is the heart of radio, and is the
IS>backbone of stations that carry syndicated programs. Ever WOR needs to
IS>keep a local flavor (and they do a good job at it) to keep successful.

Jack,
This is great news! Singers are actually singing, live, on every radio
station that uses their music? Wow! I'd sure love to be American
Airlines. Or at least a travel agent! Or, their doctors.

The "local flavor" a station should keep is its service to the
community. That means a relevant news department. Some Disk Jockey
playing recorded music and reading liner cards is hardly what I call
"flavored." In talk, a local Talk Show host bashing Hillary is no more a
service to the community than a syndicated host is.

Rich

Where do I begin my search re: viability of stating a small for profit station in extreme Northen NH. With so many of the formats brought in via sattelite or aimed at nearby cities (Portland, ME) I'm convinced a "local" station could find it's place if it can be done on the cheap.

How do I find an engineer who will do a cheap study to tell me if a frequency is available?

How do I find out potetnial equipment costs? Nothing state of the art is needed here.

How can the FCC or NAB help me?

Other sources?

Thanks!

William, throughout history we have all had to step back and take a broad look at what automation does to our society. I have had people tell me that a single bulldozer replaces 100 men with shovels. I have responded that a single shovel replaces 100 men with teaspoons!

In all seriousness, we can all look forward to the day, perhaps not in your or my lifetime, where human beings no longer need to work all day in order to earn a living. As we get more efficient, the time will come when it is no longer practical to have every one working because the labor of a very few will provde the goods and services needed for the entire race. Is this a limited view? I don't think so. It just reflects a new type of thinking that will have to emerge.

With radio, we have some down to earth problems. I had a dream of owning a radio station when I graduated from college. 12 years later that dream became a reality when we threw the switch putting a small station on the air in a very small and rural Iowa town. There was no reliable automation, at least nothing I could afford, and so my wife and I worked 15 hour days selling advertising to keep that station going, and employed a staff of 7 full time people. After 13 years, we sold the station and started this automation company. Today, a station like ours can run on only 1 person. Towns like ours that were in grave danger of losing radio service can retain it, because you can run stations for far less money.

That's what we have contributed to small market radio. I really don't have anything against the disk jocky, just the fact that many small operators can't afford them, and we can give them an alternative.

The last point is that the DJ's that have waded this far into the internet are the ones that are going to make the transition! You would be amazed at the broadcasters that are totally illiterate around a computer. We might remove a few jobs running a board, and replace them with a new kind of broadcast employment where computers do the work, and human beings create - the thing they do best.

Our visions of the future of broadcasting may be different, and neither of us can say which is valid. But I see automation and computers as extending the life of a threatened media called radio, and giving it a place in the 21st century.

John Schad

We've been toying with putting together a web page for WEXP. I'd be interested in hearing from other stations that maintain their own page. What are _your_ goals in creating a page? What kind of feedback have you gotten from people who've visited your site? Did you write the code yourself, or hire someone to do it for you? If you hired someone, what'd you pay? What do you pay (if anything) to maintain your site? Extra charges for disc space? What's your experience been like with your internet provider? Who's your provider? What's your URL?

Feel free to answer me privately, or post responses here.

Thanks!

>the AM station's tower, which is still there. I had always thought
>that towers couldn't be located in such a way that they could fall on
>any structure, and I am pretty sure this new home violates that (does
>the fact that the home was built after the tower make any difference?).

I deleted a bunch more stuff here.....

Seems that most of the rest of your questions would be addressed by some sort of zoning board. I've got no expertise there. However, as far as a collapsing tower goes, a properly designed and erected tower will twist in on itself as it falls. If everything works as planned, the entire structure of the tower SHOULD stay within the radius of the guy wires.

3404. Antenna for Transistor radio?

3405. Canadian ID regulations

Newsgroup: rec.radio.broadcasting
Date: 1995-04-28 00:00:00 UTC
From: richw@mks.com
Message-ID: <3nq5mb$hjc@vixen.cso.uiuc.edu>
Source record: 32252

Here are excerpts from some material on Canadian broadcast station ID's which I obtained a few days ago from the Kitchener office of Industry Canada.

The reference to an "accompanying number designator" in the following has to do with numeric suffixes appended to a single call sign used by both a primary (originating) station and secondary stations that spend more than half their air time doing simultaneous rebroadcasts of the primary station.

Rich Wales, VE3HKZ <richw@mks.com>
Kitchener, Ontario, Canada

==========

[General Radio Regulations, Part II, Section 118]

The holder of a broadcasting transmitting technical certificate shall, during any time that the broadcasting station for which that certificate was issued transmits a radio signal, identify the broadcasting station at least once every hour on the hour or within 10 minutes thereof, or at the beginning and end of a program where the program lasts longer than one hour, by a voice announcement in English or in French that

(a) articulates each letter and states any accompanying number designator of the call sign of the station; and

(b) names the principal city or community that is served by the station.

In the case of a television broadcasting station, the voice announcement may be replaced by a visual announcement of not less than three seconds in duration that identifies the call sign assigned to that station and the principal city or community that is served by that station.

A broadcasting station or network that originates programming shall identify at least once every day . . . a station that is licensed to rebroadcast the programming.

There's one other aspect of the CJBC situation. If that station is ever shut down, either through budget cuts, a move to FM (which a lot of the SRC network is doing these days, and there IS still one open FM channel in Toronto at 99.1) or, God forbid, Quebec separation, then CFRB gets to move to 860. They were shoved off that frequency in the 1940s to make room for the CBC station. (CBC could do that in those days, since they had the regulatory power that's now given to the CRTC.) If that station ever closes or moves, the frequency passes back to CFRB with a non-directional 50,000 watt license. They can then sell the 1010 license (50,000 watts but directional and protecting WINS in New York) to anyone who wants it, or cut a deal with WINS that will allow it to go to class I clear-channel status as well.

Don't know if or when that will happen...the current owners of CFRB may not even be aware of it. And the CRTC can always renege on the deal and put 860 up for grabs to the highest bidder (in which case I'd bet on CHUM to win the contest, they have the deepest pockets and the biggest staff and broadcast facilities in Toronto outside the CBC itself).

At the risk of being of the minority opinion, and comming from a station where we use donuts at the top of the hour, and punch jingles for the weather, I'm going to vote for punch jingles, but punch jingles that are done right.

Everyone talks about the thrill of hitting the post, but the number of times I've heard jocks (and, yes, even been guilty of) babbling wothless nonsense just to fill those last few seconds... a well constructed punch jingle (easier said than done) executed in the hands of a skilled jock sounds amazing AND eliminates the mindless repitition of the donut. Sure, good punch jingles are hard to do, and poor ones seem to be the rule, don't underestimate the power of doing them well.

From: markp@ksgrsch.harvard.edu
Message-ID: <3nq5me$hjg@vixen.cso.uiuc.edu>
Source record: 32255

I have the perfect solution to getting rid of dull, bland, repetitive, overly researched music radio. Simply stop listening to it. I did. I don't listen to anyone's best mix, morning zoo, favorite hits, or best oldies. And do you know what? I don't miss it at all. Except for the non commercial band, I haven't listened to FM for almost two years. It's the same thing as not buying a product you don't like. If sales drop enough, the product will go away. If enough people just stopped listening to this pablum, you would see it change in a minute. But if "Where Did Our Love Go" still sells after thirty years, why pull it off the market?

Just a thought,

The following message in Spanish was received from FIRE, the Feminist International Radio Endeavour. FIRE is a project of Radio for Peace International, an international shortwave station based in Costa Rica. For information about FIRE or RFPI, contact them via email at rfpicr@sol.racsa.co.cr

The latest information I have available says that RFPI can be received on 7385 kHz with an ordinary shortwave radio and on 9400 kHz, 15030 kHz and 17905 kHz if you have a radio capable of receiving upper sideband broadcasts.

English Summary:
~~~~~~~~~~~~~~~~
May 1st, 1995 will be FIRE's 4th anniversary. Since its beginnings in 1991 FIRE has maintained relations with the women's community radio movement and has had an enriching association with AMARC's women's network.

Because of this relationship, FIRE will be celebrating its anniversary with a live program in which they invite women from the Americas to call them on May 1 between 10:00 am and noon and between 6:00 pm and 8:00 pm Costa Rican time.

Women radio broadcasters from Latin America can call them collect at (506) 2491821. Women broadcasters in the United States, Canada, the Virgin Islands, Puerto Rico and the Bahamas can call the toll free number 1-800-404-7374.

You can also send faxes or email messages ahead of time to fax (506) 2491095 or by email to rfpicr@sol.racsa.co.cr

Texto completo en espanol:
~~~~~~~~~~~~~~~~~~~~~~~~~
Amigas: con mucho agrado y orgullo compartido con todas ustedes, les anunciamos que el lunes 1 DE MAYO es el 4to aniversario del Programa Radio Internacional Feminista. Fue el 1991, en un dia tan significativo para las trabajadoras y trabajadores del mundo - Dia Internacional de trabajadores - cuando por primera vez salimos al aire. Desde entonces, el mundo de onda corta no es el mismo: las voces de las mujeres, las perspectivas nuestras, nuestras experiencias y nuestras esperanzas irrumpieron en la inosfera para rebotar diariamente,y ser capatadas en al menos 100 paises del mundo. Siempre hemos sabido, y difundido el hecho de que una de las bases que le dieron fuerza y sustento a esta iniciativa desde el inicio ha sido el movimiento de mujeres de radios comunitarias. La relacion de RAIF con la Red de Mujeres

de AMARC nos ha enriquecido en ente trayecto de 4 anos. Es por eso que queremos celebrar este proximo aniversario mediante un programa en vivo de llamadas internacionales de cada una de ustedes, donde nos hablen de lo que hacen, de lo que es RAIF para la Rede de AMARC, y saludos en nuestro aniversario.

Esperamos sus llamadas desde donde esten ese dia! Llamenos a cobrar, al (506) 2491821 desde cualquiera rincon de America Latina. Desde Estados Unidos, Canada, las Islas Virgenes, Puerto Rico y las Bahamas nos pueden llamar al 1-800-404-7374.

Las transmisiones de llamadas en vivo las recibiremos entre las 10:00 am y 12:00 am, y entre las 6:00pm y 8:00pm en Costa Rica.

Por adelantado puden ademas enviarnos faxes de saludo al (506) 2491095 o correo electronico al siguiente apartado: rfpicr@sol.racsa.co.cr

Por supuesto que nuestra PREFERENCIA es que nos llamen en vivo! Las esperamos al aire en coneccion directa. Kata, Maria y Nancy.

3410. KACD/KBCD Change format

Newsgroup: rec.radio.broadcasting
Date: 1995-04-28 00:00:00 UTC
From: mstrand@delphi.com
Message-ID: <3nq5mg$hji@vixen.cso.uiuc.edu>
Source record: 32257

KACD (Santa Monica, CA) and KBCD (Newport Beach, CA) simulcasting on 103.1 change from "easy listening jazz" to "Hot AC" on Monday, April 24 1995. This consists of 1 hour blocks of 70's, 80's, and 90's hot hits. They had kinda of a weird switch over. On Saturday the 24th they did a remote from a local car dealer and then about 1pm went into about 48 hours of the Beetles with 5-6 minutes of ad blocks. This leaves KTWV (94.7) the only easy listening station in the LA market (I think).

Regards,
Mike

: What radio stations actually carry this guy? None in L.A. do. I think
: KOGO AM 600 out of San Diego does.

I have to follow-up on my own thread. A station in San Bernardino,
California has apparently canceled it's airings of the G. GOrdon Liddy
show. My source for this is the Tom Leykis show.

That sounds like pretty good news. If I owned a radio station, I would
be glad to have and exercise the right to carry what I wish. If I want
all-right radio, I should be allowed to have it. BUT< if I want to
cancel the G-man! then I should be able to.

This is good news. I'd like any Liddy listeners to comment on other
stations that carry him and other staements of his so we can expose this
crap (IMHO) publicly. He doesn't deserve to be censored, he deserves to
be exposed to the public in his own words.

Rich:

Thanks for your post..I understand you're support of Dr. Browne
and I ca appreciate it.
I must tell you however that Dr. Laura is a very hot property and
many stations, including wtic, wsb, wjr and other 50kw's have jumped
aboard and I don't hear too many of their now 100 plus affiliates having
second thoughts.
For us, Dr. Laura has generated more calls, more mail and more
street talk than any program, local or syndicated, since Rush hit the air.

Dr. Laura's growth on wtic has been nothing short of stunning,
naturally, I'd like to think our station's strength and popularity has
certainly helped.
I wish you continued success with the entire network line-up and
perhaps we'll get an opportunity to meet and share war stories some day.

Sincerely,

Paul Douglas
Manager, Programming
WTICAM1080
Hartford.

With all due respect to Rush (although I have little respect for the man)...the term "Left Coast" has been in use for quite awhile, especially among those of us from the "Left Side" of New York City.

Rush may have broadcast the phrase "Left Coast" to the largest number of stations, but he certainly didn't "coin" the phrase. He probably first heard it from the same place I did...WBAI's Simon Loekle.

3419. Broadcasting and OKC Bombing

Newsgroup: rec.radio.broadcasting

IH>I think this is somehat irresponsible for Clinton to say. Yes, there are
IH>people who worship the ground Rush broadcasts from just because he is
IH>Rush. And I know that a lot of other people take what extremists say as
IH>the word of truth because they don't know any better. HOWEVER, I would
IH>like to think that the majority of people have enough common sense to
IH>know what is right and wrong and to take this sort of stuff with a grain
IH>of salt.

IH>I could be way off base with what Clinton meant, but this type of
IH>suggestion is a bit unfounded, I think.

Mike,
I agree that it might have been a foolish thing to say. However, you have to view it in context. Talk radio today makes its living bashing the president. If someone in East Armpit slips in the shower, it's Bill Clinton's fault.

In my view, Talk Radio is so virulently one-sided that there's virtually no opportunity to discuss anything positive the president might do. I hardly think he's great president, but no one can be that bad. The unfairness of it all is demonstrated by Talk Show hosts completely ignoring the abuses, hypocrisies, the pork and the immoral acts of the Republicans while lambasting those very same qualities in Democrats.

I would suggest that Newt Gingrich is every bit as immoral, hypocritical, and unethical as Bill Clinton, yet I'll never get to hear about it anywhere in any even medium-rated Talk Show.

Hour after hour. Day after day. Week after week it's the same ol, same ol. I wouldn't be a bit surprised if some Talk Show host finds a link between Hillary and the Oklahoma bombing.

What made Clinton's comment so foolish was, first, that he's already riding high in popularity because of how he's handling the bombing issue. Second, as a percentage of the population, there are so few people listening to any single radio format that it's a waste of his time to even consider it.

From: dsheldon@netcom.com
Message-ID: <3nq5mq$hk4@vixen.cso.uiuc.edu>
Source record: 32267

In our last episode, Showjack was heard to say:
: Rich Wood was heard to say:
: > When you break it down even further you have to note that even the
: >music isn't local. It was recorded somewhere else. I'm sure Whitney
: >Houston doesn't hop around from station to station to sing all those
: >songs live and local.
:
: You better believe she (and most others) do!

You mean all those years I was playing records, carts, and CDs that I could have simply gotten Whitney to fly in and sing her songs every few hours? Well darn, I wish I had known that earlier...

Local _is_ the heart of radio, but that comes in the selection and presentation of the programming...not necessarily in the origin of the programming. I'd bet that a *good* LOCAL morning show would routinely beat Howard Stern hands down. (At least a few do here in Dallas.) But even only pretty good morning shows beat Tom Joyner... and he's syndicated from right here in Big D! Local does not always equal location.

Hi,

As a librarian working in this "nub of the northwest" PA, I have a question that I thought your list might be able to help. I've had a request to track a periodical entitled "Talkers Magazine" and the only other info I have is an editor by the name of "Michael harrison." This info came from another article, who quoted Mr. Harrison as editor of this publication.

Have any of you heard of it? Anyone able to give me info for subscription purposes? Can anyone describe its focus, or shall we say objective?

If you can respond to me directly, I'll be glad to forward any answers that I get back to the list. Thanks for any/all help.

I, too, have wondered about this. Is there an easily attainable database
that could be used to translate the barcode on a CD or Record into useful
data?

A friend of mine has about 5000 LPs and around 1000 CDs. He used to have
them in racks in alphabetical order. The Northridge quake's epicenter was
about 6 blocks from his house. His albums haven't been in alpha order
since. One of these days (we keep saying) we're going to get those albums
organized again. It would make this job easier if we could just use
a bar code wand to collect information about all his albums and have the
computer tell us the alpha order.

>
> Fred Honsberger
> KDKA-Pgh. PA

Fred,

You're at it again, aren't you? Re-writing history from your rather
odd perspective.

While Westinghouse was (and is) indeed a major force in all-news radio,
it *was not* first. There were a couple of stations in California that
you have conveniently forgotten. True, WINS is the longest running
all-news operation on the air, but that isn't what you write.

Furthermore ... being inside Westinghouse ... you have the resources.
Why not contribute more to everyone than "Don't know the exact dates"?
We can already say that.

How about something like this:

First All News format: On 5/16/60, KFAX San Francisco began an all news format.

Longest running: WINS news continues since 4/19/65.

Fred,

I like Westinghouse. Even worked there for a while. But that doesn't make
it first in everything.

regards

I mixed up the stations. KSL was the station I usually listened to. I also heard the Nitecaps on KVOO Sunday nights when KCBQ left the air for maintenance. Sorry for the confusion, it's been many years :-)

[Article crossposted from fl.politics,cybergate.politics,fl.announce,cybergate.talk,cybergate.adamsworld,fl.news,fl.general]
[Author was D. Citron]
[Posted on Thu, 27 Apr 1995 15:34:19 -0400]

PC Guide editor Harvey Gordon and technical writer/journalist David H. Citron (citron@reply.net) will be featured guests on Adam's World, Monday morning May 22nd, from 9 to 10 AM. Topics will include computers, publishing, and the Internet. Citron, an author of user manuals, online help, and articles in consumer magazines, newspapers, and trade publications, has appeared as a guest and as a guest host previously on Adam's World. Business and political resources available on the 'net were discussed.

Adam's World is a daily radio show, heard on WWNN (980 kHz AM in south Florida) from 9 to 10 AM weekdays. The host is Adam Clatsoff of Adcahb Life Group. Frequent topics of discussion include business, politics, health care, and insurance. Guests have included people prominent in business and politics.

Adam's World fans on CyberGate have their own Usenet newsgroup: cybergate.adamsworld.

The May issue of Success Magazine features "Selling In Cyberspace", an eight-page information-packed excerpt from Vince Gelormine's forthcoming Internet Marketing Blackbook.

...From the New On The Internet newsletter. (For an instant copy of this newsletter, send an e-mail note to new.on.the.net@reply.net. No message or subject is required) It will arrive in your e-mail mailbox within minutes!)

Perhaps I heard a different president this week. The one I heard resisted the temptation to grandstand or bluster, but advised Americans of good will to speak up and refute hateful speech and ideas individually, using their own words and ideas to reiterate that this is a country of respect for individuals and ideas, not hate for groups on the left or right.
I see and hear the national media carefully checking their sources, avoiding group condemnations, and putting out only verified facts about the investigation and arrests of suspects, the suspects' own statements and the unedited comments of groups with which they may be affiliated.
There will always be an audience for commentators who frame ideas in simple terms and sneer at those they oppose: there is a crying need for thoughtful dissemination and debate of the complex issues and events we live among. Sneering and name-calling are not a proper forum for discussion of vitally important issues.
We need to understand who attacks citizens and institutions of this country, and why. Posing as an injured party, cynically stirring emotions to a higher pitch, or using this terrible event to float a particular agenda, are not going to forward the rational discussion of how a civilized society operates, and how to heal the sores of hateful behavior. This is too important to use as a soapbox for more shouting.

Yes folks, this is niche programming at its best! They probably spent 50,000 bucks on research...and the final decision was that there was a hole in the market for an all-ProudMary station. Heck, I could've told them that for HALF the price! ;)

There are some high-end audiophile types that claim that vinyl records (and tube amps, and gold cables, etc.) actually sound better than the CD stuff.

I've never been able to appreciate the superiority (if any) of vinyl records on any equipment I've been able to afford. Your mileage may differ . . .

Outside of the high-end audiophile market, (and used record collectors) I've noticed nothing but CD's and cassettes in most music stores lately.

After reading several posts under this topic, I start to wonder if maybe people who are trying to become DJ's, are being scared out of it, because of radio station automation.

If this is indeed the case, I want to make a few points. For starters, automated radio is not a new concept. It dates back to at least the early 70's. The only thing that is possibly "new" about automated radio, is the range of technology available to execute such a format.

Automated radio does save money for stations who are on very tight budgets, especially stations serving small markets. But automated radio can still retain a local sound, if you do the right things. Also, with automated radio, the owners have more assurance that the station is legally operating, in terms of power limit requirements, doing station ID's legally, etc... I'll comment on those aspects in a moment, but first...

My mom has a cousin who at one point worked in radio, in the 70's. I had a chance to visit the station he worked at. Of course I was only a young child, but I still vividly remember a lot about it.

There were actually two stations in this building. One was an AM, and the other was an FM. The AM station actually had a DJ spinning records. But guess how they did the FM station...

If you said it was automated, you are correct. It was a fully automated FM station. And there was even a computer in there running the whole show. Actually the computer was only used to fire off the open reel tape decks and the carousel cart machines.

They would take the tapes which contained the music, and copy them, and they would stick in voices over some of the intros. Other localization was on carts.

I am sure some of you who have been in the business for years and years, have seen setups similar to these. My point is, that the only thing changing automated radio, is the technology.

So if you fear that you won't be able to ever find work in radio, because stations are going automated... I think a greater fear to have, is how to survive on such a low paying job...

Only a few jocks actually make radio a fully succesful career, and that is primarily due to finding a gig in a major market station such as on the morning and afternoon drive... But how many jocks do you personally know, who have been that lucky?

I have been in radio for almost 8 years. I have only been a paid staff member for about 4 1/2 of those years. I am making so little ammount of money, that eventually I am going to either have to find more work, or find a better radio gig. The later will be tougher.

This is the very reason why my mom's cousin got out of radio. It just wasn't a financially stable career choice.

Despite that the hours can be long, and the pay is rather low, I am having fun doing what I am doing right now. Radio has been a very big part of my life, and it has always been my dream job. Therefor I think it's safe to say that if radio is what you want to do... you CAN do it. It's just a matter of being at the right place at the right time. Just be prepared that this is a very low paying business, especially when you are just breaking in to it.

Station automation won't necessarily reduce your chances, in my humble opinion, if you really want the work. But it could make finding a radio job more difficult...

Heck, where I am working, the station was designed to be fully automated. But it's an NCE station which is owned and operated by a public school system. They train high schoolers on the basics of radio, and even give them an FCC test, before they can get their FCC license. This is actually, in my opinion, good! Because I have met a few DJ's who got their license just by filling out the form, and didn't even have a clue that the legal station ID has to be done in a certain way during the certian time frame, they had no clue about the power limit range, they didn't know anything about conducting EBS tests, let alone what to do during a real emergency. That's scarry!!! Would you trust them with the $$$ worth of equipment and an x-mitter? I am glad I obtained my license the hard way... It gives me a very satisfying feeling that I indeed know what I am doing, and can be trusted to keep a station operating legally without any supervision. Makes me wonder if this is one of the reasons why more and more stations are going automated, don't you think?

IM>If AFTRA is a lame duck, its because WE LET IT BECOME a lame duck. WE LET
IM>IT BECOME a weaker negotiator. WE LET IT BECOME a powerless enforcer.

Mark,
We also let it lose touch with reality. At WOR we had 155 engineers
20 years ago. As the format evolved and equipment improved we no longer
needed two people to push two buttons. We didn't need one man to run the
board while another cued a disk. The union disagreed. Show me, today,
how any station can survive with that kind of productivity anchor.

IM>Being "good" isn't enough to keep you in demand anymore. Duop's and
IM>Trombo's make your chances of being "good enough" for the *corporate* ear
IM>slimmer with every transaction. WE sponsored this expansion out of our
IM>own pockets.

Frankly, it's none of the union's business what stations a company
buys. It's the union's responsibility to find a way to adapt to it in
the interests of their members. They don't. Duopolies are legal. I don't
like them much, but they're legal.

As the opportunities to make a profit get squeezed, the largest
expenses become targets. When I have to compete with lean, hungry,
aggressive non-union stations with union employees whose goal in life is
to get the biggest paycheck for the least amount of work, I'm dead in
the water. While I'm "negotiating" with a union employee to get his
permission to ask him to do a job, my non-union competitor has already
done the job and is on to his next competitive attack.

When a union employee becomes a boat anchor, the business is in
trouble.

>AM 730, which currently airs CNN Headline News audio, will become
>WBZS "Business Radio 730."

>The station, owned by Viacom, has hired Steve Chaconas to be
>program director and morning host at the new business station.
>Chaconas comes from WPGC AM 1580 in Washington, which was pretty
>successful for Infinity broadcasting, but Infinity decided to
>switch format in January to test a new hip-hop format.

Will they ever get enough power at night to be heard past the Beltway? I enjoy listening to this station on my ride home from work to Northern Virginia but the signal fades seriously about 15 miles outside of the District. They are going to need to get permission to boost their signal if they are going to compete with the big boys (WMAL, WTOP, WRC, etc.).

Shaun Maher

[Moderator's Note: This station has 5000 watts days and 20 watts nights with a DA-2 antenna. Imagine having to change patterns at night when you are already going down to 20 watts!! Bill]

WBZX, The Blitz (Columbus OH) now on WWW. Check it out at
http://www.wbzx.com Leave E-Mail for Suzy Waud. She's my wife and will
get a kick out of it.

By the way, The Blitz kicked serious ass in ARB (#2 12+). I'll post
the break downs in a day or two.

ID>thing to do.

David,
The more civil liberties are restricted, the more fuel these groups
will have. They've formed out of a fear that their liberties will be
taken away. Now the government proposes to do just that, to all of us.

Take the combination of the religious right wanting to limit our
liberty on "moral" grounds with the government wanting to limit our
liberty "for our own protection" and you've got critical mass that hits
every citizen directly.

Noble Broadcasting has agreed to purchase WSPD (AM1370), and 101.5
(WLQRFM), from Stockpole, Inc., of Pennysylvania. They are now waiting
for approval by the FCC. Noble expects approval within the next two
weeks. Closing of the sale would be within 30 days following approval,
even though Noble could take conrol before closing through an agreement
called LMA (Local Marketing Agreement) by the end of May. No plans
however to change either of the stations as of yet.
So, If you are keeping score at home Noble Broadcasting Group now
owns 3 station in the Toledo Market: WVKS, WSPD, WLQR.

Yes, it has happened!!! I won a chance to be guest DJ on WVKS 92.5
Kiss-fm this Friday night from 10:15PM- Midnight!! Although I am not
expecting a contract out of it, it will be my first chance at something I
have always wanted to do, and pursue a career in!!!!!!!!!! :)

: Frankly John, I *am* impressed with your technical prowess in
: creating the Swedish system.

: However, that having been said, I believe that it is a thought-system
: like yours which is at the heart of the ruination and degradation of
: the radio industry and many other industries as well. If fellows
: like you had your way (and it looks as if you will in time) the only
: people in radio would be the owners, the hardware/software
: manufacturers (and their support people), and, maybe, the sales staff.
: Although I am fairly well convinced that those in the "I trust the
: machines more than the people" crowd would love to find a credible way
: to eliminate even the sales staff if they could. After all, why pay a
: commission if you don't have to, right? Isn't the bottom line the only
: thing of importance.

An automation system such as the one John put together would never(and
would probably not be expected to) replace real radio in the larger
markets. I believe it's probably intended to provide a higher quality of
broadcasting in rural areas and smaller markets than can be achieved on
the available revenues. $700 per month cannot draw a "good" announcer.
However with an automation system like this, a small station can utilize
the BIG talents of the networks. The only people who loose out due to
small market automation are the fellows who are unable to develop the
necessary on-air skills to move into the larger markets where automation
is not and will not be needed.

And your next argument might be that the small markets are where they cut their chops.
College radio should be
that area to learn in.

: If fellows
: like you had your way (and it looks as if you will in time) the only
: people in radio would be the owners, the hardware/software
: manufacturers (and their support people), and, maybe, the sales staff.

I recently quit a job as PD/ Morning drive, where we were live 4 hours every morning and on ABC/SMN the toher 20 hours. The automation was a great assett not only in providing the station with quality broadcasting while we were on sattelite, but during my morning show as well. All of the audio is digital, the ingenoius design of the system allowed me to have all my prerecorded bits, news and weather at the touch of a button, I could record phoners instantaneously to the hard-disk and play them back without rewinding. It was the first Digital Audio/Automation system I worked with and I was very impressed.

: I hope that such a vision is never realized, although I am aware that
: there are many, monied interests who would are actively perusing it,

Insecurity is a horrible thing
If you were able to land good on-air work in a major market you might not be so afraid of a few networks providing rural america with quality broadcasts. Did you lose a job to an automation system or something?

: and I have never had a computer split town in the middle
: of the night, after writing a bad check on my best advertiser!

: What a sad outlook you must have on humanity, Mr Schad.
: I sincerely hope your vision fails and that people let you know that
: they prefer another person on the other end of their radio speaker.
: Although, sadly, I expect you and yours to, in time, convince the
: populace that the Robotized Radio is so much better than the flawed
: presentation of people. Look at how we are fooled in elections..
: Yep, methinks you will eventually prevail.

ABC/SMN does have live announcers on the other end with 800 numbers so that listeners all over america can reach them. The classic rock format has some 50 stations braodcasting their programming, however, the largest market is here in Santa Fe, population 50,000. Automation is not a threat to major markets and it is a very valuable service to rural america. Without automation many farm communities would have no local broadcasting at all.

Paranoia is the source of many tragic happenings

From: airshow1@itchy.mi.net
Message-ID: <3npr34$ndk@vixen.cso.uiuc.edu>
Source record: 32365

Greetings all!
I wholeheartedly echo the sentiments expressed by Bill Pfeiffer,
Steve Coletti and John Devecka in their recent postings.....we are in the
business of communication and that is an interactive, two-way process....how
in the heck does one interact with a box?! When I was in my teen years, I
listened to whoever because that guy was talking to me, talking about my
school and things that mattered to me, because he was in touch with the
community and had the instant feedback from the groupie line.
On that topic, I am looking for a little assistance from my fellow
broadcasters, if you could please. I have a general manager who, believe it
or not, is not thoroughly convinced that desktop radio/time-shifted
announcers/automation/satellite is the greatest thing since peanut butter,
however we are coming down to the crunch with the owners and the bean
counters who love the idea of having a box doing everything for them. We
are looking for some ammunition, to show that it may be an instant financial
plus, but in the long run..... It is all fine and dandy to quote articles
from R&R, but those are mainly opinion pieces and success stories.....people
don't seem too willing to write about how badly they screwed up. I am
looking for some evidence of those screw-ups; stations that have made the
big switch and end up going down the proverbial tubes, and has anyone
managed to recover by switching back to humans? Can anyone help us out?
Hey, nothing against the manufacturers and sales reps for these
various systems; I think anything that cuts down on the drudgery and lets me
focus more on presentation is great....we've come such a long way from the
days when we made sure we had a couple of quarters in our pockets to stick
on the tone arms...the listeners can definitely benefit from the
technological updates, but let's not lose the human touch, otherwise they
can just slide a cassette into the player in the car, or stick on a CD at home.
Thanx in advance for your help,
Ian Cameron (airshow1@mi.net)

} vdavis@spy.org (Val Davis) commented thusly..

} : However, that having been said, I believe that it is a thought-system
} : like yours which is at the heart of the ruination and degradation of
} : the radio industry and many other industries as well.
}
} An automation system such as the one John put together would never(and
} would probably not be expected to) replace real radio in the larger
} markets.

On the contrary. John's system was touted (by him) as being nation
wide in Sweden. Perhaps you missed that article a few weeks back.

} I believe it's probably intended to provide a higher quality of
} broadcasting in rural areas and smaller markets than can be achieved on
} the available revenues. $700 per month cannot draw a "good" announcer.

In todays marketplace, there are many who might not have worked for
that a decade ago who would do so today. Also, it is rural areas
which need live radio the most. It is rural areas, also, which are
hardest hit by the lack of live radio which can respond to local news,
and emergencies.

} However with an automation system like this, a small station can utilize
} the BIG talents of the networks. The only people who loose out due to
} small market automation are the fellows who are unable to develop the
} necessary on-air skills to move into the larger markets where automation
} is not and will not be needed.

Val, you are well known as one of the industries finest voice talents.
You can go anyplace and write your own ticket (within reason)
However, what rural people need more of is not network-quality voice
talent, they need real, live, local information and radio that
responds to them. As a person who has lived in Chicago and in rural
areas of Tennessee, Indiana and most recently Missouri (Tornado Alley)
I am all too aware of the fact that while city dwellers have countless
sources for (mostly) locally produced information, those outside the
urban belt are left with reruns of Jim Bohannon and Bruce Williams on
their local station.

If a tornado arrives, or some other local emergency, many of these
stations are as worthless as breasts on a brahma.

} And your next argument might be that the
} small markets are where they cut their chops. College radio should be
} that area to learn in.

College radio is a good thing, where and when it exists. But you
should know that it is not realistic to go from college radio to a
major market. It is also unrealistic to presume that major markets
(like the top 100) are immune to the encroachment of people-free
broadcasting.

} If fellows
} : like you had your way (and it looks as if you will in time) the only
} : people in radio would be the owners, the hardware/software
} : manufacturers (and their support people), and, maybe, the sales staff.
}
} Insecurity is a horrible thing

You bet I am insecure. I am very insecure when all this is going on
under our noses and we cannot see the potentially negative side
effects. It depends upon where you are looking in from. You, Val,
are a highly successful and gifted voice talent. As such your
position in the mix is in much less jeopardy than many. Also, from
the short-sighted 'todays bottom line is god' perspective of many of
today's broadcasters, the notion of being able to place a machine in
there, which will not ask for a raise, will not take over the PD's
job, and will obey any and all commands, working 24/7 without health
insurance, vacations or the risk of moving on to a better job ... is a
very tempting proposition.

However, from the point of view of those who listen (yes I know
listeners are not people they are just demographics) and from the
standpoint of those who may be tomorrows Val Davis's, Larry Lujacks and
Cousin Brucies, the notion is down right scary. Without a place to go
and 'be bad' for a while, where will these raw talents get to be good?
Last I heard, WLS and KNX were not hiring out of colleges.

} : I hope that such a vision is never realized, although I am aware that
} : there are many, monied interests who would are actively perusing it,
}
} If you were able to land good on-air work in a major market you might not
} be so afraid of a few networks providing rural america with quality
} broadcasts

Right now there are a relative few, that is mostly true. However that
is not likely to be true for long. Moves are afoot to eliminate, even
the restrictions now imposed by duopoly (up to 4 stations per market)
and to open the flood gates wide to any and all acquisitions, limited
only by ones pocket-book. The idea of having all, or mostly all,
desirable broadcast properties under a few very large corporate roofs
is also scary to me.

} : } and I have never had a computer split town in the middle
} : } of the night, after writing a bad check on my best advertiser!
}
} : What a sad outlook you must have on humanity, Mr Schad. I am not
}
[...]

} : I sincerely hope your vision fails and that people let you know that
} : they prefer another person on the other end of their radio speaker.
} : Although, sadly, I expect you and yours to, in time, convince the
} : populace that the Robotized Radio is so much better than the flawed
} : presentation of people. Look at how we are fooled in elections..
} : Yep, methinks you will eventually prevail.
}
}
} Paranoia is the source of many tragic happenings

Some say that todays paranoiac is tomorrows revered prophet. I have also heard that paranoia is just having the facts. It is easy to flip off comments about paranoia, but all of what I have said has either happened already to some extent or is about to. When Duopoly came into being, I commented that this was just the beginning. Now there is legislation pending to remove all safeguards against monopoly in broadcasting.

>From the point of view of those who stand to profit exponentially from all this consolidation of properties, I can understand the notion that I am paranoid and that I don't know what I am talking about. But when we look at the steady stream of deterioration of public service and concern for those who consume the medium (the elimination of the 3 year rule, duopoly, LMA, Satellite feeds, Docket 80-90, and more) it is not unrealistic to look forward at a time (not too far in the future) where every desirable broadcast property will w\either be owned by, LMA'd by or fed programming by, a handful of corporations which will be more similar than different, and will have little regard for anything but their profits and bottom-line.

At *that* time, Mr Davis, we will be looking at a situation where Mr Schad's system will be a viable alternative to any form of independent radio voice. Once all, or most, stations are under total control of a handful of companies, there will be little alternative. At least no *real* alternative to whatever those companies wish to program. I do not think this is a paranoid vision, Mr Davis. I think it is most plausible given todays climate, the declines in the last 20 years and the mind-sets of those who ... "Trust Machines more that People...".

I don't think Mr. Schad should be criticized for attempting to create an unattended radio network thereby eliminating live announcers. After all, he's an equipment salesman trying to make a buck. Nothing wrong with that. Maybe we have provided him with the opportunity to sell his wares by culitivating a fickle audience that will drop a station at mere airing of a "wrong" song. After all if they came for the music they'll leave for the music. I don't see Mr Schad selling his concept in N.Y. and I don't think Dan Ingram, Howard Stern or Ron Lundy, among others need to worry about being replaced by a computer and a video tape. But I'm sure Sweden, or Norway or wherever it is that bought the concept will be a good testing ground.

I can recall an incident in the '70's when a station owner proudly stood in front of his automation system declaring, in my presence, to a golfing buddy that "this system never asks for a raise, never calls in sick and never complains." Whoops...is that a silent sense? Excuse me for a second! Where is that station and owner now? Bankrupt with a pacemaker, living in Florida? Where is his GM who so prouldy exclaimed that everything is on cassette? (sic) Out of work, living with her mother. Guess what? I'm still here doing what I've always done. So don't be so smug in your blanket characterisation of dj's as being untrustworthy. I have never bounced a check to a valued advertiser. As a matter of fact I have brought a fair amount of business to advertisers over the years and on occasion developed friendships with them that I have taken with me when I was forced to "cross the street." I have taken a pay cut to help

sustain a failing radio station, when the sales people were in the office at 2pm discussing last night's episode of "Knott's Landing", when they should have been outside hustling.

I am currently working on creating an "unattended sales department." But have no fear and don't wait for me because just as satellite broadcasting sent whirring cartridge carousels and out of synch voice tracks into oblivion, another concept that doesn't embrace your technology will come along and do the same to you.

Seattle Radio (KOMO/KVI/KPLZ) seeks an aggressive newshound to anchor and report, primarily on KOMO Radio (AM-1000, N/T). Want to live in America's most livable city? Work for a company committed to a bright new future?

Hiring expected by June 1, 1995 for rare full-time position.

Send cover letter, tape of your BEST work and resume to: J. Raymond, Human Resources Manager; Seattle Radio; 200 Tower Building; 7th Ave and Olive Way; Seattle, WA 98101.

Please mention where you heard about the opening!

Seattle Radio promotes a drug-free workplace, and is an Equal Opportunity Employer.

3457. Re: LA Radio Ratings

In a previous article, gj@irock.com ("G. J. at iROCK[TM]") says:

>>Some things I wonder about:
>
>1. The ratings decline of LA newsradio stations.
>2. KLOS going quasi-metal and falling like a rock (no pun intended)?
>3. KLSX Classic Rock...does playing a dinosaur cause possible extinction?
>4. KSCA and AAA Radio, is it really just a bad signal, or is nobody
>listening?
>
G.J.: Some observations from a born Angeleno transplanted to Phoenix:

1. The news stations(KFWB, KNX) have been living with a 2.3-2.8 each
for about 5 years now. All OJ has paid off this time around for KNX.
Even before the decline into the 2 shares, L.A. news radio has never
been the monster that, say, San Francisco is and has been.

2. KLOS jumped into a void left by KNAC. A 1.5 void.

3. Most of KLSX's numbers are presumably Howard Stern. Maybe it's time
to drop the dinosaur rock, give Arrow 93 a mid-4 share by default and
out-KFI KFI in the hot talk arena...on FM.

4. Haven't heard KSCA yet, but someone this past week posted that
they've had a power increase recently.

5. CapCities has a problem: KABC tied for 13th; KLOS in 18th and
dropping....and can anybody tell me(since the original post stopped
at 25th place with a 1.4[KRLA])what KMPC did? Best case, they're 26th
with a 1.3. And even in that best case, they're getting beaten,
with 50,000 watts at 710 on the dial, by KRLA, KLAC, KWKW, KKGO and
KKHJ. I hope they saved the Sinatra CD's(and the rolodex with Gary Owens,
Jim Lange, Wink Martindale, Geoff Edwards and Johnny Magnus's
phone numbers in it). If they did, and if they're reading this,
I'm available to PD. If they didn't,
I have Geoff's number and can get the rest....
including the music.
The 3.2 Golden West walked away from three years
ago(when they went sports talk) would tie them for 10th this time with
KRTH and KBIG.
Fix the demographics later, just get someone tuned to the frequency.

There has been a RUSH to judgement, (pun intended), about how the big names
in conservative talk radio are to blame for edging on certain screw loose
individuals. It is NOT the big names you have to worry about. It is the

small time wannabes that are the dangerous ones. They are buying time on little adhoc satellite services/networks and/or syndicating their own brand of hate to tiny, hard-up-for-cash, stations all over the country, and on broker time shortwave outlets as well. Some are even doing it under the guise of religion.

I'm trying to stay on good terms with the people at WWCR in Nashville, but I have to say that they are the worst offenders when it comes to selling air time to these off beat hosts. While it may be true that they NEVER sold air time to the white supremisist, "American Dissident Voices" program, (you can hear that on WRNO shortwave), they did get con'ed into airing the Canadian Neo-Nazi, Ernst Zundel's program for a beief period. If you understand German you can hear him on WRMI shortwave from Miami.

Programs like "The Voice Of Liberty", "The Intelegence Report", Tom Valentine, and "Hour Of The Time" are heard nightly on WWCR#3, and with the exception of Valentine, (which is a rebroadcast of his afternoon show on the right wing SUN network, [yes, SUN's still around]), are live and interactive via phone. My advice is to listen to the callers.

I don't have the schedules of WRNO or WRMI handy, but those two jokers are on the air on weekends. But if you want to hear the damage control currently going on, except for Bill Cooper, (Hour of the Time), who is blaming the media for everything, anyone with a SW radio can tune in WWCR. The station can be heard starting on 12160kHz, switching to 5065Khz at 7PM EDT, (8PM EDT during June & July). The block starts with the more palatable Dr. Norm Resnick at 6PM EDT, Mon-Fri.

I haven't paid too much attention to the overwhelimg assortment of religious programs on either of WWCR's 3 services, (Number 1 is at 7435kHz at night, Number 2 is Dr. Gene Scott 24 hours a day), but I remember one preacher who's ministry was a cover for his own personal gun lobby. The FBI was after him last year for a tax evasion and he was on the lam.

Shortwave schedules for WWCR, WRMI and, [for those who want to hear a left wing station], RFPI can be found in the rec.radio.info and rec.radio.shortwave newsgroups.

3459. Locating Pat Murphy (talk radio)

Newsgroup: rec.radio.broadcasting
Date: 1995-04-28 00:00:00 UTC
From: cmerritt@infi.net
Message-ID: <3npr2f$nbs@vixen.cso.uiuc.edu>
Source record: 32378

Dateline: Tidewater area of Virginia (Southeast corner)
I'm a big talk radio junkie, Pat Murphy until recently was a local
A.M.radio station in the morning talk show host. Great at his job.
He made folks here think. He recently left his last radio station.
Pat Murphy was a past Presedent of national radio talk show hosts
(or some similar title).I miss his morning wit and wisdom. If anyone
out here knows of someone whom knows someone that can provide me with
a correct answer as to what station Pat Murphy is working at now, I'd
love to hear it so that maybe I can hear him again.
Sincerely
cmerritt@infi.net

3460. Phoenix Radiowatchers 4/26

Newsgroup: rec.radio.broadcasting
Date: 1995-04-28 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <3npr2h$nbv@vixen.cso.uiuc.edu>
Source record: 32379

Longtime midday jock J. David Holmes has
left AOR KUPD(97.9). PD/afternoon talent
Curtiss Johnson moves into middays, evening
jock Eddie Webb takes afternoons, and Michael
Abad moves from overnights to 7-12Midnight.
KUPD is now looking for an overnight talent.

An observation: It could be the good bump in the
most recent Arbitrend(the winter book arrives
soon), it could be knowing that heavy OJ coverage
likely means more of the same good ratings news,
or it could be that their moderate political stance
gives them breathing room the competition at
KFYI(910)doesn't have in the talk-show criticism
following the Oklahoma City bombing...but for
whatever reason, the air staff at KTAR(620) sounds
the most upbeat and confident they have in years.

The front page of today(Wednesday 4/26)'s
editions of the Phoenix Gazette carry a front
page banner
headline: "Furious Valley talk jocks deny fueling
violence".
KFYI afternoon host Bob Mohan is portrayed
as telling a
news photographer "If you're going to use my face
under a negative story, you can go straight to hell."
The Arizona Republic's editorial cartoonist, Steve
Benson on Tuesday published a cartoon depicting
a militiaman standing in front of a bombed out building
and holding a transistor radio tuned to KFYI(which
features conservative talk with Barry Young,
Rush Limbaugh, Mohan, Ken Hamblin and
John Dayl.The caption: "Radio Controlled Bomb."
KFYI owner Fred Weber is quoted in the Gazette
article as saying the Benson cartoon was...
"an erroneous depiction. We are not a fringe
element station. We're reflecting supposedly
the desires of the people in the community here...
to be informed and entertained.
KXAM(1310), which carries conservative
talk programs hosted by former Arizona
Congressman Sam Steiger and G.Gordon
Liddy's synidicated show, has garnered less
attention, despite Liddy's now-infamous

"Shoot for the body, then the groin" quote
referring to federal agents. KXAM failed to
show in the most recent Arbitrends, which may
account for the local lack of controversy.
At least one station, KCKC, San Bernardino,
California(suburban L.A.), has dropped Liddy
as a direct response to those remarks...KCKC's
station manager is quoted by the AP as
saying that it is KCKC's "opinion that the views
of G. Gordon Lioddy foster and encourage
extremist action."

On Wed, 26 Apr 1995, Carl McCaskey wrote:
> Specific examples please?

Gladly. Here's part of a post I wrote recently that addresed it, I hope, succinctly:

Limbaugh is a "one-trick" donkey. His entire performance consists of one basic logic twist: the "straw man". He creates, out of whole cloth, sharply divisive "agenda" (the "environmental agenda", the "feminist agenda", the "gay agenda", ad nausium). Then he reports (or on occasion, creates [see any of dozens of FAIR reports]) isolated and wholly disparate events or statements to "prove" not that these "agenda" exist, since he and, more importantly, his listeners simply assume that's already a given, but to rail (always in the most general and vague terms, if he chooses to give a reason at all) against these "agenda" as a threat to "us, the right-thinking people in this country" (and, yes, that's a direct quote).

In his rhetoric, he makes it clear that it's not just ideas he's attacking: these "agenda" are always held by people, whom he derisively groups and labels. He then invariably ties the bundle of straw together with a single rope: the ultimate boogy-man, "those liberals" (again, a direct quote).

It shouldn't have to need explaination that this is "hate-speak"; it's clear to anyone with a rudimentary understanding of logic and language.

But I'll explain anyway.

The boogymen Limbaugh uses in his arguments don't exist. There is no "liberal agenda", at least not as Limbaugh characterizes such a thing. "Conservative" and "liberal" are political constructs; abstractions. They have no basis in reality. There are issues, and some of them can be simplistically labeled as purely "conservative" or "liberal", but there are few people or institutions on the planet who adhere sufficiently to ideology that could be label purely "conservative" or "liberal" so to be simplistically labeled with such a broad stroke, much less be characterized as wanting to advance a purely "liberal" or "conservative" "agenda".

(It should go without saying that the idea of advancing or denouncing any pure ideology to it's ultmate conclusion is naive at best and destructive at worst, since it should be clear that any pure ideology is inherently flawed. "Consertivitism" in it's purest sense is "anarchy"; pure "liberalism" [because of the vagueness of the term] doesn't exist, but, as it is characterized by it's opposition, would be "dictatorship". Neither are acceptable; compromises are necessary. Only the sociopath benefits

from either a totally "free" or a totally "equal" society.)

The concept of an "agenda" set forth by a so-called "liberal media", for example, is so patently absurd that it would be laughable if so many people didn't actually believe such a thing exists. Who do you think owns the so-called "EIB network" and WABC in New York (the call letters ought to give you a clue)? Or the station on which you hear Limbaugh? The station in Phoenix that broadcasts his TV show is owned by the same corporation that owns USA Today. The mere fact that the name "Rush Limbaugh" has any meaning to you at all belies the concept.

Since in the face of such facts he can't hold the institutions accountable for their supposed actions (it wouldn't do to bite your boss), he has no choice but to maintain this "agenda" charade by creating, characterizing and labeling groups of imaginary people, (only "people" can hold and advance "agenda"), grossly generalizing (and dehumanizing) them as "environmentalists" or "radical feminists"; ultimately, all become part of that great intanglble amorphous mass called "liberals".

So who *are* these "liberals", anyway? That's the point: as so vaguely defined by Limbaugh's "agenda" logic, there's really no clear defining characteristics, except that they're "against" equally vague characteristics, like "freedom" or "family values". It's mere rhetoric; a catch-all epithet that can be used against anyone you choose to disagree with. How else could a basically "freedom from government interference" position such as "pro-choice" be labeled as anything remotely like "liberal"? The word is meaningless.

Yet Limbaugh and others insist not only that "liberals", in his definition (or rather, non-definition) exist, but that "they" are the root not just of our political problems, but all our social ills, such as crime and poverty. Rarely, if ever, is a real solution to a problem outlined; if actual solutions were discussed, the listener would tune out. Instead, Limbaugh aims for the gut: "How do they think they can get away with it?" (again, a direct quote). The listener's reaction is precisely what the host intends it to be: purely emotional. The imaginary "liberal" is held up for derision and ridicule for only one reason: to be reviled. The listener becomes angry at the "straw man" that has supposedly somehow taken advantage of him.

Intellectual arguments can be resolved intellectually, but this is not an intellectual disagreement, it's an emotional one, and the listener must resolve it emotionally. While it's initially fortunate that the listener cannot immediately identify the source of his discomfort as someone having, say, a hooked nose, the ultimate result is the same, except his hate is more broadly scattered, encompassing anyone who Limbaugh has lumped into his bale of straw: women, gays, conservationists, Democrats, university professors, reporters, artists, and, especially, anyone intelligent enough to see through Limbaugh's scam and point it out.

In Limbaugh's world, it's incomprehensible for anyone to hold both so-called "conservative" and "liberal" views. It's either black or white. It's "delusional" to hold the views that, for example, the social welfare system needs a major overhaul, if not dismantling, and that health-care would be a heck of a lot cheaper under a "single-payor" system. It's not impossible to be a Catholic and be secularly pro-choice, nor is it impossible to hold any number of "conservative" views, yet comdemn Limbaugh for "hate-speak".

Please note: Do not assume that I am "for" or "against" any of the above views; I merely list them as possible viewpoints for the rhetorical person in my example. Why I feel the need to add this caveat only points out the depths of misunderstanding common communication has fallen to. Tho I'm not surprised, you may be astonished to learn how many post I've received misrepresenting and debasing the intention of my original post. There's a *lot* of unresolved hate out there.

One more thing: Citing a report that some wacko spiked a tree is no more evidence of a "liberal agenda" than the fact that an LP cover displaying a musician walking across a street barefoot is evidence that there's a "conspiracy" to hide that fact that Paul McCartney is dead. That's just plain paranoia.

I don't think Clinton was irresponsible at all, but instead he had the courage to speak out against the rightwing wackos he previously had been pandering to. In other words, he was so moved by the tragedy that he's finally speaking his mind instead of worrying where his votes are coming from. It's about time someone in power takes these talk show hosts to task for their part in legitimizing the lunatic fringe.

3463. Limbaugh For BROADCASTER OF YEAR!

Newsgroup: rec.radio.broadcasting
Date: 1995-04-28 00:00:00 UTC
From: David Lee Poland <heydave@iglou.com>
Message-ID: <3npr2j$nc7@vixen.cso.uiuc.edu>
Source record: 32382

I am angered over the suggestion from some quarters that Rush Limbaugh had any sort of influence or control over those responsible for the bombing which took place last Wednesday in Oklahoma City! Rush is a decent, responsible, fair, and -=>sane<=- broadcast presence, who has never once advocated the use of violence to overthrow any government entity. In fact, one malitia member referred to Limbaugh last fall as a "Judas goat" who was far too "liberal," and who had sold himself out to the liberal establishment. Isn't it malitia types who are suspected of planting the bomb?

I am proud to be a political conservative like Rush Limbaugh and dare any sane individual to compare my or Rush's ethics to those who endanger and destroy innocent lives. Rush, like Pat Robertson, -=>has<=- clearly spoken out against the bombers and regularly (not just in the past week) urges political and social change to come about -=>only<=- as the result of working within the system (ie. voting, educating, and living within the laws of the land!). Also, when news would break about the shooting of those involved with the abortion industry, Rush clearly spoke out against those extremists, while maintaining a clearly pro-life position. In other words, Rush is -=>consistently<=- sane and rational in his approach to the issues of the day, from a conservative perspective.

I think it's time that those who are critical of Rush to back off--especially when it comes to claiming he had any role whatsoever in the Oklahoma City bombing. I think Rush Limbaugh deserves the title of Radio Broadcaster of The Year--for his information, his wit, his respect for callers, and pursuit of spreading the truth.

- Dave Poland
Louisville, Kentucky

With all due respect for the bully pulpit RL has constructed for himself, he is nothing if not a vigorous self-promoter. And why shouldn't he be? He is an entertainer, a media personality whose earning potential varies directly with his celebrity candlepower. He is not a pundit, like William F. Buckley or George Will, who _needs_ to stay "above the fray" in order to maintain his moral authority to comment on society.

I agree that RL is to be admired for his tenacity in the face of repeated failures. I also agree that he has attracted a large national audience not just for himself but for the whole genre he represents. I even agree with the principles behind his pronouncements. I simply don't see him as an independent thinker. While I am sure that he says what he believes in his own words, I am equally sure that what drives him is not a desire to make a difference, but rather to make a buck.

I think that RL borrows heavily from certain aspects of Howard Stern's on-air personality. Like HS, he often makes sweeping political statements with great disregard for rhetorical subtlety. While Stern himself repeatedly states that his opinions carry no special weight and are not to be taken seriously, however, RL encourages his listeners to think of him as their political guru. This is RL's sole innovation.

Now, I appreciate the role RL plays, and as I said I don't disagree with the principles behind what he says. I simply think that no one of any political stripe should ever consider him a spokesman for conservatives. A mouthpiece for the GOP, maybe ;-).

He strives to entertain, and that he does for many. Don't begrudge him his ability to make as much money as he can.

Broadcasters know the power of words. Radio practitioners utilize that power constantly. When President Clinton urges Americans (including responsible broadcasters) to take responsibility for the words they use it sounds like a reasonable request to me. And given the nuts that roam the world, some of them listening to the radio, a smart thing for any responsible broadcaster to observe.

There is no reason to be defensive. No reason to cry out for the protection of the First Amendment. No one is threatening to take away your liberty. We broadcasters are only being urged to be responsible. If we are not prepared to take responsibility for the consequences of our words, we are being foolish (our loved ones might be next), unethical and irresponsible. Who would want to do that?

Vic Bremer

3467. "Hate"

Newsgroup: rec.radio.broadcasting
Date: 1995-04-28 00:00:00 UTC
From: salem.news@libmail.chemek.cc.or.us
Message-ID: <3npr2p$ncl@vixen.cso.uiuc.edu>
Source record: 32386

When did it become so popular for the much overused and intellectually lazy term of "hate" to be bandied about so casually in political conversation? Even one of the regulars here has a signature in which the word hate is used!

Calling someone hateful used to be something that was done with great restraint. Then again, people in society used to have a greater ability for self-restraint. Is logical discourse; is questioning authority; is dissent in any form soon to be untolerated in a society which supposedly values free speech? Any rhetoric from the extreme left or the extreme right, both of which are generally out of balance with reality, does not need to be combattedd with the unthinking, labeling of opposition of that position.

If it is wrong to hate (which it is), it is also just as wrong to slander by mislabeling or name calling. Let's upgrade the conversation on this discussion group to one of dignity and giving the specific evidence to support a discussion position, rather than to lash out out of a feeling of powerlessness and anger over the event-du-jour.

When Andy Rooney said about the Oklahoma bombers that they have succeeded in reducing him to their level, he said a mouthful. His response to their actions was to hate the doers of the deed, and in doing so, he admitted that they won! He summed up his piece by saying, "I hate the bastards." The bombers hate permeated Mr. Rooney, and he became like them, in respect to hate.

It goes to the old saying that hate begets hate.

As Mohandas Gandhi said "An eye for an eye...making the whole world blind."

Chris,

I'm Assistant Production Director and fill-in jock on KGB/KPOP. I think it should be pointed out how well K-POP did this book. Going from a 2.7 - 4.1 is INCREDIBLE! We're beating a host of other "big-time" FM stations now. How 'bout that! Also, K-POP's format is not the 70's. It is MOR (nostalgia/big band/standards of the 40's - 70's). I guess the word is getting out about K-POP's unique format. We'll take it!

I should also mention that KGB continues to dominate the key demos for rock stations in San Diego. Very cool too!

: Quaker Foods has succumbed, and has cancelled all Snapple radio
: advertising in all markets running on the Howard Stern show...

Playing a gunshot during one of Selena's songs may have been Howard Stern's idea of "parody", but true parody is done in a sense of fun. There is nothing fun about grieving fans of a girl whose family overcame poverty and the millions of Latinos and others who looked up to her and her family as role models. In my neighborhood Selena's songs play on the jukebox and people stop their talking and give a moment of silence.

: Howard singlehandedly put that product on the map before Quaker's 1+
: billion dollar purchase ...
: How soon they forget.....

How soon *you* forget that Snapple was a saturation buy. Not only did Stern have them as a client, but so did Rush, Tom Snyder, Bruce Williams, Gil Gross, and other radio personalies. It's likely the Snapple people bought some spots on everything linking more than 1 station.

3470. ANNOUNCING: New Radio Broadcast Pro mailing list

Newsgroup: rec.radio.broadcasting
Date: 1995-04-28 00:00:00 UTC
From: wdp@airwaves.com
Message-ID: <3nqi5p$6j5@vixen.cso.uiuc.edu>

Hello Radio Pros:

This is an announcement of a new publication from AIRWAVES RADIO JOURNAL.

Beginning May 1, 1995 AIRWAVES MEDIA is starting a new net-newsletter for radio broadcast professionals and others who would like to see more intensive information and less discussion. If you are, or have been, a reader of AIRWAVES RADIO JOURNAL and find that it sometimes takes too long to wade through the followups and side-roads of conversation to get to the important radio information, then this new 'zine is just for you. It's called AIRWAVES-SELECT, and will be more of an "Electronic Trade Publication" focusing on news and not schmooze.

AIRWAVES-SELECT will consist of *informational* articles from rec.radio.broadcasting, AIRWAVES RADIO JOURNAL, and other Internet sources. AIRWAVES-SELECT will *not* carry followups except for purposes of correction or retraction. Followups and comments will either go to rec.radio.broadcasting and AIRWAVES RADIO JOURNAL as they always have, or be emailed directly to the article's author. AIRWAVES-SELECT articles may also be edited for clarity or to remove extraneous quoting or excessive signatures.

AIRWAVES-SELECT will be published in text digest format at first, just like AIRWAVES RADIO JOURNAL and other similar Internet digests. At a later date (as soon as a colleague can finish a script he is working on for me) AIRWAVES-SELECT will be made available in HTML (World Wide Web) format and will be browse-able via your favorite web browser. This will permit easier access to individual articles (you click on a subject in the TOC and get taken right to that article) and possibly support pictures, sound, and other goodies.

The following are some of the types of articles which will be carried in AIRWAVES-SELECT....

* RadioWatchers Reports
* Sales and acquisitions of broadcast properties
* Changes in station personnel, technical facilities or format
* Help/Positions wanted
* F.C.C. bulletins and information
* Technology information and updates
* Updates to the AIRWAVES (and other) web servers
* Announcements of potential interest to broadcast professionals

==

The following are some of the types of articles which will NOT be carried in AIRWAVES-SELECT....

* "Where are they now?" posts
* DX and hobbiest posts
* Howard Stern [or other] station lists and gossip.
* "Gee, I wish they would play better music in my town"
* "Rush Limbaugh is the Anti-Christ/R.L is a Savior" (and other political ramblings)
* "How do I start a radio station...?"

In other words, AIRWAVES-SELECT will be just what the name implies. An e-zine of *select* articles for busy professionals who want information without a lot of conversation. AIRWAVES-SELECT will be published as news warrants, but is not likely to exceed one or two digests per week, since its scope of content will be much more defined than that of AIRWAVES RADIO JOURNAL.

In addition to articles from r.r.b./A.R.J. (and elsewhere on the Internet), we may be looking for individuals who are interested in writing articles *specifically* for AIRWAVES-SELECT. If this sounds interesting, please contact me with your area of expertise and we'll talk.

If you are interested in trying AIRWAVES-SELECT, send email *exactly* in the following format...

To: select-request@airwaves.com
Subject: SUBSCRIBE

[The body of your subscribe letter is ignored by the server]

You will receive confirmation by return mail. If you decide to leave the list, send to the same address, with the word UNSUBSCRIBE as the subject of the note. Again, you should receive confirmation by return mail.

You may, of course, subscribe to both AIRWAVES-SELECT & AIRWAVES RADIO JOURNAL, or you may find that one is all you really need. If you now access the forum via rec.radio.broadcasting, you may still wish to receive AIRWAVES-SELECT as a sort of 'Headline News' version to keep up when time is at a premium (as if it ever is *not* at a premium <grin>).

I hope that you will enjoy this new publication. If you have recently UNSUBSCRIBED from AIRWAVES RADIO JOURNAL because of the high volume of mail, then this might be just what the doctor ordered. I will do my very best to make sure that AIRWAVES-SELECT carries *only* the meat and little or no fat.

AIRWAVES-SELECT will be provided, initially, free of charge to anyone who wants it. However, as you might imagine, creating such a 'zine is going to require considerable time and effort, since we will essentially be creating two separate publications instead of one. So after an initial period of time (at least a month, maybe longer) I will be looking at ways to fund this project. This could take the form of a small subscription fee for AIRWAVES-SELECT. In lieu of that, we may seek sponsors to help defray the costs and expenditures of time needed to create a quality e-zine of this nature. At some point we may even offer a FAX delivery service. (Note: There are *no* plans to charge for the regular AIRWAVES RADIO JOURNAL, which will remain as it now is, a direct reflector of rec.radio.broadcasting.)

Hope to hear from you. I welcome comments. Send them directly to my personal mailbox, wdp@airwaves.com.

Sincerely

William Pfeiffer

Hello all:

With the President's statements vis-a-vis the 'voices of hate' on the airwaves (and I don't think he was referring to my email digest <g>), I realize that the hot topic of Limbaugh, Liddy et-al is hard to resist. All of us know that I am among those who find it hard to resist anyway, and now it is even more timely and newsworthy.

But I was just wondering if we have had enough of it yet? I am not going to pull the plug on the discussion, but even though I am a sucker for a good debate, I don't want the entire group taken over by it either.

We are a broadcasting group (I have to remind myself as much as any of you-all out there) and while Rush is a broadcaster, and a very high-profile one at that, I hope we can continue to explore other aspects of the industry as well and not let Mr Limbaugh et-al take over. Limbaugh is a big force (no pun intended) but he is not the only newsworthy topic.

I also want to extend the invitation to all to continue to start new broadcast threads so the group continues to move forward.

Lets get talking about radio again. What's happening in YOUR station, YOUR town, Your job?

Can we talk?

William Pfeiffer

3472. Dallas-Ft. Worth Arbitron Ratings

Newsgroup: rec.radio.broadcasting
Date: 1995-04-28 00:00:00 UTC
From: Tom Desmond <wsu@mimi.itg.ti.com>
Message-ID: <3nq5lo$hin@vixen.cso.uiuc.edu>
Source record: 32391

Below is the Winter 1995 Arbitrons for Dallas-Ft. Worth, from today's edition of the Dallas Morning News:

Rank Station 12+ Share Format
1T KSCS(FM) 5.6 Country
1T KVIL-A/F 5.6 AC
3 WBAP(AM) 5.2 Talk
4 KHKS(FM) 5.0 CHR
5 KYNG(FM) 4.6 Young Country
6 KKDA(FM) 4.5 UC
7 KPLX(FM) 4.2 Country
8T KOAI(FM) 4.0 NAC
8T KEGL(FM) 4.0 Rock/Howard Stern
10T KLUV(FM) 3.8 Oldies
10T KJMZ(FM) 3.8 UC
12 KDGE(FM) 3.5 Alternative
13T KLTY(FM) 3.4 Christian AC
13T KRLD(AM) 3.4 News/talk
15 KDMX(FM) 3.1 Hot AC
16 KRRW(FM) 2.7 70's "Arrow" format
17T WRR(FM) 2.6 Classical (owned by city of Dallas)
17T KZPS(FM) 2.6 Classic Rock
19 KTXQ(FM) 2.4 Rock
20T KLIF(AM) 2.0 Talk
20T KHVN(AM) 2.0 Black Gospel

Of note:
In the 25-54 race, KVIL has unseated KSCS, jumping from 6.1 to 7.1, while the latter dropped from 7.5 to 5.8. KVIL had been the dominant station in Dallas through much of the 80's, and appears to be regaining some of its past success.

All sports KTCK(AM) plummetted from 13th to 24th, losing almost half its audience (3.2 to 1.7). This station (which is only a year old), recently sold for a very healthy sum of money (about $6 million, I believe).

Showing a healthy recovery was KYNG, which had taken a hit in the Fall book.

KTXQ's reformulation from dinosaur rock to a more modern leaning approach doesn't seem to have had much affect, so far, but since they made their changes in January, it's probably a little soon to see much effect.

Since it didn't even make the list this time, I presume that (once again) KYNG(FM)'s duopoly partner, "EZ Country" KSNN(FM) must still be

occupying the cellar for a full facility FM in the market. Anyone have any guesses on how much longer this experiment with major market classic country will last? Over two years, and the ratings still stink...

>From today's DALLAS MORNING NEWS...

Fall Winter
1 KVIL-103.7 AC 5.1 5.6
KSCS-96.3 country 6.9 5.6
3 WBAP-820 news/talk "NewsTalk 820" 6.3 5.2
4 KHKS-106.1 CHR "106.1 Kiss FM" 5.6 5.0
5 KYNG-105.3 hit country "Young Country" 3.7 4.6
6 KKDA-FM-104.5 urban "K104" 4.9 4.5
7 KPLX-99.5 country "99.5 K-Plex" 4.1 4.2
8 KOAI-107.5 smooth jazz "Oasis" 4.3 4.0
KEGL-97.1 AOR "Pure Rock 97-1, Eagle" 3.5 4.0
10 KLUV-98.7 oldies "98.7 K-Love" 3.7 3.8
KJMZ-100.3 urban "100.3 Jamz" 4.5 3.8
12 KDGE-94.5 new rock "94.5 the Edge" 3.6 3.5
13 KRLD-1080 news/talk "News Radio 1080" 3.0 3.4
KLTY-94.1 contemporary christian 2.8 3.4
15 KDMX-102.9 hot AC "Mix 102.9" 3.1 3.1
16 KRRW-97.9 clx rock/70s "Arrow 97.9" 2.4 2.7
17 WRR-101.1 classical "Classical 101" 2.6 2.6
KZPS-92.5 classic rock 2.6 2.6
19 KTXQ-102.1 AOR "Q102" 2.5 2.4
20 KLIF-570 talk "Talk Radio 570" 2.3 2.0
KHVN-970 black gospel "Heaven 97" 2.0

The DMN only lists the top 20. In the article, they did mention sports
KTCK-1310 "the Ticket" was way off (3.2 to 1.7 and #25).

Also apparantly off is "Easy Country Sunny 95" KSNN-94.9 which had a
2.7 last time and failed to make the top 20 this time.

19.KTWC(103.5)MOR/AC 1.9--->1.2
20.KISO(1230)Urban AC 1.5--->1.0

Synopsis: A lot of movement this book.
KTAR's spectacular rise(up 3.8) can
be attributed to
OJ coverage and the Phoenix Suns.
That no doubt cut into KFYI, accounting
for at least some
of its 1.2 drop.
KMLE effectively turned the tables
on Country competitor
KNIX, which got the lowest number I can
recall at that legendary station in my 9
years in the market. Five years ago,
KNIX routinely performed in the 12-15 share
range.
As foreshadowed in the last Arbitrend,
KSLX appears to have lost the incredible
momentum that took it into the low 5's in the
fall.
Also, a nice first book for KHTC(K-Hits)
and its 70's format...nearly a full point boost.

Here's what's happening in the 55th Market [and Carl's Diner at I-15]

KOGO, San Diego, broadcast the Roger Fredinburg show nightly from 9 to 11. In today's San Diego Daily Transcript, Richard Acello wrote a piece on the militia and Fredinburg.

The Medord, Ore., host reaches about 7,000 San Diego listners according to the latest ratings -- and is up against KFMB's Late, Late Radio Show. Respective numbers in this market.

Archello wrote in the April 27 edition:
"Some of Fredinburg's listeners call up to charge the federal government with bombing its own building. "Paranoia spreads like wildfire," he said. "Some of these people already think the government's after them as it is."

"Last Friday, Fredinburg hosted audibly shaken Montana militia leader John Trochman, whom he wound up counseling not to do anything rash. Trochman was followed by political analyst Craig Hulet, who said he follows the activities of "illegal" militias and lectured Fredinburg at length on the Constitution's express prohibition against independent militias like Trochman's. If militias are illegal, as Fredinburg appeared to concede during Hulet's appearance, how has the Oregonian become the bulletin board for what are now the nation's most controversial groups? "

For the complete article, point the browser to:
http://www.sddt.com/files/library/95headlines/DN95_04_27/STORY95_04_27_02.html

Last night on Art Bell's show, he said that today [April 27] he was going to debate Tom Leykis on a KNZR, Bakersfield. Did any one catch the debate? [past readers probably know of my views on TL. I hope Art smoked him!]

Art Bell syndicated show is on KOGO, San Diego, and KNZR Bakersfield.

Thanks!

Here's what's happening in the 55th Market [and Carl's Diner at I-15]

KOGO, San Diego, broadcast the Roger Fredinburg show nightly from 9 to 11. In today's San Diego Daily Transcript, Richard Acello wrote a piece on the militia and Fredinburg.

The Medord, Ore., host reaches about 7,000 San Diego listners according to the latest ratings -- and is up against KFMB's Late, Late Radio Show. Respective numbers in this market.

Archello wrote in the April 27 edition:
"Some of Fredinburg's listeners call up to charge the federal government with bombing its own building. "Paranoia spreads like wildfire," he said. "Some of these people already think the government's after them as it is."

"Last Friday, Fredinburg hosted audibly shaken Montana militia leader John Trochman, whom he wound up counseling not to do anything rash. Trochman was followed by political analyst Craig Hulet, who said he follows the activities of "illegal" militias and lectured Fredinburg at length on the Constitution's express prohibition against independent militias like Trochman's. If militias are illegal, as Fredinburg appeared to concede during Hulet's appearance, how has the Oregonian become the bulletin board for what are now the nation's most controversial groups? "

For the complete article, point the browser to:
http://www.sddt.com/files/library/95headlines/DN95_04_27/STORY95_04_27_02.html

Last night on Art Bell's show, he said that today [April 27] he was going to debate Tom Leykis on a KNZR, Bakersfield. Did any one catch the debate? [past readers probably know of my views on TL. I hope Art smoked him!]

Art Bell syndicated show is on KOGO, San Diego, and KNZR Bakersfield.

Thanks!

> be had from the Knowlton Nash book.

Actually CJBC's history goes back even further than its participation in CBC's Dominion Network. The Aird Commission report of 1929, which was the first royal Commission dealing with Canadian broadcasting, mentions CJBC as a station licenced to Jarvis Street Baptist Church. This church still exists and is located in downtown Toronto. According to the Aird Report, CJBC was a phantom station -- that is, a station that "owns no physical equipment, but is alloted a distinctive call signal and is licensed to operate over a station having physical equipment."

Free Radio Berkeley & San Francisco Liberation
Radio to Celebrate 2nd Anniversary

Micropower broadcasting stations Free Radio Berkeley 104.1 FM and San Francisco Liberation Radio 93.7 FM have much to celebrate besides being on the air for 2 years. What could have been a gag on first amendment rights turned into a unprecedented victory for micropower broadcasting and a historic defeat for the FCC when Federal Judge Claudia Wilken refused a motion by the FCC for a preliminary injunction against Stephen Dunifer and Free Radio Berkeley on January 20, 1995.

Citing serious constitutional concerns as her reason for denial, Judge Claudia Wilken further ordered the FCC to examine the constitutional nature of their rules as they apply to micropower broadcasting. In the opinion of attorneys for Free Radio Berkeley and Stephen Dunifer Judge Claudia Wilken's decision places micropower broadcasting in the category of being neither legal or illegal.

Anniversary events are planned for: Thursday, May 11 with a benefit celebration party at Cesar's Latin Palace, 3140 Mission St with the featured bands being Resistance and the Funky Nixons. Party begins at 8 PM with a suggested donation of $5-$10; Friday, May 12 will feature a Free Speech demonstration to coincide with a scheduled court hearing with the FCC. Scheduled for 12 noon in front of the Oakland Federal Building (13th & Clay Sts.), the demonstration will continue until shortly before the hearing which begins at 1:30 PM. Later that evening a public forum and party take place at the Unitarian Fellowship in Berkeley (Cedar and Bonita). This will start at 8 PM with a suggested donation of $5-$20; On Saturday, May 13 starting at 1O AM a series of workshops on micropower broadcasting will take place at the Unitarian Fellowship. Topics include Setting Up a Micropower Station, Food Not Bombs Radio Network, Digital Sound Editing and Production, Using the Internet as a News Source and more

Free Radio Berkeley took to the air in April 1993 followed by San Francisco Liberation in May 1993 as mobile broadcast operations on a weekly basis. Both rebel radio operations are now firmly established in fixed locations and provide a voice for their respective communities. As a free speech challenge to the authority and regulatory structure of the FCC, the micropower broadcasting movement in the Bay Area has accomplished much in the short space of 2 years.

Free Radio Berkeley is on the air twenty four hours a day with a collective staff of about 40 people. San Francisco Liberation Radio is on the air every night of the week with a smaller staff. Following in the wake of these operations Radio Libre covering the SF Mission District took to the air in August 1994. Stations are now on in the air in Santa Cruz,

Salinas, Grover Beach and many other areas of California and the United States.

Not only are we celebrating the 2nd anniversary of both Free Radio Berkeley and San Francisco Liberation Radio, we are celebrating a movement which is breaking the stranglehold on the free flow of information, news, ideas culture and artistic expression.

: Even well past his prime, Howard was a great broadcaster.

I remember Howard Cosell as someone who had some respect for people. In particular, when Cassius Clay converted to Islam and became Muhammed Ali, none of the sportscasters would use that name, or they'd use it in a mocking way. Howard Cosell was (I believe) the first to use his new name with the proper respect Ali deserved as a fellow human. And Howard caught plenty of hell for it -- angry letters, bomb threats, coworkers chastising him for "giving in", etc. Yet, he not only didn't cave in, but even editorialized in his commentaries about the need for people to respect each other on their own terms. Truly a great man.

I am part of a small group that is in the process of purchasing a Talk Radio AM in a medium-sized market. We are looking for a source to provide capital, in exchange for a decent interest rate, and a small interest in the station (say, 5%).

We need about $150K. Can be secured with real estate.

E-mail me here, or call Brian Robinson at 214-516-4868.

I haven't noticed any real trend--maybe talk radio is taking some of
their audience?

> 2. KLOS going quasi-metal and falling like a rock (no pun intended)?
Let's face it . . .Metal in 1995 is like disco in 1979--on its way out.
(But don't fret--I bet they'll be "classic metal revival" stations 20
years from now, just as we have with the 70's and disco music today)

> 3. KLSX Classic Rock...does playing a dinosaur cause possible extinction?
It'll live on as long as people want to listen . . .

> 4. KSCA and AAA Radio, is it really just a bad signal, or is nobody
> listening?

KSCA has supposedly improved its signal some time ago; I have no trouble
hearing in any part of Southern California. It's been up for almost a
year now. Maybe it seems "too esoteric" for a lot of people to appreciate,
kind of like classical music or public radio, etc.

Bob Stahley writes:
>Limbaugh is a "one-trick" donkey. His entire performance consists of one
>basic logic twist: the "straw man". He creates, out of whole cloth,

[etc., just indicating the article]

What about Limbaugh's sense of humor? Don't you think that's an
important reason for his popularity?

He pokes fun at himself first of all.

If you want a Liberal Limbaugh, that would be the first thing.

I think probably it is incompatible with serious social engineering
though, which is perhaps why there isn't one.

Seriously, on the 4/26 show, Limbaugh had ``liberal monologues,'' where
``liberal'' callers got 3 minutes uninterrupted. There was a very successful
one, a woman who began by saying she was keeping half her sex-appeal
tied behind her back to make it fair. That is self-deprecating humor.

The others were losers because they weren't funny.

Imus has Limbaugh parodies that aren't very good because they aren't
self-deprecating. They have all the edge you'd want.

Limbaugh usually keeps that humor throughout his comments, at least when
they work.

Limbaugh is at his worst, I mean his least listenable, when he loses
the self-deprecating humor, the opening to the idea that nothing is without
perverse unintended consequences; say expounding on morals.

If you think that ``America Held Hostage,'' the chain-saw opening to the
``Timber Update,'' etc, are not self-deprecating first of all, in their
bigger-than-lifeness, then you won't understand Limbaugh. You will
intellectualize it; you will sulk. American humor will pass you by.

IW>As far as Gingrich's supposed book deal, it had been fairly well
IW>established that his agent handled the negotiations and sold to the
IW>highest bidder. Gingrich had no idea who the publishers would be nor that
IW>they had a connection to Murdoch until later. It may make some with
IW>partisan views happy to spread the "inside" dirt, but like most of what
IW>passes for fact in this town, it is essentially without foundation.

Bill,
It's also been "well established" that Gingrich didn't have the ethical character to tell the publisher not to do the deal because of it's impropriety. Any politician, particularly one of Gingrich's national stature and experience, who doesn't investigate offers of $4 million dollars leave a great deal to be desired in the ethics department.

The bottom line is that Murdoch will get whatever he asks for. Those that don't offer incentives won't. Witness the WATL sale. My prediction is that Murdoch's foreign ownership difficulties will disappear rather suddenly very soon, thanks to his good buddies in Washington. So much for serving their constituents - well, so much for their less powerful constituents.

It also makes partisan views happy to ignore Republican abuses while lambasting the same abuses in Democrats.

Rich

Unfortunately, the deal's a lot dirtier than it looks. Gingrich's agent told the NY Post that NO serious talks were held with any other publisher but Murdoch-owned Harper/Collins...and Murdoch, his lobbyist, and the Harper-Collins people held a number of private meetings with Gingrich in Washington between the time he was chosen Speaker-elect and the time the deal was announced.

(It's interesting that a Murdoch-owned paper blew the whistle on the boss...but remember, Murdoch has never been reluctant to admit he's courted and purchased influence, in fact he's been quoted as saying he regards his ability to do it with pride.)

It should also be remembered that the deal has been restructured not only to eliminate the embarrassing advance, but to extend Murdoch's leverage...it now could pay up to $10 million in royalties, but those royalties will be spread out over a long enough time that Gingrich now must stay longer in Murdoch's corner to get the maximum payout.

> University. I have been asking myself the same question: how can we
> acquire a 'sound' service such as ABC Information Network or AP Radio
> Network....if you find anything out could you e-mail me or post...

Call your local AP bureau and ask for the sales representative. Syracuse probably doesn't have one, so they'll probably give you a Buffalo number or something.

Both AP and UPI have radio services; I assume that they come via satellite, in which case the wire service will rent you a mini-satellite dish and the accompanying equipment. Check the white pages for "Associated Press" and "United Press International." AP is a bit more reliable than UPI.

I don't know that ABC will sell news to a non-network station, but CNN has a radio news service, and Westwood One might, also. CNN is in Atlanta; try long-distance information. Westwood One is in (I think) L.A., but they might have a closer office.

Call the bureaus and ask to speak with their sales reps. They'll be able to take care of you. Keep in mind that this stuff ain't cheap, even at college rates (I investigated getting a wire service for a college newspaper and nearly died when they gave me the price). If it's considerably cheaper, consider a wire service printer, instead, and train your jocks to read news on the air every half-hour. 'Course, then you don't get LIVE updates of the O.J. trial and presidential press conferences... :-)

Well, not *quite* continuous. I vividly recall a night when I
was growing up in Brooklyn (early 70s) when WINS played "Who Wears
Short Shorts" and a couple of other songs over and over and over
through the wee hours. Funny thing is, I never found out why that
happened. (When I woke up in the morning, the news was back.) My guess
was that maybe there was a breakdown between transmitter and studios
and there were a couple of records left at the transmitter site to
play -- I have seen similar situations in other markets where that was
the case. But on the other hand, somebody once told me that WINS had
no equipment capable of playing records at its transmitter site.

> time to these off beat hosts. While it may be true that they NEVER sold

To follow up on my posting of the other day, a brief profile of these programs on WWCR was done this past Thursday on the Media Network program over Radio Netherlands. Host Johnathan Marks contacted WWCR manager George McClintock for an on air interview, something George rarely gives, by the way. Mr. McClintock paraphrased Voltare when he said that he doesn't agree with them, but does defend their right to say what they do.

On another front, many of the programs had been feeding the station via the Omega radio network, a registered common carrier with the FCC. Omega was owned by a 3 person partnership in New Jersey and used a subcarrier of a video service to distribute programming on Telstar 1. Omega is shutting down on Sunday night, April 30th.

A major contributing factor is that the Telstar 1 bird is overdue for replacement, is short of fuel, and had been placed in a inclined orbit. This, in turn, is causing the video service to cut back it's operation since it cannot track the bird and has had to make daily manual adjustments to the uplink dish. Even so, the reception of the signal has been erratic.

All the work at Omega had been done by one partner. Faced with the inability to sell time due to the curtailment of hours, and that some accounts were already in arears, he decided to leave the operation. I spoke to the senior partner, Mark Emanual, yesterday. He has not made a decision as to finding a new orbital home and continuing the service. As of now it looks like the major buyer of air time will be finding their own new home for relay of the programs they sponsor to WWCR and any other affiliates.

Omega was started as a way of backhauling Mr. Emanuel's SPECRTUM show, a program of Techno-info for radio hobbists. The sale of other air time to all comers was a method of keeping the backhaul self supporting.

Payola was a system used by record companies in the 50's to get certain records played. They paid DJ's to play them. The FCC and the Government took a rather dim view of this since they felt it was promoting the "evil rock & roll" and passed laws against this. Alan Freed was one of those caught and was knocked out of radio for it.
For an interesting view of this, read "Rock, Roll & Remember" by Dick Clark, he was raked over the coals by the congressional investigators.

Tripp Rogers
TRRadio@aol.com

[Moderator's Note: Wonder what today's "Business at all costs" FCC would say about Payola? Not much, I'd bet. Bill]

I agree whoheartedly... *but* with a caveat. When oldies are released on CD, it is quite possible to botch the process. In
those cases, the vinyl version can sound better.

The classic example was Motown, which when it rereleased several 4 Tops records, made them sound far worse than the
'45 versions. (Motown botched the anthology albums, too, the same way.) Even though this particular matter has been ameliorated
(after it was written up by a major reviewer), I've seen the same problem with some other oldies. So, in these isolated cases, the old
vinyl 45s can sound better.

>
> Playing a gunshot during one of Selena's songs may have been Howard
> Stern's idea of "parody", but true parody is done in a sense of fun.

You didn't hear the broadcast, did you?

He didn't play "a gunshot during one of Selena's songs." The sound
effect was played behind the news story, as is custom with EVERY story
Robin reads- if it's a murder, you get a gunshot. If someone dies,
you get a "body drop." If it's tragic, you'll get a wholly
inappropriate "Jackie Laugh" on tape, followed by Howard rebuking
Jackie and Jackie protesting his innocence. That's a running joke
(played not by Howard but Fred Norris, BTW). If you don't think it's
funny, fine, but it's done with every story- it wasn't personally
directed at Selena. And, by the way, LULAC's ire was primarily
directed at Stern's assertion that he didn't like her type of music.
Music criticism seems to have become politically incorrect. Oh, well.
(He also said Spanish-language TV looks cheap, then admitted to
sometimes watching, I believe, "Sabado Gigante.")

LULAC's people never heard the bits, either. They reacted to accounts
promulgated by a couple of Houston DJs who fanned the flames for
publicity (and Howard isn't even heard in Houston, or Corpus Christi).
I don't know about you, but I lose all respect for groups who react
without bothering to check the facts.

> : Howard singlehandedly put that product on the map before Quaker's 1+

> How soon *you* forget that Snapple was a saturation buy. Not only did
> Stern have them as a client, but so did Rush, Tom Snyder, Bruce Williams,
> Gil Gross, and other radio personalies. It's likely the Snapple people
> bought some spots on everything linking more than 1 station.

Snapple *wasn't* a saturation buy in the early days- they primarily
did local NY radio (as a primarily regional product), and mostly with
Howard at WNBC, then WXRK, before Rush made it from Sacramento to NY,
and way before Tom Snyder and Gil Gross even had radio talk shows.
Rush helped, as did the TV spots, but it's fair to say- as Snapple has

acknowledged- that Howard gave them their first, regional (then
national) boost.

Opinions expressed are not necessarily the views of the organization
named in the header. Thank you, drive through.

3500. Conservative Talk Shows

Newsgroup: rec.radio.broadcasting
Date: 1995-04-29 00:00:00 UTC
From: luxt@river.it.gvsu.edu
Message-ID: <3nt54n$k5k@vixen.cso.uiuc.edu>
Source record: 32219

WOOD-AM has gotten a lot of flack from "listeners" about the 7 hours of conservative talk shows on weekdays. Liddy comes on from 10 to noon, Rush from Noon to 3, Liddy from 3 to 5. The management has decided to drop Jim Bohannon (I kinda liked him) and pick up Michael Raegan and Art Bell (my all-time favorite). Now we have 11 hours of conservate talk shows... this comes after Bruce Holberg, Owner and General Partner, appeared on Live television discussing the relationship (or lack thereof) between talk shows and the OK bombing. The change takes place on May 1... any thought on the two shows? I have heard Art Bell before... I like him, and he will apparently fit in quite nicely with the conservative capital in the world, Grand Rapids....

Thomas Jefferson once said, "Our liberty depends on freedom of the press and that cannot be limited without being lost." I should also think this applies to the rest of our First Amendment rights. God bless the ACLU.

Perhaps the sole bright spot in the movement to restrict our civil liberties is the recent court ruling in the Dunifer case, putting pirate radion in a netherworld between legal and illegal. There are now about 4 pirates in the SF/Berkeley/Oakland area. To my knowledge no licensed broadcasters have complained. These stations also seem to be the only places to hear broadcasts about underserved communities.

> (competition was too good) that they had to switch?

WINS' numbers were still good, but Group W could see the trend comming that WABC would take over the the top position in the market just by looking at the inovation and approach that their own former Program Director, Rick Sklar was doing at WABC.

While WABC and WMCA were pretty similar in the personalities and appeal of their D.J.'s, most of WINS' top people were from the old announcer school. Both WMCA and WABC were really dependent on the abilities of their programing heads, while WINS was more or less dependent on their night time jock, Murray Kaufman, to keep the younger audience interested. Jack Lacy, Stan Z. Burns and Paul Sherman, WINS' daytime people were more appealing to adults than the teens. Over at WABC, Dan Ingrim and Bob Dayton could appeal to anyone. Similarly WMCA had Jack Spector and Dan Daniel with their broad appeal in the daytime.

With Murray being sidetracked as the 5th Beatle, and with TV appearances, he was getting too hot to handle. Keeping the format would mean that they would have to give into his contract demands when it came up for renewal. If negotiations were to break down, then Murray could work to the end of his contract, entertain offers from other stations and just move to another spot on the dial taking his loyal listeners with him, hurting the format.

What they did was wait until his contract was almost up and change format at the same time. The simply made the announcement instead of entering negotiations. The end result was that since the other stations were now going to get the audience anyway, no one wanted Murray.

> WNBC, WABC went along with that format for a long time, right?

At the time, WNBC was doing talk and adult music programming. They later went contemporary, then contemporary with oldies, then rock, then contemporary and oldies again with talk in the afternoon.

> Can anyone tell me (an European) why it was called 'payola'?

Payola is a play on words. "Pay" from the term "Pay for Play" which is what the record companies and promo men were doing by bribing the D.J. for airplay of a record. With a Juke Box, you put in your money and then you can play a record. "Ola" came from the name of a Juke Box manufacturer, Rock-Ola.

Source record: 32223

IG>No offense, Rich, but I think you've been reading your own promotional
IG>literature too long. Fact is, in only 9 months Dr. Laura has risen to one
IG>of the top 5 rated national talk shows on radio. She can be heard on
IG>metro stations in 15 of the top 25 markets including: KFI AM/Los Angeles,
IG>WJR AM/Detroit, KRLD AM/Dallas, WSB AM/Atlanta, KFYI AM/Phoenix, KFMB
IG>AM/San Diego, KIRO FM/Seattle, and WTIC AM/Hartford-New Haven. In the
IG>fall Arbitron book, her audience increased in all of the above-mentioned
IG>markets where she was on for the full book (KFI, KFMB, KIRO and WTIC). In
IG>the case of WTIC, she increased the A25-54 AQH in her timeslot by 80% , on
IG>KIRO she doubled the A25-54 numbers and in KFMB, going head-to- head with
IG>Rush Limbaugh, she took the station from a 3.0 share to a 5.9 share 25-54.

Geoff,
Since you've chosen to take our private E-Mail conversations public,
I'll tell the the rest of the newsgroup's participants what I've told
you privately.

At the moment she can be heard on a list of good stations. I recall
that I cautioned you not to count your chickens before they've
cancelled. Major market stations are notoriously fickle in their loyalty
to network programming. Your experience with WCCO, Minneapolis
cancelling the show is what you should expect from many, if not most of
the major markets now carrying the show. Not just Laura, but any daytime
network programming.

I'll take your comments seriously when Laura has been up and running
for 2 years, not 9 months. I speak to new and wannabe entrants in the
talk network field (easily 5-6 a day). Virtually all of them are gone
today. The rallying cry should be "Remember Larry King."

IG>Dr. Joy Browne has done a very good job, over the years, but has never
IG>attained the above-mentioned successes, and certainly not in a mere nine
IG>months. In fact, according to our research, Dr. Laura not only has
IG>surpassed Dr. Joy in ratings, but now the Dr. Laura Schlessinger Show has
IG>more than two times the exact time audience as the Dr. Joy Browne Show.

You're doing the usual apples and oranges comparison. Dr. Joy Browne
feeds 9-12noon, eastern with a refeed at 10pm Eastern. The morning feed
is in morning drive in half the country and the evening feed is late
night. Laura feeds in a time period that can be cleared, live in all
time zones. The potential for numbers is vastly different. It has
absolutely no relationship to the appeal of the shows. No one in their
right mind will take network programming during their most potentially
profitable daypart.

IG>Dr. Laura was featured on Friday 4/21 as the only guest on Oprah for the
IG>entire hour and was profiled on Eye-To-Eye with Connie Chung in March
IG>(where Connie called her "a cross between Rush Limbaugh and your mother").
IG> Dr. Laura's appeal is in offering a relationship program based on family
IG>values and personal responsibility and challenging her listeners to take
IG>charge of their lives. ("Go Take On The Day" - Dr. Laura.)

Dr. Joy Browne has been Opss between Rush Limbaugh and your mother").
IG> Dr. Laura's appeal is in offering a relationship program based on family
IG>values and personal responsibility and challenging her listeners to take
IG>charge of their lives. ("Go Take On The Day" - Dr. Laura.)

Dr. Joy Browne has been Oprah's resident shrink for several years, now. Also, Joan Rivers and a gaggle of other TV talk shows. One hour on Oprah hardly compares. Since when do we revere anything Connie Chung says? I'd ask Newt Gingrich for an opinion on that one.

Again, when Laura has a national track record that's better than her Los Angeles track record over the past 15 years, I'll bite. So far, she's still an unproven commodity with an impressive shot out of the gate. Larry King had that. Morton Downey had that. Dozens of others had that. They're all gone, now.

Come back to us after the show has had a chance to shake out. You'll know within the next 18 months how many major markets will drop the show to replace it with local programming. I'll bet that 90% of your major markets will drop the show (any network show) within that time. It'll have nothing to do with the talent. They'll simply take it local.

In the meantime, all these gushy promotional messages belong on Web pages, not in newsgroups.

Rich

3505. Z-100 on the internet?

No ratings:
WNLT-FM 104.3 Contemporary Christian
WNOP-AM 740 Contemporary Jazz/AC (d)
WTSJ-AM 1050 Country/Christian
WBND-AM 1160 Sports/Local News
WUBE-AM 1230 Sports
WCVG-AM 1320 Southern Gospel/Sports
WAOZ-AM 1360 Radio AAHS/Sports

(a) Middletown station
(b) Dayton station
(c) Oxford station
(d) Broadcasts from 6am to sunset.

Source: _The Cincinnati Enquirer_.

Comments: I don't recall ever seeing so many stations with no ratings. Will an all-sports make it in this market? I doubt it. WUBE-AM is giving it a try, but Jacor swept up some of their programs and dumped them on WAOZ, which is doing nothing with its Radio AAHS programming. WSAI had tried all-sports when they were

still on 1360 AM, and they had no success with it.
Speaking of WSAI, they have really put on an impressive
showing with their "adult standards" format on 1530 AM.
The two "Jurassic rock" stations in the market, WOFX
("The Fox") and WPPT ("The Point") had miserable ratings
this quarter, perhaps due to competition with each other.
Even their combined 5.4 is below The Fox's highest rating
when 92.5 was running a soft AC format. Perhaps listeners
are starting to tire of this format. The high ratings of
WEBN, which features a predominantly contemporary rock
format, would seem to support this.

Source record: 32291

Here's what is happening in the 55th Market: Escondido, Vista, Carlsbad, Temecula, and Carl's Diner on I-15:

Good News: Jeff and Jer of KKLQ AM/FM set out to raise $10k on Tuesday for the Boatman's Bank Relief Fund. They overshot their goal and took in $140k!! 20,000 San Diego listeners came to the fund raiser, held at the sports arena.

The Air of my ways: Yes, KPOP is a nostalgic music station. I listed them as a 70s music station in a recent posting about SD ratings. Gee, either I'm getting older, or I'm liking my mom's music! The AM station beat out KIOZ-FM [Rock 102], XETRA-AM [Sports], KOGO [Imus!], and XETRA-FM [Stern]. The station is at 6th place with a 4.2 share, up from 2.4. Congratulations on an AM music station in this market!

News Quote: KOGO's PD Peter Weissbach in the Escondido Times Advocate on Friday commenting on the recent talk-radio reports and the president of the U.S.: "Outrageous . . . cheap polictics that demeans the tragedy and anguish of what happended in Oklahoma City."

Most worked man in the Fifth Estate: Ted Leitner on Wednesday. Radio show from 3 to 5 p.m., sports at 5:20 on TV 8, and Padres color commentary at 7 p.m. This, after starting day on Hudson & Baurer at 7:15 a.m. The KFMBer probably looks forward to weekends.
Also: KFMB has a new e.mail address: KFMB@cts.com. Perhaps a web page to come?

Carl, the owner of Carl's Diner at I-15 is gone this weekend, and in his honor, all radio log request will receive a two-for-one coupon. E.mail your request, and it'll be sent out through the electrons. Happy fishing Carl!

TIE WGAY-FM (99.5) Soft AC 3.8 4.0 -0.2
TIE WKYS-FM (93.9) Urban 3.8 3.3 +0.5
9. WHFS-FM (99.1) Alternative 3.7 3.7 0.0
10. WWDC-FM (101.1) AOR 3.6 2.9 +0.7
TIE WGMS-FM (103.5) Classical 3.6 3.4 +0.2
TIE WHUR-FM (96.3) Urban 3.6 3.7 -0.1
13. WMMJ-FM (102.3) Urban/AC 3.5 4.1 -0.6
14. WTOP-AM (1500) News 3.4 3.0 +0.4
15. WBIG-FM (100.3) Oldies 3.3 3.4 -0.1
16. WJFK-FM (106.7)Stern/Don&Mike3.2 4.2 -1.0
17. WARW-FM (94.7)ARROW/70's/AOR 2.6 2.5 +0.1
18. WWRC-AM (980) Local&Net Talk 1.7 1.6 +0.1
TIE WYCB-AM (1430) Religious 1.7 1.1 +0.6
20. WOL-AM (1450) Local Talk 1.6 1.1 +0.5

Winners this book: Smooth Jazz 105.9, continues to grow in popularity in the metro D.C. area moving from 13th place overall to 5th.

Rocker DC-101 is back in the top 10 with a strong gain.

Urban staton WKYS, which is about to be sold to Albimar communications, hopped up to a 6th place tie from 13th place.

Losers this book: "Shock talk" station WJFK falls from 5th place to 16th place overall. A shocking fall for a station that just spent a boat-load of money to get the Washington Redskins football rights for the next 3 years.

WARW's ARROW format has yet to be embraced by Washingtonians. Judging from what I've heard from listeners and seen posted in RRB/Airwaves, most folks think the music is OK but do not like their on air staff or their jingles. It's been a year-and-a-half since the format changed from WLTT (Lite Rock/ Less Talk) to All Rock & Roll Oldies/Classics and the ratings are no higher than they were under the old format. Example: Listeners 12+ Summer 1992, WLTT FM 94.7 had a 2.6. Fall 1992: 2.1. Winter 1993: 2.8. Spring 1993: 2.2. Summer 1993: 2.0. Fall 1993: 2.2. Management can't be pleased with

this books 2.5.

WMMJ's Urban AC format took a bit of a tumble this book too, falling to a 3.5 from the fall's 4.1.

Falling out of the top 20 this rating period are WXTR, X-tra 104, who changed format last month from Oldies to 70's. And Washington's troubled All Sports station AM 570 WTEM fell out of the top 20 station list.

In the Fall of '94, WXTR was ranked at 19th place with a 1.5 and WTEM was 20th with a 1.3.

I know of two AM's in the Boston market that have parking lots over their ground systems. I suspect the price of real estate around here is just so high that using it solely for a ground system is not cost-effective, especially in this day of declining AM listening.

One of the AM transmitters in question is located in the WCRB studio building, although it hasn't belonged to WCRB in twenty years. In 1985 a truck in the parking lot snapped a guy wire and took down one of the towers. I think you can still see the marks in the pavement where it landed.

Matt,
I used to work for an AM'er here in Salt Lake. What I would
tell the listners was to get a Quaker Oats (or simialr) box,
about 100 feet of wire. Throw 40 feet of that wire outside,
preferably just launch into a tree. Wrap the rest of the wire
around the box and leave about 5 feet not wrapped at the other
end. Place the box in, around the receiver. Move the box around
until you get the reception that you want. Seems to work.
At least with AM haven't tried it with FM.

|: fine. Yes I've already tried all the obvious things...

Among the obvious things:

Hooking up an outside antenna. Did you do that?

What? No antenna jack? Well, how about clipping to the rod?

What? No rod? It's an AM radio?

How about wrapping a few turns of wire around the radio itself (in a direction that couples with the internal antenna), connecting one end to ground, and letting the other stretch across the room...

What? No rod? It's an FM radio?

Probably the headphone cable is being used. Clip your antenna to the headphone jack.

What? It's fine on every station except the 250-watt 1550 kHz AM you want to listen to, that's 75 miles away?

Move.

>...But then again, one thing that stands out about 105.7
>is its history of format changes -- they probably hold a record in
>that category in the Boston market...:-)

I beg to differ. When I first set foot in the Boston area (mid-1970's) they were WVBF "F-105" running top-40 rock. Since that time they've changed formats twice-- in 1981 to adult contemporary and 1994 to country. Compare this with CBS's WODS, which was WEEI-FM Soft Rock ("Joni without the baloney; the Eagles without the turkeys; Roberta without the flak") until 1983 when they changed to WHTT (CHR), then WMRQ "Quality Rock", a proto-AAA format (but not the first; see below) in 1986, then WODS a year or so later.

WJMN (94.5) was WCOZ "Boston's best rock" in the seventies, then (still WCOZ) adult contemporary in 1983, then WZOU (CHR) in 1984 or thereabouts, and now WJMN (CHurban).

The grand champion of format switching in Boston has to be WBOS, where I was chief engineer in the early eighties. Running beautiful music in the mid seventies, they went disco (1978), AC (1980), AOR (1982), and pioneered what must have been the first AAA format in the country under Clark Smidt (also 1982), then alternative rock (1983), country (1983), and AAA again (1988 if I remember right).

>stations[the other two are WFNX 101.7FM and WODS 103.3FM]. I'm sure they'll
>have no problem finding a buyer and getting the most money for the property...

Nope, four; the other is WCRB, which has been running a single format-- classical-- since 1948 (although not always on 102.5 FM)

Reply-To: mbrady@ibm.net

Is radio talk show host Gene Burns, from Boston I think, still on the air?
I used to pick him up in Georgia, but the station replaced him with Limbaugh.
If anyone knows where and when he broadcasts I would appreciate the
information.
I would be especially interested to know the call letters of his
home station and the frequency.

Might he also be on shortwave?

Please forward and e-mail, too, if possible!
Thanks!

G'day all...

I wonder if anyone could help me out....
A group of associates wish to start a low-power, non-profit A.M. radio
station here in Ottawa, Canada. They wish to broadcast somewhere between
500-1700 Khz but desperatly need more info on licensing procedures in Canada.
Basically they would like a general idea of whether or not this is even
feasable and also a general idea of what the licencing procedure entailes
before they start making phonecalls and vists to Industry Canada or the
D.O.C. Can anyone help me out? I've been told that low-power transmitters
(5-50 watts) are legal in Canada but I'm not sure if that information is
acurate or not! Can anyone comfirm this and also maybe give me a little more
info on licensing procedures for this kind of station?
Also, does anyone know if Industry Canada is reachable over the inter-net?

Any help would be GREATLY appreciated!!
Thanks in advance!

-Jim!

3524. Liddy in Fort Wayne

Reply-To: maya548980@aol.com (MayA548980)

This is probably not news to you professionals, but some of you may have missed it.

G. Gordon Liddy was in Ft. Wayne Indiana last night. All 3100+ seats in the Embassy were sold out as was the cocktail reception held prior.

There were many bomb threats made on the Embassy Theater. In fact, it was so tense that a high school prom which was to be held in the Botannical Gardens next to it was moved to the high school gym for the safety of the students.

Liddy had plenty to say to his critics. Haven't read all the reviews yet. Those who sponsored his appearance were threatened with boycotts, etc. All of this was set uplong before the OKC bombing.

BTW: WOWO's signal in the daytime has become very annoying. It seems that the engineers employed by Federated Media do not know how to keep their other stations from interfering with each other. This is another step on the way down.

3528. Mexican AM Powers >50 KW

Newsgroup: rec.radio.broadcasting
Date: 1995-05-01 00:00:00 UTC
From: jfriley@iadfw.net
Message-ID: <3o24u9$e61@vixen.cso.uiuc.edu>
Source record: 32159

A recent posting suggested that the maximum power of Mexican AM stations is 50 KW. That is not accurate for existing stations. Two examples: XEW, in Mexico City, the mother station of the Televisa broadcasting group (Systema Radiopolis), uses a Continental Electronics 318.5D 150 KW transmitter and a 318C 100 KW transmitter combined for 250 KW service on 900 KHz. XEG, Radio Ranchero, the mother station of the Bicharra group (that also owns XEPRS--formerly XERB) uses two 317C-3 50 KW transmitters combined for 100 KW service on 1050 KHZ. The D319 dissimilar power combiner at XEW uses a Magic T circuit; the D318 combiner at XEG uses a conventional bridge combiner. Several other stations in Mexico hold licenses for powers in excess of 50 KW although olnly about five actually run their full licensed power.

At WWHS-FM, we have begun broadcasting news/features from the World Radio Network (WRN) in London. This may not be what you're looking for, but it work$ for us. WRN is a satellite distributed (more on that later) collection of the English language news/info programs from 25 +/- countries. They include Australia, France, Netherlands(!), Ireland, and so on. The programs are typically 30 or 60 min long, so they may not fit your format, although the news at the beginning of the hour is typically in the 5-15 minute range.

Now, I have found the people at WRN (and Global Communications) VERY easy and helpful to deal with. WRN can be contacted at WRN@CITYSCAPE.CO.UK. I'd encourage you to try them.

The satellite part: From Global Communications, we got EVERYTHING we needed, except the post in the ground, to put a satellite audio signal into our broadcast board for a total of $450. We put in some time in dish assembly, but the instructions were clear and Mike Kohl was particularly helpful. Global Communications is located in Spring Green, Wis. I don't have their phone # here- just use directory asst.

There is currently no subscription fee for WRN and the dish was pretty cheap, so this fit into our microscopic budget well. Our students get a really diverse picture of world events and something interesting from their radio station.

good luck

Message-ID: <3o24uc$e6a@vixen.cso.uiuc.edu>
Source record: 32161

Years ago, when they were first released, we used to do some mods
to Otari MX5050-BIIs to improve their "drop-in" editing capability
for radio work.

It involved swapping around the order of the heads, to Erase,Record,
2-tk Play, Qtr-tk play (to reduce time lag between play & erase/record)
.and also involved modifying the bias circuit to speed up bias
ramp-up to permit faster dropping into record.

Unfortunately I no longer have access to the modified machines, and I
want to modify some more.

Does anyone have the detail of the bias mod?

If so I would appreciate it.

Many thanks.

Peter Smerdon.

>those cases, the vinyl version can sound better

I really don't think it has that much to do with the delivery medium.
They each have advantages and disadvantages. I think it has to do more
with the care taken when making the masters. If the original master
session reels are available along with the original engineers and
producers, CDs can sound better than the original vinyl versions.

If the proper care and attention to the mix and equalization isn't
attended to, the original vinyl WILL sound better. That's why certain
record/CD collectors I know pay close attention to who mastered a
CD collection. Bill Inglot with Rhino always gets high marks because
he strives to get the CD to sound as good if not better than the
original.

A small group of artists are releasing their albums on vinyl. The local
Harmony House chain here in the Detroit area started carrying a small
section of vinyl again.

The high-end mavens like the warm sound of tube amps and the older
technology does have its charm. It has been around quite a while.
Digital equipment that's high end can duplicate that warm sound.
But it's like anything else...you get what you pay for!

>[SARCASM INTENDED]

...but not needed. What IS needed is for talk show hosts to be responsible on the air-radio and television alike-so they aren't making themselves targets for criticism as hate-mongers and inciters of violence.

If there weren't some small grain of truth in the fact that the tone of talk radio today has grown so ugly that it encourages those in the fringe, Rush Limbaugh wouldn't be spending so much time defending himself these days; he'd just move on.

I just saw on McLaughlin Group the panelists essentially call Clinton a dummy for accusing talk show hosts of making the bombing possible...the reality is that Clinton's comments about talk shows rang true with most Americans...and that's why Limbaugh's show has been crippled the last two weeks. It hasn't been able to have the edge that it normally has. Politically, I think Clinton should be given an "A" in strategic speech...a few words-easily and quickly deniable-that have incapacitated, albeit temporarily, an adversary.

A listener reminded me the other day of a fill-in I did for our conservative local talker...a time when I was in the position of hearing callers blast Limbaugh (about six months ago). I defended his right to speak, but also reminded everyone that with freedom...including freedom of speech...comes responsibility...and that talk show hosts must recognize that. Funny how we heard Clinton say the exact same thing here in Des Moines last week. Maybe I have a job waiting as a speech writer? ;)

You make excellent points, the strongest being the "straw man" technique which Limbaugh does better than most. Oliver North, neophyte on the microphone and a "talk show host" by designation rather than qualification, has been working on it as well. Here is how it worked out recently:

On the Monday after Pres. Clinton's two speeches in which he included passages asking all Americans to respond to and challenge hateful and divisive speech North asked his "North Poll" question: "Should Pres. Clinton be able to tell us what to talk about on talk radio?" Ollie expressed delight later in his program that 99.5% of his callers that day answered "no."

That fact that Pres. Clinton never asked for or even implied that he wanted censorship of any medium was not discussed. North created a position for Clinton out of the darkness of his own mind, then attacked Clinton for something Clinton had never advocated.

This is merely one example of the technique, but it is, IMHO, at the core of what is wrong with current talk radio. Talk radio, in the name of entertainment, makes a lot of things up. The majority of talk show hosts working today, network and local, are conservative or libertarian and as such have targeted government as their main target. Many of them maintain that they are important politically and can get a vote on a specific issues or even a set of issues changed by the response of their listeners. At the same time they create a picture of government that is, depending on the occcasion or event they use to create more of the image, venal, brutal, mindless, ignorant, cruel, divisive--fill in the negative characterization you wish to use---they deny that any actions taken against such a government have anything to do with them. Having claimed power for the sake of their egos and their hype, they deny it when something bad happens. Or they use the ultimate Limbaughian cop-out: "I'm not a journalist. I'm just an entertainer."

I have been in talk radio as a host in Washington, Cincinnati and Boston for over twenty years and am disgusted with my profession. Management, most of which has no experience in talk radio and even less in journalism, revels in the headlines their hosts get for outrageous conduct and irresponsibility. They bask in the reflected glow of feelings, often self-created, that they are important players in the politics of their towns and they repeat the mantra: "We're not in this for facts, but for profits." They insist on no journalistic ethics, they stage phony "suspensions" when a host goes over the line so that they APPEAR to have some standards, then publicize the hell out of the incident so that it sounds as if their station is "where it's happening" even though what is

happening is racist, sexist or seditious.

Talk radio and television as well as other media exploitation of "in-your-face" style "conversation" IS polluting America. And Clinton was right: too many people who give lip service to rights and responsibility have celebrated the right without responsibility. The solution is not, as he said, to violate the free speech rights of right or left wing talk show hosts but to argue with them, their stations and their listeners when they are once again trashing America or their betters in order to get their moment of fame and publicity as well as a thirteen-week extension on their contract.

Believe me, most of the talk show hosts now working regard themselves as much more important than mere "entertainers." It might be time to remind them that that's what they are becoming as they attack the structure of this society for their own profit while proclaiming innocence in the face of violence they encourage by portraying people and institutions as soulless, mindless and evil.

Francisco Duran listened to talk radio and he tried to kill the President. Do not allow the talk show hosts he listened to to escape responsiblity for the image of America they created for him.

3543. Re: Wanted: Good, but inexpensive traffic program

Newsgroup: rec.radio.broadcasting
Date: 1995-05-01 00:00:00 UTC
From: pcwbillb@aol.com
Message-ID: <3o24uo$e7f@vixen.cso.uiuc.edu>
Source record: 32174

Grant hudson was saying:
The software provider hooks you with an inexpensive program, as far as purchase price is concerned, then builds in code that shuts the system down if your traffic director hits a wrong key. You have to call them for "support" for which they bill you on a monthly/quarterly basis forever. The correction is usually something simple like "hit the F3 key", and everything goes back to normal. They build in these problems, keep the info out of the documentation, and charge you forever.

There is a reason for that: They want to stay in business. I considered writing a traffic program for small market radio and tv, but the tendency in a lot of places is to buy cheap, then protest when questions have to be asked. I've done radio (CE at a few stations)... done air work... and I do computers. (Hint: my current employer is a biggie in the software business...)

The trick is that for a software business to *stay* in business, you have to generate a fair bit of cash flow. That means things like radio where you have a few thousand possible sales need to continue to provide $$$$ to keep that software supported.

If you sell the software outright for $1K (as an example).. and you sell 500 of them a year, that is a fair bit of cash.. However, the programming staff, support staff.. documentation people and all are not cheap. The last software house I was with did an analysis, and unless we got somewhere around $500 per station year after year, there simply wasn't enough cash flow to support more than a microscopic staff.. that means no updates.... no bug fixes.. no support.

The initial development is around 6 man months to a man year. (Read: $45K for a talented programmer.. mabe a touch more..)--- Docs? 3 man months with a technical writer and additional staff person. Support? Humans cost a fair bit each year if you hadn't noticed. Figure $30K a year for a support droid. If you sell 500 in the first year, you are going to have to come up with that $30K the second year somehow.. (Selling another 500 would be nice, but then that requires an additional support human the second year..)

Radio is, unfortunately, a limited market. You don't have 100,000 insurance agents to hit. I worked in Insurance Software at my last job, which died because there were only a hundred K or so agents to sell to... and that was with a wonderful package with *6* man years in it... That system sold for only $395... the part that made the money was the database they sold each month.

With a traffic system, there is no database you can sell each month to make up the bucks... You can only do it off support..

>
Don't bet on it! Scott Savage, GM of the combo, is one of the
smartest/most strategic radio folks I've ever known. It doesn't
really matter that KSNN has a 2.0 or so 12+... when you add its
demographics and audience to KYNG, you have what is, by far, the best
country spot buy in North Texas! I think it's safe to say KSNN is run
"on the cheap", with no major promotions or advertising,
market-average pay for the jocks. While I have no idea how he's doing
it, I wouldn't be surprised if Scott is selling KYNG, and bonusing
KSNN, or some combination thereof. He's also protecting KYNG from
even further fragmentation of the country audience by controlling the
most logical fragmentation. Let's face it: the man invented, no,
first executed successfully in a major market, the Young Country
format. Don't ever bet against him! (And my law firm isn't taking
any new clients, so these kind words are gratis. <g>)

Tell 'em to turn on a radio, and tune it away from your station for a day. Who's running automation? You'll find it on the AM band, on outstate stations, low-budget sounding operations with no local-interest information and lots of PI (per-inquiry: call 1800ABCDEFG!) ads instead of big local schedules.

Now listen to big stations with big advertisers and big ad accounts. They may have smooth, stick-to-the-format announcers, but they're live people, engaging local attention. An automation system can't take local calls with comments on local events, where the storm hit in the city or even local requests.

If the managers have problems with dependable staff who run a station they can sell, perhaps they should look at their hiring practices, and their sales department. There's so much pressure from up-and-coming jocks lining up to get into metro radio, they should be able to find a good staff that can make them plenty of money to run a quality operation without closing the studios and putting a satellite dish on the roof.

Source record: 32179

The local news/talk station in Fresno (KMJ) recently fired their weatherman, Sean Boyd.

Depending on who to believe, Boyd, or KMJ management, Boyd was either "let go" because of substandard performance, or because Boyd didn't deliver the weather that KMJ wanted.

According to the Fresno Bee, Boyd was fired because he didn't present an optimistic weather forcast for the day that KMJ was holding its 2nd annual "Politically Incorrect" picnic - an outdoor event inspired Rush Limbaugh (KMJ is the local Rush station).

According to the Bee...

Boyd predicted rain.

KMJ wanted sunshine.

According to the Bee, Boyd refused to change his forcast, and as a result, was let go.

Now, in today's (Saturday, April 29) Fresno Bee, Boyd claims that KMJ had asked him to change forcasts for past KMJ, or KMJ related events. Boyd claims that when he predicted "partly cloudy skies, breezy and cool with highs in the upper 50s and 60s" for a day that a KMJ sponsored golf tournament was to take place, KMJ management asked him to change it to "mostly sunny with a high near 70."

Since the Fresno Bee printed its original story on Boyd and KMJ, KMJ GM Al Smith has gone on the air to say that Boyd was relieved of his duties for "subpar performance." Smith has denied anyone ever suggested that Boyd change his forcasts.

Source record: 32182

My recollection of why WINS went all-news is somewhat simpler than the ones offered. I was there, as Director of Community Relations, transferred over from Westinghouse Broadcasting (not yet Group W) HQ office. Westinghouse was a very strait-laced organization, headed by Donald McGannon, a man who claimed to be devoutly religious. (He was, BTW, a Papal Knight.) The feeling around Headquarters was that the format was too raucous, too undignified for a Westinghouse property. There were also some who thought that some of the deejays were on the take. Westinghouse Electric was having some of its own image problems relating to alleged price-fixing. The idea (and this does not negate some of the other suppositions about audience and income necessarily) was to create a high-level, squeaky-clean image for a Westinghouse operation. Had they had a station in Washington, and there was much talk of trying to acquire one, it would have gone the all-news route first. However, this was what they had; it _was_ in the communications capital; all-news was considered a good way to achieve a clean image. Had the group headquarters been in, say, Fort Wayne rather than New York, WOWO would have been the one to go that route; or WIND, Chicago, if the same. The laws of libel and slander make it prudent for me to perhaps go no further. Bert Cowlan.

>From: wwcr@aol.com (WWCR)
>Subject: WWCR Press Release

OFFICIAL WWCR PRESS RELEASE
28 April 1995

We have found it necessary to, at least temporarily, suspend the airing of the program "The Intelligence Report."

The adverse publicity against programs of this nature in the aftermath of the Oklahoma City bombing and indiscriminate killing of innocent people including children, has caused us to reconsider our responsibility as a broadcaster.

We do believe in the Bill of Rights and the First Amendment of the US Constitution, including the freedom of speech. To paraphrase the words of a very famous American, "Although I may not believe in what you say, I will defend with my life your right to say it."

We find ourselves today in a violent world, with the breakdown of families and family values, with parents and children killing each other, ethnic cleansing killings in Bosnia and elsewhere, terrorist attacks all over the world, excessive violence permeating our movies and television, and the concentration of our news media (cable, t.v., radio, newspapers, etc.), to focus on this violence, in part generated by a public ever thirsty for grisly tales of horror.

Somewhere and somehow it must be stopped! We must all contribute to that effort.

It is as wrong to accuse any one group (no matter how "far-right" it may be), of responsibility for the irrational, irresponsible and criminal actions of the Oklahoma City incident, as it is to accuse, for example, the anti-abortion movement of responsibility when one of its believers deliberately kills a doctor who may be performing abortions.

But those who use the media, radio, newspaper, television, short-wave, etc., need to understand that their words, to paraphrase a recent editorial, "no matter how innocent or rhetorical or satirical they may in fact be, have the power to push certain people over the edge, into violence." We don't mean to suggest that such broadcasters should be

shut-up, only to remind them that it is possible to be both conservative and responsible.

It is not enough for such broadcasters to satisfy themselves that they meant no harm. They need to reflect on the possibility that their excessive language can lead other people over whom they have no direct control, to do harm, and that their bitter words can have consequences.

Due to the volume of our programs we at WWCR are not able to review programs in advance or even during their airing for content. We do rely upon our listeners to alert us when they hear offensive material and when they do, we review the program and closely monitor it in the future. Programs that are offensive to our listeners are censored and/or canceled.

WWCR Programming content breakdown:
Christian teaching/preaching programs 83%
Open forum talk programs 8%
Country and other music programs 5%
Technical/science/short-wave programs 2%
Entertainment programs 2%

Going boldly where no other SW broadcaster dares.

3554. ADMINISTRIVIA: Political talk on rrb/AIRWAVES

Newsgroup: rec.radio.broadcasting
Date: 1995-05-01 00:00:00 UTC
From: rrb@clm.aiss.uiuc.edu
Message-ID: <3o24tf$e36@vixen.cso.uiuc.edu>
Source record: 32228

Hi:

Have been fielding a good bit of mail, recently, on the topic of "political rants on this broadcast group". Here is how it is all shaking out. I am open to other opinion.

Yes it is true that talk on this group can stray from 'pure' broadcasting topics to political debate, especially when the likes of Limbaugh, Liddy, Leykis and others are concerned. These threads always start out Radio Related, since these men are all radio personalities, but the talk often [Read: always] gets way beyond the respective hosts and their positions on issues etc.

We all know that *I*, your esteemed (sometimes just steamed), moderator gets into these discussions as often as anyone, so it would be the height of hypocrisy for me to say that I don't play a significant role in these digressions.

However, despite my propensity for political rants and debate, I always make a point to constantly refer back to the radio-issues involved as well as any political digressions. None the less, I feel it only fair that if I am going to indulge myself in these discussions that I allow others similar access (I am a believer in diverse opinions) so that all points of view can be aired. I do not, usually, post articles that are totally devoid of radio content and are merely "Liberal<->Conservative bash-sessions".

Also, (as many in the industry often respond when asked "Why does radio play all that dull music" ... Because People Want To Hear It...), I try to respond to what the readers want to discuss. Lets face it, politics is a hot topic, especially for those in media. So to artificially eliminate it would be an act of undue censorship.

BUT .... a number of our most respected posters have commented that it IS getting out of hand and getting too far afield from the charter of this group, radio broadcasting. Therefore I am going to try to tighten up on the political side-roads on this group. Basically, I will continue to post material about Rush, Liddy, and talk radio in general, but once it starts getting into the Liberal<->Conservative bashing I will put a stop to it. Once we start using terms like "Typical [Liberal/Conservative] Media" and other such pejorative stupidity, I will have to curtail the thread. There is no need to enter an attack-mode with our political opponents. We can respect each-other even as we disagree.

Also, if you post political commentary, PLEASE make a specific effort to *anchor your comments to the topic of BROADCAST RADIO*. I don't want to degenerate into 'ruling the group with an iron fist' nor do I want to degenerate into a shouting match of unresolvable differences. We are here to talk radio. Politics IS a part of radio... but lets be sure we stick to radio while we delve into our political slants.

Obviously when current events like the OKC bombing occur, political posts will be more timely and more relevant. I will do my very best (as I always have) not to restrict appropriate dialogue. I, of course, will do my best to adhere to this ideal.

I hope hat we can live with this idea, I have to admit that it is necessary at this time.

3555. Baltimore RadioWatch

Newsgroup: rec.radio.broadcasting
Date: 1995-05-01 00:00:00 UTC
From: James Purther <73124.3307@compuserve.com>
Message-ID: <3o24tg$e38@vixen.cso.uiuc.edu>
Source record: 32229

Baltimore Arbitron Ratings:

Station Fall Winter
1. WPOC-FM (93.1) Country 10.9 8.1
2. WBAL-AM (1090) News/Talk 7.4 7.4
3. WLIF-FM (101.9) AC 5.4 6.2
4. WXYV-FM (102.7) Urban 5.6 6.1
5. WWMX-FM (106.7) AC 5.6 5.6
6. WERQ-FM (92.3) CHR-Urban 6.0 5.5
6. WQSR-FM (105.7) Oldies 6.3 5.5
8. WWIN-FM (95.1) Gospel 3.3 4.8
9. WIYY-FM (97.9) AOR 3.7 4.0
10.WOCT-FM (104.3) 70's 3.7 3.6

As more Baltimore RadioWatch's appear here, I'll give a little more background on the top station's in the market but ratings are always a good place to start. Most notable items to watch for include the lack of a true classic rock station here (WIYY and WGRX are AORs and WOCT is 70's), the affect Washington D.C. station's that penetrate Baltimore's airwaves have on the market (progressive-rock WHFS broke the top ten in the fall book), and if WBAL can reclaim #1 overall with WPOC slipping and fellow News/Talk WCBM continuing to hammer away at them.

Stay tuned.

News of the past two weeks.....

Movin to the other end of the dial

The Chicago Bulls and the Chicago White Sox will be switching from WMAQ-AM (670) to WVMP-AM (1000). MVP and station owner Evergreen broadcasting, which is now home to the Chicago Black Hawks, paid a reported 32 million for a 5 year contract and a 5 year option. The Sox are expected to move to MVP next season with the Bulls to follow in October of 1997. There was speculation that the move would involve an equity interest for Bulls/Sox owner Jerry Reinsdorf. However, both parties denied any equity in the station was involved.

It is what impact the loss of the Sox and Bulls will have on WMAQ. MAQ is all news during the day and has a lame sports talk program in the evenings.

Movin on up

Dave Robbins, former evening and morning jock at WWBZ (predecessor of WRCX 103.5-FM) has landed in Memphis at WMPS handling the morning drive.

Deidra White returns to WBBM-AM (780) as the managing editor. Deidra had been at Detroit's WWJ in Detriot.

Terry Hardin, General Sales Manager at the struggling WPNT got out before the boat sank. He landed as GM at KZON-FM, KYOT-FM and KOY-AM in Phoenix.

More OJ talk:

Although it appears that the publics appetite for OJ news is fading, Roe Conn (mid-mornings at WLS-AM (890)) will host a prime time discussion of the OJ trial at 6 pm Central time. The gabfest is syndicated by ABC radio and Court TV.

Message-ID: <3o24th$e3c@vixen.cso.uiuc.edu>
Source record: 32231

Sorry for the delay in posting these numbers. I was trying to get my hands on a complete listing of the ratings. However, my source dried up . I was only able to track down overall station ratings along with top tens in mornings and afternoon drives. If I can get my hands on a complete list, I will post additional results ASAP. Thanks for your patience.

The Winter Arbitron ratiings were released. The results for the 12 year old plus demographic are detailed below along with the Fall results.

WGN (talk) 7.1 6.9
WGCI-FM (urban. contemp) 6.4 6.3
WUSN (country) 4.3 4.1
WLIT (light favorites) 4.1 4.1
WBBM-FM (top 40/dance) 4.0 4.3
WVAZ-FM (urb. adult. contemp) 3.9 4.3
WKQX (alternative rock) 3.7 3.6
WMAQ (news, sports talk) 3.6 3.2
WBBM-AM (news) 3.4 3.9
WJMK (oldies) 3.4 3.1
WNUA (smooth jazz) 3.2 3.5
WLUP (entertaining talk) 3.2 3.3
WRCX (rock) 3.0 3.1
WLS-AM (talk) 2.9 3.5
WXRT (progressive rock) 2.8 2.7
WOJO-FM (Spanish language) 2.7 2.7
WAIT-AM (big band) 2.4 1.1
WTMX (light rock) 2.4 2.4
WCKG (classic rock) 2.3 2.3
WNIB (classical/jazz) 2.0 1.9
WEJM-FM (urb. contem/rap) 1.9 2.3
WPNT (light rock-70-90's) 1.9 2.2
WYSY (70's) 1.7 1.8
WSCR (sports talk) 1.6 1.8
WGCI-AM (oldies) 1.4 1.1
WFMT (classical) 1.3 1.1
WMVP (sports talk) 1.2 1.3
WJJD (talk) 1.1 2.3
WIND (spanish language) 1.1 1.3
WLS-FM (talk) 0.7 1.0

Highlights of the numbers:

Long time king of morning drive Bob Collins (WGN) extended his lead over his competition. Bob scored an 11.7 share, up from a 10.5 in the fall.

WGCI's Tom Joyner also enjoyed an uptick in ratings, moving from a 5.6 from a 5.1.

Pat Cassidy and Jay Congdon from all news WMAQ jumped from a 3.3 to a 3.8 share.

Mancow Muller (WRCX) continues his ascent towards the top of the ratings heap. Mancow moved up to 5th in the mornings with a 3.8 share. Mancow, who inherited a 2.4 rating upon arrival, has moved to the 3.8 share.

Steve Dahl and Bruce Wolf (WMVP) declined slightly to a 2.7 share from the previous 2.9 share

Kevin Matthews (WLUP) dropped out of the top ten of morning shows. Kev dropped to a 2.9 share from a 3.9 share in the Fall.

Doug Banks (WGCI-FM) continues to lead the PM drive with a 6.3 share. Johnathon Brandmeier (WLUP) improved his share from 5.2 to 5.4.

OJ Simpson played a big role in the afternoon ratings. WMAQ, which has broadcast the trial live since it started, moved to a 4.1 share versus a 1.8 in the Fall.

Ian Punnett moved from a 4.0 to a 4.5 PM's on WGN.

It is too early to tell how Howard Stern will impact WCKG. His first day in the market was the last date covered in this rating period. CKG held its share at 2.3 as Chicago's home of repetitive music.

Station versus station:

News: WBBM-AM now trails WMAQ. MAQ moved up to a 3.6 while BBM declined to a 3.4 share. The return of Michael Jordan and coverage of the OJ trial certainly helped MAQ.

Sports talk: WSCR, down slightly 1.6 in the winter vs 1.8 (fall)
, continues to lead WMVP 1.2 (w).

Classical music: WNIB maintains its lead over WFMT. NIB scored a 2.0 share vs. FMT's 1.3.

Adult contemporary rock: WLIT continues to tower over its main competitors WTMX and WPNT. One wonders how long TMX and PNT will continue before trying their hand at another format.

Rock in all of its genres: WKQX maintained its audience at a 3.7 share. WRCX (3.0) and WXRT (2.8) remained very close to their performance in the Fall.

Oops, did we make a tatical mistake awards?

WJJD, which had a stranglehold on the big band format, took a mighty fall from 2.3 to 1.1. The station, which mainly features syndicated talk from Infinity Broadcasting, was lapped by a weak signal, daytime only station WAIT-AM which now is the only outlet for big band. On the whole, Chicago continues to reject syndicated talk shows.

Congrats to WLS management (Tom Tradup and Drew Hayes). Their plan to make WLS-FM into a lifestyles and entertainment talk outlet appealing to younger people is a failure. The station limped into 30th place with an abysmal 0.7 share. The dynamic duo also watched their AM outlet decline from a 3.5 share to a 2.9 share.
Possible format change in the air on the FM side?

WYSY,(70's music) which scored a 2.6 in the spring 1994 book and got all excited about its future, continued its decline. The station is down to a 1.7. Nothing like hearing the same songs over and over and over and over.

Hi Rich,

>>When a union employee becomes a boat anchor, the business is in trouble.

IMHO, when ANY employee becomes a boat anchor--union or not--the business is in trouble.

Then too, when the FCC buckled and allowed Rule 80-90 to be pushed through, it set the wheels in motion for the entire radio industry to go on a feeding frenzy. Unfortunately, few people realized that it was feeding on itself.

I myself am not generally in favor of government regulation, but I do believe that the allowance of Rule 80-90 will go down in history as one of the most destructive actions taken by the government against radio broadcasting.

One way to get better reception on an AM radio is to build a resonant loop antenna. I'm not sure of the exact physics, but you could think of it as sucking up a larger amount of signal, approximately scaled to the cross sectional area of the loop.

One sized 2 feet by 2 feet would intercept lots of signal strength. If you're somewhat handy with radio electronics, These loops are fairly easy to make. You'll need a variable tuning capicator, range of about 10pF to 350pF. The sort used in old vacuum tube radios (before you trash that old 5 tube AM radio grandma used to have, be aware that these old radios are collector items nowdays, and worth some money. More if it still works.). One possible source is to get one of those stupid Radio Shack "build an AM radio for the school science fair" TRF radio kits. And you'll need two pieces of wood similar to yardsticks. And 4 terminal strips with 8 or 9 lugs (the kind with a hole in each lug, not a T post.). And 22 or 24 guage insulated wire.

Make an X cross with the yardsticks, and attach the terminal strips in a mechanically convenient manner, but in a way that when you thread the wire thru the holes, the adjacent turns of wire don't touch much, with about 1/8 inch seperation or more. A few touches here and there won't matter. Do the wire so the first turn passes thru the first lug hole of the 4 strips, then the second turn passes thru the 2nd hole, and so on (You don't have to strip and solder at these lugs, they are for mechanical support). after the 8th turn, mount the variable capacitor to one of the yardsticks, near the beginning of the first turn, and the end of the last turn. Connect the begin wire to one side of the cap (electrically speaking here), other to other.

Now, time to adjust, cut and try.

Allign approximately the radio's ferrite rod antenna and the loop such that the long axis of the rod is pependicular to the plane of the loop. have the radio in a convenient spot, but within about 4 inches of the outer perminiter of the loop. Tune the radio to a station that is somewhat weak, in about the middle of the AM band. Try to see if tuning the loop's variable cap will increase the signal of this station. Odds are that if it peaks, the peak will be near one end or the other of the loop's capicator. If the cap's metal fins are close to being all meshed, you'll need to add another turn of wire to the loop, if the cap's fins are mostly unmessed, remove a turn. This will take a few iterations to get the cap's dial to peak the station where you'd expect that

station to appear on that dial if it were the radio's dial.

More adjustments: tune in a station near the 540 end of the band, see if you can peak the signal with the loop's cap. If you can't, try a station higher up, till you find a station you can peak. You can add more turns of wire to extend the range lower, but be sure to check that you don't loose the high end of the band.

Expect to spend the weekend fooling around with this, it's an iterative process.

If you just want to recieve a particular station, you need not worry about the tuning range adjustment above. Odds are you will want to use this loop to DX distant stations, so the range will be of value.

[Bill - If someone else already posted this, it is not necessary to repeat]

A report in Long Island Newsday states that radio personality Bob Dayton died of Cancer. He is best known for his firing in 1965 from WABC when on the 20th Anniversary of the bombing of Hiroshima, he dedicated "Sixteen Candles" by the Crests to Japan. He worked at several New York and Long Island radio stations including WKJY and WPIX-FM. Bob was 60 years old when he died.

>that category in the Boston market...:-)

NAAH!, not even close. As I recall, this is only their third format...
Top 40 from the late 60's (as WKOX-FM) thru the early 80s, many flavors of
AC thru the 80s, and now country.

The champion (if you wanna call it that) of revolving formats would have to
be WBOS. In the past 15 years or so, elevator music, disco, soft AC, several
flavors of AOR, several varieties of country, and many variations of AAA.
The common thread seems to be that all have been executed poorly, and they've
remained the most consistent dog of the market.

```
: Canada doesn't have allocations for calls beginning
: with "CB" . . . .

CBC radio stations do carry the CB prefix. This is an 'unofficial' call
sign. Take for example, Australia and New Zealand. They use callsigns
like 2XS, 6KY, etc. Those prefixes are not assigned to these countries.

In MW radio, I don't think there is a problem. It's when they start
signing like that on HF bands, then it's time to be concerned.

>CJBC was a phantom station -- that is, a station that "owns no physical
>equipment, but is alloted a distinctive call signal and is licensed to
>operate over a station having physical equipment."
>

This brings up a couple of interesting points in regard to early
broadcasting in Canada. Phantom stations as far as I know were unique
to Canadian broadcasting. W Grant, the founder of station CFCN
Calgary (Spring 1922) is believed to have originated the idea of
a phantom station. Most of the orginal Canadian Stations, like many
in the USA in the early years (up to 1925 or so) were operated by
manufacturers of radio sets and related items, such as CFCF Montreal
(Marconi), CKCL Toronto (Dominion Battery Company), by newspapers
(CJCA Edmonton (Edmonton Journal), CFAC Calgary (Calgary Herald) and
CFCA Toronto (Toronto Star)), by sellers of radio sets (CFQC Saskatoon)
or by religious groups. Without such backing it was difficult to run a
station as advertizing was not permitted. To get arounf this problem,
Grant came up with the idea of a phantom station. A organization would
apply for a license for a station (easy to obtain provided that you
had the $50 annual frr and were a British subject, as all Canadians were
before 1947) and receive its own set of call letters. They would than
simply buy time on a estabilished station and broadcast using
their call letters. Some stations such as Grant's CFCN hosted several
phantom stations. CJBC was such a phantom station, and are in fact
listed in a July 1924 list of Canadian stations. They have no
connection however with the present CJBC, having ceased operations
in the early 1930's (when both phontom stations and religious stations
were effectively banned).

This recycling of call letters makes the study of early Canadian
radio confusing to say the least. Another example is CKY,

Winnipeg. The first CBW was started by the goverment of Manitoba
in 1923. It was around until 1948, when it was taken over by the CBC
and had its calls changed to CBW, which it still is. A couple of years
later a private station was started in Winnipeg, which requested and
received the CKY calls, which it has used to this day on 580 kHz.

Something else unique to canadian radio were amateur broadcasting
stations, whose licenses were helf by ham radio clubs. They
had calls like 10AE, Bowmanville, Ont until 1930 when the
VE prefix was added (VE10AE). By that time few were left, most
having left the air or becomming regular commerical stations.
CHAB Moose Jaw, Sask., CKBI Prince Albert, Sask, CKNX Wingham, Ont.,
CKPC Brantford, Ont. and CFCY Charlottetown, P.E.I. are a few
examples of stations which started as amateur radio broadcasting stations.
All such stations operated on 1200 kHz with typically 10 watts, and
were only licensed to towns without a "regular" station.

Cheers, Deane D McIntyre

One difference, though. CFRX (CFRB's 24-hour shortwave relay on 6070 kHz) is audible over a much wider area. Here in Eastern Ontario, I can hear CFRX during the day, CFRB most of the time at night, but I have only heard CHOG twice scanning the dial at night.

Oh well, go Riders!

Welcome to radio of the 90's...if you're not conservative, you're just not.

We don't have Art Bell...we do have Reagan, however...and I have mixed emotions about him. I started out thinking he was much more of a free thinker than a Republican up until the last week before the election. He spent a considerable amount of time railing on Michael Huffington on the show-until the night he told everyone about getting a phone call from Newt Gingerich's staff blasting him for not supporting Huffington ("any Republican's better than a Democrat," etc.)...after which, Reagan quit talking about Huffington and defended him up until the election...then railed on him again for not giving up.

Reagan now tends to be a Rush wannabe...but seems to play very well with the limited late-night demographics-generally about a tenth of the daily cume and all over 50-mostly over 60. Instead of "mega-dittoes" being the starting words from callers as it is with Rush, Reagan's callers say "I really loved your dad..."

>any guesses on how much longer this experiment with major market
>classic country will last? Over two years, and the ratings still
stink...

Glad you asked. The answer is that Sunny will be around for a long time to come. The music format on Sunny is similar to what WBAP used to run when they ran music most of the time. Now that they are news-talk for 19 hours a day,
Sunny has picked up much of their music audience while WBAP has taken a lot of talk and news audience from KLIF and KRLD respectively. For all practical purposes, Sunny's format has been around and proven successful for several decades in this market. Also, classifying it as a "classic country" format is probably not quite accurate. It is more of an AC country format. Kind of like KVIL for country music listeners.

Furthermore, as you noted above, Young Country made a nice rebound in this book. The reality is that Young Country had an anomoly in December with Arbitron. The same thing happend with Sunny in January. The next trend (due out in a week or so) will show Sunny back in the mid 2's and the next book will as well.

The combination of these two formats and stations makes them the number one country "station" in the market by a fair margin. The other two country stations do not have the flexibility in programming or sales that Young Country-Sunny 95 does. It makes it very difficult for KSCS or KPLX to counter program them. Also, remember, KPLX has had something like 5 PD's over the past 3 years. Young Country-Sunny 95 has had only 1 PD the whole time. Seems to me that they are far more stable in all areas that some of their competitors. Occasional rating blips aside, they are in great shape from what I can tell.

One question concerning the numbers in the D/FW market;
Does this book actually mean what I think it means...
an erosion of share for all the fulltime talk stations in the
market? It looks like WBAP, KRLD and KLIF all lost share
in the market in the winter book overall 12+. Same thing has
happened in NYC, Chicago and a number of other cities...
could it be there's a trend there? And who's losing, and
who's still strong?

Complain all you want, but the reason for duopoly deals is not greed. It's failure. Many of those stations in duopolies today failed to be profitable standing alone. That means the marketplace rejected them. You can't have diversity if the stations are off the air.

And for those people who have romantic notions of owning radio stations and doing better than those of us who do, ge a life. This is a business. Not show business.

>--Mike Dowling
> mikedow@gate.net

Nope....59 was a repeater of 30, but was available as a full UHF.

I can't get WTVU/59 in Cromwell, have to wait for them to use must carry to
get on cable.

CPTV has WEDH/24 in Hartford, but all but one of the other "repeaters" have
full call letters as opposed to translator or LPTV style letters.
WEDY /65 New Haven
WEDN /53 Norwich

Their real translator in Waterbury was switched to a VHF LPTV a few years ago,
W12BH.

WEDW/49, unlike all of the others, doesn't always carry WEDH's programming.

>Is Instant Replay a great thing, and worth $3k?

Sorry to be slow with a response, but I've been gone for a few days.

DATs in general need at least a second for pre-roll. I know there is at least one DAT out there that has a RAM buffer to allow for instant audio. If I remember correctly it is a Sony. About a year or so ago there were regular ads in the audio trades for this unit. You can bet that if it is a Sony, it won't be cheap.

While this shows that it can be done, I agree with other respondants that say to go with hard disk or Mini-Disk. Disk acess time is fantastic; you don't have to constantly be changing DAT tapes; and DAT is less reliable for t hat type of operation.

Another problem with (syndicated) talk radio, IMHO:

A lot of today's talk programs are, in essence, infomercials for a particular ideology. Programs hosted by Pat Buchanan, Oliver North, Ross Perot, Mike Reagan and others are not about debate and information; they're about selling the hosts' agenda--which too often means advancing the hosts' political ambitions.

Many of these hosts put out inflated claims along the lines of, "We encourage dissenting listeners to air their opinions." But this is often illusionary. It's not unlike what you see on TV infomercials--the guy selling the, say, WonderMop on TV offers a "cynical" member of the studio audience the chance to come on stage and create as big a mess as she can imagine. The audience member makes the mess, then, lo and behold, the WonderMop cleans it all up. "Proof," the TV guy says, "that this mop can tackle any stain."

Same thing on the air. Listeners with opposing views (usually that means liberals) are encouraged to call and "debate." But, because calls are carefully screened and because the host controls the direction of the call, the host winds up on top. "Proof," the talk show host will say, "that my views represent the truth."

Certainly talk show hosts have as much right to peddle their political agenda as the mop salesman has to sell his wares. The problem is, most discerning viewers know exactly what it is the mop salesman is selling: mops. The talk show host's agenda is often more clandestine, and subject to misinterpretation.

And that's why some of us are worried about the impact talk shows are having on unstable extremists. Some kook takes what the WonderMop guy says too seriously, he ends up buying more mops than he needs. The less-than-stable person who hears Oliver North saying the government's main agenda is to take away our rights or Gordon Liddy saying the Bureau of Alcohol, Firearms and Tobacco is the devil incarnate may respond in a more dangerous way.

As others in this thread have suggested, no one is interested in censoring the words of broadcasters. Rather, the points are (1) responsible talk show hosts should weigh the consequences of their words and (2) even if they are no longer bound by an equal time doctrine, stations have a responsibility to air a range of ideas.

BTW, I noted with amusement Oliver North's recent defense to Bryant Gumbel regarding the lack of dissenting voices on talk shows. He told Gumbel that at "my station" (presumable WWRC) there were four liberal voices (Dr. Gabe?!) to his one. If he believes a diversity of viewpoint is appropriate, I suggest he examine the programming offered by his syndicator, Salem Broadcasting. He won't find a liberal (or even moderate) voice there.

Mike, as you undoubtedly know, there are lots of listeners--liberal and conservative--who miss your daily presence in Washington radio.

If they've already gotten a lot of criticism from the potential
audience over their current hard-right programming tilt,
what do they expect when they give people even more of it
(from some of the least temperate and most partisan hosts
in the country)? This kind of in-your-face programming seems
to be a bizarre business decision, to say the least, unless
you're convinced the militia-member demo will be a major one
in the spring Arbitrons.
Strange decision, in the birthplace of a man who rep-
resented a thoughtful brand of conservatism, Gerry Ford...

> Bob Smith, middays WXXI-AM 1370 Rochester NY

WBAP tends to show seasonal fluctuations from it's sports programming. Because of this, I'd be hesitant to jump to any conclusions about their performance just yet. However, KRLD and KLIF have both been gradually sliding downward for some time, now. And KGBS "Hot Talk" 1190 is now carrying business news, so I guess they've decided to bail out of the talk battle.
As for any sort of a national trend...it does seem to me that there has been an enornous increase in the volume of radio talk in the last two years, and that much of the increase is in one genre--conservative politics. Ratings declines would seem an inevitable result of over-exposure--eventually even the most dedicated conservative talk show listener is going to tire of hearing the same thing over and over and over and... After all, if three and four CHR outlets in a market could burn out Top 40 music in the mid to late 80's in many areas, and multiple country outlets are threatening to do the same with country music now, why should talkradio be immune? Just a theory...

3579. Kansas City Radio Watch (1-May-1995)

Newsgroup: rec.radio.broadcasting

Written May 1, 1995

It's very quiet around here, and I haven't seen any Arbitron numbers yet (hey! radio people! I do have a fax number! hint!). So here's what I know:

* Thanks to KCUR(FM) general manager Patricia Cahill, the KCUR program schedule and station history is now available from the Interstate Radio Page. KCUR is the National Public Radio affiliate for the Kansas City metropolitan area, with a news/talk and jazz format. As always, you can access the Interstate Radio Page at http://www.interstate.net/~transvox/marp.html -- check it out.

* St. Joseph adult contemporary station KKJO(FM) is putting on the platform shoes every Saturday night. The station has begun a locally produced Super Seventies Saturday Night show from 7 p.m. until midnight. Unlike Kansas City 70s rock station KCFX(FM), the KKJO show does not shy away from Top 40 and disco and even seems to embrace those genres. Moreover, host Rick Reynolds even emulates a 1970s Top 40 announcing style. It's a great nostalgia trip. KKJO probably has a pretty good record library, too; it's a direct descendant of KKJO(AM), which had been St. Joseph's Top 40 station during the 1960s, 70s, and 80s. KKJO(AM) is now nostalgia KSFT(AM).

More (much more) when the Arbitron numbers are available....

APOGEE SELLS KGON/KFXX/KMUZ
Apogee Communications has sold the duopoly of Classic Rock KGON-FM, New Rock KMUZ-FM, and The Fan, KFXX-AM to Entertainment Communications of Philadelphia for a reported $24.5 million. Sale is actually pending on Apogee's recent purchase of KMUZ, expected to close in July. Privately held "Entercom" is said to have expertise in New Rock format, with 13 stations in markets like San Francisco, Houston, Seattle, Pittsburgh, and Tampa. Apogee is a Portland based company owned by Roy Disney.

DONOVAN RETIRES FROM RADIO
23-year radio veteran Jim Donovan has retired from the business to devote fulltime duties to his TV-Weather gig at KGW-TV channel 8. Donovan, PM jock at KEX for the past 8 years, will do weekend weather. No replacement named by KEX. Phil Robbins holding down spot in the interim.

DAHLGREN MOVES TO KWJJ
Doug Dahlgren, another radio veteran, has moved to KWJJ. He was released early from KUPL no-compete. He moves from one country station to the other. Once highly rated in AM slot at KUPL, he is expected to do mornings on KWJJ-AM as they end simulcast to go with country oldies product offered by Buck Owens' company. Dalhgren has worked in Chicago, Milwaukee and Indianapolis.

----------------------------------------------------------------
AMARC-Europe Project Officer (Open Channels 1995)
----------------------------------------------------------------
Introduction
AMARC-Europe is the European section of the World Association
of Community Radio Broadcasters, the world-wide network of
independent community-based and participatory radio stations. Its
aim is to support, promote and defend the interests of community
radio broadcasters through solidarity and international
co-operation.
Open Channels 1995 is a programme of events and activities
organised by AMARC-Europe to support the development of community
radio in Central and Eastern Europe. It gives priority to radios
which are local, independent, established for social and cultural
purposes and committed to the promotion of a pluralist and
democratic society.

----------------------------------------------------------------
Summary
The post of Development Officer is a short term contract to
run for six months and starting as soon as possible. The contract
holder will be responsible for co-ordinating a needs analysis of
participatory radio projects in Central and Eastern European
(CEE) countries, establishment of a comprehensive database of
such projects and the preparation of a plan for the development
of the AMARC-Europe network and services in the CEE countries.
The contract holder will report to a Project Management Group
consisting of representatives of AMARC-Europe and the Open
Society Fund - Media Programme. An AMARC-Europe Advisory
Committee will provide additional consultative support to the
work.
----------------------------------------------------------------

For more information or a complete job description, contact AMARC
Europe at the address below.

----------------------------------------------------------------
Applications should be sent by fax or electronic mail before 21
May 1995 to AMARC-Europe at:
Fax: +44 114 297 8976
E-mail: amarc@gn.apc.org
In case of difficulty telephone +44 114 279 5219
Postal address: 15 Paternoster Row, Sheffield S1 2BX U.K.

Multitrack Hit List (formerly Multitrack One) comes on in England at 9:30 Monday nights and 2:30 Tuesday afternoon (some of the Great Britain stations have local programming during the day, so the Tuesday afternoon repeat is not heard on all of them, but there's about 50 FM frequencies that carry World Service-the European stream, and a dozen or so AM stations so chances are if you can't bring in one of the stations, you can get the one in the next town over).
On the US shortwave, btw for anyone interested, the show comes on the North American service on Monday nights at 6:30, early Tuesday morning at 1:30 and Tuesday afternoon at 2:30.

Is this the same Bob Dayton who worked in Chicago at WJJD when they were country and WMAQ under the country and all-news formats? I tend to think not...I don't think that Bob Dayton would be 60 yet...but I thought air-personalities were very careful not to duplicate names?

>remember right).

Umm, I think you need to think back a bit further. Consider 100.7:

WCOP-FM Top-40 // WCOP(AM)
WCOP-FM Classical
WCOP-FM Top-40 // WCOP(AM)
WCOP-FM Beautiful music
WCOP-FM Oldies
WCOP-FM Country, part // WCOP(AM)
WTTK Country
WTTK Album rock
WHUE Beautiful music
WCOZ Beautiful music
WKKT CHR
WKKT Classic rock
WZLX Classic rock

As I write in the Boston Radio Archives regarding callsigns:

WZLX is tied with WJIB and WNRB for the most callsigns in the Boston
market: WCOP-FM, WTTK, WHUE, WCOZ, WKKT, WZLX.

WJIB is tied with WNRB and WZLX for the greatest number of callsigns in the
Boston market: WTAO, WXHR, WJIB, WCAS, WLVG, WWEA, WJIB (again).

[Unknown, classical, beautiful music, folk, gospel, eclectic,
beautiful music]

WNRB is tied with WJIB and WZLX for the greatest number of callsigns in the
Boston market: WMEX, WITS, WMRE, WSSH-AM, WKKU, WSSH-AM (again),
WNRB.

[Top-40, news-talk, standards, dark, standards, country, AC, Spanish,
dark, talk, Spanish, religion]

The URL is ftp://radio.lcs.mit.edu/radio/bostonradio.html. If there's
anybody out there with special knowledge of 92.9 or 1330/102.5---or
any other Boston-area station---we'd be interested in your
contributions.

Reply-To: scw1118@hertz.njit.edu (steve c walko ee stnt)

Hello. I'm looking for people to record Top 40/Dance stations to add to
my collection. I'll send the tapes and return postage.

But before I do, I'd like to compile a checklist of stations I need. I
have a partial list. I'd like to expand on it, any help would be
appreciated. Send your listings to....
scw1118@hertz.njit.edu

Listing Of Top 40, Top 40/Dance, Top 40/Alt, Top 40/Urban Stations
---
Frequency Call Nickname Format Location

102.1 WIOQ Q-102 Top 40/Dance Philadelphia
100.3 WPLY Y-100 Top 40/Alt Philadelphia
93.7 WSTW ------- Top 40 Wilmington, DE
95.7 WKSS Kiss 95.7 Top 40/Dance Hartford
96.5 WTIC 95 TIC Top 40 Hartford
94.5 WJMA Jammin 94.5 Top 40/Dance Boston
107.9 WXKS Kiss 108 Top 40 Boston
104.1 WAEB B-104 Top 40 Allentown
92.3 WPRO 92 PRO-FM Top 40 Providence
104.7 WSPK K-104 Top 40 Poughkeepsie
101.3 WKCI KC-101 Top 40 New Haven, CT
105.5 WQGN Q-105 Top 40 Groton/New London CT
97.5 WPST 97.5 PST Top 40/Alt Trenton, NJ
92.3 WZJM Jammin 92.3 Top 40/Alt/Dance Cleveland, OH
101.1 WHOT Hot 101 Top 40 Youngstown, OH
94.5 WBZZ B-94 Top 40 Pittsburgh, PA
96.3 WBBM B-96 Top 40 Chicago, IL

Looking for West Coast, East Coast (Baltimore and south) or any fill. If
you can help by recording any Top 40 in your market, let me know. I'll send tapes to you in
the coming weeks.

Steve

>Ty Ford
>Tford1010@aol.com

Instant start DAT machines are a very hot potato here at the moment, as
we need them, but none of them are any good. The important thing you need
to know is that tape must have some sort of timecode recorded on it for
instant start to work. The Sony is also operationally difficult to use,
such that the instant start feature is rarely used, even if the tape has got
timecode on it. Suffice to say we have not yet found an instant start DAT
machine that lives up to the rigours of live broadcasting.

Fred Weinberg wrote:

: Complain all you want, but the reason for duopoly deals is not
: greed. It's failure. Many of those stations in duopolies today
: failed to be profitable standing alone. That means the marketplace
: rejected them.

In the case of ABC buying KMPC in LA, Gene Autry was retiring. In the case of ABC buying KSFO in SF, the owners (the remaining Bullitt sisters) were retiring. In the case of KDFC in SF, the owner died and his daughter didn't want it. I'm told that all 3 stations were profitable.

The case of KNEW/KSAN and KABL/KBGG is a a textbook example of coporate greed: Shamrock (Disney family company) took over Malrite Communications. Both were profitable. I'm told that at one point Malrite considered taking on corporate debt to make their company less attractive to buyers, though ultimately they were bought out ("merged") anyway.

3595. All-news WINS TV parody (TW3 from 1965)

Newsgroup: rec.radio.broadcasting
Date: 1995-05-02 00:00:00 UTC
From: Art_Chimes@NEB.VOA.GOV
Message-ID: <3o51fi$jvu@vixen.cso.uiuc.edu>
Source record: 32119

Alan Cassel (alcassel@crl.com) mentioned the sendup of all-news WINS on the legendary NBC-TV show of the mid-60s, "That Was The Week That Was." ("Legendary" -- from the Latin meaning, short-lived, never rerun, dimly-remembered.)

>From my "I knew this would come in handy some day" file, here is the skit. For those of you who remember TW3, the all-news skit followed Buck Henry as roving reporter "John Cancellor" (sic) whose travels, in the days when chroma key was still exotic and tricky, were played out in front of a giant real-projection (Vizmo?) system that used glass slides (I know, 'cause I saw one shatter once at a dress rehersal). And afterwards, Buck returned to join "TW3 Girl" Nancy Ames to sing Tom Lehrer's latest, "New Math."

==========

THAT WAS THE WEEK THAT WAS
April 6, 1965 (program no. 2TW24)

PAT ENGLUND
The other day- The other day radio station WINS, until recently a rock-n-roll station in New York, announced that starting on April 19th [1965] it will broadcast only news reports 24 hours a day of continuous news. However, we're wondering if they'll convert their disk jockeys to newscasters.

(MUSIC: ROCK JINGLE)

LES CRANE
(reverb) Okay bunch, we've had our lunch, so get out of your bunk and dig my junk, 'cause I'm makin' the scene with my new news machine. Yeah, baby, it's your crazy Leslie the C show on W-GO-GO with the big beat sound of W-GO-GO news. Group! Let's get right to it swingers with super All-American news story number (heavy echo:) Fourteen (fourteen, fourteen, fourteen...) (laughter) Moving up the chart a-go-go with "We're Dropping Napalm on the Viet Cong," the new super hit sound by Bobby MacNamara and the Pentagons. Yeah. (laughter) Tough enough. It's a real gas from South Viet go-go-Nam.

Okay cousins, cousins we gonna move on now with the big beat sound of W-GO-GO news. Super All-American news story number (heavy echo:) Eight (eight, eight, eight...) It's Marty Luther King and the Boycotters (laughter) doing their wild new version of a great old goldie, "When the Midnight Choo-Choo Leaves for Alabam' ... Don't Get On It." (laughter) 'Ow, the boss sound. Crazyville on your Go-Go 24 hour a day news station.

(SFX: BELL)

Oooo, stop the show! That's to Go-Go Stop-Stop bell! Time to give out another W-GO-GO bad guy T-shirt. (light laughter) And the winner, the winner, is Ho Chi Minh. (laughter) You phone me here, big Mr. C, baby, phone me here within 10 minutes and we'll rocket out your Bad Guy T-shirt absolutely from freesville! Yeah! Let's get that wire sizzling all the way from (heavy echo:) Hanoi (Hanoi, Hanoi, Hanoi...) Hey!

All you Beatle-diggers out there in newsville, here's the big one you've been waiting to pick up on. Super All-American news story number (heavy echo:) One! (one, one, one...) (light laughter) It's L-B-J and the Revenooers doing (light laughter) "I Wanna Withhold Your Hand" (laughter and applause) Boy. Yeah. Oh. Yeah. I dig it. Or "Lay It On Me Now With a Fast Hundred Thou." (light laughter). Hey gang, keep jumping with your big beat go-go news station. We gonna be swingin' here all day and all night with the hottest big beat super news in all of the United States of A-go-go-merica. So stay tuned, bunch, 'cause we gonna keep groovin' here with W- (heavy echo:) GO-GO (go-go, go-go, go-go...)

(MUSIC: ROCK JINGLE)
(APPLAUSE)

IZ> I must tell you however that Dr. Laura is a very hot property and
IZ>many stations, including wtic, wsb, wjr and other 50kw's have jumped
IZ>aboard and I don't hear too many of their now 100 plus affiliates having
IZ>second thoughts.

Paul,
As I told Geoff, her syndicator, come back to us in 18 months with the same affiliate list and I'll be a believer. 9 months is far too short a time to declare any syndicated show a success.

I talk to her affiliates. Some have already dropped the show. It's too early to know if the show, itself, has staying power. Major market stations, particularly the ones you mention, will drop the show in a heartbeat if a local personality surfaces. That holds true for ALL network programming, not just Laura.

That's one of the things that killed ABC Talkradio. Midday clearances in major markets are tenuous, at best. Virtually all the delayed clearances (where Laura is run at night, instead of live) will remain. The majority of the major market live clears will cancel.

I wish it weren't so, but I've been doing this for a long time and have never seen it to fail. It's happened to me at WOR. It happened to me at ABC and it regularly happens to Westwood. The one-show networks are the first ones to take a bullet because there's no leverage with other shows. Imagine the number of stations that would cancel Dean Edell if there weren't an implied threat to cancel Rush if they did. I know of dozens.

My point is that it's too soon to predict and too soon to be touting the success of any show that's that new. I add Laura's Los Angeles track record over 15 years and won't be a believer until this one proves more successful than the previous 15. Time is the key.

Yes and no. I think that the reason SIBC is so automated is that the population of the islands is so few that if they had presenters on all the time - well, that would probably be the population of the islands! Small audience = low revenue = no money for air staff = automated operation with local news slotted in.

Now, if you were to do the same thing in London, I'd agree with you...

Cheers,
Dave

It only takes one loony listening to the wrong thing at the wrong time
to cause a real tragedy...and if Charlie Manson could find the
instructions for his rampage in a Beatles song which near as I can
tell is about sex, how much more likely is some loony to go out and
do something awful after hearing what is unmistakeably pure hatred
and calls to action by far right-wing nuts...like G. Gordon Liddy
who, as everyone who listens to him or reads this group knows, has
encouraged listeners to shoot BATF agents in the head and in the
groin. Isn't it a crime to exhort people to violent acts? Isn't
that like inciting a riot or something? What, if anything, can be
done to stop this kind of thing? I think it goes beyond freedom of
speech when you tell people to kill federal agents and explain three
times in one show how to make the bomb that was used in Okla City...
surely it's not in the public interest...isn't that still a criterion
for maintaining a license???

BTW, Rich, I think Clinton is doing an excellent job given the
conditions under which he is forced to work.

Ed Janik
--
The United States ranks 8th in the world regarding average income at
$23,000, behind Switzerland, Luxembourg, Japan, Sweden, Denmark,
Norway and Iceland. The balance of trade for those nations is in
the black rather than the red like ours. They have a greater growth
index with far less deficit and debt. Their tax rates are higher.
Their unions are stonger. They have national single payer health
plans and are far more socialist than we.

I worked with Peter here at WRC in Washington, a station he is suing over the manner of his firing. Peter is very liberal in his politics by American standards, and has a fierce dedication to NEWS as the basis of talk radio rather than hyperbolic talk by uninformed hosts. I have yet to read his book but talked with him about some chapters while he was here. He is particularly well-informed on Latin America and Eastern European politics and I think you will find him a stimulating person. I'd apply if I spoke German and wanted to leave here!

IU>nationally syndicated talk shows?

None that I know of. If there were, it would be out of date before the ink dried. Network affiliations change so quickly that it's useless to try and keep track of them.

Be very, very careful about what information you accept as gospel where networks are concerned. Don't ever believe a network person's claims (even mine) about affiliations. They're notoriously inaccurate due to a combination of wishful puffery and station additions and cancellations.

One New York newspaper did a story on right wing talk. A small, one-man network that feeds overnight claimed to have 5-6 million listeners. The same claim Liddy makes for a show that feeds midday. The reporter got suckered in because he didn't check his facts. What the network spokesman probably meant was that his show had 5-6 million POTENTIAL listeners, only a fraction of which would actually be listening. Yet it appeared in print. I called the newspaper and he admitted he just accepted the network's claim without question.

Take a look at the Radio & Records' Program Suppliers Guide. You'll see fanciful claims of the number of affiliates networks have. The real bottom line is whether or not a network is profitable. If it isn't, they could have a million affiliates and go bankrupt.

I have been trying, without much success so far, to find good examples of current radio talk shows that might be considered controversial in the aftermath of the Oklahoma City bombing. Although the focus of late has been on right-wing talkers, I'm interested in the gamut of shows, including those on the Right that have been denounced as "hate radio," but also those on the Left. I'm not just looking for shows that tell you how to make a bomb or dig a bunker, although I'd like to see a few examples of those. I'm interested as well in shows that deal seriously with current affairs and constitutional issues. I'm starting my own talk show this week and hope to put together a credible review of what's out there. Any contributions would be most welcome, either on the list or directly to me: potter@emily.emba.uvm.edu

Please include as much information as you have, including hosts, call letters, air times, history, content, addresses, phone numbers, etc. Thanks!

I'll have to Ditto! that suppport!

I worked at a radio station that had brought on-board a pd that was
into broadcast software. There was one programmer and he did all the
work, including, suppport. I think they have gone bust, I haven't heard
of them for awhile.But then again they could have a small nich in the
market and support only a few customers.

I know they had patches in the program to make the program go dead if
you didn't pay your support fees. As far as any other bugs, to make you
call for support, that kind of thing is kinda low, don't you think.

I will support the fact that the radio industry is not lucrative. In
that it is a small market, for those that do pursue trying to make a
living off of things like software programs for the industry.

The only way sell to a customer that has bought an excisting product
is to keep up with technological advances, come up with a new design,
and/or come up with new inovative first time never done before things
that lead to technological advances. Incorporate all of these things
into your product or new product and you have customers that will
continually buy from you. Plus maybe a few new customers. Maybe the
loss of customers. That's business as usual,especially in a small
market.

Another thing is dedication. Flyby-nights don't cut it. If your here
for a quick buck forget it. If you are dedicated to what you do, or at
least seem halfway dedicated to your design or product and it's a

proven /or given, then it will fly. You might even be able to paid for writting a program for a single station. If, you can prove that it will be usefull in the next five years without modification. I won't give away any trade secrets here, but it can be done. Ask and you shall recieve :)

Station Owners/Mangers don't want to get something from someone that isn't going to stand by there product, update it on a regular basis, or who will be gone next year when they get a new traffic person or whomever.

(They might buy a program that controls the transmitter automatically, that kind of a program might serve well. I won't say any more on that I've already opened my big mouth too wide:)).

If there isn't any service available, or anyone there to give out information on the product, what good is the product. Especially after a couple of years have gone by and technology has changed considerably. That's the biggest reason that you see companies getting licensing fees for the programs that they provide to broadcasters. It also gives the company a incentive to incoporate new ideas, designs, upgrades into the product for future success of the product.

So licensing fees, insures (in most cases, correct me if I am wrong) to the broadcaster that the company will hopefully be around when you need them.

You mean you don't run local schedules in your stop-sets?
That's bad.

[snip]
> An automation system can't take local calls with comments on local
events, where the storm hit in the city or even local requests.
>
No an automation system can't do that, (here I am sticky up for
automation, ha) but it can give updated weather reports if done
correctly. You have a system at your house. How long does it take to
make a small promo or quick announcement to upload to the system???
Not long that;s right. Maybe 5 minutes. So now you have an update.
More listners because they listen for just that update.

I find the main trouble with automation. It makes people automated. You
have to use imagination. No imagination then sure you'll sound just as
feeble as that other guy running automation.

I have been reading the last few issues, and have seen the thread of Rush Limbaugh and G. Gordon Liddy. With the President of the United States, stating that "Talk shows on radio are somewhat responsible for the stituation in Oklahoma City".... is ludicrious.
>
I use to work with a gentleman in Dallas/Ft. Worth, who jokingly was known as the "VOICE OF WACO". Ron Engleman was a talk show host that radio station KGBS AM 1190 hired in Januray of '93. On March 1 of 1993, the day after the ATF raid on the compound in Waco, Texas. Ron went on the air and read a prepared statement, asking that David Koresh give up before more lives are lost. Ron is a believer of the Consitution. He is also a believer in rights of the indivisual. The ensuing month or so that Ron took the Branch Davidians to be his own little crusade, our radio station was bombarded with request from stations around the country, and around the world to talk to Ron.

The Davidians put out a sign from the "Tower" that read..."
WE WANT RON ENGELMAN" <sp> And from that moment on, Ron was on the map. At the same time, KGBS also had Morton Downey Jr. And for all the posturing the station did with the extreme RIGHT. Downey wanted Ron to "get off the Waco thing... and talk about something else". Before the faitful day in April when the compound went up in smoke. Ron tried to get off the subject and talk about anything else... his listners refused to allow it. It got to the point that we started calling them... RON'S BUNKER BUDDIES.

Now since the Oklahoma City bombing is into its second week, I am hearing that the reason was some fanatics were upset for the way that WACO was handled. I am sure that there are some out there who feel that the U.S. Government was way out of line with the tactics that it took against the Branch Davidians, and that the whole thing should have been handled differently. But my goodness, we are talking 2 years ago. And for someone to hold such a grudge for that period of time is in need of some serious help.

Rush Limbaugh is no more resposible for the attack on the Federal Building then Ron Engleman was for the burning of the Compound in Waco. G. Gordon Liddy on the other hand, needs to be delt with on a whole different level. I am outraged that a memeber of the media, (albeit, a talk show host) would suggest, or promote the idea of shooting someone from the Government, when "you think you are about to be attacked". By "shooting them in the head... since they are wearing bullet proof vest". THIS is not only a stupid statement, but a down right dangerous one, not just for memebers of the FBI or ATF, but to any memeber of any law enforcement agency. For G-d sakes, this man needs to be delt with through the legal channels. For a while there, I was upset with Howard Stern, for his parody of the death of Selena.

But next to Liddy, Stern is a saint. (NOT!!!!)

I would like to hear others opinions as to where do you draw the line with Freedom of Speech, and border line stupidity. Thank you.

OH, one more thing, if you are in the market for hiring someone with 10 years experience and would like to move and grow with a station, either in their Sports Department, or Promotions, please drop a line to me at this address. Thank you.

Greetings from Naptown! The book is in.

***Stalwarts WFBQ and WFMS Continue to Dominate in Winter Book: Here's how the chips fell 12+ in the Winter book.

Station Fall Winter
WFBQ (94.7, AOR) 11.8 12.0
WFMS (95.5, Country) 12.0 11.6
WIBC (1070, News/Talk) 8.7 8.5
WTPI (107.9, Soft Hits) 4.6 7.1
WENS (97.1, AC) 6.1 5.3
WNAP (93.1, 70s Hits) 8.0 5.3
WTLC (105.7, Urban) 7.0 5.3
WGRL (104.5, Yng Country) 3.8 5.1
WHHH (96.3, CHR) 4.7 4.4
WZPL (99.5, CHR) 5.1 4.3

It's no surprise that WFBQ and WFMS continue to tower over the rest, taking the #1 and #2 spots, respectively, in most of the key demos. Elsewhere, WGRL shows its strongest numbers ever, WTPI makes a major leap, and WNAP slid significantly.

***WNAP Brings Legendary Jock Back to Indy Airwaves: More than ten years hence, Adam Smasher returns to the station that made him locally famous, WNAP (93.1). He took over the morning show, starting this morning. Calling himself "the Smash" on the air, he came most recently from country station WKKX-FM in St. Louis. He also spent time on the air at WWDC-FM in Washington, DC, and KSHE-FM in St. Louis in the interim. Because WNAP seems (shamelessly) to be going after the same audience it had in the 1970s when it was a more-or-less free-form rocker, hiring Smasher may well be a very smart move. (WNAP was, until eight months ago, oldies WKLR-FM. The reincarnated WNAP has run mostly jockless since then.) Smasher will also handle some Indy 500 on-air duties for sister station WIBC (1070).

From: fybush@world.std.com
Message-ID: <3o4576$h9v@vixen.cso.uiuc.edu>
Source record: 32186

It's been a few weeks, I've been out of town (Chicago and Fort Wayne - more on THAT later), and a little has happened in the meantime. In no particular order:

*WKRH 105.9 in Bath ME is off the air. It's supposed to reappear later this month as religious WBCI-FM under new ownership. This is the second time this decade that this station has gone through a silent period. Circa 1990 they were off for a while as they transitioned from CHR WIGY to classic-rock WKRH. The station has a good class B signal over the Portland market, they've just never gotten it to work for them.

*New calls for "Mix 96.7," the alternative rock station in Rochester NH (part of a quadropoly with standards WMYF-AM, newly-standards WZNN-AM (ex-CNN Headline News), and AOR WERZ-FM). The former WWEM is now WSRI.

*Speaking of calls with SR in them (and how's THAT for a meaningless segue?), the WYSR calls abandoned by 104.1 in Waterbury (Hartford) CT have resurfaced to the northwest on 98.3 Rotterdam (Albany-Schenectady-Troy) NY. The former WTRY-FM has been calling itself "Star" for a few months, since it broke from its simulcast with oldies WTRY-AM 980. WYSR 98.3 and WWCP 96.7 Clifton Park (using the "UN" alternative format) are both owned by Jarad Broadcasting, but operated and sold by Liberty Broadcasting, which also owns WTRY(AM), country WGNA AM-FM, and AOR WPYX-FM.

*Another Albany mega-opoly is about to shed one station. Albany Broadcasting is selling 50kw WPTR-1540 to an as-yet-unnamed religious broadcaster. Albany Broadcasting's other stations are AP all-news WROW 590, ac WJYB-95.5, and chr WFLY-92.3.

*The folks up in Greenville, Maine are getting nervous about the town's biggest landowner, the shortwave station formerly known as WCSN. The Christian Scientists sold the station this year to a group called Prophecy Countdown, an offshoot of the Seventh-Day Adventists. The station is now known as WVHA. The AP reports that while WCSN never tried to take a religious exemption from paying property taxes, WVHA plans to seek such an exemption -- a big deal considering the radio station makes up more than 10% of the town's tax base! Also, neighbors are worried about increased security at WVHA. Apparently the new owners asked a lot of questions about how long the station can get by without outside supplies and power...and that has neighbors wondering what they're planning.

*WBZ is mourning the passing of its general manager of 10 years, A.B. "Bill" Hartman. Hartman was at BZ radio from 1978-1988, and at KDKA for a few years before that. He died in Florida last week after a long battle with cancer.

*WREF, an 850 khz daytimer in Ridgefield CT, has reportedly ended all local programming, and is now being run by the network based at WIFI-1460 Florence (Trenton-Philadelphia) NJ. All programming (big bands, some leased time) comes from WIFI via satellite. WIFI's owner, Mike Venditti, reportedly wants to add night power and a directional antenna system at WREF. I don't know how all this affects WQQQ-103.3 Sharon CT, which had been simulcasting WREF.

*And outside New England, a note that the "Jukebox Radio" network has reconfigured. Jukebox started as an attempt to program translator W276AQ Fort Lee NJ, just across the George Washington Bridge from Manhattan. The original idea was to buy a dark high school station on 88.7 in Franklin Lakes NJ, some 60 miles away, and use that station (redesignated "WJUX") as the primary. Then, last fall, Jukebox bought and built the CP for WXTM-99.7 Monticello NY, a commercial station. WXTM became the primary, WJUX 88.7 went dark, and 103.1 W276AQ was able to air commercials at long last. I *think* the rules were being bent somewhat by originating programming in NJ, outside the contours of both 99.7 and 88.7. And I can't imagine that W276AQ, in sight of the 99.5 WBAI transmitter on the Empire State, can hear WXTM 99.7 over the air. Anyway, 99.7 has now picked up the WJUX calls, The *88.7 station now has calls WNJW, and will be sold and pick up a new format. Even if they're bending the rules a bit, Jukebox does a nice job. The 103.1 signal is pretty good in the immediate Bergen County area, they do lots of serious local news (live...on weekends even!), and the music is great.

*And that, I think, is that.

Reply-To: geezinbro@aol.com (GeezinBro)

I have a friend who is considering a move with his family to Australia, and needs some info on that country, and its radio scene. He currently works (on air/promotions) for a rock station, has a BA in Mass Comm, great attitude and a lot of talent. We need some basic info on Australian radio. Is it pretty much the same as in America regarding:

Licensing?
Getting a Job/The current job market----Salary?
# of stations in each market, comparable to US markets?
Formats?
How can we get a list of rock stations, to make applications?
Is American Radio experience valid?
How are Americans perceived by the Australian Audience?
Cost of living?
Any info on the Australian radio scene will help--A big decision like this would be made easier with some of this basic info. Any other light you can shed on this is appreciated.

Thanks

Jay Philpott

I was in Florida City FL in 1986-87 and Big was doing AM drive at WKAT 1360, Miami Beach/North Miami (not sure their city of license). The format was big band and Big played electronic piano both on the show and on a nighttime gig with a group at some nightspot. His voice is that which opens and closes "Star Hustler" on PBS; produced at WPBT-Ch2 Miami. Very talented personality and easy to listen to. And to think WNBC replaced him a Imus in the Muhning".
Go figure.

If they've already gotten a lot of criticism from the potential
audience over their current hard-right programming tilt,
what do they expect when they give people even more of it
(from some of the least temperate and most partisan hosts
in the country)? This kind of in-your-face programming seems
to be a bizarre business decision, to say the least, unless
you're convinced the militia-member demo will be a major one
in the spring Arbitrons.
Strange decision, in the birthplace of a man who rep-
resented a thoughtful brand of conservatism, Gerry Ford...

Rich,
I have never had a problem booking musicians, or artists when they are in
town. It's a fact of life that one industry helps the other. (It's known
as P-R-O-M-O-T-I-O-N.)

As far as talk radio, I don't know what your listening to, but any local
TALK show that does nothing but Clinton bash is not worth the price of a
10 second promo.

Although I haven't listened to your station (I don't know what it is, you
never say), your notes seem to indicate a lack of diversity about radio.
My advise; you should hire (or at least listen to) some more creative
hosts and experienced producers.

Bill you are right. Here in Columbia, SC we have been dubbed the Duopoly
Capital of the US. There has been a buying up frenzy. Did it make anything
better? Certainly NOT! The stations here are as mediocre to bad as before
with maybe an exception. I made the comment that no one would miss any of
the stations if they all went off the air here. With maybe an exception that
holds true.

Isn't it ironic that as an industry we spend tons of time and energy proving to our sponsors how effective we are in motivating public behavior--getting people to buy products or services--while at the same time we deny any responsibility for behavior that may be considered less than desirable?

We insist that broadcasting is a great medium for increasing sales--and point to all kinds of statistics as proof--but when public violence or other negative behaviors take place, we're suddenly not responsible.

Here's another follow up to the satellite delivery of the "patriot"
programs aired on shortwave station, WWCR.

With Omega now officially gone, all the programs formerly on the network,
including the techno SPECTRUM show, will be moving, effective today, to
S3/T24@5.8 audio. This subcarrier is currently leased to a station in
Dallas, but will be taken over by one of it's time buyers, broadcast
consultant, Mike Vindetti, the owner of WIFI in Florence NJ.

He is currently using the unnamed service for the distribution of a talk
program produced at his station. It remains to be seen what he will be
doing as far as keeping or dumping these programs after he takes over.

3628. Re: Payola..

Newsgroup: rec.radio.broadcasting
Date: 1995-05-02 00:00:00 UTC
From: rtnda@aol.com
Message-ID: <3o457k$hb6@vixen.cso.uiuc.edu>
Source record: 32197

The statement
Payola was a system used by record companies in the 50's to get certain
records played. They paid DJ's to play them. The FCC and the Government
took
a rather dim view of this since they felt it was promoting the "evil rock
&
roll" and passed laws against this.
is not quite true.
The FCC couldn't have cared less about rock and roll. What was wrong with
payola was that people were taking money for air play and either directly
or by implication saying that they thought a song was good whether they
thought it was or not. It was, in effect, an unlogged commercial, not
discxlosed as being a commercial. The licensee wasn't getting revenue
from the commercial---and usually wasn't even aware that it was being
paid, till the end when the whole practice became pretty flagrant.
What the FCC objected to was that the disc jockey (or program director)
was lying and cheating. Lying to the audience; cheating his employer.

Why do so many on air talents possess English, Australian, New Zealand, etc. accents? Just look at the infommertials. Seems every guy selling a slicer/dicer has a quirky British accent. Hard Copy, Inside Edition, etc. all have "correspondants" with them. What gives? Has some marketing been done to indicate that they draw bigger audiences? Do they lend an air of class or credibility to the program?

I heard that Broadcast News in Toronto and IDB have worked together in the past to provide international connections from one country to another via the BN and IDB satellite facilities.

The obvious answer is Switched 56 and/or ISDN for international broadcasts. We carried countless Canadian Football League games in Baltimore using SW56 with great success.

3636. CKLW & WLS

Newsgroup: rec.radio.broadcasting
Date: 1995-05-03 00:00:00 UTC
From: TRRadio@aol.com
Message-ID: <3o76np$cmi@vixen.cso.uiuc.edu>
Source record: 32055

I've been sharing our "Whatever happened to..." threads with a friend of mine and he suggested two other stations CKLW and WLS.
I know Bill is a little leery of the amount of mail these threads generate, so I will act as a clearinghouse for the information. Here's the deal--

We're looking for info on the following:

WLS from the Top 40 days of the 60's & 70's--Lujack, Landecker, etc.
CKLW - Top 40 days of the 60's and 70's - Tom Shannon, Bill Gable, Pat Holliday, etc.

Send whatever info you can to TRRADIO@AOL.COM (Since I didn't grow up in those areas, I'm not really sure who the voices were...). I'll compile the info into one posting for each station (with credits to those who helped, of course.) Let's say we'll let it go for around 2 weeks.

PLEASE SEND YOUR INFO TO ME, not the group.

Thanks,

Tripp Rogers
TRRadio@aol.com

[Moderator's Note: Thanks, Tripp. I would like to include, though, WCFL in the WLS thread since in Chicago of the sixties/early seventies, both stations were VERY prominant and were, in some peoples eyes, one-in-the-same. I welcome your summaries, Tripp and echo your statment to please NOT send raw listings to the group. Bill]

|: I could use some ideas. My station is moving into a new building the middle
|: of July and our new owners want a proposal for a new production studio and
|: equipment.

I've worked a lot with Mac-based DAWs (in fact, I also write books about the Mac for Prentice-Hall) but I've found the fastest, most efficient production box is the Orban DSE 7000. That's where I put my money.

But the most important thing is:

Whatever system you're considering, GET A LOANER in your studio for at least a couple of weeks before you decide. Let _everybody_ on staff poke around with it, and do their real production chores: morning zoo producers who have to cut phoners, jocks who do spec spots, the news director... See which system is going to be most comfortable for the way you work. You just can't tell from a video or a factory tour: any respectable dealer will be glad to arrange a long-term, in-studio demo for a serious buyer.

(A $12,000 system that doesn't fit the people who'll be using it -- and gets maybe six hours use a day -- is going to cost a lot more than an $20,000 system that's cranking from 7 AM to 10 PM.)

...

The second most important thing, is don't believe anything anybody says about a workstation they don't use every day. Software and capabilities are changing so fast that it's impossible to keep up with the market.

As a former WBGU-er, best of luck!

Lots of good desktop editing packages (if you're willing to take the time
to learn them). By and large the low-cost and shareware ones take much
longer to use than traditional production, but with good hardware and a
careful operator can sound much better.

But the first question is, what computer platform are you using?

Um, for the record, Jarad still operates WWCP and WYSR- all
programming and marketing is 100% Jarad's. Liberty's WPYX/WTRY sales
staff sells WWCP/WYSR local time only. And I oughta know... ;) (BTW,
WGNA AM/FM is sold separately)

Actually, Franklin Lakes is about 20 miles away, but that's still far.
What was even more interesting was the studio location, Dumont; I may
be wrong, but I think it was outrside the coverage of both the primary
and the translator! Noncomms have very different rules, but they
still need a main studio within the city grade, I believe.

> Then, last fall, Jukebox bought and built the CP for WXTM-99.7 Monticello NY, a
> commercial station. WXTM became the primary, WJUX 88.7 went dark,
> and 103.1 W276AQ was able to air commercials at long last. I *think*
> the rules were being bent somewhat by originating programming
> in NJ, outside the contours of both 99.7 and 88.7.
(snip)

Rebroadcasting distant programming isn't the problem- it's legal- but
if the translator and primary are both owned by the same guy, that's
forbidden (for commercial stations- noncomms can go wildwith distant
translators. Ask Harold Camping or Donald Wildmon). I don't know how
Mr.Turro set up the Monticello station's ownership, but I presume he
found a way to make it work; certainly, nobody can quarrel with his
success with W276AQ, probably the most successful translator in the
nation...

Entercom is the owner of KITS in San Francisco, a trend-setting modern
rocker here. They've owned it for probably 25 years under several
formats. KFXX on 1520 probably had its best days as an oldies outlet in
the 1980s as KSGO. At the time it could be heard about 300 miles away,
and was one of the few oldies stations in the Northwest.

Apparently you didn't see the story or those subsequent stories that attempted to directly link our organization to Mr. McVey or the Nichols brothers by saying they attended "For The People" meetings in Michigan.

While there are local "fan clubs" or "discussion groups", they are not in any way related to the For The People organization, a not-for-profit 501(c)(3) corporation. Nor are outside groups permitted to use our name, a registered trademark. It's like if someone local to you called themselves the "WHO Gary Barnett sewing circle and Gun Club". Because the media failed to check the story out FIRST, hundreds of newspapers printed erronious material which has also led at least one columnist to call us "the communications arm of the Militias" and claim that Chuck is the "head of the Florida Militia". Neither are accurate portrayals and both are being scrutinized by counsel.

This goes beyond what we say, Gary...this is into what an even more irresponsible news media is saying, reporting strictly rumor and

innuendo. I am not at all a fan of Mark Koernke, but a weekend was spent reporting that he was a "prime suspect" and that a "nationwide manhunt" was on for him...meanwhile he was at home...no one had bothered to check there! ;->

Again, I'll say this...in the reporting on investigations in progress, reporting rumors and speculation do nothing but infringe on the rights of those falsely accused and impinge on the constitutional right to a fair trial by those who are tried, whether or not they are guilty.

Who can disagree with that?

Does anyone recall the name and frequency of the St. Paul, MN area AM around 1000 Khz that went dark about 5 or so years ago?

Mike Sokol
Sokol & Timmons, P.A.
http://www.winternet.com/~sokolaw/

[Moderator's Note: I dunno about 1000 khz, but 630khz went dark some years back. It was KDWB and had an impressive 6 tower array just east of St Paul off of I-94. Guess the land became more valuable than the station. It had *terrible* sound quality... even for AM. It died as WDGY (calls taken from 1130khz when it went sports) a bad country format. Bill]

Thanks to Tom Longo for posting the DC-area Arbitrons...however, at least two non-profit stations (certainly not non-comercial) would show in the top-20 if Arbitron saw fit to include them. They are WETA (classical and NPR talk), and WAMU (bluegrass and LOTS of talk, also old-time jazz Saturday evening, old-time radio Sunday evening). Each of them usually appears with something like a 3 when the "non"comercial ratings are extracted from the Arbitron raw data.

WETA plus WGMS add to a classical audience in the vicinity of 6 or 7, and WBJC, Baltimore (more classical/less talk), has lots of listeners in the DC area. WGTS, also classical, Takoma Park, MD (close-in to DC) doesn't seem to draw many listeners; don't know why.

We don'r want to rain on the parade of our old friend and colleague Steve Chakonis, but it should be noted that WMET, Business Radio 1150 which initially inherited the staff and format from WPGC-AM, is still broadcasting their business format, with the Business Radio Network from their Gaithersburg, MD studios and transmitter. They do have a useable nighttime signal in the northwest quadrant of the Metro with 500 watts.
And Don MacDonald is back on BRN, with a 12N to 3PM live show.
And by the way, many stations have to drop their power dramatically at night.
WPGC-AM 1580 drops from 50,000 watts to 270 watts, DA-2 with both patterns pointed west and south. Even with the peanut whistle at night, our "FLAVA 1580" rap and hip-hop format made a debut entrance in the winter Arbitron with a 0.3 share, which included a 0.3 at night 12+.

Actually, WINS wasn't even the first all-news operation in New York...

WABC-FM went all-news during the 114 day newspaper strike in 1963.
Apparently the results didn't give anyone big ideas at the American
Broadcasting Company.

Sorry to say I didn't hear your station (I live in Michigan) so I can't tell you exactly what was going on. From past experience, I can venture a guess, however. Back on New Year's weekend of 1993, WDFX in Detroit changed to an FM Talk format, and their call to WYCD. To publicize the change, they first did a countdown from 30,000 to zero using a synthesized voice. After doing that, they played a Garth Brooks' "Friends in Low Places" over and over again, making people think the new station would be country, (It eventually went to New Country after lousy ratings and losing a bucket of cash.) They then played a six hour loop of morning zoo segments and classic comedy bits from around the country over and over again. Finally, on Monday, 6 am, they commenced their new format. I would suspect your station probably was doing the same thing to promote a big change in programming. I would say you should call the station and ask them directly. A call to information, (find out the area code) should give you a person on the other end who could fill you in.

Quoting from the "OFFICIAL WWCR PRESS RELEASE"

>Due to the volume of our programs we at WWCR are not able to review
>programs in advance or even during their airing for content. We do rely
>upon our listeners to alert us when they hear offensive material and
>whenthey do, we review the program and closely monitor it in the future.
>Programs that are offensive to our listeners are censored and/or
>canceled.

This seems to me to be a rather amazing public statement. As I understand it, the FCC clearly requires broadcast licensees to be in control of and responsible for their programming and an admission that, in effect, "we don't listen to our programs" would certainly be frowned upon by the commission. Perhaps a different standard is required of short wave broadcasters, but I kinda doubt it.

Really smart people at Young Country. After they bought the station, they NEVER gave their call letters for the first 3 months on the air...the girl answering the phone told me "We prefer not to use them...we want to be known as Young Country." The FCC Dallas office found that amusing...they started giving their ID 2 days later. Now , word is, KYNG will not be in the spring Arbitron book for using an on-air promo "if someone calls you and asks what radio station you are listening to, tell them "young Country"...even if you aren't"

Sedge Thomson's West Coast Live
San Francisco's Live Radio Show to the World
Show Schedule
1995 May 03

1. Overview:
2. Dolby Surround Broadcasts:
3. The Upcoming Schedule:
3.1. May 6th:
3.2. May 13th:
3.3. May 20th:
3.4. May 27th:
3.5. June 3rd:
3.6. June 10th:
3.7. June 17th:
3.8. June 24th:
3.9. July 1st:
4. Special Offers:
4.1. Internet Free Ticket Offer:
5. Downloading Additional Information:
6. How to Reach West Coast Live:

1. Overview:

This is the weekly schedule for West Coast Live, San Francisco's Live Radio Show to the World (actually just public radio). Each week we give away two free tickets to the live show by a drawing over the Internet. Read below for details.
Live shows are broadcast from the Cowell Theater at Fort Mason in San Francisco, at 10am Saturday mornings.

2. Dolby Surround Broadcasts:

As soon as Fort Mason installs their new mixing board, West Coast Live will be broadcasted in Dolby Surround. The new board has arrived and should be installed soon, very soon. Listeners who are equipped with Surround decoders will be able to appreciate an audio experience similar to that of an audience member in the Cowell Theater.
For further information about Dolby, listeners are encouraged to telephone Dolby Labs., 8:30am to 5:30pm (Pacific) at (415)558-0200 or e-mail at:

info@dolby.com

Please mention West Coast Live when requesting information, and your name will go into a regular drawing for a Dolby Tee shirt!

3. The Upcoming Schedule:

The live shows often sell out. Please ensure your seat by calling the office at (415)664-9500 to make a reservation. The reservation phone is open 24 hours a day. Remember that the best seats go early.

3.1. May 6th:

* Clarence Clemons, the big guy from the E Street Band.
* Alistair Cooke, BBC correspondent of "Letter from America".
* Thomas Kennedy, author of "Schindlers List" and "A River Town".
* Guerrilla Girls, women artists in masks.
* Lucy Kaplansky, folk soprano.
* True Friction Magazine, improvisational theater.
* Bonnie Loyd, the urban geographer.

3.2. May 13th:

All mothers save $2.00 off the normal ticket price for this Mother's Day show.

* Adrian Legg, guitarist.
* Arlie Hochschild, author of "The Second Shift".
* Chris Strachwitz, founder of Arhoolie Records.
* Kathy Kallick & Friends, bluegrass musicians.
* Meredith Tromble with a view from the studio.

3.3. May 20th:

* Didgeridoo masters Stephen Kent and David Hudson.
* Gyuto Tantric Monks, Tibetan monks exiled in India.
* Pete Anderson, guitarist.
* Claire Peaslee, naturalist.

3.4. May 27th:

* Paulo Coehlo, author of "The Alchemist".
* Other guests to be announced.

3.5. June 3rd:

* Guests to be announced.

3.6. June 10th:

* Calvin Trillin, columnist and humorist.
* Peppino D'Agostino, Windham Hill guitarist.
* Tom Russell, folkie.

3.7. June 17th:

* Rebroadcast show to be announced.

3.8. June 24th:

* Rebroadcast show to be announced.

3.9. July 1st:

Celebrate Canada Day with West Coast Live at a special
remote broadcast from the High Sierra Music Festival at Bear
Valley, California. For more information concerning the
festival call (800)594-9171.

* Guests to be announced.

4. Special Offers:

4.1. Internet Free Ticket Offer:

The first person who sends e-mail correcting a spelling
error in this mail message will win two (2) free tickets to
this week's live show. In case I don't make a spelling
error, corrections to grammar will be accepted.

4.1.1. Rules:

The contest begins each week as soon as the moderator sends
this notice to the West Coast Live Internet mail list.
Contestants must be subscribed to our Internet mail list.
The winner will be selected based on the time the entry was
sent, and no later than 48 hours prior to the live show. In
other words, at about 10:00am on Thursday.
The e-mail must be addressed to:

DRAWING@wcl.org

Entries are limited to one entry per person each week.
The winner will be notified by e-mail.
If the winner can't attend this week's show, the winner must
assign the tickets to a couple of friends.
The moderator's selection is final.

5. Downloading Additional Information:

To receive an auto-reply containing information about West
Coast Live and our Internet presence, send a dummy e-mail
message to:

3659. ADMINISTRIVIA: Calling All RadioWatchers

Newsgroup: rec.radio.broadcasting
Date: 1995-05-03 00:00:00 UTC
From: wdp@airwaves.com
Message-ID: <3o76n2$ckr@vixen.cso.uiuc.edu>
Source record: 32139

This is a call to all non-active RadioWatchers, those who have said they wanted to be RadioWatchers and who have not posted, or who have stopped posting.

With the launch of AIRWAVES-SELECT, (a condensed, informational version of rrb/AIRWAVES aimed mainly at radio pros) we will be needing your reports from your markets more than ever.

It is our aim to have regular reports coming in, at least once a month, covering most major (and many minor) markets in the USA and outside of the USA. European, Australian and Asian reporters are especially encouraged.

To those RadioWatchers who have remained regular and prolific (we all know who you are) a hearty ** THANK YOU ** for your time and effort in keeping the industry abreast of your market's changes.

To those who have applied, and have not posted, I urge you to do so.

To anyone else who feels like they would like to offer perspectives, news and views on their home radio market, please do not hesitate to write to me (wdp@airwaves.com). We ask RadioWatchers to post at least monthly and more if possible. Your writings are appreciated and you will receive much exposure to the world through your contributions.

Thanks

William Pfeiffer

Some analysis:

1. Q102's got good reason to be sipping champagne at 2077 Elmwood. They moved up substansially in all dayparts(at least 12+),and exploded into the top 5 in 25-54-gaining well over 3 points to finish 3rd at 9.1 . Middays also had big growth(nearly 3 points),PM drive had almost a 2 share gain,while nights with Q After Dark were up 3 share points.
2. FM 101 The Planet continues to make gains in the market. Except for AM drive,all dayparts had at least a 1 share gain. Nights are when it gets its best #'s,with a 5.1,up well over 2 points from fall.
3. As for WGR,take the Bills away and watch the wheels spin. "The Coach"-or,Chuck Dickerson-dropped 2 share points from the fall to a 5.8,leaving 'BEN the winner in that battle with Limbaugh(at 7.1,up .7). As for Rich Michaels' last book,he dropped 1 share to a 6.0,with WBEN obliterating 'GR by 2.7 points. Only Art Wander at nights is immune-he's 2nd w/a 9.1,up 1.6;Kiss' Donny Walker beats him there with a 10.3 .

I'll post the rest of this later...time's short,you know. :)

*One last note:
-AM 640's Toronto Talks has a e-mail address. It's:

torontotalk@am640.wic.ca

Also,FM 101 The Planet is at a new address:

3661. Sacramento RadioWatch Ratings Winter 95

Newsgroup: rec.radio.broadcasting
Date: 1995-05-03 00:00:00 UTC
From: MLennartz@aol.com
Message-ID: <3o76n4$cl1@vixen.cso.uiuc.edu>
Source record: 32141

Here's the way Arbitron stacked 'em up for Winter, 1995:
12+, in order, change from Fall book in ( ).

KFBK-am (News) 11.4 (-2.5)
KSFM (CHR) 7.7 (+1.9)
KYMX (Soft AC) 5.9 (+1.5)
KNCI (Country) 5.7 (same)
KHYL (Oldies) 5.6 (-0.2)

KGBY (AC) 5.0 (-2.3)
KWOD (Alt.) 4.9 (+1.1)
KSEG (CR) 4.5 (+0.2)
KSTE-am (Talk) 4.4 (+1.6)
KRXQ (Rock) 4.2 (+0.8)

KCTC (Nostalgia) 4.0 (+0.5)
KRAK (Country) 4.0 (+0.8)
KXOA-fm (Arrow) 3.3 (-1.2)
KQPT (AAA) 2.6 (+1.0)
KZSA (Spanish) 1.6 (+0.6)

KHTK (Hot Talk) 1.5 (-0.5)
KGO (NewsTalk) 1.4 (-0.6)
KSSJ (Jazz) 1.3 (-0.9)
KQBR (Jazz) 1.1 (-0.1)
KSXX (Spanish) 1.0 (+0.5)

Gavel-to-gavel O.J. Simpson coverage propels Talk 650 KSTE from back of the pack to number 9 (is there a Heisman award for radio?) A closer look shows that during actual trial "showtime," KSTE's ratings were a 6.3 share (according to the Sacramento Bee that is triple its fall performance middays). Thier 25-54 share middays leapfrogged to 7.3. Someone had to pay, and NewsTalker KFBK took some of the hit, dropping off over 2 points, 12+. However KFBK maintains its mastery of the market despite the drop, now finishing first in Sacramento for what insiders say is the 21st consecutive book.

Another big winner is KYMX (Soft AC), where P.D. Art Schroeder stayed the course despite a disappointing Fall book. KYMX ("The Mix") shook the bump and, as expected, the numbers fell back into line with a strong 12+ (up over 1.5 points) and 25-54 finish. Maybe this will put to rest any rumors of pending format changes should the rumored deal with Henry Broadcasting go through (hey, a double rumor! rare in this biz, huh?)

KYMX sister station KCTC (Nostalgia) showed some muscle rising over half a point to finish 11th 12+ (This format showing some strength around the

country, will someone take the plunge on FM?)(And will someone ever figure out how to make money off the format? Remember KFRC, San Francisco, #1 12+. One of the great Nostalgia stations of all time, but had to bail because they couldn't bill enough to keep it afloat).

The market's only traditional AC, KGBY(Y-92) took a hit 12+, dropping from number two to number 6. It is not panic time at KGBY. Expect them to stay the course and steadily climb back into the race.

KWOD (Alt.) is dancing in the streets. The station every broadcaster seems to hate continues is steady climb finishing # 7, doing it without any major promotional campaign...just word of mouth (and it's taken a couple of years).

The bottom fell out of the ARROW format in Sacramento with KXOA-F again dropping over a point and finishing 13th. Insiders will tell you that they had signal problems this book, but outsiders will say otherwise. A new PD is in to rescue the frequency, but it's a long road back and musically they seem to be taking a longer route.
Brown Broadcasting's other Duopoly station, KQPT(The Point)(AAA) made up the Arrow's loss adding a share 12+, but still finishing behind the Arrow at 14th.

Hot Talk 1140 turned in a disappointing performance despite their first season as hosts of Sacramento Kings basketball (and the Kings even made a run at the playoffs). Much of their prime time is syndicated (Imus, Don & Mike) and although good, lacks any local feel. PM Drive (4pm) is all local sports, but until the Kings are for real it will be hard for sports to drive a station in Sacramento. Hot Talk finished 16th.

Smooth Jazz KSSJ (and Jazz comeptitor KQBR, The Breeze) finished 18th and 19th respectively. KSSJ, hoping to build on a good Fall effort, lost almost a share. Not enough dentist's offices in Sacramento to make it go this book, I guess

The unprecidented Chancellor Communications 1-2-3 sweep of Sacramento in their Winter 94 book was lost as KGBY (AC) slipped from number 2 to number 6. KHYL slipped from number 3 to number 5. Still, their market share was a whopping 22.0 12+. Their next closest competitor is Nationwide's KNCI/KRAK/KHTK combo at
11.2 12+.

Similar situation here in Phoenix....where a shopping center and
its parking lot surround the KTAR(620) dual towers. Name of
the shopping center....Tower Plaza!
If it has hurt KTAR's coverage, then I'd love to hear that signal
under ideal circumstances!

: incentive for breaking with tradition. <g>

KFAC, which at the time was a struggling classical station in Los Angeles, allowed an apartment complex to be built on top of their transmitter site back in the 1960s. Same reason, the money was too attractive. They also changed from 1/2 wave guyed towers to similar sized tapering self supporters.

The chief engineer supervised all foundation activity. Every foundation pour was ringed with copper strap, and every intercepted radial was bonded to it.

When they were done the system passed the directional proof with good efficiency and as far as I know is still operating fine today.

3665. ARBITRON is watching...

Newsgroup: rec.radio.broadcasting
Date: 1995-05-03 00:00:00 UTC
From: MLennartz@aol.com
Message-ID: <3o76nc$clp@vixen.cso.uiuc.edu>
Source record: 32145

Bill, my one-on-one with Arbitron finally occurred 5/1/95. Here is the results: (post as you see fit)

Had an interesting experience with Arbitron this month. They called me at HOME intimating they would chastise me for posting TREND numbers on the INTERNET.

Seems the office in New York monitors this newsgroup and was rankled when they saw Sacramento TRENDS posted. They sent out representatives to hunt me down, and indeed found my home phone number. When they finally reached me the rep was...well, rather cordial. He explained they didn't want numbers posted on the NET because those are the number's they are trying to sell...that unless I was a SUBSCRIBER or representative of a SUBSCRIBING STATION (I am neither at the moment), I was being asked to cool it on the trends. I agreed that TRENDS, different from quarterlies, are somewhat "sensitive" in nature; information that not everyone receives. As this is ARBITRON's bread and butter, I will adhere to their request and not actively pursue posting Trend numbers on the net. But read on...there is a caveat.

Note that Arbitron agreement with all its subscribers is that they may use trend numbers for "self-promotion," which is why trends (and quarterlies, for that matter) in just about every market are immediately faxed to the local newspaper media writers hoping for a little good, free publicity. Why not?. So, I grudgingly got Arbitron to agree that the Internet, like a newspaper, is a platform for such "self-promotion."

No moral to the story here, just information.

How did your local 70's station do in the winter arbs? Several are down in the numbers and the consultants, GM's, etc. are already pointing to this as evidence that the format has peaked and is dying. I disagree; I think the erosion has more to do with t
he fact that, in most cases, the format is not being done correctly. Tight playlists, liner cards, endless segues, etc. all combine to produce heavy burn-out and consequent tune-out of the format. The missing element here is PERSONALITY, folks! If you'r
e going to do 70's Oldies, do it the way it was being done in the 70's!! That means personality, energy, phones, and a broad playlist that people won't grow tired of after two weeks of listening. This format has incredible potential...the format's not th
e problem; the PRESENTATION is the problem. We need more true, personality-intensive 70's stations and fewer A/C or Classic Rock "wannabe" musicboxes!

> How are Americans perceived by the Australian Audience?
> Cost of living?
> Any info on the Australian radio scene will help--A big decision like this
> would be made easier with some of this basic info. Any other light you
> can shed on this is appreciated.

I only know the situation from a few years ago and from only a couple of viewpoints but the guy talking to me about it was a drive time talent in Sydney as well as a former manager in Melbourne and very active in radio generally in Australia. He explained the situation to me this way:
"We have laws in Australia banning discrimination against anyone on radio for reasons of race, religion, gender or country of origin and accent---which means you'd NEVER work in Australian radio!"

I saw this as confusing and he explained that, in the 60s and 70s a lot of Yanks went to Oz for the lifestyle and for a better gig than they had here. Unfortunately they were not necessarily the best talents that the US had produced and tended to be heavily into booze, drugs and irresponsible behavior. They went from revered because they were bringing "Big Time Radio" Down Under, to despised because of their unprofessionalism and they gave us all a bad name.

It may have changed, but there is a residual resentment among Australian broadcasters of American talents. I know of no Yank currently in a top spot in Australian radio.

Salaries are all over the map. John Laws in Sydney, a "shock jock" in a way that would stun many Americans, was reportedly the first radio talent in the history of the world to make over a million dollars in radio alone. But the rapid proliferation of FM stations there has tightened talent dollars from what I hear and guys who were getting A$200-300k for drive time are now supposedly settling for A$100-200K.

The country is fantastic though the cost of living in Sydney and Melbourne particularly can be very steep. I suggest you contact the Australian Embassy here in Washington or, for initial questions, contact the Australian Embassy Home Page on the Net: http://www.aust.emb.nw.dc.us

My wife is from Melbourne, I have guested on both the ABC and commercial stations and would not mind living there some day myself. But I don't expect to get work!

GJ at IRock pondered......

>Some things I wonder about:
>
>1. The ratings decline of LA newsradio stations.
There really isn't a decline. KNX (1070) got smart by capitalizing on the O-Jail Trial. They went from a 1.3 to a 4.6 Middays 12+!! Now if only Ito would call more sidebars so that KNX could sell it....
KFWB was flat at a 2.5..
>2. KLOS going quasi-metal and falling like a rock (no pun intended)?
KLOS has been adjusting to an ever-changing rock audience. They saw KROQ's 4-share and are attacking. However, you're doing battle with a habit, not a radio station. It'll take a lot for KLOS to make a big dent in the 'ROQ..
>3. KLSX Classic Rock...does playing a dinosaur cause possible
>extinction?
Without Howard Stern......it's hopeless. How can a station with a 4.5 morning show get a 2.1 overall? They've figured out how. (ie: 1.5 middays, 1.4 PM Drive, 1.3 nights) KLSX has been trying to play a lot of songs that haven't been played in years ("DeepCuts"), it's more like ColdCuts. There's a REASON no one else is playing these tunes.
>4. KSCA and AAA Radio, is it really just a bad signal, or is nobody
>listening?
They have made gains.....but it might be still too esoteric for Helen Housewife and Warren Workforce to chew on. KSCA might claim to not want those listeners, but we all need them more than we realise...

That is correct. I suspect he burned his bridges with WNIS-850 when he left them. The ad campaigns he sponsored were brutal, and the WNIS guys are having a field day with his firing. I don't think any other stations in the area have a talk format. WVAB might be a possible option (1550) since the run CNN all day, and I understand the old WZAM-1150 is up for sale. Pat bought an FM station in Williamsburg once, but I think it failed and he was forced to sell it.

I would remind you folks that Rush, Liddy and a few others are just small cogs in a pretty big institution. I have done a survey for one of my consulting clients and can tell you that there are over 950 local and regional talk show hosts who have as much or more power over their audiences as either of the aforementioned gents.

Yes, talk radio is predominently conservative. It is also market driven.

But in terms of real numbers, remember that Rush cannot carry Paul Harvey's jockstrap and he is overexposing himself by the minute.

My suggestion--mildly put as always <evil grin>--is that the biggest problem Bill Clinton has is trying to understand why people would be scared of their government. If he is any kind of president at all, he will try to understand the message in all of this as opposed to trying to kill the messenger.

A bigger problem than Bill Clinton may well be Reed Hundt, who has been a complete disaster as chairman of the FCC and may well take his boss seriously and try to make trouble for guys like me. He's just stupid enough to try and that would divert a terrible amount of my time and resources as I sued the FCC into oblivion--which would be a two years process ending in the 1996 election.

Fact of the matter is the 10Q (KTNQ) ground system is built ABOVE the
industrial complex. It is a difficult pattern, but not impossible to
work with.

Many AM's have gone to above ground ground systems to maximize the use of
their property.

>format. Bill]

Have to agree with the MOD Note. KDWB and WDGY were the big rock
stations in the mid-50's to late 60's [before FM came on strong].

KDWB still exist on FM.

There was also 1280 (WWTC) that became OOHAA [what ever] kids radio.
A.K.A. Radio "Aahz". WTCN [around 900] gave up its call some years
back. The call sign is now used by a small station in Stillwater MN.

I think that creative use of automation can allow a station to concentrate its resources where they count--sales and daytime programming. We are automated at night and I have stations in two markets (Tulsa and Muskogee) strapped together. There is nothing inherently wrong with unattended operation but a lot depends on your format.

You can't do interactive talk (as we do) completely unattended. But you can play good music. This is not as simple a discussion as people would have it seem and I would suggest you meet your GM halfway before you reject his viewpoint automatically. the technology CAN help you spread costly resources

From: nhmas@gauss.med.harvard.edu
Message-ID: <3oa1tp$jgi@vixen.cso.uiuc.edu>
Source record: 32078

I forgot to submit the Arbitron Winter ratings before I went out of
last week... But, here they are a week late -- Boston's Winter '94
Arbitrons in a 12+ category :

Win'95 Fall'94 Win '94 Format
1. WBZ AM 1030 9.0 8.0 8.3 Full Service(All-News/Talk/Sports)
2. WRKO AM 680 7.1 7.5 4.7 All-Talk(Rush)/Red Sox Baseball
3, WJMN 94.5FM 5.7 5.5 4.7 CHurban/Dance -- 'Jam'n 94-5'
4. WXKS 107.9FM 5.6 6.0 6.8 CHR - "KISS 108"
5. WZLX 100.7FM 5.3 4.2 4.7 CR -'Boston's Classic Rock'
6. WBCN 104.1FM 4.8 5.4 5.3 Full Service(AOR/Talk/Sports)'The Rock'
7. WMJX 106.7FM 4.8 4.2 4.5 AC -'Magic 106.7'
WBMX 98.5FM 4.8 4.6 4.1 'Hot' AC - 'Mix 98.5'
9. WODS 103.3FM 4.4 4.7 3.9 All-Oldies - 'Oldies 103'
10.WCRB 102.5FM 3.9 3.5 3.9 Classical Radio Boston

* In the 25-54, group Hot AC WBMX-FM and CR WZLX-FM are sharing the top
spot with a 7.0 share each knocking out of AOR WBCN-FM and Oldies WODS-FM.
Mix98.5 jumped a full share since the 1993 winter book...
WBMX's growth has been very strong over the past 4 years with the
Hot AC format.

* In the 18-34 group, WXKS-FM still rules with a stable 10.1 share(last
year's winter book had them with 10.2). AOR rocker WBCN-FM is in
second place(9.7) and that's where they were last year(9.3).

* No major moves on the Boston radio scene this week...Of course,
eveything is subject to change...:-)

3681. Louisville Radio Watch: Listeners Say: Keep Liddy!

Newsgroup: rec.radio.broadcasting
Date: 1995-05-04 00:00:00 UTC
From: David Lee Poland <heydave@iglou.com>
Message-ID: <3oa1tp$jgj@vixen.cso.uiuc.edu>
Source record: 32079

(the following is a summary of a portion of the Louisville (Kentucky) Courier-Journal's media column which appeared Wed., May 3, 1995.)

AM-790, WWKY announced yesterday (5/2/95) that, as a result of listener comments and votes it collected this past week, it will continue to air the G. Gordon Liddy radio show. The non-scientific results, which were collected via telephone, FAX, and electronic mail, showed 62% of respondents favor keeping Liddy on the local talk station. 4,340 votes were counted during a period of just under 72 hours.
The listener poll was in response to recent attacks by President Clinton on "hateful talk" in the media, following the tragic bombing which took place in Oklahoma a few wees ago.

3682. New England Radio Watcher: Asian on WNTN

Newsgroup: rec.radio.broadcasting
Date: 1995-05-04 00:00:00 UTC
From: fybush@world.std.com
Message-ID: <3oa1tq$jgm@vixen.cso.uiuc.edu>
Source record: 32080

*1550 WNTN in Newton (10kw-D) has added a new block of programming to its leased-time format. The "Asian American Broadcasting Network" is heard from 4:30 till 7:30 pm, and rebroadcast the following day from noon till 3. It's the first broadcasting venture of businesswoman Sarinna Chiang, and the first Chinese-language program on commercial radio in Boston. Chiang is already talking about branching out to other large markets. I want to know what happens this winter, when WNTN's signoff creeps back to around 4:30 pm! (A note to DXers -- if you heard a dead carrier on 1550 last Saturday evening, it was WNTN. They left the carrier on for a few hours after sign-off. Yes, I notice these things.)

*I do indeed stand corrected about two items in the last post. Jarad still programs WYSR/WWCP in the Albany market, and Franklin Lakes NJ is only 20 miles or so from Fort Lee.

*Unsolicited Mail of the Day: A flyer that crossed my desk is touting a new book called "Los Angeles Radio People." It's a 225+ page book tracking more than 1600 LA DJs from 1957-1994. You can call 818-773-2255 to order with a credit card, or send $29.52 to db Marketing Co., PO Box 55518, Valencia CA 91385. Don't know that I'll order one, but it should answer many of the West Coasters' "Where are they now?" questions.

Replying to Bill:

There you go with the romantic notions about the "overall industry"

Most of the time, reducing competition is what it takes to make a business profitable enough to have people invest their hard earned money in it.

Economics being what they are, you don't buy a radio station to make a "little" money. You buy a radio station to make a darn good living and more money than you can make by putting the money in a bank or in the stock market.

Why should I buy into a 30 station market to make a "little"money when I can buy Clear Channel's stock and double my investment in two years?

Understand that this is a business in which, at the end of the day, I like what I do for a living. But neither I nor any serious businessman will do it for free or any less than we can make elsewhere.

Bluntly, there is nothing wrong with letting market forces take their course. If you measure diversity in the different strains of country or rock music on the airwave, you are missing the point.

>gradually sliding downward for some time, now. And KGBS "Hot Talk"
>1190 is now carrying business news, so I guess they've decided to bail
>out of the talk battle.

Pretty good analysis but, WBAP no longer carries the Rangers and the Stars are too new to get a gage on in the ratings. Also, KGBS is still a talk station. They carry a two hour business oriented talk show in the late afternoon, but the rest of their schedule is filled with G.Gordon Liddy and talk shows by Jocelyn White and Alex Burton.

Regarding the ratings drop at KTCK Sportsradio 1310 The Ticket, let's Remember that after a phenomenal Fall book during football season, the station ran into a baseball and hockey strike. That's like stripping away half the CD's of a music station. Sports radio stations can have enormous swings depending on sports activity. And AM stations with low power nighttime signals are further plagued during the Winter book.

etc.....etc....
>Are there instant play DATs out there? What are they?
>David Withers

>Yes Panasonic now has the 4100 which has a five second ram buffer in it
for
>instant starts.

Both the Panasonic 4100 and especially the Fostex D-10 are exceleent instant start DAT machines. Both use a RAM Buffer and load 3-5 seconds of first audio above a threshold {not time-code based}. You can preview the contents of RAM and even scrub and edit RAM on the 4100. I have 4 D-10's and they take a lot of punishment. I would wait for the "b" model of the Instant Replay based on experience with 360 Systems. It is a great concept though.

Hope this helps.

In regards to the recent post concerning digital workstations:

For around $3,000 you can be set up a 486/66mhz IBM system w/8-12mb of RAM including Turtle Beach soundcard (don't need any other) for use with SAW software.

SAW just recently released their new 16 track (stereo 8 channel) software. While SAW does have it's limitations, it's easy to use and allows flexible editing. There's awesome stuff for the Mac...but, SAW is the best multitrack software for IBM that I've seen.

Our station also runs Session Eight...costing way more and seeming to be understood by few.

Check around, try a demo of the SAW software... or try a demo of something.

Does anyone know of any resonable-priced software for quick recording/editing/listing/storage of phoners? For use with Soundblaster or Turtle Beach, btw.

Flanks!

There are copies of the latest pre-release (0,91) of SoundEfffects, a stereo/mono graphical sound editor and effects pack in the AIRWAVES archive site (available by FTP/Gopher or Web).

FTP: radio.aiss.uiuc.edu/pub/rec.radio.b-cast/UTILS

Gopher: radio.aiss.uiuc.edu:7070 /UTILS

Web http://radio.aiss.uiuc.edu/~rrb/ Follow "AIRWAVES PUBLICATIONS LINK".

It is limited, mainly by the lack of *undo* (a bad omission that the author WILL correct in the next version), but has a lot of features for shareware. Lack of undo is annoying, but I just use revert for that.

Grab a copy and let me know what you think. It is full functioning, non-crippled software.

Sorry Jay but I gotta' disagree. The DSE is a nice machine but with the simplicty comes alot of limtations. In my mind it's hard to beat the Pacific Recorders Dawn system. 8-8-8 not 2-8-2 like the DSE, Automated e.q., sends and faders. Gouping and true soundfiles. The DSE's main advantage is it's simplicty (easy for even the lamest of deejays to learn) but that also is what creates it's limitations.

3697. Re: Digital Production Studios

Newsgroup: rec.radio.broadcasting
Date: 1995-05-04 00:00:00 UTC
From: ai227@detroit.freenet.org
Message-ID: <3oa1ub$ji6@vixen.cso.uiuc.edu>
Source record: 32095

In a previous article, ary@southwind.net (Patrick Murphy) says:

>I could use some ideas. My station is moving into a new building the middle
>of July and our new owners want a proposal for a new production studio and
>equipment. ANYTHING is game here, but I'd like some ideas from those of you
>who have personal experience with the various digital stations now available.

I agree with the other post that says USE it before you buy it. You'll
be amazed at how different they all are.

For the dollar vs. power argument, I would consider:
Sadie - Has some nice radio oriented features
Spectral - Very flexible does a TON of tricks, but languaged for the
Musician. It has lifetime software updates free.

Both of these units are PC Based, so you can build and bargain tailored
your needs. Both use a Windows platform.

The Windows multi-tasking is nice, because we can call up a separate
database of our production orders and music while IN the system.

I would try to get one that utilizes a midi-mixing console... the most
popular being the JL Cooper CS-10. It saves a lot of time. Also one
that supports Data Dat or Magneto Optical backup.

Some of the more costly machines are quicker, but not necessarily more
powerful. Also many are proprietary machines, use only components they
manufacture.

Pro-Tools is another very nice setup if you want a MAC based system. I
costs a little more though.

This station ended up buying the Spectral Synthesis Audio Engine with the
JL Cooper board, a 486-66 computer, 2-1.2gig drives (4hrs of audio) 17"
oversize monitor, Data DAT tape backup... and the software for $11,000

I would do the same again if I was given a choice, but I would opt for
the MO backup instead. I would also consider the Sadie system. It is
the same cost, and it has a couple of little software features like NOISE
REDUCTION.

Every unit has their strong points and these are only a couple of examples.
If you care to discuss any others, I'm more than happy to assist.

WOW! I've never heard that story. That KFAC facility is now KWKW at
1330kHz.

I worked at the OLD KWKW site in Pasadena, now KAZN at 1300kHz. KWKW
allowed a condominium complex to be built on the Northwest corner of
their 5.5 acre antenna field in the early 70's. That condo complex is
directly in line with the main lobe of radiation of the daytime pattern.
There was minimal effect to the pattern. The facility is 5 kW day, 1kW
night.

Howard was also one of the most talented radio people I have ever known. As a vacation-relief ABC Radio board op, I sometimes taped his shows, when he would be at his home in Westchester County or his Manhattan apartment. He was such a pro, and had such an innate sense of timing, that most of the directors didn't even bother running a stopwatch on him. He would glance at the AP Sports Wire, start talking, it would all come out in words and sentences that made sense, and he would end RIGHT ON TIME, EVERY TIME!! It was truly amazing.

And, according to the late Rick Sklar, you were wise not to let Howard sit at your poker table. He was the type that would be thrown out of the casinos in Vegas and Atlantic City. He remembered every card that was played, divined everyone's strategy, and beat the pants off of everyone. Dan Ingram still remembers the afternoons at WABC, when they carried the Mets, when Howard and Ralph Branca would regularly clean his clock at gin rummy.

As Howard himself would have said, "A true...professional." We'll miss him.

3705. Want to find an OTR near Boston

Newsgroup: rec.radio.broadcasting
Date: 1995-05-05 00:00:00 UTC
From: bogey@world.std.com
Message-ID: <3ocvf1$a3i@vixen.cso.uiuc.edu>
Source record: 31963

When I was a 'Kid"...6 or 7, I used to listen to many OTR programs...Suspense, Archies Tavern, Lone Ranger, The Life of Riley....on and on. I loved and still do the images in my mind of these characters on these programs. I still believe that this is the best way of conceiving, in ones one mind, the story...and particular the characters of the programs. In fact, I think that the creators of "Multimedia" tend to leave this to ..."Themselves".

Anyway I live in Weymouth Massachusetts, (Boston), and would like to know if there is any station within my area that delivers these great OTR programs. Also is there any "hardware"...any radio equipment, Am or FM, Antenna or whatever that I can get to pull in stations from other areas?

Thanks,
Ed Reilly

3706. WWCR License reviewed by FCC

Newsgroup: rec.radio.broadcasting
Date: 1995-05-05 00:00:00 UTC
From: rrb@clm.aiss.uiuc.edu
Message-ID: <3ocvee$a2s@vixen.cso.uiuc.edu>
Source record: 31964

As heard today on some newscast, perhaps All Things Considered, there was a fairly major story regarding the (alleged) reality that WWCR's license is being 'reviewed' by the FCC over some of their programming, mainly some of their right-wing (their term not mine) extremist programming.

I believe they said something about this being the first time (in a long time) that this has been done (to a shortwave station I think they said). Sorry for the poor recall but I was very occupied wioth work when it was on in a noisy environment.

If what I heard is true, that this broadcaster is being 'examined' or whatever, over the political content of their transmissions, then that sets a very interesting precedent in USA commercial broadcasting, I think. Not a very good one from where I sit (and where many of you-all are probably sitting).

Sure, some might say, we don't need these violent, militia, right-wing, militaristic gangs on the air... But today they come for these broadcasters, what will be the next 'unacceptable' program content?

Since I didn't get a full copy on the broadcast, I cannot tie this down any more than I have, but I am sure others have more facts. Are we going a little overboard here in trying to control a terrible thing like terrorism by categorizing and restricting broadcast speech beyond the so-called profanities to ideologies, concepts, thoughts, opinions?

I hope we can get over the overload from OKC and maintain our heads, lest we go too far in giving up basic freedoms under some potentially specious banner of 'war on terrorism'. On NewsTalk television (a decent cable/satellite non-tabloid talk channel) there was a poll that asked "Would you be willing to *temporarily* give up *a few* of your constitutional rights to fight terrorism" (may not be a precise quote, but it is accurate if not precise). Never saw the answer on that one. But I do know that if rights are allowed to go, it is questionable how much of them will return. I am speaking now of the right of free speech, the legal commerce of a licensed radio station (all programs are brokered).

As radio broadcasters, I hope we can all see the potential threat here if a license can be called into question based upon airing of programming that holds a certain view, no matter how bizarre and radical (but not illegal) the opinions may be.

What do other broadcasters/observers think about the WWCR license thing? Do you think that WWCR (or any licensed broadcaster) should be

restrained from engaging in lawful trade (the sale of airtime to, basically,. who ever has the cash and who doesn't violate decency standards?

Despite the overtones of the situation... Lets keep discussion centered around the 'broadcasting issues' at hand and do our bests NOT to just rail on politics. We all know how that can get :-).

>and not actively pursue posting Trend numbers on the net. <snip>
>
>Note that Arbitron agreement with all its subscribers is that they may use
>trend numbers for "self-promotion," which is why trends (and quarterlies, for
>that matter) in just about every market are immediately faxed to the local
>newspaper media writers hoping for a little good, free publicity. Why not?.
> So, I grudgingly got Arbitron to agree that the Internet, like a newspaper,
>is a platform for such "self-promotion."

For those of us who see the trends in the paper and then post them here, how
should we proceed? Should all of us stop posting trends at this point?
Should we continue to post only 12+ trends?

Bill, maybe what's needed here is a guideline about what kinds of Arb
numbers we can post, so everyone stays out of trouble.

Peace,
jim grey

Message-ID: <3ocvef$a2u@vixen.cso.uiuc.edu>
Source record: 31966

Reply-To: an904@cleveland.Freenet.Edu (Michael King)

>From the land the new area code (770 outside the Perimeter Highway I-285 goes into effect December 1), the new numbers have finally showed up...I'll have specifics soon...

Granum's (formerly Summit's) V-103 (WVEE-FM 103.3) retained it's long-standing number one rating overally, with Mike Roberts & Carol Blackman as number one morning team. CapCities' WKHX-FM country outlet kept their long-standing number two slot. WSB-AM (750 AM) took bragging rights as the top talker in the market, at number 3 overall, at a 6.7, over cross town rival WGST-AM (with O.J. during the midday) at #5 overall, and a 6.1. 'GST has been running spots bragging about it's news coverage though, considering that GST has been running OJ on it's AM with Rush on the FM, and was the only station in town to bump other on-air coverage to carry live coverage from Oklahoma City. WSB has kept it's afternoon line up of syndicated shrink Dr. Laura from 12 to 2, and geeky sex-symbol/consumer guru Clark Howard from 2 to 5. On the other side of the coin, GST wins out in the all important 25-54 demo's with a resounding 6.5 to WSB's 5.0.

WSB-AM's Neil Boortz has made the rounds to try to diffuse some of the anger toward conservative talk hosts around the country...he was on Donahue last week. Sean Hannity of WGST is venting much steam over the President's remarks as well. Oh, to be back on the air.....all I can do is sit on the sidelines and chomp at the bit.

It appears that Cos Carson has enherited the 'obligatory black talk show host slot' over at WGST...there is much hype over there regarding the upcoming 'fight' between Carson and Hannity.

Ring Radio appears to be tweaking the signal on WIGO (1340 AM) - it sounds a lot cleaner now than it did when they took over a couple of weeks ago.

Such as life....I am still in the job hunt, so if you recognize me or my voice as I wait on your table at Waffle House, keep me in mind...I don't want to stray too far from the business....

Take it easy...

M

(PS: and yes, I'll finally change the .sig file soon enough...I just wish I could replace it with another station...)

BTW, ever since its commissioning as a CBC station, CJBC (50KW - 860KHz) has shared an antenna mast with the other CBC AM outlet in Toronto, CBL (also 50KW, on 740KHz). The transmitter site is located at Hornby, ON, west of Toronto ... the two transmitters face each other through a very sharply tuned diplexer. I don't know whether this situation has changed recently, but in the days when I lived in Ontario (up until about two years ago), this caused quite a noticeable roll-off on the high-frequency end of the audio spectrum for both stations.

3714. D.C. / XTRA-104 speaks!

Newsgroup: rec.radio.broadcasting
Date: 1995-05-05 00:00:00 UTC
From: "Max Cacas - NPR News Ops - Wash. D.C." <MCACAS@npr.org>
Message-ID: <3ocveo$a35@vixen.cso.uiuc.edu>
Source record: 31972

Washington's new "Seventies Station", XTRA-104 (WXTR-FM 104.1 Waldorf/Washington, and WZYQ-FM 103.9 Braddock Heights/Fredrick, Md.) has finally found its "voice", and now has jocks talking again, approximately 4 weeks after switching from 50s/60s oldies.

>From random listening, here's the jock lineup I've been able to ascertain so far:

6a-10a - Steve "More Music" Michaels (former afternoon drive on the "old" XTRA. This, by the way, marks the return of Steve to morning drive on 104.1; he had been morning drive on the country-formatted WXTR-FM/WSMD-AM when the station broadcast from a little house off a dirt road in LaPlata, Md. in the early 80s., before Bill Dalton, ex-WASH-FM, ex-WNEW-AM/FM, bought the stations and took them oldies.)

10a-2p (or 3p?) - Marilyn Thompson (middays on the "old" XTRA, and also ex-WASH-FM).

2p/3p-7p - Dave Thompson (new to the station; I have an idea where he might have come from, but I'm hoping to confirm this tommorow.)

7p-Midnite (?) - Tom Bell (weekender on the old XTRA, and spokesman for the Arlington County, Va. Police Dept.; also, formerly on the old Top-40 WEAM-AM).

Overnite - ?????

Anyway...the new XTRA appears to be further distancing itself from the floundering CBS "Arrow 94.7" by taking a distinctly personality-driven approach; excellent production/formatics (including terrific jingles, and two really good voices doing promos and liners, one of which is the guy who did the liners/production for the old WCXR); and a good, wide range of 70s music.

Nothing by way of print or bus-billboard promotion/advertising to report yet, but they are running TV ads featuring a woman inviting listeners to dial an 800 toll free number, and tell them what they think about the station, music, etc. A call also enters you in a contest giveaway.

More details as they become available.

From: Cannon@bilbo.pic.net
Message-ID: <3ocvep$a37@vixen.cso.uiuc.edu>
Source record: 31973

I've commented to several current/former broadcasters re: the universally-kind words that have been posted about Herb Jepko. It's a pity that we didn't have a chance to say them to him while he was still alive. Is it safe to say Herb is the only "national" broadcaster from the 80's forward about whom there'll be no dissension after his obituary, and whom everyone who posts will remember fondly? Seems to me that's quite a legacy. I hope someone will share this observation with his family. And, to kinda paraphrase William Faulkner, wouldn't that be a great legacy for some of us to aspire to!

From: llr@phantom.com
Message-ID: <3ocves$a3a@vixen.cso.uiuc.edu>
Source record: 31976

Amid all this attention to conservative, right-wing talk hosts, liberals seem to have been passed over. I find it hard to believe that left-wing talk is any less potent that right-wing. Extremes, in any direction, can have powerful effects.

It seems that there are more conservatives on the radio--rather, conservatives have greater presence on the radio, clearing in more markets and bringing in higher audience levels. Are there fewer liberals because most radio owners are conservative?

I am working on a story on liberal talk radio for Inside Media magazine, where I cover the radio industry. I'm looking for any insight on liberal talk radio (not for attribution unless indicated, of course), and would appreciate thoughts on some of the liberals with greater presence (Tom Leykis will be featured) and what the market is like for them (listeners and advertisers).

Thanks,
Laura Rich

IS> I have never had a problem booking musicians, or artists when they are in
IS> town. It's a fact of life that one industry helps the other. (It's known
IS>as P-R-O-M-O-T-I-O-N.)

Jack,
No one said anything about booking musicians. We were talking about localization in radio. For every live concert you'll have another 21 hours a day to program from not-so-local disks. My comment was about local jocks reading liners between recorded-elsewhere music.

IS> As far as talk radio, I don't know what your listening to, but any local
IS> TALK show that does nothing but Clinton bash is not worth the price of a
IS> 10 second promo.

No argument there. I hear them everywhere I go.

IS> Although I haven't listened to your station (I don't know what it is, you
IS> never say), your notes seem to indicate a lack of diversity about radio.
IS> My advise; you should hire (or at least listen to) some more creative
IS> hosts and experienced producers.

I work for one of those little stations that dot the countryside, but in my spare time I run the WOR Radio Network from a skyscraper in Times Square, New York.

I'm very happy to say that my network has a wide variety of programming from the longest-running psychologist (Dr. Joy Browne), The Dolans, Jay Severin, Arthur Frommer, Warren Eckstein, Ralph Snodsmith, Arthur Schwartz and Dr. Ronald Hoffman. We don't do hate and keep the Clinton bashing to a minimum.

It works, too. We're very profitable and have no problem sleeping nights. I like that.

Reply-To: rtnda@aol.com (Rtnda)

Bombs and Bombers will be the subject of the next meeting of the Northern California Radio-Television News Directors Association meeting, Wednesday, May 10. It will offer insight into the bombing in Oklahoma City and the Unabomber and information on how to protect yourself, your people and your newsroom. Speakers will be Dr. Elliot B. Byall, Chief of the San Francisco laboratory for the Bureau of Alcohol, Tobacco and Firearms; Rick Martinez, head of the Sacramento Urban Search and Rescue Team; John Fowler, Reporter, KTVU; and Ed Gleba, PIO, BATF. Dr. Byall coordinated the collection of evidence in the Oklahoma City bombing, in cooperation with the FBI and local agencies. Martinez' unit was the first to search the Murrah Federal Building for survivors in the first hours after the bombing. Fowler covered the bombing. Social half-hour begins at 11:30; lunch at noon; adjournment 1:30PM. San Francisco Tennis Club, 645 Fifth Street at Brannan. $20, with a $5 discount if you call (415) 259- 7538 before noon, Monday, May 8. You do not have to be a member of NorCal RTNDA or a news director to attend, but seating is limited and you are urged to call to be sure of having a place.

3723. Re: Payola

Newsgroup: rec.radio.broadcasting
Date: 1995-05-05 00:00:00 UTC
From: be992@freenet.Buffalo.EDU
Message-ID: <3ocvf3$a3j@vixen.cso.uiuc.edu>
Source record: 31981

A previous poster suggested that the payola scandal of
the late 1950s had less to do with rock and roll than unethical
business practices. This isn't entirely accurate. Consider that
payola had existed in the music industry at least since the mid-
19th century (see Kerry Segrave's book on the subject) and never
became the social/political cause celebre it was in 1959/60 and
the link with rock and roll starts to become clear. In addition,
the impetus for the Congressional, FCC, FTC, and local investiga-
tions can be traced to ASCAP's rivalry with BMI, and the former's
lobbying for legislative controls over the latter-- whose economic
health at that time was largely a result of its association with
rock and roll (and the country and r&b that spawned it). It is
also noteworthy that while disc jockeys were the main focus of
attention, the companies that offered the bribes were mostly
ignored-- the exceptions being companies that specialized in
rock and roll.
One last point: when one disc jockey testified before
the House Committee on Legislative Oversight that he had indeed
accepted payola to push a particular recording of a Tchaikovsky
tune, he was told that the Committe was not interested in that,
but only in those cases where payola promoted "bad" music, namely
rock and roll.

Bomb Threat Lincoln, NE

>From the Lincoln Star, Tuesday, May 2, 1995. Bomb Threat at TV Station Linked to Oklahoma blast. A viewer apparently upset at the coverage of the explosion at the Oklahoma City federal building issued a bomb threat of his own to the KOLN/KGIN Television station, Lincoln, Nebraska.

Fire Inspector James Ellis said an employee of the station received the threat about 8:20a.m.

The caller said the he didn't feel the station should air photoghraphs of the Oklahoma City bombing. He then said that a bomb is placed or could be placed in the stations newsroom, left a phone number to call and hung up.

Ellis said the police are tracing the number.

The station was evacuated for about 30 minutes while fire inspectors checked the building.

Lisa Guill, Production manager said the Sally Jessy Raphael show was airing when the building was evacuated. The show continued while employees were outside but two breaks carried dead air rather then commercials.

Ellis said that he inspected one package but found only a video tape inside.

3725. New England Radio Watcher: WBZ's Lapierre to Sub For Harvey

Newsgroup: rec.radio.broadcasting
Date: 1995-05-05 00:00:00 UTC
From: fybush@world.std.com
Message-ID: <3ocveb$a2p@vixen.cso.uiuc.edu>
Source record: 31983

*WBZ's veteran morning news anchor, Gary LaPierre, will be in New York Friday morning (May 5), to sub for Paul Harvey on Harvey's morning and midday news and comment broadcasts. This will be a chance for the nation's largest radio audiences to hear what we've all known for years -- Gary's one of the best there is. We're all thrilled for Gary, and he's pretty excited himself.

*One more from the Corrections and Amplifications department: Shortwave station WVHA is in the town of Greenbush, Maine...not Greenfield. And following up on the story mentioned here a few days ago, WVHA is formally applying for a religious exemption from its $120,000/yr property tax bill. Town officials are skeptical... they're citing tax law that refers to church buildings as including sanctuaries, rectories, and the like -- but not radio towers.

KMLE(107.9-Camel Country 108) has
promoted evening jock Gwen Foster
to middays, replacing the departing
Jeff Daniels.
Rumor is Foster beat out at least one
big gun who wanted the gig at the
station, which leapt to a 2-point 12+
lead over former country king KNIX
in the winter book.
The promotion pits Foster against
market legend W. Steven Martin,
whom KNIX moved to middays after
17 years in morning drive...a reaction
to the out-of-nowhere success of
KMLE's Tim and Willy.
Haven't seen dayparts for the winter
book, but in the most recent Arbitrend,
Martin was the only KNIX jock beating
KMLE.
No pressure, Gwen.

> (.5 meg). It was so slow that I finally just gave up. I use
> a PPP account at 28.8.

At the risk of getting off topic (Bill will surely let me know), your experience has little to do with general Internet traffic, but has everything to do with how many ports your service provider has (and how many were in use), how many people were logged into the FTP server you were attempting to access and the size pipe your service provider has for you to draw bandwidth.

The other point is that RealAudio was designed to minimize packet traffic. The files don't have to be downloaded onto your drive to be heard.

Anyway, it's not a brute force method that would tax the 'net.

Anybody else heard it?

3730. Radio Sales/National Radio Syndication

Newsgroup: rec.radio.broadcasting
Date: 1995-05-05 00:00:00 UTC
From: travlradio@aol.com
Message-ID: <3ocvf7$a3o@vixen.cso.uiuc.edu>
Source record: 31988

Reply-To: travlradio@aol.com (TravlRadio)

I am seeking an experienced radio professional who knows all there is to know about radio advertising and selling nationally syndicated radio features.

Must have an extensive background in and knowledge of radio sales, management, markets, formats & programming. I am looking for an aggressive--yet NOT overbearing--male/female/minority who loves radio sales. Ideal person will be committed to the belief that nationally syndicated radio features can be a huge money maker for radio stations in all size markets.

This is a lucrative opportunity for the right person.

Please contact me by phone or FAX (with a detailed resume) at (817) 483-2216, E-Mail at TravlRadio @ aol.com, Prodigy at ID# wjrs10a or by US Mail at:

TravelRadio
PO Box 170117
Arlington TX 76003-0117

If FAXing or using the PO Box please include a detailed cover letter with some ideas.

Thank You very much...

SALES ASSISTANT

Westwood One Companies has an opening for a Sales Assistant, start date ASAP. Job involves working with three account executives who call on Advertising Agencies in the Media Planning Department. Candidate must have interest in communications, advertising and marketing industries. Responsibilities include word processing, answering phones, creating proposals, processing sales orders and daily correspondence. Must be able to handle deadlines and prioritize work loads. A Communications, Marketing or English major is preferred. Wordperfect and Lotus required.

Westwood One is the largest syndicator of radio programming in the United States. Westwood One's talk programs are among the most popular and best known in the nation, including such personalities as Don Imus, G. Gordon Liddy, David Brenner, Tom Leykis, Larry King, and Mike Walker. Special event programming includes The Rolling Stones Voodoo Lounge Tour, U2 Live from Dublin, Madonna, The Who's 25th Anniversary "Tommy" concert and the Paul McCartney New World tour. The work environment is music oriented and fast paced.

Salary: $20,000

Please send resume to:

Westwood One
1675 Broadway
17th Floor
New York, NY 10019
Attention: Human Resources
Fax #: 212-641-2189

3732. Broadcast regulations needed

Newsgroup: rec.radio.broadcasting
Date: 1995-05-05 00:00:00 UTC
From: rbartsch@lynx.dac.neu.edu
Message-ID: <3ocvf8$a3q@vixen.cso.uiuc.edu>
Source record: 31990

I am a member of our college radio station (WRBB) at Northeastern University in Boston. At a recent meeting, we got into a debate about the FCC and their guidelines as far as what can and cannot be said and played on the air. The debate centered around obscenities in song lyrics, in both rock and rap songs. Our PD and General manager aren't exactally the brightest bulbs, and neither posessed or had ever seen any actual guidelines from the FCC. Is there someone we can contact so that we may obtain a list of regulations from the FCC? I have already checked their gopher site, but that has proven fruitless.

Along with the obscenity guidelines, it would also be extremely helpful if we could get a list of ALL of the FCC's guidelines, i.e., rules regarding the EBS, PSA's, licenses, transmitter logs, etc.

Any information of this type would be greatly appreciated.

thanx in advance

3734. Rush Limbaugh's responsibility for OKC

Newsgroup: rec.radio.broadcasting
Date: 1995-05-05 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <3ocvfa$a3s@vixen.cso.uiuc.edu>
Source record: 31992

IP>Another problem with (syndicated) talk radio, IMHO:

IP>A lot of today's talk programs are, in essence, infomercials for a
IP>particular ideology. Programs hosted by Pat Buchanan, Oliver North, Ross
IP>Perot, Mike Reagan and others are not about debate and information;
IP>they're about selling the hosts' agenda--which too often means advancing
IP>the hosts' political ambitions.

Before we get into a "syndicated talk is the root of all evil"
discussion, I think I need to point out that the only syndicated host
accused of serious breaches of community responsibility is Gordon Liddy
for his radio course in bomb making and human target practice.

The others mentioned are all local: Mohan in Phoenix, some other wacko
in Colorado Springs and the shortwave paranoids predicting helicopter
invasions from Mongolians under the wing of the U.N.

Bob Grant and Lionel on WABC aren't exactly intellectual exercises in
debate. They also push the host's right wing agendas. So let's be
accurate in this discussion. It has nothing to do with whether or not a
host is local or syndicated.

IP>And that's why some of us are worried about the impact talk shows are
IP>having on unstable extremists. Some kook takes what the WonderMop guy
IP>says too seriously, he ends up buying more mops than he needs. The less-
IP>than-stable person who hears Oliver North saying the government's main
IP>agenda is to take away our rights or Gordon Liddy saying the Bureau of
IP>Alcohol, Firearms and Tobacco is the devil incarnate may respond in a
IP>more dangerous way.

Regardless of who responds, or how they do it, it's still irresponsible
broadcasting; Local or syndicated.

IP>As others in this thread have suggested, no one is interested in
IP>censoring the words of broadcasters. Rather, the points are (1)
IP>responsible talk show hosts should weigh the consequences of their words
IP>and (2) even if they are no longer bound by an equal time doctrine,
IP>stations have a responsibility to air a range of ideas.

I think we need to define who is being censored. There's absolutely no
mention of freedom of speech for Talk Show hosts in the constitution. No
one has a right to be one or have his/her opinions revered and
broadcast. Freedom of speech is granted to individuals against the
government's suppression of it.

In broadcasting, that freedom is granted to the licensee, as is the
responsibility. When Howard Stern says something dirty, the station gets

the fine. No station has the obligation to grant freedom of speech to an employee.

IP> I noted with amusement Oliver North's recent defense to Bryant
IP>Gumbel regarding the lack of dissenting voices on talk shows. He told
IP>Gumbel that at "my station" (presumable WWRC) there were four liberal
IP>voices (Dr. Gabe?!) to his one. If he believes a diversity of viewpoint
IP>is appropriate, I suggest he examine the programming offered by his
IP>syndicator, Salem Broadcasting. He won't find a liberal (or even
IP>moderate) voice there.

It's all relative. Compared to North, Liddy and Limbaugh, Atilla the Hun would be a liberal. Even Limbaugh is being accused of being a liberal by the even more ultra right. They're accusing him of selling out to the government. Salem Broadcasting is a religious network. I'd expect them to be on the right. Their concept of a liberal would be Paul Harvey.

Defining a Liberal in today's political climate is like wrestling a greased pig. Once you think you've got it, it slips away.

Rich

>I am about to graduate from Arizona State University, and am
>interviewing for an Account Executive position at many of the top
>stations in Phoenix. What qualities should I look for in a top notch
>organization? Are some more important than others?

If you are just coming out of college, look for the following:

- Training! Too many stations hire rookies without regard to giving them adequate training. Without training you're being taught to swim by getting thrown overboard.

- A pattern of success in developing sales talent!

- Either a list of clients to work, a geographic area or something that's yours.

- Avoid a station that will offer you 100% commission from day 1. What's their investment in you? Why should they be overly interested in your success, it's not costing them anything. Negotiate for a reasonable draw (maybe 15-18k at least) that is forgiven for the first 90 days.

- Talk to some newer AE's, ask them how they were brought up there. Were they given some good accounts? Did they get to attend any company paid training (Radio Ad Bureau or sales training)? Is it sink or swim or does the Sales Manager help them out?

Good luck, if I can be of any further assistance, please e-mail.

> (KMJ is the local Rush station).
>
> According to the Bee...
>
> Boyd predicted rain.
>
> KMJ wanted sunshine.
>

Just for the record:

Sean Boyd said, up until Saturday Morning, "cancel any activities
you've got planned for the weekend, it's going to rain all weekend"
That weatherforecast did not mesh with the NOAA weather
forecast. KMJ's Program Director called Sean to question the
difference between the forecasts and the conversation moved on to the
"glass is half full as opposed to half empty" argument. The chance of
rain was pegged at 30% and the KMJ PD argued that you could very
easily make the argument that there was a 70% chance of sunshine. The
fact of the matter is...Sean did not get his forecast 'right' until
early Saturday morning when he said "It looks like we've dodged a
major bullet and the rain will hold off until late Saturday afternoon.

> According to the Bee, Boyd refused to change his forcast, and as a result,
> was let go.

Just for the Record:

Sean Boyd was not a KMJ employee. He was a contracted weather service
that was used on a month to month basis. His month was up at the end
of April. There were plans to end Sean Boyd's services about 6 months
ago. However, the weather reporter that KMJ desired to use had just

begun a 6 month contract with KMPH(FM).

> Now, in today's (Saturday, April 29) Fresno Bee, Boyd claims that KMJ had
> asked him to change forcasts for past KMJ, or KMJ related events. Boyd
> claims that when he predicted "partly cloudy skies, breezy and cool with
> highs in the upper 50s and 60s" for a day that a KMJ sponsored golf
> tournament was to take place, KMJ management asked him to change it to
> "mostly sunny with a high near 70."

This really makes little sense:

The golf tournament was sponsored by KMJ radio to benefit the Fresno Philharmonic Orchestra. It raised about $15,000. The golf tournament did not have any walk up business. All the participants in the golf tournament had already paid their entry fee. What good would it do to alter the forecast?

> Since the Fresno Bee printed its original story on Boyd and KMJ, KMJ GM Al
> Smith has gone on the air to say that Boyd was relieved of his duties for
> "subpar performance." Smith has denied anyone ever suggested that Boyd
> change his forcasts.

And Lastly:

What would you expect a disgruntled former 'employee' to say? That he did a bad job and deserved to be fired. NOT! This guy went crying to the pompus Fresno Bee Media reporter, who incidently never bothered to check the credibility of the allegation made by Boyd, and proceeded to tell him a the story. This particular reporter has never had a good relationship with KMJ. KMJ is a major competitor of The Bee, is a typical liberal newspaper, and as such, the Bee very seldom wastes an opportunity to take a shot at KMJ.

3743. Dallas-Ft. Worth (Suburban) radio happenings

Newsgroup: rec.radio.broadcasting
Date: 1995-05-06 00:00:00 UTC
From: Tom Desmond <wsu@mimi.itg.ti.com>
Message-ID: <3ofo4u$qna@vixen.cso.uiuc.edu>
Source record: 32001

An article appeared in the Plano section of today's Dallas Morning News, which I have taken the liberty of paraphrasing, below:

INVESTORS TO REVIVE STATION--NEW KAAM MAY AIR IN JULY

Hue Beavers (former VP of Operations at KAAM in Dallas) has assembled a group of about 25 investors that are buying KWFT Wichita Falls (620 khz), with plans to move it to Plano, which is a major (population 170,000) suburb of Dallas. The new station will pick up the pop standards/ big band format that had been running on KAAM (1310 khz) in Dallas, prior to its conversion to sports-talk KTCK at the end of 1993. Target demographic is 45+, and the station will feature most of the old KAAM personalities. The signal will be sufficient to cover the Dallas-Ft Worth radio market.
The station will also provide news, weather, and high school football for Plano and Collin County residents, filling a need that has gone unserved for about five years now. They may also provide such programming for Denton County residents, as well. The station could be ready to begin broadcasting as soon as this July.
The article also notes that "...this station won't shut down because the investors want to change the format for more profits," because "...it is just people who love the music running the station."

As a resident of Plano and Collin County, they have my best wishes. Although I am not a fan of the music they will be playing, I do believe that their music programming fills a definite need (this music is currently available only via a couple of low powered stations in the area) for many people, and I strongly feel that the news programming will fill a need, as well.

3744. North San Diego Radio Watcher 5.5.95

Newsgroup: rec.radio.broadcasting
Date: 1995-05-06 00:00:00 UTC
From: Chris Carmichael <CCHRIS@cei.mhs.compuserve.com>
Message-ID: <3ofo4v$qnb@vixen.cso.uiuc.edu>
Source record: 32002

Here's the latest in happenings from the 55th market: Vista, Carlsbad, Oceanside, San Marcos, and Carl's Diner on I-15.

Billboards: Plastered on the side of North County Transit buses is the smiling Dr. Laura Schlessinger with her finger pointing to "9 to noon." Dr. Laura gets double play here: 9 to noon on 760 KFMB, San Deigo, and from 12-2 p.m. on AM 640, KFI, Los Angeles.

On the front of the buses are KKLQ-FM [Q-106] and KOGO AM 600. The Par Broadcasting stations have been there since last June.

The KKOS [95.9 Carlsbad] Morning Coffee Crew has been taking a few weeks of vacation, and will be gearing up next week at a North County site. Interested San Diego readers/listeners who want info, either e.mail me, or call the station. The site for the coffee, danish, and newspaper giveaway is announced on Thursday.

Reoger Hedgecock and his crew will be heading back to Washington, D.C., for "Holding the Feet to the Fire (part 2)" the first part of June. The popular KSDO [1130] host has made several trips before. The listening audience who want to participate can join Rodger by calling the station and booking through a San Diego travel agency.

Baseball is back: KFMB AM 760 is back in its comfortable seat as the home of the Padres, while cross nation station, XEXX gives the play-by-play in espanol at 1420. Radio with pictures home of the Padres is also KFMB-TV 8 -- and some of the games broadcast on KTTY, Ch. 69.

Mr. KFI, the popular Saturday and Sunday night host, has been filling in for Stephanie Miller on KFI this week.

It's been a good week here in North County, Carl, the owner of Carl's Diner on I-15 came back refreshed from his fishing trip. For those who would like a HTML version of the San Diego Radio log, visit the Airwaves homepage, or e.mail me for an ASCII version. [Thanks to Bill for 'hosting' my page! Coming in July, Carl's Diner will be on-line, all-the-time with the freshest Radio Pages and Fries via the 'net. Watch this space for coming details!]

3745. '50s-'60s Pgh airchecks wanted

Newsgroup: rec.radio.broadcasting
Date: 1995-05-06 00:00:00 UTC
From: Jason Paul Togyer <jt3y+@andrew.cmu.edu>
Message-ID: <3ofo4v$qnc@vixen.cso.uiuc.edu>
Source record: 32003

Among my many interests is model railroading, and I'm a member of a club just outside of Pittsburgh, Pennsylvania. We're constructing a model of a typical Mon Valley steel town of the late 1950s or early '60s, and for atmosphere, I'd like to pipe sounds of the era through one of my little AM five-tubes.

Here's the problem: I have plenty of music, but nothing much in the way of commercials, news broadcasts, or station IDs.

If you have 1950s-1960s airchecks from WEDO, WMCK, KQV, KDKA, WHOD, or any of the Pittsburgh/McKeesport stations, especially ones that feature Terry Lee, Clark Race, Perry Marshall, Rege Cordic, Porky Chedwick, or other personalities, I'd love to hear from you. Again, I'm primarily looking for commercials (Fort Pitt and Duquesne Beers, Wilkens "E-Z" Credit, etc), station IDs and jingles, and DJ patter.

I don't have much to trade, but I am willing to compensate you for your time and material. I can use cassettes, open reels (1/4"), 8-tracks, or records (I know there's some Cordic and Co. skits out there on vinyl!).

If you can help me in this "worthy cause," drop me a line at jt3y+@andrew.cmu.edu, or regular mail at McKeesport Model Railroad Club, 2209 Walnut Street, McKeesport, Pa, 15132, USA. Thanks for your time!

Any insight on the following observation from my boss would be appreciated:

"WKBN's running spots for church-supported bingo games. Have the rules been changed so as to permit this? Too, I hear "The Trapper" has a Saturday morning show on which he prescribes home-style remedies for medical maladies. Many of these treatments are available through his program sponsors. Reminds me of Dr. John Brinkley. Do the rules now permit this activity?"

I stand corrected. All-classical WCRB 102.5FM is one of the few remaining commercial stations in the Boston market which are not part of ever-growing duopoly ownerships. *However*, it's very unlikely that WCRB will be sold any time soon or its format will change in the next 90-some years...

I didnt mean to overlook WCRB's independent operation but my original post dealt with the other 3 non-duopoly FM stations which could potentially change hands at any given momement...

Best Regards,

-Mark

DALLAS/FORT WORTH *RADIOWATCHER REPORT* RON STEELE

Dallas/FW radio listeners are fortunate to have enough computer talk
on the air to make their 'byte' heads spin! The bulk of it is on
AM 1190 - KGBS. They program over 25 hours weekly. Here's the details:

KGBS radio
3500 Maple Ave.
Dallas,TX 75238
PH 214/526-2580
E-mail kgbs@pic.net

INTERNET AT NIGHT - nitely 10pm-2am/Sunday 10pm-1am
This show is a surfer's dream. Throughout the show, the host and guests
travel through cyberspace and you're invited! Just a hint from someone
that has tuned in several times....have a pen and paper handy to jot down
all of the URLs, HTTPs, and E-MAIL addresses that will come flying your
way! They even have cool giveaways at the end of the show!

INTERNET 101 - nitely 7-8pm

ON COMPUTERS - Sunday noon-3pm (sat. feed fr. FL)

COMPUTALK - Sunday 8pm-10pm (fr.Houston)

THE MACWAVE - 11am-12noon (show for McIntosh users)

<NOTE: some of the above programs may soon be available in your area,
either through syndication or Satellite feed.>

My sincere thanks to Doug for all of the Showtimes and info.!

I think you're right about that. The KYNG call letters
were already in use, in Coos Bay, Oregon (as I recall), so they had
to arrange some sort of a call letter swap with the Coos Bay station.
I don't know if they had to pay the other station for the calls (or
what), but I believe that after the change, the Coos Bay station
became KRSR (don't know if they still are)...

> Alzheimers Disease <grin>
>

KQZY became "Star 105" and a while into that format, they changed calls to KRSR. KRSR became "Young Country" at the beginning of '92 and the calls stayed KRSR for a while. They changed from KRSR to KRRM briefly and then to KYNG by mid 1992. The KYNG calls belonged to some station in Oregon, who I believe ended up taking the KRSR calls.

The KRRM calls were hidden and if I recall, they were for "Armadillo" even though they always went by "Young Country."

>were their weak points, etc.

We use a Sony TCD-D10PRO which we have had for several years. It's wonderful and certainly reduces our field recording problems while improving our quality. We record a gardening program in the field (examples at HTTP://hansenr.ads.orst.edu/)and used to take an Otari RTR with us and all the gear that went along with it. Now we just take the DAT recorder, three batteries, cable, a boom, a mic and we come back with wonderful audio.

Problems arose when we brought the Sony back into the studio. It's digital output was type AES/EBU while the digital input on the Sound Designer II card in our Macintosh computer was type S/PDIF. We had to download and upload all audio analogue until we solved the problem by buying a studio DAT Recorder, a Panasonic SV 3700, with both type digital inputs/outputs.

Additionally, our Sony is an early model and does not record absolute time. Later versions may; I don't know.

Finally, the Sound Designer II package gets you a free archiving program called DATa. DATa not only archives the audio, but the playlists, merges and other things you do to the audio. DATa does not work with our Sony but does work with most other DATs.

We are very pleased with our Sony and the quality it has given us. And, we are pleased with our Mac editing system (Sound Designer II) and our multitrack digital audio workstation software (DECK II).

I hope this helps. Contact me if you need more information.

I have a Sony D-5 Datman, and although it is a consumer model that has stereo mini-jack inputs, it does have a 20db switchable pad on the input. The mic preamp is kinda noisy, so I use it with a portable mixer and it works great! There's a new model out now that doesn't use rechargable batteries, runs on AA cells. It will kill a set in about 5 hours, but it's better than the rechargables. I have gone through 5 rechargables on mine, if you don't treat them just so, they die fast!

|: what creates it's limitations.

What? You disagree that it's where I put my money? ;)

Friend, I'm no lame DJ. I'm a vice-chair of the AES, won major national awards (Clios, Emmies, that sort of thing), have taught production at the college level, write about audio for IDG, and make most of my living doing ad agency-driven promos for CBS, Turner, and Arts & Entertainment. Pretty high-standard work.

If the DSE had limited power, I wouldn't be able to use it. And my clients wouldn't pay for it.

Too many people confuse a simple interface with a lack of some kind of seriousness, and mistake confusion for power. The DOS-folks used to say that about the Macintosh (until they realized Mac users were more productive, and came up with Windows).

The DSE's simplicity really means I can do my edits super-fast, try new ideas, work flexibly, fix mixes without hassling 'automation' modes, add or undo special effects at the touch of a button...

and all this time, I'm concentrating on the project instead of the computer.

Hey, I write magazine articles on a Mac. Would they be better if I had to do them on a UNIX machine?

From: Rick Hansen <rch@hansenr.ads.orst.edu>
Message-ID: <3ofo5h$qo5@vixen.cso.uiuc.edu>
Source record: 32020

Officials at KYKN, Salem OR today told me that KSLM will be going silent "around the first week in June" but will be back on the air in September with "Lifestyle Talk."

KYKN-AM owns KSLM-AM.

An article about KYKN today in the "Statesman Journal" newspaper said that the programming on KSLM would include "shows about wellness, finances, pets, travel, sports and a bit of politics."

According to the newspaper, "a bit of politics" has been very kind to KYKN since shifting from country to news/talk four years ago ... monthly revinues 10-12K then and estimated at around 50K for 1994. KYKN carries Rush and, locally, former conservative (some say ultra-conservative) Republican US Congressman and gubernatorial candidate Denny Smith (one of the few Republicans in the country to lose last election). One or two other stations in the state carry the Denny Smith program. KYKN also carries more moderate programming including Bruce Williams and Dr. Dean Edell along with Portland Trailblazers and Oregon State University sports.

Station Manager Michael Frith from the newspaper article: "We went for a niche. A station needs to stand for something rather than stand for everything. Then, you get nothing. You saw the last election, we are giving people what they want."

Laura,

Perhaps you would be so kind as to name some of the left-wing hosts you spoke of?

Right-wing, and left-wing are very strong terms. We do have a genuine right-wing at this time, but I can not think of any genuine left-wing types. We have people who are not conservative. We have people who can properly be called liberal, but left-wing?

Lassiter

3765. Liberal talk radio

Newsgroup: rec.radio.broadcasting

IL>Amid all this attention to conservative, right-wing talk hosts, liberals
IL>seem to have been passed over. I find it hard to believe that left-wing
IL>talk is any less potent that right-wing. Extremes, in any direction, can
IL>have powerful effects.

Laura,
It's much less potent. We find conservative hosts to be on the attack while liberals seem to act as apologists and whiners. I don't like the situation. I've heard no liberals I'd consider as compelling as the conservatives and I'm a Libertarian, not a conservative.

I've recently completed an intense search for talk show hosts. The majority of calls, tapes and auditions I heard were from Limbaugh wannabes. Nothing unique. Mostly white, male, republican, Clinton-bashing talk show hosts. The Liberals I heard were dull, talking heads or screamers relying on weak shock value. The liberal network shows are showing very little growth. Most of them live on external promotion, not ratings. They're more famous for their posts on the Internet than they are on the air.

IL>It seems that there are more conservatives on the radio--rather,
IL>conservatives have greater presence on the radio, clearing in more
IL>markets and bringing in higher audience levels. Are there fewer liberals
IL>because most radio owners are conservative?

Most owners want to conserve as much money as possible. That's as far as their conservatism goes. It really has nothing to do with ownership. When conservatives get ratings, even the most liberal owner will go where the cash is. If you're a liberal owner and insist on running Jerry Brown instead of Rush Limbaugh you need to have your head examined or develop a warm and fuzzy relationship with a bankruptcy attorney.

IL>appreciate thoughts on some of the liberals with greater presence (Tom
IL>Leykis will be featured) and what the market is like for them (listeners
IL>and advertisers).

Tom is a good guy, and all that, but he's become the token Liberal in everyone's articles. Why not ask Jay Marvin at WLS-FM and Bob Smith at WXXI for some input. I'm sure they have a far larger presence in their markets than Tom has. You'll find that the individual local hosts are far more representative of liberal broadcasting than a single network host. How about Lynn Samuels at WABC? She might have more listeners from WABC than Tom's entire network has. If Lynn didn't have that great New York accent, I'd put her on my network in a heartbeat.

If you concentrate on a single host, you'll come out with a puff piece on that host. Who needs it? Get a good cross-section of liberal radio.

Rich

I challenge you to find even *one* leftwing national talkshow host.
There aren't any. True, there are a few moderates and a few liberals,
but the true left wing (the pro-socialist, pro-labor, pro-people)
national talk host simply doesn't exist. About the only person who seems
to come close is Pacifica's Larry Bensky, and he's not a socialist and
doesn't have a regular gig.

Last I knew, The Chief Engineer position at Federated's Stations in Ft. Wayne had been eliminated. Thats what they told the last REAL engineer they had. I think they are using some contract engineer who just happens to be the GM's brother. The full time "technical engineer" is also the GM's brother. I guess it must me a real "family affair".

I am *very* sorry to hear that the sale of 'PTR is to a religious broadcaster (who is presumably feeding canned
programming). WPTR has a *long* history of local programming. What in the *%%$%$#@# infuriates me is when a mega-opoly
sheds its 50kw signal and retains its 5kw station, shifting stuff to the 5k station. (WROW/WPTR has been running local stuff in
addition to its AP newsfeed/OJ trial on WROW and atrociously bad satellite talk on 'PTR, including local sports, local sports talk,
and local news cut-ins.) 'PTR has not hidden that a sale was in the air, but has very carefully avoided discussing on-air who the
buyer was.

The state of AM continues to worsen....

The Fort Lee translator does have pretty good signal for its power level. What I'm wondering is how he got the FCC to authorize the thing. It seems to me a translator operating somewhere around 20 watts on 103.1 would cause "harmful interference" to WNEW on 102.7 and WYNY at 103.5. Maybe when you examine the desired vs undesired ratios the interference does not occur since the translator antenna is on a rather tall tower above an apartment building and within 5 miles of the second adjacent class B's, thus allowing the "ball of interference" to be suspended in mid air. That would make their operation similar to the former WMSC frequency of 101.5 in Montclair, NJ (they recently moved to 90.3 but still operate at 1 watt ERP) where the antenna is on a tall UHF-TV tower and the "interference" does not reach the ground.

Anyway I'm glad I don't have to deal with those class D secondary type licenses which always run the risk of being pushed off due to interference complaints. Speaking of licenses, I'm still searching for a NY-Hudson valley station to LMA with my startup, WQMR 97.9 in Jewett (Windham). You gotta see the computer coverage models I have run - pretty impressive- right down into Albany/Troy!

Fascinating. Now that rock and roll is mainstream, the feds apparently aren't interested in the payola that still exists. Occasionally, a station fires someone and gives payola as the reason, but there's a lot more out there than anyone's going to admit publicly, especially since so much of today's payola involves cocaine. Nobody's going to admit to accepting cocaine to play records.

I am told, however, that there is pressure being applied to certain radio stations to get them not to sponsor rap concerts. I guess rap is today's "bad" music.

>

In an AM antenna system, ground radials have one major function: To provide a constant ground reference for the radiator (tower). Studies ahve been conducted since the 1930's regarding the effects of ground radials, arranged in various fashions, have on a radiated pattern.

Most AM stations employe a ground system that consists of 120 equally spaced radials that are made of uninsulated #10 copper wire. This is approach is an outgrowth of the 1930's studies by a man named Brown. Recent studies have shown that reducing the number of radials from 120 to 8 did not effect the overall efficiency of the antenna system.

In the 1960's there were studies made where the radials were 'plowed' into the ground in a pattern. Again, no effect on the radiated pattern.

Finally, KTNQ (10Q) is not the only station to have buildings around their towers. KFI, Los Angeles has constructed buildings around there tower. KFXM, San Bernardino was on a golf course, the glolf course was sold and an Auto Mall (gorund of 10 ten automobile dealers) was constucted amongst the three tower array. That array is stable and operates well.

KMIN at 1030, licensed to Maplewood has had a pretty spotty history, changing format in 1990 (to adult standards, I believe) and again in 1993, to religion. It may also have gone dark at some point.

Then there is KMAP, 1370, licensed to South Saint Paul, which is listed as off-air in the current M street directory.

>There was also 1280 (WWTC) that became OOHAA [what ever] kids radio.
A.K.A. Radio "Aahz". WTCN [around 900] gave up its call some years
back. The call sign is now used by a small station in Stillwater MN.<

WTCN radio was on the dial around 900? Before the 1220 Stillwater station, I
thought it had been dormant for years...last I knew of that call, it preceded
the WWTC sign on 1280 (maybe as long ago as when the 1280 allocation was on
1250 in the '20's!)
900, specifically, has been nc KTIS for as long as I can remember. 950 is
KJJO-AM and 980 is KEGE-AM...none of them had the WTCN calls did they?

You're not thinking of the 1010 that moved to 1030 three years or so ago when
it upgraded power & went fulltime (now nc WCTS)?

We used to get a bomb threat about every six months at CKLW during the 1960s and 1970s. All bogus.

The only time anyone acted on a threat was when a hockey game was blacked out and CKLW-TV couldn't carry it. The fans were rather upset, to say the least.

One of them sliced one of the guywires on the TV tower, which just happened to be beside the radio and TV studios. That was exciting.

So was the time the drunk managed to climb the tower with a bag full of beer bottles. He kept bombing the officials below with his empties.

While I'm not very familiar with the KMJ story, forcing a weather talent/service to say a particular forecast management wants isn't as rare as it seems. While I would never allow my credibility to go out the window because of what management wants the weather to be and what it will really be, I have seen this practiced in New York--especially on television. There is one station in New York City(network too) that will intentionally leave bad weather out of the weekend forecasts just because research shows people will tune to a better-weather forecast than a bad-weather forecast.

So while this may be (or may not be) the case with KMJ, it's certainly not out of the realms of possibilities.

WFLN, Philadelphia's Classical Music Station, now has a web site. On it, you'll find a complete programming schedule, concert and program listings, program host bios, a station history, and other information...as well as (eventually) links to the other 2 stations in the Marlin Broadcasting classical chain, WTMI, Miami...and WQRS, Detroit. The address is http://www.netaxs.com/people/isphere/wfln.

Incidentally, WCRB is, I believe, the third classical station in the nation to set up a web site. KDFC is the first...the classical station in Houston (whose calls escape me at the moment) was second, then WCRB.

You might want to check the FCC versus Red Lion case in the 1960s in which the feds tried to shut down SWer WINB in Red Lion, PA, for extremist views. This was done under the pretense that WINB was really broadcasting to the USA (illegal) because they had failed to edit programs urging people to write to their "congressman" or to send money to a U.S. address for newsletters, etc. WINB won.

IR>If what I heard is true, that this broadcaster is being 'examined' or
IR>whatever, over the political content of their transmissions, then that
IR>sets a very interesting precedent in USA commercial broadcasting, I
IR>think. Not a very good one from where I sit (and where many of
IR>you-all are probably sitting).

Bill,
This may only apply to government shortwave, but I thought US shortwave stations were not allowed to "officially" serve domestic audiences. If that's the case, an argument could be made that they're trying to import (recruit) terrorists. After all, no one would want to circumvent the rules and target domestic listeners when they're not supposed to.

IR>militaristic gangs on the air... But today they come for these
IR>broadcasters, what will be the next 'unacceptable' program content?

Frankly, I fear religious groups under the cover of government much more than I fear partisan censorship. The partisan stuff generally gets shot down by the Supreme Court. I suspect WWCR ("World Wide Christian Radio") would win in a court battle. However, I find it hard to consider a station that dispenses so much hateful programming very "Christian."

I guess there's some poetic justice in this review. After all, "Christian" groups are always after the government to silence one voice or another in the name of God. They just don't like it when it happens to them. a little overboard here in trying to control a terrible thing

IR>like terrorism by categorizing and restricting broadcast speech beyond
IR>the so-called profanities to ideologies, concepts, thoughts, opinions?

Which category of speech does more harm? We spend so much time agonizing over profanity that the other stuff just passes us by. Someone made the argument that we, as broadcasters, claim that our influence via advertising is legendary. Yet, when someone suggests that our political speech isn't, we have some explaining to do to our advertisers. Logic would have it that, if we can persuade someone to buy toothpaste, we certainly must have some influence over their other activities.

IR>lest we go too far in giving up basic freedoms under some potentially
IR>specious banner of 'war on terrorism'.

Why is that any different than giving up our freedoms in any other arena? I hear conservatives talk about punishment all the time. Yet why are we willing to give up our right to be considered innocent until proven guilty? Gosh, we're hogtying our police, they say. Let em beat the crap out of suspects because they know they'll probably get off. At least they'll administer some "justice" on the street. In New York,

we've just arrested another gaggle of cops for corruption.

IR>As radio broadcasters, I hope we can all see the potential threat here
IR>if a license can be called into question based upon airing of
IR>programming that holds a certain view, no matter how bizarre and
IR>radical (but not illegal) the opinions may be.

It isn't the view that will cost the license. If the FCC can prove
the station is harming the community, they'll have a case.

IR>What do other broadcasters/observers think about the WWCR license thing?
IR>Do you think that WWCR (or any licensed broadcaster) should be
IR>restrained from engaging in lawful trade (the sale of airtime to,
IR>basically,. who ever has the cash and who doesn't violate decency
IR>standards?

Again, what's "decent?" Broadcasting hate is indecent to me. Far
more indecent than discussing penises and breasts. I'll bet the hateful
speech is far more damaging to kids than discussion of body parts and
their uses. The kids allready know about that and their speech on the
street is far worse and far more descriptive than anything ever heard on
the air. We're really protecting the sensitivities and fears of adults.

I think is more an issue of intellectual honesty and discipline. We
all know that one-sided broadcasting isn't particularly fair, no matter
which side it comes from. It does no one a service. It's intellectually
barren.

WWCR is the licensee. As such it's responsible for EVERYTHING it
broadcasts. To claim there isn't time to listen to the station to ferret
out the bad stuff won't hold water in any court. That'll get them fined
faster than anything else. They can't claim to be a common carrier. They
strike me as very poor broadcasters looking for a way to avoid taking
responsibility for who they sell time to. Imagine using that excuse if
they sold time to a child molester group. "Gosh, we had no idea. We were
on the golf course."

Reply-To: kellyrho@aol.com (KellyRho)

With all of the changes taking place in the business, just WHAT is a PD or GM looking for in their air talent? What do they want to hear on a tape? What kind of technical or computer skills should they bring with them to the "party"? What kind of production capability should be the standard - SAW, GOLDWAVE, etc...?

With all of the legal, social, musical, business, programming and technical changes happening so rapidly, just what kinds of skills and abilities should we, as "pro's" (hopefully) be developing?

Rich,

Is this your normal sarcasm? You can't be surprised that licensees don't have a current set of Rules. It is sadly so common that it is amazing to me the FCC doesn't issue more fines for lack of Rules.

3794. COMDEX horns in on NAB--uses real sharp horns

Newsgroup: rec.radio.broadcasting
Date: 1995-05-07 00:00:00 UTC
From: jerryt@touchmap.com
Message-ID: <3oiadc$2h1@vixen.cso.uiuc.edu>
Source record: 31902

Fifteen years ago, in Las Vegas, the best and the brightest came to the convention of the National Association of Broadcasters.

The radio and television stations were the opinion leaders, and the pulse of the nations collective thoughts and beliefs.

The hardware and software vendors, who wanted the eyes and ears of broadcast station owners and managers recruited employees and spokespeople who were easy on the eyes and quick with friendly responses.

There was an upstart convention in Vegas called Comdex. Each year it showed phenomenal growth, but it was a collection of outcasts.

The halls were full of bearded, paunchy programmers and hardware salesmen renegades from the "real" computing giants like Sperry and NCR and IBM.

This year, my lover and I did the NAB in Vegas, and the "small" spring Comdex in Atlanta within a week of each other, and the difference from 15 years ago is astounding.

The NAB is racing to embrace computers and multimedia, but Comdex has an iron grip on it, and the handsome young men and beautiful spokesmodels are now in abundance at the Comdex, and rare at the NAB.

There's a natural progression to a medium. First comes the pathway itself. A delivery method is invented, like commercial radio was in the 1920s, but it takes about 10 years for the creative people to learn how to exploit that medium. By the 30s, the radio was a fixture in the average living room.

Television followed a similar path, but the 2nd world war made its development a little slower.

Now multimedia is coming into its own, and the difference at the Comdex is that the creative people and the business and presentation people are taking the reins.

The internet, or its successor, is the delivery medium of tomorrow, and the personal computer or its successor is the way we'll be entertained.

A lot of people don't want to admit that. The master feed source for the HDTV transmission systems at the NAB checked its video

quality on--not a piece of broadcast equipment-- but a trinitron computer monitor; when they saw us notice what it was, they turned it off.

The offline video editing software was better explained, better understood and in more abundance at the Comdex than the NAB.

And on our way back from the Georgia Comdex, I was able to hear 92.1 at King Frog in South Georgia, which has been turned from serving the interest convenience and necessity of the citizens of Adel, into a 24 hour pitchman for the tourists traps at King Frog.

Then in Florida, I was treated to 107.9, which serves the same purpose for the folks at Disney, pitching to an audience as small as the cars on I-75.

A lot can happen in 15 years.

While we all know of instances where the interpretation of weather may be in dispute...just say "too bad, it'll rain," and a farmer will call to roast you because they needed the showers...it can come down to a judgement call.
I once got hotlined by the sales manager at a station where I was broadcasting the winter storm warning of the day, so he could say "You play my sponsor's ad and then tell people not to go there and shop!" At the time, the highway patrol was asserting that if you went out into this storm and turned up missing, they would not risk their plows or even snowmobiles to try and find you.
Later that stormy winter, a listener stopped by the radio station to say he'd been stranded in another snowstorm and considered walking before he heard me advising snowbound travelers to stay with their vehicles, so he did. Turned out there was no shelter within miles of where he got ditched, and he would have been in serious trouble had he not stayed in his truck and waited for the plows. I wasn't there to receive the thanks...had gone home to sleep after a solo 48 or so hours running the station, snowbound at the studios under the towers.

When I was working at KDON AM/FM Salinas, California a decade ago I recall that one of the other stations in the market had what must be the most cleverly concealed AM directional array in the country. The site was in Aptos, just off Highway 1, in a golf course. There were four large flag-poles, two of them flying oversized United States and California flags, standing in the middle of the golf course, each surrounded by high wooden fences. The only thing that tipped me off that I was looking at an AM array was a small building nearby, presumably containing the transmitter, that had a Scala PR-450 STL antenna on the roof-- not something normally found in the average American golf course.

Here are a few others I know about (all local)
Michael Jackson, Gloria Allred on KABC
Bill Press, Tammy Bruce, Wayne Resnick on KFI
Bernie Ward, Chris Clark, Ray Tagliaferro on KGO

Even so, a lot of these hosts may not be so consistently
liberal. Tom Leykis supported Calif Prop 187 (deyning sate
services to illegal aliens) while the conservative Xavier
Hermosillo, whose show comes after Tom's on KMPC-Los Angeles,
opposed it.

3802. OKC - History repeats itself

Newsgroup: rec.radio.broadcasting
Date: 1995-05-07 00:00:00 UTC
From: jerryt@touchmap.com
Message-ID: <3oiadj$2h9@vixen.cso.uiuc.edu>
Source record: 31910
Cross-posted to: rec.radio.broadcasting,alt.fan.rush-limbaugh

I heard it in Rush Limbaugh's voice, coming from a small radio in the back of an RV repair shop, and I knew something was wrong; isolated snippets of Ditto-drivel between the whines of powertools.

He was arguing that we forget that it was the loathsome left that had the history of bombing. Later that day I learned that the smart money was no longer on "Arab terrorists" and was on Limbaugh's own listeners...or at least one of them...a right-winger named McVeigh.

They said McVeigh rented the Ryder truck that was stuffed with explosives and demolished the OKC federal building. There's a mood in the country that the bomb took away our innocence, but it didn't. Its just history repeating itself, faster, bigger, and louder.

In 1910, the country was abuzz with progress. We were taming nature, replacing the horse with the internal combustion engine; the country had become comfortable being linked by coast-to-coast rail.

The engineer was the guru of the decade; there was nothing science couldn't solve. A genius called Goethels was cutting a pathway that would link the Atlantic and Pacific. And Marconi was developing a magic box that would make communications instantaneous.

And in downtown Los Angeles, in the early morning hours of October 1, a bomb ripped through the Los Angeles Times building. The gas lines, ripped apart by the explosion turned the building into a ball of flame. How could someone do such a terrible thing, was the question?

But within weeks, people began to fathom the motivations of the bombers. Now, with 80 years of perspective, we see the bombers, trying desperately to organize the newspaper workers in a corrupt Los Angeles, reaching the point that they saw destruction of the Times as their only recourse.

Job Harriman, the socialist candidate for mayor, exploited the not guilty pleas of the bombers. It was the Times itself, blind to the safety of its own workers, that didn't fix a gas leak and caused its own destruction, Harriman claimed.

In the mix of emotion coming out of the nation's focus on Oklahoma City, we have yet to fully consider the motive for the bombing, but we will.

When we're through repackaging the lives of the dead and wounded in tabloid-size, we will turn to the perpetrators. We will try to understand.

It will be the same as Los Angeles. Job Harriman almost won, but weeks before the election, the bombers changed their pleas to guilty, and the corrupt Los Angeles machine won again.

There are two Rush Limbaughs. There is the temporal, "on-air" Limbaugh performing a vaudeville to promote quick reaction and polarized thought. There's also the long-term Limbaugh who is worried about what he'll be saying and what he'll be defending next week, next month and next year.

The McVeigh arrest cut through the teme is the temporal, "on-air" Limbaugh performing a vaudeville to promote quick reaction and polarized thought. There's also the long-term Limbaugh who is worried about what he'll be saying and what he'll be defending next week, next month and next year.

The McVeigh arrest cut through the temporal one, and exposed the real worry in Limbaugh that someone will believe his rantings too completely, will accept his polished prophesy of doom too thoroughly, will forget that this is a radio show and not real life.

The far right is at a nasty crossroads. They've built an army of irregulars among the disaffected and the disenfranchised, just like the socialists did. But now they must thin their army and jettison their antisocials and their extremists.

It took 40 years for the socialists to reach that point, but in the 90s, it only took the new right only about 4, thanks largely to Marconi's magic box. History does repeat itself, just faster, bigger, and louder.

>IR>Is there someone we can contact so that we may obtain a list of regulations
>IR>from the FCC? I have already checked their gopher site, but that has proven
>IR>fruitless.

They won't tell you.

A couple of years ago I attended a convention session where some NAB types and members of the audience asked an FCC representative-- I forget his name-- what exactly constituted indecency. Basically what the FCC guy said was "you know what it is"; he consistently refused to say what he or his bosses would, or would not, find indecent. Apparently were he to say that a particular description or sound being considered for broadcast was indecent, that would be "prior restraint" and the FCC doesn't do that. Rather, after refusing to tell you whether what you've got planned for tomorrow's morning show is indecent, they'll slap you with a fine, or not, after they hear it, and that's the only way you'll find out.

Oh and one other thing: just because they didn't fine you for what you did yesterday doesn't mean it's ok to do again tomorrow. Every time you do anything on the air that's even the slightest bit questionable, outside of the 10 pm to 6 am safe harbor, you're at risk.

And while they said they were going to go after daytime TV, they don't seem to be doing so, and the only indecency enforcement actions that I've heard of have been against radio broadcasters.

Now I'm not a lawyer, and some of this bullshit has been challenged in court; perhaps someone else on line can tell us if any rulings have been made on these cases.

Andrea;
I think you should try to listen to Kool 96.7, (WKHL in Stamford, CT).
They have a format you'll like. If you can't hear them, go buy a good
radio.

BTW, the rumor about your favorite WCBS-FM air personality replacing the
program director has been denied. He seems to think that you originated
that rumor on a certain online service.

You should be careful about rumors you start. It doesn't look very good
for him when it gets back to managment. If you want to keep him on the
air, stop spreading your wants as false rumors.

William Pfeiffer recently wrote:

>[...] there was a fairly major story regarding the (alleged) reality
>that WWCR's license is being 'reviewed' by the FCC over some of
>their programming, mainly some of their right-wing (their term not
>mine) extremist programming.

According to an article in Broadcasting & Cable magazine, the investigation of possible rules violations by WWCR centers on the question of whether one of its programs is directed solely at a domestic U. S. audience. The article quoted an attorney at the FCC as saying FCC rules require that shortwave licensees air programs for an international audience.

The program in question is The Intelligence Report, hosted by a member of the Michigan militia.

Most of the programming by U. S. commercial shortwave stations is either religious or political (and some is a mixture of the two). It could be argued that the religious programs are intended for anyone who can hear them, but, having listened to some of the political programs on WWCR and other shortwave stations, I have to assume they are intended for residents of the U. S.

Whether or not this FCC rule is justified, it does seem that a number of time buyers have found that shortwave radio represents an efficient way to get their message across the country. It may also be true that regular AM and FM stations would decline to sell time to some of these individuals because of the controversial nature of their beliefs.

>station) solicited on-the-air calls with a U.S.-only toll-free "800"
>number. I think it makes some sense for the FCC to question whether such
>broadcasts -- particularly if done on a regular basis -- constitute
>unauthorized targeted domestic broadcasts.

The part you're missing here - the programs in question are generally produced and distributed over other channels besides WWCR. Sometimes by home satellite dish-targeted radio channels, sometimes by radio networks that air on commercial stations (granted, usually small ones, but legitimate nonetheless).

It IS legal for these independent program producers to use an 800 U.S.-only number and solicit calls from within the United States...after all, they can be heard on services that are quite legal to target the United States. It's legitimate if they're heard on even one small radio station outside of WWCR, legally entitled to broadcast to the domestic audience. It's not reasonable to expect WWCR to bleep out 800 number references on these shows, especially live ones.

Now, if WWCR itself produced a show that targeted U.S. listeners and was solely aired on WWCR, complete with 800 number, that'd be another matter.

I tend to think that, given history (and with the above), WWCR will win out.

Incidentally, WWCR is not solely a "haven for right-wing nutballs", as someone mentioned on another thread. It is also the home of an excellent communications magazine called Spectrum, and was the launching ground for the latest broadcast effort of the Radio Newyork International crew... the ex-NYC shipboard pirates. I don't think it's any secret that the driving forces behind the RNI bunch are generally considered liberal.

I've long been upset by the amount of intolerant speech I hear on radio whether AM/FM, domestic shortwave, or even ham operators. In fact I've pretty much given up operating my ham rig because the bands are full of rude, narrow-minded old fools to whom I have nothing to say.

That said, I don't like censorship. Instead of bombing transmitter sites or asking my congressman to yank somebody's license, I just turn off my radio. I heartily recommend turning off the radio as the ideal response to whatever strikes you as indecent; if enough people do this the broadcasters and their advertisers will eventually find out that offending listeners is bad for business.

I do wish, though, that more broadcasters would realize how much influence they have on public attitudes and moods. The atmosphere of fear and violence that has evolved in this country in recent years is only exacerbated by mouthpieces of fear, anger and hatred on radio and television.

Sarcasm well noted, however the provisions forbidding domestic broadcasting were placed there by insistance of the brodacasting companies, CBS, RCA, Crosley, etc., to prevent the ease of competition one national SW station could have over a conventional network using 1946 distribution technology.

> a station that dispenses so much hateful programming very "Christian."

If you remember, we had a telephone discussion about a certain very powerful religious leader and multiple media owner about 2 years ago. You are familiar with his use of biblical fundamentalism to promote bigotry. The extention of the ultra right as part of this type of fundi-ism is a logical, although not simple, step. Remember the old saying, "Kill a Commie for Christ"? Well with the fall of Communism, they are no longer the threat to our freedoms, the cronies of the Justice Department in Washington are. You might say the saying is now, "Kill a Congressperson for Christ".

These people see our rights legislated away in noble attempts to stop crime. These well meaning laws are being used against those only under suspicion for crimes not even close to the reason for the laws passage. As you are the owner of a BBS, what would happen if while you went on vacation someone, somehow, put a bomb making plan file on the board. Then someone from the Justice Dept. were to download it. You might come back to find the Marshals at your door. They would take everything you had, and with a federal case pending and the fact that you and Howie are in sensitive positions, you just might find yourselves out of jobs for the duration of the investigation, and the Secret Service has a habit of dragging their feet.

> I guess there's some poetic justice in this review. After all,
> "Christian" groups are always after the government to silence one voice
> or another in the name of God. They just don't like it when it happens
> to them. a little overboard here in trying to control a terrible thing

You are off base on this. It is not organized religion or Christian groups that you have to worry about, it is the ones who use Christianity, the Bible, or whatever religious belief, as an excuse. Before long the followers "learn" that this is the true belief, just like in any other brainwashing cult. The two main religions in Germany are Lutheran and Catholosism. Neither church *said* the Jews killed Christ, although some preachers and zealots did. The Nazi's used that as the excuse to have the Holocaust and kill 6 million Jews and who knows how many others, (Gypsies, Blacks, retarded, mentally ill, handicapped, and other "impurities").

Similarly, the Arian and Klan movements use religion as the excuse for hatred. Why, because in the Old Testament some prophets attempted to keep Jews from intermarrying with Romans, Egyptians and Arabs by writting passages about their "faults", but they never said the naionalities in particular, they used inuendo. If you interpret the Bible as it was in the History, then you truly know the meaning, but they see the words as if they were written by God Himself today.

But on the other hand, by allowing the extremists, Left OR Right, the Flying Saucer worshiping weirdos, and "The End of the World is at hand, send me all your money" types on the air, all of us regular people get to know what they are up too, that is if we care to listen. While the OKC bombing was a tradgedy and Women and Children were killed, in the sceme of the world, it was only a gnat bite. Now that the gnat has stung do we overreact and swat it to death? Or in this case pull WWCR's license? Why, it did the biting, it has it's belly full of your blood. Maybe we should just shoo it away and take the scolding from mommy and daddy about letting ourselves get stung, i.e. flush the show and pay the fine. Leaving the wackos on the air, but this time with the goverment and opposite view parties encouraged to monitor it, is like doing something we should have done in the first place with the gnat bite, put on insect repellent.

> WWCR is the licensee. As such it's responsible for EVERYTHING it

> on the golf course."

You are right, but maybe neither you or anyone else seems to realize that WWCR is not one radio station, it is FOUR, 3 seperate SW services and an AM station, (WNQM/1300). Sometimes the stations are run with only one board op. When a time buyer comes along, ALL of them by tape or plug in satellite feed, the station will monitor the program for the first few weeks, then its time to take a listen to someone else. Most of these producers will start off innocently enough and not raise eyebrows, then they will gradually increase the indoctrination until the program is way out in the outfield, (pick your side). By this time the managment is doing their listening to the new guy on one of the other transmitters. By the time they get back to the first guy for a periodic check, well the following is strong, the letters of support and the money is coming in, and anyone who would have complained is not listening. Especially that the general manager is a devout believer in free speech, do you really take the yo-yo off the schedule, or do you take it as status quo?

> The reason for this restriction may very well be based upon international
> treaties concerning the use of various portions of the radio spectrum.
> Not all countries observe these treaties, but the U.S. usually does.

It has nothing to do with treaties, it was requested by US domestic
broadcasters after WWII. They decided they didn't want their old SW relay
transmitters back. They had been commandeered during the war by the US Gov.
as a way of sending entertainment to the GI's and US propaganda to the Axis
powers. At the end of the war they decided to turn them over to the then
being formed Voice Of America, (for a significant tax write-off), rather
than take them back, (there were a few exceptions). The proviso forbidding
domestic use of the stations was to prevent the government from starting
a domestic service, and to prevent any independent station from easily
competing with their networks.

I do not know what the provisions state about overseas US territories,
posessions and protectorates. Since the provisions were written, the
Philipeans were granted independence, Alaska and Hawaii were made states,
and Okinawa was returned to Japan. If domestic SW broadcasting was
restriced for the continental 48 states, then the entrance into the Union
of AK and HI would negate the provision, they are domestic, but not
contiguous.

> Obviously, there will always be some U.S. listeners to these stations, and

> number. I think it makes some sense for the FCC to question whether such
> broadcasts -- particularly if done on a regular basis -- constitute
> unauthorized targeted domestic broadcasts.

The old North American Numbering Plan, i.e, the area code system, extends beyond US borders. Therefore MOST 800 numbers are valid from Canada and Caribbean Countries. In many cases, the subscriber has to request this extended service. However, if the number is AT&T, it is possible to dial an AT&T operator in Europe and other areas of the globe and as long as they pay for the part of the call to the 800 number operations center in Pittsburg, can dial any AT&T 800 number. MCI either is, or is planing to offer a similar service. The 800 number argument is inconsequential as far as the station goes, the producers contract for their own numbers. Second, the programs are fed by satellite. The producers can, and do contract time on domestic stations as well, that moves WWCR into being an affiliate, not the station of origin.

> In theory, at least, there is no need to use a station licensed only for
> international broadcasting and having facilities designed for such
> purposes to get one's message across domestically, nor would there be any
> restriction against using a shortwave station to broadcast these messages
> if they solicited an *international* rather than a domestic audience.

WWCR consciously tries to serve the international community, it is the time buyers who seem to forget, or just plain ignore it.

WWCR started our just running preachers and similar programming. I tend
to think that the name is more historical than anything else, as most
of their stuff is really secular
>
> Which category of speech does more harm? We spend so much time

Advertising is a good point.
1. Not everyone who hears an ad on the radio is immediately influenced
(if at all) by it. If everyone who heard a McDonalds ad was influenced
by it in robot-like fashion, burger King would have been put out of business
a long time ago.

2. Most decent human beings do have inhibitions. Hearing "Buy a Big Mac"
or "Vote Republican" over the radio may influence many people, where as
hearing "Shoot a cop" or "Blow-up a building" will disgust most people who
are not disaffected with something/someone, or are just plain mentally ill.

Clinical sex information on the radio doesn't bother me much. But,
in this age of AIDS, etc., I hope you'd consider that programming advocating
casual sex is as least as "irresponsible" as that advocating violence
of any kind.

And we've still haven't really nailed down, what is "broadcasting hate".
The Nazi-type programs on some of the shortwave stations are a given, but
what about Rush picking on Clinton in his show? Is that really worse than

the Reagan and Bush spoofs done on Saturday Night Live? How about the
jokes on the Howard Stern and Don Imus programs?

I moved here to Connecticut two years ago and miss listeniong to WCBM 680.
Does anyone here listen to it? I would like to know what's new, I was a
regular listener to it and regular caller to Les Kinsolving's show Uninhibited
Radio. I understand he is on at 10pm to 1am. If anyone can tell me a current
program schedule, ratings, etc. I would greatly appreciate it, this station has
been a great inspiration for me and my college radio talk show. You can either
reply on the newsgroup or you directly e-mail at: TILTONB@ECSUC.CTSTATEU.EDU
Thanking you in advance-

Well, I wouldn't toll the bells for broadcasting just yet. The fact is that broadcasters still attract 78,000 people to Vegas and we at least tip the cabbies and the dealers in contrast to the Fall Comdex folks about whom the Vegas folks point out that only the hookers do any business during comdex week.

I go to both shows and I am a leader in the alternate delivery business. But I also just bought three more AM stations in the Tulsa area, bringing my total to five. Spectrum is still spectrum.

As far as the NAB, well, I would feel a lot better if Ampex would bring out their old VR1000 which was the first VTR and at least RCA would remind us that they invented broadcasting as we know it in their previous life as a spin-off from GE (we bring good things to life).

I doubt the NAB is closing up any time soon, but I'll bet that we will see history repeat itself where Comdex (now owned by the Japanese) is concerned

Hi,

As I often do, I agree with Jay. If all of your operators are chomping at the bit to learn how to use a computer, any of the DOS, Windows or Mac-based devices will do the job. If they want to edit and produce audio quickly and precisely withoput mousing around, the DSE-7000 (Orban) is a powerful and simple system. I'm biased. I've had one since 10/90.

You might try your local SBE Chapter. There was an article in the
april Radio World about the SBE helping broadcasters to modify
the EBS decoders to meet the requiured parameters of the new laws
which take effect July 1 of 1995.

If you want I can bring the April issue in and transpose some of
it for everyone to read that doesn't get Radio WOrld. I believe
there was also an earlier article in another RW that might be of
assistance also.

There is a certian station (I will call it station "A")
which is the lead station for EBS activity for other stations in that
same area.

Recently station "A", conducted an EBS test before 8:30 AM local
time, on a Sunday morning.

When one of the stations under this lead station (station "B") called to
inquire about this, the person at station "A" first said that no
record of this EBS test could be found.

This person later became a tad bit hostile, when station "B", tried to
save station "A" from being fined by the FCC, by informing them that they
had not legally conducted an EBS test.

Needless to say, station "A" never did conduct an EBS test
during the specifed time frame, for the rest of the week. They did do
another EBS test on Saturday morning, but again it was before
8:30 AM.

Fortunatly for station "B", they took it upon themselves to conduct
an EBS test during the specified time frame. But what does this say
about station "A"???

Should they be fined? Should they be forced to revoke their license?
What do you think?

a sidenote question... is a real EBS emergency, considered as a legal
replacement for an EBS test?

thanks

Rob Bass

Most manufacturers sell kits to upgrade your old
reciever. There are also a few ads in the back of Radio World
for companies that will do the job for you.

If you can't get in touch with the manufacturer, you
may be able to make the change yourself. Take a good look at
the schematics and see how the unit determines how long it's
heard a tone. Our unit just built up voltage across a
capacitor until it was large enough to turn on a transistor.

3819. A Quick presentation of FERUE

Newsgroup: rec.radio.broadcasting
Date: 1995-05-09 00:00:00 UTC
From: brume@dialup.francenet.fr
Message-ID: <3omv40$k3q@vixen.cso.uiuc.edu>
Source record: 31857

A quick presentation of FERUE

History

The European Federation of Student and University-based Radio Station was
born under a bus shelter! Whilst he was in Brussels, the head of
Campus Radio Strasbourg (France) caught sight of a poster
advertising the radio station of the Free University of Brussels (ULB).
Contact was made and an association set up. To start with the association
began to grow in French-speaking Europe only. But soon, radio stations
from outside France and Belgium came knocking on the door. They
came talking about student television, the internet and so in
the light of this, FERUE decided to take these changes into account.

Plans

Welcome to the European Federation of Student and University-based Electronic
Media!

This name is provisional and a competition is open if you wish to make
suggestions. The new FERUE, by jan 1996 at the latest, will☐
include student and university groups who run or aim to run a radio
or TV station, an audio or video workshop or internet-based distribution
outlet, all operating in a non-profit making manner.

Services

FERUE has begun to make inroads with the european commission to make
itself known and to access european funds for its members. A bilingual
(french and english) newsletter is produced five time a year
and mostly distributed to the members. By organising themed meetings
FERUE encourgaes bi- and multilateral exchanges and collaborations.
Transeuropean partnerships with tour organisers and festival promoters
are also proposed. A fulltime secretariat presently exists based in Dijon,
France. Programme exchange should soon be possible using the internet.
A technical and financial study is underway.

Bye.

Robert Bartsch writes:

I am a member of our college radio station (WRBB) at Northeastern University in Boston. At a recent meeting, we got into a debate about the FCC and their guidelines as far as what can and cannot be said and played on the air. The debate centered around obscenities in song lyrics, in both rock and rap songs.

Remember, there is a long jump between college radio and the real world. College DJs seem to love to play obscenities ... it makes them feel "cute". Although the state of regulation is not always 100% clear, the real world of broadcasting has very few jobs for DJs with dirty mouths and playlists. If the purpose is to train people for broadcasting, it is a bad habit. If you all want to be "cute" ... well, just make sure the University Administration won't mind.

Our PD and General manager aren't exactally the brightest bulbs, and neither posessed or had ever seen any actual guidelines from the FCC. Is there someone we can contact so that we may obtain a list of regulations from the FCC?

Every station is supposed to have one on hand.

Contact Rules Service Company 301-424-9402 or Pike & Fischer 301-654-6262 for current subscriptions and costs.

A cheaper alternative, but less current is the GPO version of the Rules.

Along with the obscenity guidelines, it would also be extremely helpful if we could get a list of ALL of the FCC's guidelines, i.e., rules regarding the EBS, PSA's, licenses, transmitter logs, etc. Any information of this type would be greatly appreciated.

I have already checked their gopher site, but that has proven fruitless.

Ahem... you expect someone to keep this up to date free?

I talked with HD's advertising department this morning and they assure me that it is not true---that they
did cut some shows they didn't feel were doing them any good, but they have no policy against
talkradio. They do--like most retailers--try to avoid high controversy shows which is no different from
many national advertisers whose spots come to us with specific instructions to avoid Limbaugh, Harder,
Cuomo, Jerry Brown and others from both sides of the spectrum

I don't think anybody's being irresponsible here--and believe me, if I thought they were, hell would have
no fury like a pissed off talkradio station group owner.

In a very thoughtful interview the other day on KQED (our local NPR affiliate, coincidentally located at the left end of the FM dial), Theodore Roszak (however he's spelled... hey, it was radio) had this to say about the defensive protestations of Rush and the Rest of the Radio Right's about being associated with OKC bombers and wacko militias: (the quote is to my best recollection) "It isn't that you're on their side; it's that they think they're on your side."

Food for thought.

Hello Laura...
Let me offer some personal observations from the trenches, if you will, after working seven years (and counting) as a midday host in a top 50 market, as my city's only non-conservative host.
Talk radio tends to be conservative for two reasons. One, many of the station owners and managers ARE much more conservative than their markets. Our main format competitor in Rochester, for example, is relentlessly right-wing even though the market regularly sends Democrats to the state legislature and to Congress (and Democratic incumbents in 1994 by and large OUTDID their 1992 vote). Their programming does tend to reflect their personal beliefs, even when market research and local election results tell them they are out of phase with their communities. (The significant audience loss many talkers showed in the winter books in markets like Rochester, Buffalo, Cleveland, Minneapolis and other sizable cities gives testimony to that.)
Second, programmers may well have misinterpreted the nature of the appeal of some of the prominent national talkers of recent years. I've been told by several of my colleagues, that programmers assume the appeal of someone like Rush Limbaugh is his message...when in fact, it may have been his style and his humor that made him a hit in SPITE of his message.
So they loaded their schedules with Limbaugh's ideological and vocal clones, even if they couldn't match his humor and presentation...and many of them, I'm sure, are wondering why the listeners and dollars are slower to appear than they expected.
I'm not saying they necessarily would have done better to balance their schedules politically, although it's not lost on me that stations which resist the temptation to tilt politically (KGO, WBZ, WGN come to mind) have not only largely escaped the recent audience erosion but prospered. The real lesson is that ideology is at best a secondary, maybe even a tertiary factor in people's listening patterns IF the listener is being offered something more than partisan rant. But it BECOMES a primary, and usually negative, factor in determining the size of a station's audience if that is all the station has to offer to set it apart from the competition. Stations that program for entertainment, information and listener service are thriving, while those which set out to preach because they mistakenly thought that's where the money was, are in for some rough times. The winter book shows this was the case even before the recent controversy over the radical right.
I'm not interested at this point in debating whether talk

radio lit the fuse in Oklahoma City. We've all given plenty of air time to that subject already. But given the simple fact that there IS serious debate over whether talk radio is responsible in any way for creating the climate of anger that exploded in Oklahoma on April 19, I expect that the BUSINESS climate for these stations will grow even colder, even more quickly, than the climate of listener acceptance. And remember, radio is not just a mass medium, it is a BUSINESS. Advertisers fear nothing more than negative associations being attached to their products or services. Unfortunately, much of talk radio is likely to generate such associations until and unless it gets off the partisan stump and returns to the first principles of spoken word broadcasting...that information, entertainment and service are what make a station successful. We've got to get back to first principles immediately, because talk radio's at a crossroads. We can either broaden and solidify our appeal, or marginalize ourselves with both the public and with the advertisers who are our lifeblood. My question to my colleagues across the nation is...what choice will we make?
Bob Smith, middays WXXI-AM 1370 Rochester NY

You raise some good points, about how much local programming could be put into an automated system,..and also the drawbacks of letting satellite programming run while zombies plug inthe carts. I worked at a place that, trying to keep my on-air credentials current after following my partner to a new job of his.

Tending automation does tend to dry up creativity: but it remains a fact that if you're not The Big Time, you're going to be hiring rookies.

It is your job to teach them better, 'cuz they have to learn it somewhere and most of the training at college stations is a joke.

Just do it: explain why the EBS system was created, how high they will swing if the FCC catches them screwing it up, and how it can make your station a bigtime important information source during tornado season.

You've got the knowledge: if you share it with your cheap announcers, one will turn out to be that diamond in the rough who knows enough to be grateful and is a real asset, and hopefully sticks around long enough to bring up the level of intelligence inthe whole place.

I started with a combination of eager rookies fresh out of broadcast school, and old-timers who were pretty burned out but had plenty of stories to tell. I'll be forever grateful to them, and take it as my responsibility to share experience and knowledge in turn with people starting on their way.

Patience: it's only love of the business that keeps us in this business anyway, after all!

Beware of ProTools. It's not a bad choice, just an outdated one. From what I gather, by recently looking for a digital production product, is that computer's own prcessing speed are fast enough nowadays that the day's of having a computer hooked up to an extra sound processor are over. Digidesign (who wrote Protools) might have just such a thing that replaces ProTools or is a super-duper upgrade.

By the way, if you've got a software based (MAC software) that works for sound editing, let me know. I haven't found one that's overwhelmed anyone yet.

Hi,

My name is Hando Sinisalu, I am the new subscriber of Airwaves. I am a grad student at the School of Telecommunications of Ohio University. Before Ohio I lived in Estonia (tiny country in North-Eastern Europe), I was active in Estonian radio industry (worked as a PD of the first independent commercial radio station- Raadio Tartu since 1991, later as a consultant of investment firm "Media Invest")

Currently I am conducting a study on radio group ownership and I would be very thankful if I could get any information (or suggestions) about following subjects:

1. Economies of scale in radio industry
2. What are the advantages/ disadvantages of group ownership
3. Program exchange, promotion, training, sales in radio groups. How does it work.
4. Cost-saving effects of group owners
5. Other related issues

I would appreciate any kind of information- personal experience/opinions, good articles/books, etc.

Hope to hear (read?) from you soon,

Hando

There are several college stations using ABC audio, in some cases even airing newscasts. Depends to some extent on what's already being carried by commercial stations in your market.

In any case, your contact at ABC is T.J. Lambert, at 214-991-9200.

3832. Payola

Newsgroup: rec.radio.broadcasting
Date: 1995-05-09 00:00:00 UTC
From: jgallagh@interserv.com
Message-ID: <3omv4k$k4j@vixen.cso.uiuc.edu>
Source record: 31870

In a previous posting, a few people described Payola as something
that happened in the 50's.

Oh really.

The book the Hitmen which came out about 4-5 years ago detailed
abuses with record company employees and Independent Promotion
people throughout the 70's and 80's.

CBS REcords when it was owned by the network was probably the largest
user of "independent promo" people.

Let's hear from some Pd's and Md's. Are you more likely to add a
record if a major Indie is pushing it ?

On a related note, we all know the record business was not squeaky clean
but someone told me about a major label promo guy (vp) who actually built a large
house in the Boston area from his expense account.

The late record retail mogul Morris Levy (who founded Roulette Records and the
Strawberries chain) was also the subject of serious controversy. I heard he died in
prison a few years ago. Anyone have any interesting stories about him? (see separate
posting).

Source record: 31872

There is not much talk in this newsgroup about the record industry
which of course is closely tied in with the radio biz.

In responding to a post about Payola, I immediately began to think
about the late Morris Levy who died in prison a few years ago.

Regardless of your opinion of Morris, the guy was a legend in the
record business helping to break Tommy James and the Shondells
on his Roulette Records Label.

I'm not sure how Morris made most of his money but supposedly
"cutouts" were a major source.

Somehow he bought (founded) the Boston-based Strawberries Records
chain which he grew to a mammoth operation.

Interestingly, he ran the chain from a mansion in upstate New York.

Morris had many friends in radio in Ny and Boston and all over the country and
of course the rumor was that you never wanted to cross him.

Record label people were scared to death of him as a bad word from Morris to
a label president could get someone fired instantly.

Other rumors about Morris was that he killed a Policeman in a bar in New Jersey and
somehow got off.

In the end, sadly, he went to jail on some sort of record related fraud charge. I'd be
interested
in hearing details about that from those of you who recall his trial which I think happened
in the
late 80's.

I had the privelege of meeting Morris a few times as he was building Strawberries and I
must
say he was an awesome personality. Of course, anyone who whips out a wad of 100 dollar
bills
an inch thick usually gets noticed...even in the record business

John Gallagher/Boston.

>government's suppression of it.
>
You need to slow and down and look at what you are saying here. In
case you hadn't noticed, there's no mention of freedom of speech for email
and usenet in the constitution. That doesn't mean that it isn't 'speech'.
The technology by which you communicate is irrelevant. The basic concept
remains: in the United States you can say dang near anything you want to,
be in in print, radio, soapbox, or usenet.

>In broadcasting, that freedom is granted to the licensee, as is the
>responsibility. When Howard Stern says something dirty, the station gets
>the fine. No station has the obligation to grant freedom of speech to an
>employee.
This gets to the crux of it. Regulation of broadcast speech should
be a social matter, not a legal matter. When groups push to have the FCC
harass and fine a station, they're simply saying that they do not like the
social society they live in and want to 'remedy' the situation with the
law. I call that fascism. Maybe a strong word, but give me a better one if
you can come up with it.

Also go back and read the 1934 communication act that sets up
regulation of the airwaves and established the FCC. It specifically states
that the airwaves are the property of the people. The FCC is simply there
to facilitate use. The FCC does *not* own the airwaves in the US. If the
airwaves are the property of the people, and a significant portion of the
people enjoy listening to people like Stern, or Liddy, then it should go
forward. If you want to restrict speech because you think it is irresponsible
by legal means, you need to pass a constitutional amendment first. Good luck.

3837. Sharing in Kansas

Newsgroup: rec.radio.broadcasting
Date: 1995-05-09 00:00:00 UTC
From: transvox@interstate.net
Message-ID: <3omv4s$k4s@vixen.cso.uiuc.edu>
Source record: 31875

Still on the air five hours a day is Kansas State University station KKSU(AM) in Manhattan, a partner in one of the last share-time arrangements remaining in the United States.

A 1972 master's thesis by Richard Ridgway at the University of Missouri-Columbia School of Journalism described the history of KKSU, then known as KSAC. Some highlights of KKSU's history as outlined in the thesis:

* The physics department of the Kansas State Agricultural College obtained a license of station 9YV in 1912, beginning a daily weather broadcast in Morse code at 9 a.m. According to Ridgway, "this is believed to have been the first fixed schedule of radio transmission of weather reports in the United States." Moreover, "except during World War I, there has been a daily weather broadcast from Kansas State College continuously since 1913."

* In 1921, physics instructor Eric R. Lyon was placed in charge of 9YV, obtaining a broadcast license for the station as WTG, a "100-watt radio telephone station." The official license date for WTG was April 6, 1922. WTG was later discontinued.

* The physics department quickly wanted a higher-power station. To demonstrate the desirability of such a facility, it turned over programming responsibilities to K-State's extension division and made arrangements with Dr. John R. Brinkley's KFKB in Milford, 25 miles west of Manhattan to begin broadcasts. "These first broadcasts from KFKB met with almost instantaneous response from the people of the state. So favorable was the reaction, that plans were made to expand the number of programs," wrote Ridgway.

* In cooperation with KFKB, the physics department decided to experiment with remote-control operation. Beginning February 11, 1924, remote broadcasts over long-distance lines from Manhattan to Milford began. Three station employees chipped in the $150 deposit needed for the phone line. Sometimes, crosstalk on the lines would cause "'many of our programs [to be] interrupted by impromptu bits of farmer's-wife-to-farmer's-wife information upon canning, chicken raising, and child care. It may be that this, too, helped show the legislature the value of broadcasting programs upon the problems of agriculture and domestic arts,'" according to then-station manager Lyon.

* The success of the KFKB programs induced the Kansas Legislature to approve the purchase of a 500-watt Western Electric transmitter and twin towers "built by a windmill company" for $29,000. KSAC began

broadcasting December 1, 1924 by special permission of the Department of Commerce. The station's official license date was January 27, 1925.

* KSAC's employees found programming a full broadcast day burdensome. KSAC decided to seek out time sharing arrangements. The first such arrangement began in the winter of 1926 with KFAB, Lincoln, Nebraska. Ridgway reported, "Considerable difficulty in time sharing resulted from this union. The trouble originated over KFAB's refusal to allow KSAC to broadcast in their entirety, the basketball games at Kansas State."

* KSAC moved to 580 kHz on October 30, 1928, sharing time with University of Iowa station WSUI. At that time, KSAC increased its daytime power to 1,000 watts. While this arrangement worked much better, according to Ridgway, "the Federal Radio Commission began to try to get stations sharing the same wave length to locate closer together geographically."

* The Topeka Broadcasting Association had just moved former portable station WIBW to the Kansas state capital. The association, owned by Capper Publications, proposed a share-time arrangement with KSAC. On November 8, 1929, an agreement was signed, with the arrangement taking effect November 30, 1929. It is in effect to this day.

Time-sharing schedules:

Until October 2, 1961, the stations alternated blocks of time on weekdays on Saturdays. WIBW broadcast until 9:30 am. KSAC broadcast from 9:30 until 10:30. WIBW then broadcast until 12:30 pm. KSAC came back on until 2:00 pm, when WIBW resumed use of the frequency. At 4:30 pm, KSAC took over for one last hour. From 5:30 pm onward, WIBW broadcast.

On Saturdays, KSAC broadcast from 9:30 to 10:30 am, and from 12:30 to 2:30 pm, with WIBW on the air at all other times.

Beginning October 2, 1961, the handoffs became much less frequent. On weekdays, KSAC broadcast from 12:30 to 5:15 pm, with WIBW broadcasting at all other times. On Saturday, KSAC handled all K-State football broadcasts; otherwise, WIBW was on the air.

At present, KKSU broadcasts weekdays from 12:30 to 5:30 pm, with WIBW on the air at all other times. WIBW now airs (and networks) Kansas State football. The stations still operate from separate transmitter sites. The difference is noticeable in Kansas City, where WIBW is practically a local signal in the daytime and KKSU definitely is not.

>
>Alan Freed
>
WTCN [1280] became WWTC [same] circa 1961. Famous for the "Starburst
Clusters" of 3 in a row. In the '70's it did a stint as "All News"
until it went to kids format in the mid 80's as a Radio AAHS net
affiliate.

There was WMIN [1000 or 1010]. Stillwater grabbed the WTCN call for
reasons I do not remember. It had to do with the change of Ch.11
ownership, WUSA->KARE,

Ever since Mark Fowler loosened the bounds on stations in 81 it's hard
to keep track of what station calls currently are.

AND...Is this the real ALAN FREED?? [ABOVE]

>The Bee no longer owns KMJ? If not, then the Bee no >longer is receiving
>payment on a note by whoever did buy it?

There seems to be some confusion creeping in here. I'm not going to discuss the merits or demerits of Sean Boyd's firing by KMJ, but a few factual clarifications are in order:

1. Sean Boyd works full-time for KSEE-TV. The station is on its third set of owners since the license was stripped from McClatchy by the F.C.C. in the late 70's. It was then known as KMJ-TV, but hasn't been since.

2. KMJ has not been owned by the Bee (McClatchy) for many years. After the above mentioned license larceny, McClatchy divested itself of the rest of its broadcast properties.

3. KMJ and KSEE-TV are not co-owned.

4. Sean Boyd worked for me at another Fresno station in the early 1980's. He did an excellent job, and I would recommend him highly.

3840. History of WOL (VERY incomplete)

Newsgroup: rec.radio.broadcasting
Date: 1995-05-09 00:00:00 UTC
From: "Robert J. Carpenter" <rcarpen@DGS.dgsys.com>
Message-ID: <3omv51$k59@vixen.cso.uiuc.edu>
Source record: 31878

Barry Mishkind will have better really-old info, but here goes:

By the mid-late 1930s, WOL was 1kW, non-directional, a single tower at Green Meadows (West Hyattsville), Maryland, across the street from WRC-AM (now WWRC). After the Great Frequency Switch about 1940, they ended up on 1260 kHz.

They were part of the Mutual Broadcasting System (WOR WGN etc), and owned (eventually?) by Scrips-Howard newspapers (which owned the tabloid Washington Daily News). Even way back then WOL didn't cover very well.

Just after WW II they built a new installation next to Rock Creek Park, between Silver Spring and North Chevy Chase, Maryland, with 5 kW DA-2 (I think). This installation has never covered very well (at least in the MD/VA suburbs).

Eventually (about 1953?) there was an ownership/frequency swap with WWDC 1450 kHz, so now 1260 is WWDC-AM and 1450 is WOL.

The current WOL owners are in no way related to the earlier owners. WOL is now part of one of the more successful black-owned radio groups (which is buying the old WRC-FM from an essentially-bankrupt group which includes Ron Brown, Sec of Commerce, and to which NBC is forgiving many millions of dollars of outstanding loan). You can be reasonably confident that the WOL people will do a lot better financially with ex-WRC-FM .

Just a few items....

In article <3omfip$h30@vixen.cso.uiuc.edu> richwood@commspec.com writes:

> It's irrelevant who produced the program or what it's other
>distribution channels might be. It's very clear the intended audience is
>domestic. That's illegal on a domestic shortwave station.

It is relevant. The program producers (in most of these cases) also air the programs on either domestic U.S. satellite or broadcast networks. I know of very few WWCR secular programs that are produced solely to air on WWCR... I believe Mr. Koernke's show may have been, and in that case, I cannot say for sure how the FCC will look upon it.

The intended audience for these shows (that are also aired on domestic sources other than WWCR) is not WWCR's concern. It is quite legitimate to state that WWCR is an "international" affiliate of these also domestically-aired programs, intended to broadcast the shows to non-U.S. points.

Now, I'll go along and acknowledge the implicit domestic audience via WWCR. But most of these programs receive feedback from outside the U.S. via WWCR.

> Nope. The only thing the FCC is going to be concerned with is what
>actually aired on WWCR. WWCR is responsible for EVERYTHING it airs. It's
>responsible for seeing that EVERYTHING it airs conforms to the
>applicable rules and regulations, regardless of the source or the other
>distribution channels.

You're right here, Rich. But see above. WWCR is indeed responsible for what it airs, but (without the FCC laws in front of me) it shouldn't be any more illegal for them to air a domestic program than it was for shortwave stations of old, including the U.S. government's own AFRTS.

What kind of programming should WWCR be able to air? Do they have to get on and start talking to tourists in England or French-Canadians? American politics IS a subject of interest to many folks outside the U.S. WWCR shouldn't be forced to "internationalize" their programming any more than the Voice of America should.

> If they can prove that they aren't intentionally targeting domestic
>audiences, they probably will. Otherwise, it's pretty clear who the
>target audience is. Given recent FCC history, I'd expect a nice fat fine
>is in their future.

WWCR isn't targeting anyone with their programming (with exceptions). They're primarily in the sold-time business. While they are indeed responsible for what airs on their station, I think the "intentional targeting of domestic listeners" is definitely up to question here. They're legally aiming their signal into Canada and Europe.

>IM>Incidentally, WWCR is not solely a "haven for right-wing nutballs", as someo
>IM>mentioned on another thread. It is also the home of an excellent
>IM>communications magazine called Spectrum, and was the launching ground for th
> What audience is Spectrum targeting?

People who like radio communications hobbies.

:)

If you're trying to point to Spectrum as an example of a program solely designed for U.S. audiences, that isn't true. Since when did the radio hobby solely consist of American adherents? Indeed, while Spectrum has a U.S. 800 number for call-ins - 1) It, like many of the other secular (and religious) WWCR programs, is distributed by domestic satellite and even has an AM broadcast affiliate (WIFI in the Philadelphia, PA area). 2) They specifically give out an international number, a non-800 one, and get calls on it on a regular basis.

I'm curious - what kind of programming do you think domestic shortwave stations should air? U.S. travelogues? Educational shows about what a great country we are? And, do you think WRNO/New Orleans should stop airing the Rush Limbaugh program on 15420 KHz weekdays?

In my post about XTRA-104 finally opening up the mikes for jocks, I neglected to mention the man who they *didn't* shut off the mike for in the format transition: Wolfman Jack, who still does his thing from 7-11PM EST from Planet Hollywood in D.C. for XTRA and his little network of stations. Listening to the show over 103.9 in Fredrick last night (Friday), I did detect a few early 70s era tunes sprinkled in with the predominately 50s and 60s songs that make up his playlist.

Also, thanks to Tripp Rogers, who informs me Dave Thompson was acknowledged last weekend as having been with the old WPGC as afternoon drive under their CHR incarnation. I also seem to recall Dave as having been middays at the old Q-107 (WRQX)...can anyone confirm that for me?

Cheers,
Max

This will take some explaining but I went to Atlanta about a month ago for the AERho (National Broadcasters Society) Convention for 4 days, and we video taped my schools adventures from Marta to TalkBack Live to 'Beverly' (If you went to the World of Coke you know what I'm talking about.) and while we were there we listened to Star 94, V103 and 99X. I was able to get an aircheck of Star 94 but not from 99X and V103, and I want to use those stations as a background 'music' for my video scrapbook (I also collect airchecks as well) So if anyone gets this message and can get me 90 min of both stations (the music, DJ's,etc.) It will be greatly appreciated. Write back to me via my e-mail address: JJGATO@AOL.COM. !Gracias 100 por 100!

Hello,

I need a station contact address for Michael Harrison. He lives in the Longmeadow, Ma area. He is a talk show host and a talk show newsletter publisher.

He was interviewed on NPR Weekend Edition Saturday about Right Wing Talk Radio. I would like to write him to explain the difference between shortwave broadcasting and Amateur Radio (Hams). It seems a few broadcasting experts are confused about this subject and are spreading this confusion over the news media.

Thank You,

I'm looking for information on the purchase of radio time. I know that you can buy blocks of time for television broadcast. Can you also do the same with radio?

Do local radio stations lease time?

Also, if anyone has information on the purchase of Television time I would be interested in seeing that as well.

Any information would be greatly appreciated.

> Frog.

I have a lot less problem with this station than I do the 910 in Valdosta which you missed mentioning. At least this station actually does something form the community...getting people to stop and spend money in Adel. The 910 in Valdosta never mentions Valdosta, but rather spends all its time hawking the two "Florida Welcome Station" gas stations. One is 20 miles south of Valdosta and the second is an hour and a half south of Valdosta. It is actually detrimental to the city of license.

King Frog has an AM side that actually does the local service thing. IMNSHO which is more important...playing music or bringing money into the commmunity. WDDQ may be a continuous commercial, but at least it's entertaining, unique, and actually can help the economy of Adel!

> Then in Florida, I was treated to 107.9, which serves the same
> purpose for the folks at Disney, pitching to an audience as
> small as the cars on I-75.

This is licensed as an experimental station, 250 watts mono, supposedly testing digital transmissions of some kind. FWIW, they also have a "hotline" dialup for the county so that in case of an emergency, the county can take over operations of the station. None of the "locals" have that good a relationship with the authorities...

The times are a changin'...

Wayne,

I use the Sony DATMan and really like it. The sound is awesome, and it's easy and quick to rewind. Some of our AM (WTOP in Washington) reporters have expressed disappointment in their cumbersome cueing (it's not as instant on as conventional tape decks). I record listener drops when I'm out and some TV audio from home, so cueing is not that important. Can't beat the price either...About $500...

Kevin

"Were fertilizer sales off in the lawn and garden department?"

No...just that most talk radio listeners (at least those hearing the usual diet of radical rant) were getting so much "fertilizer" from their radios for free, they had no need to purchase any. :-)

Incidentally, advice to that other radio pro in Tulsa who plans on attacking Home Depot on the air....DON'T DO IT for two reasons. One, you never know when circumstances might change their minds, and if they do, you'll still be left off your buy list. Two, you'll get a reputation as a batch of hotheads and scare the hell out of other retail accounts in your market, including some of Home Depot's competitors who might otherwise do business with you.

Below is a posting that was posted to talkin' tech. It discusses
most EBS equipment.
Note that several petitions for reconsideration have been filed
on the EAS report and order. I'm waiting for a phone call back from the
FCC on what this does to the proceeding. They have decided to not
approve any EAS equipment until this is resolved. I'm wondering if the
other parts of the R&O are suspended. I expect to hear something back in
a day or two. NOTE that the short tones ARE NOT LEGAL until July 1, 1995
(under the current R&O). I heard a local station run short tones this
past week. Oh well....
Here are the notes on modifying EBS equipment for short tones.

Harold

>From: dbiondi@electrotex.com
>To: tech@airwaves.chi.il.us
>Subject: EBS/EAS 8 Second Mods
>
To assist you in converting your present EBS equipment to the new 8 second tone
standard, I have gathered the technical modifications to Gorman-Redlich, TFT
and McMartin type EBS Encoder/Decoders.

Remember, only the >Decode< function can be modified, until all the
broadcasters in your EBS Broadcast Area have decided to switch to the new
standard. Do not make the <Encode> modification until this happens.

GORMAN-REDLICH - ALL MODELS

The outputs of the 107 Hz filters for the two tone decoders go into a diode, a
parallel R/C circuit, another diode and combine into a voltage divider. Where
these two diodes tie together, there is a 47 uF Tantalum capacitor. Change this
to a 22 uF @ 16-25 volt Tantalum. The decoder will now activate at about 6 - 7
seconds.

On the encoder turn the 1 megohm Activate Internal Adjust pot counter clockwise
until the tone is at 9 - 10 seconds(recommended). This modification may require
a slightly longer closure of the activate switch to allow the timing capacitor
to fully charge.

TFT - 760 SERIES

On the decoder board, replace C13 with a 22 uF 25 volt Tantalum capacitor. Replace R26 with a 182K ohm 1/4 watt 1% resistor. This will cause the decoder to activate in approximately 4 seconds.

On the encoder board, cut the trace at Z3 pin 1. Then jumper from Z3 pin 1 to Z4 pin 9. This will give 8.5 - 9 seconds of encode tone.

If you want to put in a 8.5/23 second encode select switch, install a SPDT switch on the back panel of the chassis with the common on Z3 pin 1 and the other switch terminals on Z4 pins 9 & 11 respectively, to select the tone times.

McMARTIN - EBS-2/TG-2

In the EBS-2 decoder, parallel R37 with a 560K ohm 1/4 watt 1% resistor. This should decode in 5.5 - 7 seconds.

In the TG-2 encoder, adjust the trimpot near the NE555 chip clockwise to 9 seconds.

If you have comments or questions, leave me an e-mail.

I am working on a story on liberal talk radio for Inside Media magazine,

where I cover the radio industry. I'm looking for any insight on liberal talk radio (not for attribution unless indicated, of course), and would appreciate thoughts on some of the liberals with greater presence (Tom Leykis will be featured) and what the market is like for them (listeners and advertisers).

There isn't much liberal talk radio most places because it doesn't get any ratings. For example, Leykis, in this market, isn't cracking a one share on the most powerful AM signal in town. And he's about the best of the lot.

The other reason there isn't much liberal talk radio is because liberal politics, with its concern for "political correctness" and not offending anyone, just doesn't lend itself to entertaining conversation. Talk radio is entertainment first, last, and everything in between. And it's all about making money, not pushing a particular ideology.

BTW, our stations don't run any talk shows. We play country music and do honest-to-goodness, enterprising local news.

Hi all you ol time radio fanatics,

if you would like information on where you can receive old time radio shows. There is an old time radio network called When Radio Was. We get here in S.L.C. on KSL 1160 every weekday night at 11pm. It's great fun.

Anyway here is the number for the network maybe they can help you out on how to receive iot in your area. They have 250 affiliates so it might not be hard to find in your area. Plus KSL 1160 is a clear channel station for those of you on the west coast. You might, be able to get it there.

When Radio Was
Hosted by: Art Flemming
Dick Brescia Associates
(201)385-6566

I heard a some really great shows over the xmas holidays the full candy bear episodes and Ebber Mcgee and Molley, can't forget Jack Benny :) oh well. I won't say anymore you'll be frosting at the mouth :) Try the above number hope it helps.

Rich commented about dumping audio into the Iway... >>> I'm not questioning whether or not it works, nor if it's a good idea. I simply see the Internet grinding to a molasses-like pace. Last night I tried to FTP an MPEG file (.5 meg). It was so slow that I finally just gave up. I use a PPP account at 28.8. <<

One of the things that will kill the internet (or at least make it totally useless) would be dozens of radio stations deciding that people all over would like to hear them in full digital stereo. That means you end up (for lousy sound) with a pair of 56K channels. Each 56K slice gives you one telephone headset worth of sound. Tack in a second one, and you have 112-115K worth of bandwidth eaten up by not-so-great sounding audio. Better than nothing, but not something you would want to listen to.

Get a couple hundred people doing that, and you end up eating the bandwidth of the net real quickly. 3 mb/sec would impact the performance of the net rather negatively. You can give EVERYONE the AM radio (nothing over 5K) sound real easily this way.... And give people neat pauses in the audio that burn out their speakers (if they happen at the top of the excursion..)

Hi, Kelly...I'm not a Program Director or GM, I'm a Production Director...and I must say that much hasn't changed over the 23 years I've been in the business in regards to what a PD/GM look for. Relatability to the audience is one. Being able to sell the station liners and calls believably. An enthusiasm that comes through without necessarily shouting. A sense of fun should be there.. you can't sound bored to tears or like you just put down the newspaper to crack open the mike. You must sound like you're using your brain and that comes from thinking about what you're going to say before you open the mike.

You must be professional in your approach. A well packaged tape with a good brief cover letter and resume is paramount. The resume should focus on your professional experience. The tape should be of good quality...high bias/chrome. Don't use Dolby because many decks don't work properly, unlike pro-duping decks the record companies use. Some engineers never bother to check that it's set up properly. And the tape should always have a name and phone number on the label. It's amazing how many people don't do that. I know because I get the old cassettes for my "junk tape" box!

It's always a good idea to bring good production skills to the party. Even in the major markets (I'm in Detroit) you will still have production to do and if you don't have a production guy or engineer putting your tracks together, you will have to yourself.

Be familiar with 4-track and 8-track tape technology. Almost every digital system out there is based on that fundamental working knowledge. If you understand how that works, how pan pots should be set for stereo (left channel is far left/right channel is far right) you will not have problems dealing with most digital set-ups. Most are designed with the thought in mind that even the station techno-boobs should easily be able to figure it out. If you are good with a razor blade, you will be excellent with the better digital workstations.

Right now Orban's DSE-7000 is king of the hill here in Detroit. Korg has a unit at WJR and I think WHYT is getting one. But usually the Production Directors use those. A couple stations have the Roland DM-80 and Pro Tools is at some stations. I have the DSE-7000 and love it to pieces! It's a time saver. If you're in a crunch, you can do things very quickly with it. But you also get the time to experiment from that speed, so more things can be done to commercials, promos, etc.

See if you get Radio and Production at your station...It's a small but excellent trade with production tips and it comes with a cassette every month with spots and promos from all over. It's a great idea starter.

Hope that helps!

Kevin Sanderson, Production Director
Q95FM/WKQI-Detroit

<drewdurigan@delphi.com> wrote:
>....the format's not the problem; the PRESENTATION is the problem. We need >more true, personality-intensive 70's stations and fewer A/C or Classic Rock >"wannabe"musicboxes!

Personality is the icing on the cake of a format. Music is this format's strength, and weakness. The success (or lack thereof) of 70's stations in every market can be traced to the one MUSIC programming axiom that holds true for most formats everywhere:
"You can't have it both ways."

IB>WWCR consciously tries to serve the international community, it is the time
IB>buyers who seem to forget, or just plain ignore it.

Steve,
The time buyers don't have to answer to the FCC. The time sellers
(the licensee) do. There's still no way around the fact that the FCC
will hold any station responsible for anything it broadcasts. Period!

I don't care how many stations they run or how many employees they
have. It's their responsibility to operate within the law.

Since the original intent for the prohibition of domestic shortwave
no longer has validity, why don't they petition for a change? WWCR
certainly isn't competition to domestic broadcasters, so the prohibition
should be lifted. Until it is, it's illegal to do what they're doing.

Rich

IM>It IS legal for these independent program producers to use an 800 U.S.-only
IM>number and solicit calls from within the United States...after all, they can
IM>be heard on services that are quite legal to target the United States. It's
IM>legitimate if they're heard on even one small radio station outside of WWCR,
IM>legally entitled to broadcast to the domestic audience. It's not reasonable
IM>to expect WWCR to bleep out 800 number references on these shows, especially
IM>live ones.

Mike,
It's irrelevant who produced the program or what it's other
distribution channels might be. It's very clear the intended audience is
domestic. That's illegal on a domestic shortwave station.

An analogy might be a TV station claiming that the porn tape they
ran last night wasn't originally intended for TV, so it's OK for them to
run it. The regulations say no.

IM>Now, if WWCR itself produced a show that targeted U.S. listeners and was
IM>solely aired on WWCR, complete with 800 number, that'd be another matter.

Nope. The only thing the FCC is going to be concerned with is what
actually aired on WWCR. WWCR is responsible for EVERYTHING it airs. It's
responsible for seeing that EVERYTHING it airs conforms to the
applicable rules and regulations, regardless of the source or the other
distribution channels.

IM>I tend to think that, given history (and with the above), WWCR will win out.

If they can prove that they aren't intentionally targeting domestic
audiences, they probably will. Otherwise, it's pretty clear who the
target audience is. Given recent FCC history, I'd expect a nice fat fine
is in their future.

IM>Incidentally, WWCR is not solely a "haven for right-wing nutballs", as someo
IM>mentioned on another thread. It is also the home of an excellent
IM>communications magazine called Spectrum, and was the launching ground for th
IM>latest broadcast effort of the Radio Newyork International crew... the ex-NY
IM>shipboard pirates. I don't think it's any secret that the driving forces
IM>behind the RNI bunch are generally considered liberal.

What audience is Spectrum targeting?

Rich

> When a time buyer comes along, ALL of them by tape or plug in satellite
> feed, the station will monitor the program for the first few weeks, then
> its time to take a listen to someone else.

It doesn't matter how many separate programs WWCR (or any other licensee) is transmitting at the same time. As licensee, they have an obligation to know the content of the programs being transmitted under that license. It's true that the single board operator is probably more concerned about getting each program to the right transmitter, but there's no reason (other than cost) why four separate "members of management" could not be listeneing to the four program streams.

There's a history of case law on this kind of "inadequate control of program content." See Jack Straw Memorial Foundation (KRAB-FM), FCC 70-93 (released Jan 21, 1970) as one specific example.

3874. DC / XTRA-104 Speaks - Addendum

Newsgroup: rec.radio.broadcasting

From: "Max Cacas - NPR News Ops - Wash. D.C." <MCACAS@npr.org>
Message-ID: <3omfit$h3i@vixen.cso.uiuc.edu>
Source record: 31949

In my post about XTRA-104 finally opening up the mikes for jocks, I neglected to mention the man who they *didn't* shut off the mike for in the format transition: Wolfman Jack, who still does his thing from 7-11PM EST from Planet Hollywood in D.C. for XTRA and his little network of stations. Listening to the show over 103.9 in Fredrick last night (Friday), I did detect a few early 70s era tunes sprinkled in with the predominately 50s and 60s songs that make up his playlist.

Also, thanks to Tripp Rogers, who informs me Dave Thompson was acknowledged last weekend as having been with the old WPGC as afternoon drive under their CHR incarnation. I also seem to recall Dave as having been middays at the old Q-107 (WRQX)...can anyone confirm that for me?

Cheers,
Max

```
Sedge Thomson's West Coast Live
San Francisco's Live Radio Show to the World
Show Schedule
1995 May 10

1. Overview:
2. We moved our Internet Facilities:
3. Dolby Surround Broadcasts:
4. The Upcoming Schedule:
4.1. May 13th:
4.2. May 20th:
4.3. May 27th:
4.4. June 3rd:
4.5. June 10th:
4.6. June 17th:
4.7. June 24th:
4.8. July 1st::
5. True Fiction Magazine Internet Mail List:
6. Special Offers:
6.1. Internet Free Ticket Offer:
7. Downloading Additional Information:
8. How to Reach West Coast Live:

1. Overview:

This is the weekly schedule for West Coast Live, San
Francisco's Live Radio Show to the World (actually just
public radio). Each week we give away two free tickets to
the live show by a drawing over the Internet. Read below
for details.
Live shows are broadcast from the Cowell Theater at Fort
Mason in San Francisco, at 10am Saturday mornings.

2. We moved our Internet Facilities:

NIC approved our domain name of wcl.org, so we have migrated
from NETCOM to QuakeNet. We now have our own domain name,
HTML home page, anonymous FTP, simplified e-mail addresses,
and our Internet mail list.
For more information on QuakeNet, send a dummy e-mail note
to;

INFO@quake.net

3. Dolby Surround Broadcasts:
```

As soon as Fort Mason installs their new mixing board, West Coast Live will be broadcast in Dolby Surround. The new board turned out to be defective (it was made in the U.S.A.), so they had to return it. Now we're waiting for a new mixing board again. Someday, listeners who are equipped with Surround decoders will be able to appreciate an audio experience similar to that of an audience member in the Cowell Theater.
For further information about Dolby, listeners are encouraged to telephone Dolby Labs., 8:30am to 5:30pm (Pacific) at (415)558-0200 or e-mail at:

info@dolby.com

Please mention West Coast Live when requesting information, and your name will go into a regular drawing for a Dolby Tee shirt!

4. The Upcoming Schedule:

All seats are reserved, and the best seats go first. Ensure the best seats are yours by calling the office at (415)664-9500 to make a reservation. The reservation phone is open 24 hours a day. Remember that the best seats go early.

4.1. May 13th:

For this Mothers' Day show, all mothers save $2.00 off the ticket price.

* Adrian Legg, guitarist.
* Arlie Hochschild, author of "The Second Shift".
* Chris Strachwitz, founder of Arhoolie Records.
* Kathy Kallick & Friends, noted bluegrass musicians.
* Bonnie Loyd, the urban geographer.

4.2. May 20th:

* Didgeridoo masters Stephen Kent and David Hudson.
* Gyuto Tantric Monks, Tibetan monks exiled in India.
* Pete Anderson, guitarist.
* Claire Peaslee, naturalist.

4.3. May 27th:

* Paulo Coehlo, author of "The Alchemist".
* Meredith Tromble with a view from the studio.
* Other guests to be announced.

4.4. June 3rd:

* Dr. Loco's Rockin' Jalapeno Band, innovative world root's music.
* John McKinney, author of 'A Walk Along Land's End'.
* Karl and Carl, with zany travel tips.

4.5. June 10th:

* Calvin Trillin, columnist and humorist.
* Peppino D'Agostino, Windham Hill guitarist.
* Tom Russell, folkie.

4.6. June 17th:

* Rebroadcast show to be announced.

4.7. June 24th:

* Rebroadcast show to be announced.

4.8. July 1st::

Celebrate Canada Day with West Coast Live at a special remote broadcast from the High Sierra Music Festival at Bear Valley, California. For more information concerning the festival call 800-594-9171. Early discount tickets are available.

* Guests to be announced.

5. True Fiction Magazine Internet Mail List:

True Fiction Magazine is now connected to the Internet with their own mail list. If you wish to be kept up to date on True Fiction Magazine tour dates and general discussion, send a dummy e-mail note to;

True_Fiction_Magazine-Request@netcom.com

6. Special Offers:

6.1. Internet Free Ticket Offer:

We've fixed most spelling and grammar errors in the weekly mailing, so this week we'll do something completely different. West Coast Live has a mantra that we all mutter to ourselves backstage. To enter this week's drawing, follow the rules below, but instead of correcting spelling or grammar errors, quote the show's mantra in the message body. The third correct entry will win this drawing. Hint: The show's mantra is disclosed on our WEB pages.

6.1.1. Rules:

The contest begins each week as soon as the moderator sends this notice to the West Coast Live Internet mail list. Contestants must be subscribed to our Internet mail list. The winner will be selected based on the time the entry was sent, and no later than 48 hours prior to the live show. In other words, at about 10:00am on Thursday.
The e-mail must be addressed to:

DRAWING@wcl.org

Entries are limited to one entry per person each week.
The winner will be notified by e-mail.
If the winner can't attend this week's show, the winner must
assign the tickets to a couple of friends.
The moderator's selection is final.

7. Downloading Additional Information:

To receive an auto-reply containing information about West
Coast Live and our Internet presence, send a dummy e-mail
message to:

INFO@wcl.org

8. How to Reach West Coast Live:

Phil Hendrie hosts a radio talk show on WIOD-AM here in Miami. He says he used to work in Minneapolis. Does anybody there remember him?

He is very popular here. I think he is great, too, but he lets some of his callers stay on the phone too long. One caller, Margaret, has such a "superior" attitude that she makes many people angry, but Phil lets her stay on the air. He should hang up on her.

Another time he had a caller that was a supposed Scrabble expert, and the expert couldn't even spell.

I don't know where he gets these people. Or why.

Was he like that in Minneapolis?

natchmo

3881. More Questions on Industry

Newsgroup: rec.radio.broadcasting
Date: 1995-05-14 00:00:00 UTC

Message-ID: <3p4kq1$5p7@vixen.cso.uiuc.edu>
Source record: 31805

I MESSED UP MY FIRST POST BECAUSE i AM NEW TO USENET BUT HERE IS THE REAL DEAL!
I am an aspiring mix show disc jockey and on air talent in the MD, DC,
VA area. Currently, I am the urban director at a college radio station in
Harrisongburg, VA. And I am only a sophomore. I guess hard work equals
advancement. I do four mix shows as well as serve as the on-air talent for
all of these and one more show. I am involved in all aspects of the station
including production, business, and news to name a few. I am familiar and
reliable with most computer applications and digital production workstations.
(I am also handy with a raZor blade but from what I have heard, they are thing
of the past) This is my problem. I would like to move on to a P1 or P2 two
market in the future but the experience I can gain in my market is limited.
While I am at school, which is nine months of the year, there are
no urban stations within a 100 mile radius where I could work and gain
experience at. Our market is very small and many PDs who I have spoken with
do not view this as viable experience. My question is as follows: What are
some of the ways in which a young talented mix show DJ and on-air personality
like myself can do to make myself a more marketable talent while in this
situation and what are some good ways of preparing myself for larger markets?

Any assitance would be greatly appreciated. I have tried internships but it is
very hard to develop any type of relationship with the upper echelon at the
stations. One internship was in a small market in Virginia and the other was
at WPGC FM 95.5 in Washington, DC. I am currently setting up a personal
homepage which should be completed by the end of this month. It will contain
some personal information including a resume and happenings at my station along
with some great links on the Web. Am I at least in the right direction?
Please post or (PREFERABLY) e-mail any responses to me as soon as possible.

Thanking you in advance,

Michael Robinson

Source record: 31806

You are asking about two different things here.

Re what can and cannot be said on the air: This is a matter of law, namely the US Criminal Code, Title 18, Section 1464. Any law library should have this, or be able to access its text through an online service such as Westlaw. However, you should also be aware that the legal history of 18 USC 1464 is full of ups and downs. For example, it is now legal to use indecent language on the air within certain guidelines, because the courts have ruled that indecent language is protected speech. Problem is, everytime the FCC comes up with a scheme to define under what circumstances indecency may be broadcast, they are shot down in the courts. The easiest thing to do, and the thing that will definitely keep you out of trouble, is not to broadcast any such language.

For the technical aspects, these are contained in the FCC rules and regulations, which are available at the Government Printing Office in the Thomas P. O'Neill Federal Building(in the North End, under the Green Line near North Station). Ask for Title 47, Code of Federal Regulation, Parts 70-79. The broadcast regs are in part 73. It will run around $20 for that book, which is closed for printing every October 1st, and appears in the GPO bookstores every March or April. And sometimes, that time lag makes a large difference.....especially this time, as the new EAS regulations will not be in the latest volume.

Let me know if you need any more info.

pj@astro.ocis.temple.edu asked if anyone had tried a format incorporating rock hits from the beginning to today...

My station, KKSI is doing something similar to what you propose. Our playlist runs from the early 60's to today. Originally the idea was to include everything that's been in the Top 20. It's not really that broad, since we're looking for an adult audience, so we've had to pick and choose from 80's and 90's material (i.e. no rap).

The big problem with such a format is scheduling music so it flows well. This is especially a problem for us since we are automated at nights and on Sundays. You can't go from Gene Pitney into ZZ Top very well without something in between. A format such as this needs lots of personalities.

Much of the material from the late 50's and early 60's we've dropped is still played during my show, "The Old Rock Cafe," an all-request Saturday night oldies show.

KKSI is a 50kW FM serving much of Southern Iowa, as wells as parts of Northern Missouri, Des Moines, Iowa City, and the I-80 corridor.

Someone you might find interesting is Joe Donovan on 840 WHAS--Lousiville. He does the overnight show from midnight to 5am ET and plays a very wide range of hits from the 50's to the early 80's. Lots of personality, fun giveaways, 800 number, and he really takes advantage of the wide-area audience.

Neil Griffin (N0SKG) -- 101.5 KKSI--Eddyville/Ottumwa, IA "Kiss FM"

>From Charm City...

On a sad note, WJZ-TV Anchorman Al Sanders died Friday, May 5 at age 54 from lung cancer (the initial diagnosis of cancer was only seven weeks ago). Sanders was with Channel 13 for 22 years and one of the most recognized media personalities in the Baltimore market. He was also one of the most respected for both his work and for the type of person he was. To quote his co-anchor in tribute "Al Sanders will be remembered as the great writer and reporter, of course, but we also remember the colleague who always took his turn on food runs for the night team. Most of all, we remember this lovely man as our friend."

WPOC-FM (93.1-Country, 8.1 Winter, #1 12+) has a new General Manager. Jim Dolan replaces Jennifer Grimm (who is heading to KDMX in Dallas) becoming the second major station in recent weeks to get a new GM. Bob Woodward replaced Roy Deutschmann as GM at WXYV/WCAO.

In the wake of the ratings release, stations are retooling and tweaking their morning shows. Word is that WOCT will unveil a new morning show in the near future (since their change to a '70s format, the mornings have been predominantly music). WWMX-FM has been unable to regain the dominance of its old McCarthy in the Morning program but a change is not imminent. And WQSR's Rouse & Co. continues strong as #1.

Stay tuned.

Attention Kev-heads

Kevin Matthews has added another station to his syndication stable. WQFM in Milwaukee has picked up Kev's show. On a related note, Rob Olson, who had been handling the morning shift on QFM has landed at WLUP's sister station WRCX as a weekend/fill in jock.

Fan of Wali Muhammad?

Good news for you guys; Wali returns to WVAZ-FM (102.7) Saturday evenings (6-midnight) and Sunday mornings (noon-6pm). As an added bonus, Wali continues to handle the overnight shift on WBUS-fM (99.9).

Promos:

James VanOsdal, producer of Sound Opinions on WKQX-FM (101.1) takes over the local music showcase Sunday nights at 9:00 pm. Carla Leonardo, former host of the show is leaving the station.

Mary DeBaggis, reporter for Shadow Traffic and weekend jock at WJMK-FM (104.3) takes over evenings WPNT-FM (100.3) on the 7-12 midnight shift. Mary takes over from Dee Dee McGuire who left the station a couple of months ago.

Retirement:

Nancy Turner, long time radio personality is retiring at the end of June. Nancy, who started her career at WMAQ when the station played country music, has been on the midday shift on WUSN-FM (99.5). Nancy has decided to devote more time to her family.

I'll trade you.....

Tribune Broadcasting has swapped stations KYMX-FM and KCTC-AM in Sacramento to Henry Broadcasting. In return, Tribune Broadcasting gets KVOD-FM in Denver.

Diamond Broadcasting, which will be completing the sale of WXRT-FM (93.1) and WSCR-AM (820), has completed the purchase of KOMA-FM in Oklahoma City. That's the third station in the market for Diamond which also owns KOMA-AM and KRXO-FM.

3889. Number-two KPRS the big winner in Kansas City winter book

Newsgroup: rec.radio.broadcasting
Date: 1995-05-14 00:00:00 UTC
From: transvox@interstate.net
Message-ID: <3p4kp8$5og@vixen.cso.uiuc.edu>
Source record: 31886

Written May 13, 1995

Country powerhouse WDAF(AM) continues to be the king of Signal Hill and the winter Kansas City Arbitrons in the overall 12+ numbers.

However, second-place urban-contemporary KPRS(FM) captured the number-one spot in the key 25-54 and 18-34 demographics, continuing its steady, strong performance noted last January when the Fall 1994 results were released.

The 12+ numbers since Spring 1992 are available from the Mid-America Radio Page (URL: http://www.interstate.net/~transvox/marp.html). In this article, Winter 1995, Fall 1994, and 1994 average shares are noted.

In contrast to what's happening in many other large and medium markets, Kansas City continues to be a big country music market, with five stations splitting up 25.5% of the 12+ listening audience. One of those stations, KKCJ(FM), has since left the format because of its sale to KCFX(FM) owner Heritage Media.

Speaking of KCFX, its revamped 70s-oriented classic-rock format grabbed second place in the 25-54 and 18-34 demographics.
show an increase in rock listening

Regarding each of the stations with 12+ shares of 1.0 or greater:

WDAF(AM) (610, 5 kW-U): Sure, it's still number one, but there's a ticking time bomb in the numbers: WDAF slipped to tenth in the 25-54 demographic. Even the "Flatlands Godzilla" is now showing a few grey hairs. (9.8 W'95; 9.2 F'94; 9.8 Avg. 1994)

KPRS(FM) (103.3): "Hot 103 Jamz" once again. It continues to be the most consistent ratings performer among Kansas City stations. Local ownership and a commitment to community service have given KPRS a tremendous amount of listener loyalty, which causes would-be competitors to think more than twice before taking on the "Breakfast Brothers" and the rest of the KPRS programming day. (8.9 W'95; 8.0 F'94; 8.2 Avg. 1994)

KFKF(FM) (94.1): Up a bit from the fall, but in 25-54, it's slipped to number three behind KCFX and KPRS. Now, though, "young country" KBEQ-FM is in the same stable. Thus the KFKF-KBEQ duopoly grabs a bigger share of the country audience than WDAF. Still, KFKF has some work to do. During the KFKF-KBEQ promotions on KKCJ in March, it was obvious that "young country" isn't so different from "regular country" any more. KFKF and KBEQ-FM may end up cannibalizing audience share from each other. (7.5 W'95; 7.4 F'94; 8.2 average '94)

KCFX(FM) (101.1): Slipped a bit from the fall, but I think KCFX is really ahead of its fall performance. How? In previous winter books, KCFX has slipped anywhere from 1.0 to 2.0 share points compared to the immediately preceding fall book. The station's fall audience gets a boost from the Kansas City Chiefs. The station shrewdly used a Christmas Eve Chiefs playoff game to promote its transition to 70s rock and kept most of its fall audience. While KCFX placed second in 25-54, it had a 9.4 share to KPRS' 9.5. (6.5 W'95; 6.6 F'94; 5.3 average '94)

KBEQ(FM) (104.3): "Young Country 104" has recovered a little bit from its slip in performance during the fall. However, as I noted about KFKF, there's really not much to differentiate it from the other country stations other than personalities. (5.9 W'95; 5.7 F'94; 5.9 average '94)

KLTH(FM) (99.7): "Lite 99.7" stays steady. Its soft adult contemporary playlist seems to have perked up a bit lately. (5.4 W'95; 5.2 F'94; 5.7 average '94)

KMBZ(AM) (980, 5 kW, DA-N): Some slippage from the fall book but, then again, Kansas City is not a big winter sports town, despite having a pretty good minor-league hockey team. The overall trend for the news/talker is upward. Expect a strong performance in the spring with Royals baseball and sharply increased interest in news coverage with the Oklahoma City bombing. KMBZ was the only Kansas City radio station to send a reporter to Oklahoma City after the explosion at the A.P. Murrah Federal Building. (5.2 W'95; 5.8 F'94; 5.0 average '94)

KUDL(FM) (98.1): A surprising surge for this adult contemporary station, helped in large measure by the market's strongest morning show, "Dan and Glo," who are classy and personable even if somewhat bland. For that matter, those attributes could be used to describe Kansas City. (5.2 W'95; 4.2 F'94; 4.8 average '94)

KCMO-FM (94.9): "Oldies 95" recovers from its dip in the fall book. The advent of KCFX's 70s-oriented format does not appear to have affected this 60s-oriented station very much. (4.9 W'95; 4.3 F'94; 4.8 average '94)

KYYS(FM) (102.1): One might think that, with KCFX clipping the 80s rockers out of its format, that KYYS might gain some audience without having to do much to its heritage album rock format. Bzzzt! It continues to plod along. Some modern rock crossovers have been showing up in the playlist, perhaps helping KY-102 gain share from KQRC. Otherwise, KYYS is a compulsive underachiever. The station needs fresh personalities and a fresh approach. (4.5 W'95; 5.2 F'94; 4.8 average '94)

KMXV(FM) (93.3): Steady from the fall survey, "Mix 93.3" has begun to mix in some dance beats to its contemporary-hit playlist in recent weeks. Is this a subtle way of getting a little of that massive KPRS share? (4.0 W'95; 4.0 F'94; 4.0 average '94)

KQRC(FM) (98.9): Ouch! What happened here? The one thing you can say for "98.9 The Rock" is that it was number three in 18-34 listeners with a 9.1 share (KPRS was first with a 12.7 in the 18-34 category). Despite its great performance in the fall book, the overall trend for KQRC is

down. Will "The Rock" sink like "The River," its predecessor format at 98.9?
(3.9 W'95; 5.9 F'94; 5.0 average '94)

KCMO(AM) (810, 50/5 kW, DA-N): The all-talk format may finally begin
to start showing results, although considering this station's signal and
heritage, it's another compulsive underachiever. Bonneville has a long way
to go to rebuild the station Gannett tore up. (3.6 W'95; 2.8 F'94;
3.3 average '94)

KXTR(FM) (96.5): A 3.5 share and consistent performance in that
range are nothing for a classical station to sneeze at. However, new morning
host Don Crawley's mainstream approach to classical music is generating
loud complaints from loyal KXTR listeners. (3.5 W'95; 3.4 F'94; 3.2 average '94)

KFEZ(AM) (1190, 5/0.25 kW, DA-N): Winter is good to this station with
its highest share achieved two years ago (3.4). Pretty good for an offbeat
nostalgia/MOR format with a nighttime signal that goes ka-blooey in
some parts of the city. (2.9 W'95; 1.8 F'94; 1.8 average '94)

KISF(FM) (107.3): The switch to "new rock" appears to have had a
bit of positive impact. The presentation, however, remains Top-40ish, which
may put off some listeners who otherwise would give the station a try.
(2.6 W'95; 2.2 F'94; 3.2 average '94)

KPRT(AM) (1590, 1/0.047 kW-U): Black gospel partner to KPRS(FM),
a station with strong loyalty in its target community.
(1.4 W'95; 1.9 F'94; 1.8 average '94)

KKCJ(FM) (106.5): Moot now that the "Party Cow" has gone to the
great country feedlot in the sky. Presently KCIY, "smooth jazz," being
purchased by KCFX owner Heritage Media. (1.3 W'95; 2.5 F'94; 1.8 average '94)

KNHN(AM) (1340, 1 kW-U): One of its morning hosts is a member of
a "militia," and the station continues to carry G. Gordon Liddy. Yet its
signal is too weak to penetrate a fully-stocked bomb shelter.
(1.1 W'95; 1.0 F'94; 1.0 average '94)

KBEQ(AM) (1030, 1/0.5 kW, DA-2): People's Radio Network satellite
repeater with no local programming. (1.0 W'95; 1.2 F'94; 0.8 average '94)

WHB(AM) (710, 10/5 kW, DA-2): Numbers include audience share for
the station the market's former Top-40s legend is simulcasting, country and
farm KMZU(FM), east of the metro area in Carrollton.
(1.0 W'95; 0.6 F'94; 0.8 average '94)

Note again that the 12-book numbers are available from the Mid-America
Radio Page, URL: http://www.interstate.net/~transvox/marp.html and follow
the links to the Mid-America Radio Monitor (marm.html).

OTHER RADIO WATCH NOTES

Lawrence's KLZR(FM) has been operating at about half its usual 100,000-watt
power (based on my observations) since a lightning strike early May 8.
Station owner Hank Booth told the Kansas City Star that the strike damaged

both the station's main transmitter and its backup. KLZR is the only modern rock station available in the Kansas City area. The station was off the air until May 9.

The Star has also noted the third anniversary on May 14 of a Sunday morning KCMO(AM) call-in show on religion and spiritual issues. A rabbi and two Christian ministers co-host the program from 7 to 9 a.m.

A note to M Street Radio Directory readers: On a recent trip to St. Joseph, I found that contemporary gospel KGNM(AM) is indeed operating at night, contrary to what the M Street listing indicates. Subsequent research has found that KGNM does indeed have authorization for 30 watts at night.

3890. Minneapolis to get Imus

Newsgroup: rec.radio.broadcasting
Date: 1995-05-14 00:00:00 UTC
From: StellaStar@aol.com
Message-ID: <3p4kp9$5oh@vixen.cso.uiuc.edu>
Source record: 31887

The newest carrier of shock jock pioneer Don Imus will be a Twin Cities radio station, 105.7 KCFE "The Cafe." General Manager Steve Dubbels told the St Paul Pioneer Press the show will hit local airwaves June 5, from 5-9 AM local time.

It represents a big investment for the 3,000 watt KCFE, which till now has carried soft rock, jazz fusion and what the local columnist terms "elevator jazz." Imus's show generally costs about $200,000 a year in markets this size. Imus has an indemnification clause in his contract, which means if any local listener is outraged enough to threaten legal action, the station "bears responsibility for any litigation."

Imus denies he might be "too New York" for Minnesota, saying "I'm not too New York for Sacramento, or Sioux City, or even Boston, and there isn't a more provincial New York-hating town in the country than Boston."

Talk radio in the Mini-Apple currently consists of whining about things like Outcome-Based education, which hasn't done WCCO much good in the ratings, sports talk on struggling KFAN, and KSTP-AM, which features ex-pro-wrestler Jesse "The Body" Ventura, the current governor's ex-wife, acid-tongued Barbara Carlson, and Rush middays.

This should be a refreshing change of dimension for the market.

Stella (when do they read the recipes?) Starr

Source record: 31888

Drew,

Alan has now left, or at least, he is no longer doing Afternoon Drive on Alice (KALC-FM). What is the story behind him going to Salt Lake City. I had not heard anything about him leaving until I was listening one afternoon and listened to an awful jock that does not appear to know the first thing about CHR radio...I would venture to guess this new guy (which I hope is just a temporary replacement) would be much better in a Light A/C or Beautiful Music type station.

Anyway, the bottom line is he is no longer doing PM Drive at KALC. I would love to hear him in Salt Lake!!!

Source record: 31889

Reply-To: ag365@freenet.Buffalo.EDU (Carl K. Gorney)

Up & down the dial in the #40 market:

*Insofar as the winter ratings,I promised a breakdown of the 12+ in
the dayparts besides AM drive. Here they are(with the understanding that
there's more than 1 jock/show listed,due to overlap):

Middays(10am-3pm)

1. WJYE(Jay Moran/Mike McQueen) 11.0(-.2)
2. WYRK(?/Ken Johnson) 10.6(-.9)
3. WBEN(Gary McNamara/Newsday/Rush) 8.7(+.7)
4. WMJQ(Roger Christian/Dave Gillen) 7.3(+2.8)
5. WECK(Tim White/?) 6.6(-.5)

Also:CKEY(Bob Dancy)went up .9 to 2.8. WWWS,a no-show in the fall book,
was at 1.9. P.J.Foxx(at WHTT)had a 1.6 drop to 5.1 .

PM drive(3-7pm)

1. WYRK 10.3(-1.8)
2. WJYE(Mike McQueen) 8.8(+1.3)
3. WKSE(Doc Reno/Donny Walker) 7.3(+.1)
4. WBEN(Rush/Evening News/Dean Edell) 7.1(+.7)
5. WMJQ(Dave Gillen) 6.8(+1.9)

Also:3WS' OJ coverage got it noticed at 1.4;CKEY's PMer,Kerry Gray,went up
1.3 to a 3.4;Craig Mathews(at Oldies 104)dropped to a 5.6,down 1.7.

Nights(7pm-mid.)

1. WKSE(Donny Walker) 10.3(+.4)
2. WGR(Art Wander;also Sabres coverage) 9.1(+1.6)
3. WYRK(Pat O'Brien) 8.6(-.2)
4. WBLK 8.2(-.5)
5. WMJQ(Chris Douglas(Q After Dark)) 7.1(+3.0)

Of note:WBEN's One-on-One Sports,hosted by Howard Simon,dropped sharply to
a 6.2(was a 9.0 in the fall)-thanks to no Bills.

On to the news:

*Tom Donahue,who has pulled stints at WKBW(now WWKB),as well as tours of
duty at WKSE and WGR in executive positions,is the new PD of WNUC(107.7;also
at 105.3 & 107.3). 'NUC is now mostly live during the day,but switches to
its Unistar Hot Country feed for overnights.
(Speaking of which,WSCP in Syracuse-which had been off the air for

several months-is back on the air with the Jones Satellite Network's U.S. Country format. It is live in AM & PM drive.)

*Mike Manion,who left WBUF(now WSJZ)over a year ago to work at WPAT-FM in New York City,has left. He was doing AM drive.

*WGRF(97 Rock)'s morning duo of Norton & Stout has gotten in hot water with the FCC,who issued a $4,000 fine to the Rich Communications-owned station thanks to a 1993 bit about a woman having sex with a plunger,according to an item in Radio & Records and reported on in Tony Violanti's column in today's Buffalo News. The FCC added that the material was on at 9am,when children could have been listening. Operations manager John Hager,for his part,says the duo has toned down their antics. BTW,this is the duo who fleeced the News' wedding pages not once,but twice(Stout dressed as a woman for a fake engagement notice,while the duo made themselves old for a golden anniversary notices. Talk about a dude looking like a lady....:))

*WBLK is going through a lot of turmoil-and it's not due to the ratings. Kim Fox,one half of the Wake Up Club at 'BLK,filed a complaint with the N.Y.State Division of Human Rights,charging unfair discrimination practices. Kenneth Feinman,Fox's attorney,says she filed the complaint because she was paid less than her on-air partner,Bryan Scott. Scott & Fox had been at 'BLK since 1991;before that,they were at WIZF-FM in Cincinnati-doing AM drive. VP/GM Mark Plimpton said Fox was not a co-host for the show.(Well,what _was_ she,Mark?)
And,to top it off,Scott's contract was not renewed-'BLK let Scott go last week. Scott said that,"They're going in a new direction."
Don Allen,Jr.(who had a tryout last week at WGR-AM in the midday talk slot)is now on in AM drive,along with Fox and newsman Winston Brown(as far as I know,he's with Metro Networks-not 'BLK).
Feinman said he's still proceeding with the complaint,despite the changes-adding that if the DHR finds probable cause,a hearing will be held. He also said that he'd like to see a settlement reached.

*WGR is still looking for a new midday talker,despite what I previously said. Ron Dobson was in yesterday(5/11)and today for a tryout.

TTYL...

RE: "Everyone talks about the thrill of hitting the post, but the number of
times I've heard jocks (and, yes, even been guilty of) babbling wothless nonsense just to fill those last few seconds... a well constructed punch jingle (easier said than done) executed in the hands of a skilled jock sounds amazing AND eliminates the mindless repitition of the donut. Sure, good punch jingles are hard to do, and poor ones seem to be the rule, don't underestimate the power of doing them well."

Bottom line: The most creative and entertaining personalities are still the best, jingles or no jingles. We lose sight of the basics a lot-- Easy to do. Agreed about the "babbling worthless nonsense" part. Hitting the post is a lot bigger thrill for the announcer than it is for the audience... Ask even your P1 people and they won't give a flying F for the post, guaranteed.

Your dat machine SV 3700 will only record your one hour tape for one hour no matter what your sampling rate. You would need a slow play machine to get two hours and the w/the slow play model the machine would record @ 32khz only.

Rick Dees is alive and well (and someone told me he was
#1 25-54 in morning drive in the LA winter book) but that
ABC late night TV show a few years ago made everyone
outside Southern California PRESUME he was dead. :-)
Actually it wasn't as bad as Thicke of the Night, and
Alan Thicke has had two strong sitcom runs since then,
including the new show Hope and Gloria...so there's a
chance for Dees too, if he gets himself a decent agent...

Have you looked at the Session 8 from DigiDesign? It's PC based and easily the most powerful digital editor I have ever seen. I have worked with Orban and Roland digital editors, but the DigiDesign wins hands down. For the money though, the AKAI 4 track digital recorder/editors are amazing....rack mount, shuttle jog wheel, you can link them to create up to 64 digital tracks, cut, paste, insert and auto punch features. Wholesale is $1100.00 per unit.

In a message dated 95-05-12 02:53:55 EDT,Mike Cuthbert writes:

>I wish somebody would some day define what they mean by "liberal." All too
>often, it seems to me as someone who is often described as being a
>"liberal talk show host," all it means is that the host is not
>conservative! I cannot recall talking with or listening to many real
>liberals--- in the conservative-defined sense of being all in favor of
>government, thinking government has all the right answers, etc. As
>somebody said a few weeks ago, it's so bad now that if you see both sides
>of an issue you are a "liberal!"

>"Political correctness" is a copout. Conservatives do it only don't call
>it that. If you disagree with a conservative, you're "A FLAMING,
>LIMP-WRISTED, BLEEDING HEART LIBERAL!!!" which is a confrontational way of
>saying "politically incorrect according to me."

The term "political correctness" usually refers to an insistence on the use
of euphemisms...quite the opposite of what you describe.

>BTW, for what it's worth, the "liberal" "Morning Edition" on NPR hit
>the
>#4 spot over all 12+ in morning drive in the Washington, DC, market.
>Wonder if it's because it's "politically correct?"

In Washington, it sure is! I like NPR and I wake up to Morning Edition every
day (at 3AM, California time), but it reflects a very elitist, "inside the
Beltway" point of view most of the time. Besides, Morning Edition is a newsca
st, not a "talk show" in the way that term is commonly understood.

I agree, there's not much talk radio that could qualify as "liberal," but
that which does, doesn't make the grade as entertainment. And outside of place
s like Washington and San Francisco, it gets very few listeners. It's sure
no threat to anybody on the air in this town!

3903. North SD County Report 5.15.95

Newsgroup: rec.radio.broadcasting
Date: 1995-05-16 00:00:00 UTC
From: chris@terminus.wccs.saic.com
Message-ID: <3pa007$mli@vixen.cso.uiuc.edu>
Source record: 31811

Here's what is happening in the 55th Market: Vista,
Escondido, San Marcos, and Carl's Diner on I-15:

Call letter changes: New calls go to KKBH, San Diego. The
former KCLX with the Beach format makes it official. The
station plays a mix of 70s and Beach [a.k.a. Beach Boys, etc.]
mix of music. [and it all rotates on the narrow wheel of format
blah enjoyed by all!]

KOGO changes: AM 600 will be tape delaying the G. Gordon Liddy
program from 9 to 11 p.m. This is, in part, because of the
continued coverage of the Simpson/Goldman murder trial in LA.
[and, perhaps, to make up some lost revenue in the Liddy show.]
Displaced is the Roger Fredinburg program. The change, effective
today, was announced last week.

It's Ted on the Billboard: Ted Leitner's smiling face is now
adorn billboards in San Diego county promoting his afternoon gig
on KFMB AM 760. Last week when the Padres visited Chicago,
Leitner hosted his afternoon show from Wrigley Field. Never miss-
ing a beat, Leitner has fired up the 3 - 5 p.m. radio waves.

It was a year ago that I wrote about the fall of KFMB -- letting go
popular afternoon host Mark Larson, the firing of the 20-year GM,
and the lack-luster ratings of the Hudson & Baurer show. One year
later, a fire has been set under the AM side of the house. With
H&B trimmed one hour, adding Dr. Laura's program, and Leitner's v
verbal darts, gives Stacy Taylor the noon to 3 p.m. host some
comfort: KFMB's overall ratings are up! This, on top of the
50kw directional signal at night give San Diego a full service
station the listner'
deserve.

I've had another e.mail address change, and requests for the
famous San Diego Radio log in the past two weeks have gone un-
answered. For those who have sent in, please re-send to the
above e.mail address, and I'll send 'em on the way. Or, you can
visit the Airwaves homepage, and look under DIALS for an HTML
version.

Jim,

Just a note of correction concerning WWMX. Mike McCarthy left the station last year at which point I hired him to do mornings in Richmond at WMXB.

Mike has done a wonderful job here and in the most recent Arbitron was #1 in our target demo of 25-54 women.

I am not sure who replaced Mike in Baltimore, but the McCarthy in the Morning show is now in Richmond.

3913. Noble LMA in Toledo, OH

Newsgroup: rec.radio.broadcasting
Date: 1995-05-16 00:00:00 UTC
From: bobseybold@aol.com
Message-ID: <3pa00j$mm6@vixen.cso.uiuc.edu>
Source record: 31821

Reply-To: bobseybold@aol.com (BobSeybold)

Toledo, OH radio's first duopoly came one step closer to completion Monday when Stackpole Publishing Inc., owners of WSPD-AM/WLQR-FM, Toledo, announced Monday 5/15 that effective immediately, the stations would be operated under an LMA with Noble Broadcasting Inc. Last week, Noble received preliminary FCC approval for the purchase of the two stations for $6.4 million. The sale is expected to be closed by the end of June.

Noble currently operates WVKS (Kiss)-FM in Toledo. WVKS VP/GM Andy Stuart assumed control of the stations at 1 p.m. Monday, shortly after Stackpole informed 9 of the 35 employees at WSPD/WLQR that their services were no longer needed. The 9 included 4 salespersons, a comptroller, an assistant engineer, an assistant production manager, a receptionist, and the current General Manager of WSPD/WLQR.

Stuart told staffers that the facilities of all three stations would be combined under one roof at the current WSPD/WLQR studios, probably within 120 days. Stuart also said Noble had no plans to change the formats of News-Talk for WSPD, and Adult Contemporary for WLQR. WVKS-FM is a CHR format. In the most recent Arbitron ratings, for Winter 1995, 12+ M-Sun, WSPD ranked 2nd, WLQR 4th, and WVKS 5th in the Toledo market.

From: wixc973@aol.com
Message-ID: <3pa00k$mm8@vixen.cso.uiuc.edu>
Source record: 31822

Dear Kelly,
In a previous post you asked:

>With all of the changes taking place in the business, just WHAT is a PD
or
>GM looking for in their air talent? What do they want to hear on a tape?

You asked a few other things too, but let me just address the WHAT question from a Program Director's viewpoint. I've PDed stations in Boston/San Diego/San Antonio and elsewhere -- I'm currently part owner and PD of a station in a little market (Bay City, MI) so I think I qualify to say: it depends on what market you are trying to work in, and the amount of experience you have.

If you are new -- and seeking experience -- the best thing you can bring is a fun, hard working attitude. Most PD's I know will work with anyone on their sound, but very few will go out of their way for someone with a poor attitude. I've been approached by college grads who have wanted to get their first on air job, but "not on the all night show or weekends, because I have partys and stuff." Thankfully, most newbies to radio don't have that attitude -- and those that do don't make it very far.

If you are experienced -- then be ready to hit the air waves fast and hard -- if you are a pro you will know what sounds good, what feels right, and what the station is trying to accomplish without being told. Key into the vibe of the station, and make it better today than it was yesterday. Bring all the skills you have, but be ready to bulk erase your brain and pick up new ones, because each station is different -- and each station is right in the way they do things.

Good Luck -- It's worth the effort.
John Dakins

3915. pirate radio - papua-new guinea

**** ****** ****** ** **
** ** ** ** ** COMMUNIQUE # 4 - 20
** ***** ***** ***
** ** ** ** ** 15 May 1995
**** ** ****** ** **
International Freedom of Expression eXchange Clearing House

PAPUA-NEW GUINEA: PIRATE RADIO STRUGGLES DURING BOUGAINVILLE WAR

The coconut tree has become a source of free information on the island of Bougainville in Papua-New Guinea, reports Reporters sans frontieres (RSF) in the May issue of its monthly bulletin, "La Lettre". Max Watts and Boris Adam write that the rebels fighting for independence must often resort to coconut oil to run the generator that powers their pirate radio station, Radio Free Bougainville. The oil of forty coconuts provides power to the station for one hour. But RSF says the price is heavy. A supporter of the station who himself survived an attempted summary execution recounts that the army caught four of his friends who were harvesting coconuts for the station and executed them. The article describes how the six-year war between the army of Papua-New Guinea and the separatists has taken its toll on the islanders. Censorship of the war on Bougainville continues, with the country's media ignoring it. Independent journalists are also prevented from visiting the island by a blockade, with the government allowing access to only "acceptable" journalists.

A station or two I've worked at in the past ran an interesting little syndicated program, from Denver I believe...Ray Durkee's "Sunday at the Memories" which had that blend of some of the earliest recorded hits, before there were enough consumers to BUY a million recoreds, up to at least Elvis and the Beatles.
His quality varied wildly, and sometimes a record would start to skip and not get picked up right away...but it had kind of a rough charm, and since the old disks were so eroded anyway, it seemed to fit the format. And it was eerie to hear hits from before I was born, and wonder why they sounded familliar...must've been the oldies stations of way back before my time.

Alan L. Cassel wrote:

>I strongly disagree that "the public airwaves argument doesn't work either".

Two observations about Mr. Cassel's arguments. 1. Technical traffic manager functions can be done without getting into protected areas of free spreech and the functions could be done by civil fine without a FCC. 2. Much of his argument about the technical restrictions on in band services, etc. has already been long outmoded by digital compression technology. Not even the remaining Congressional advocates of heavy regulation rely on "scarcity" any more. These regulatory arguments were dropped in the 80s in favor of concentration and other theories of broadcasting regulation with more relevance to modern technology. There are still untresolved issues of lingering social regulatory schemes such as local service, but even these seem to have died by benign neglect. There no longer seems to be a regulatory scheme only a regulatory framework within which to issue ad hoc decisions dependning on what issue is "hot" at the moment. I am not disagreeing with Mr. Cassel's worries about potential effects on real world broadcasters and listeners, merely pointing out that the technology and its implementation have undergone profound changes lately. For the most part we've been able to "see" the technological changes. It is the regulation by abandonment that we don't readily comprehend. The FCC seems to be hitch hiking with no ultimate destination in mind.

Source record: 31828

While listening to WHTZ Newark-New York City (Z-100), I noticed an approx one second of dead air during a song. Song ends, and the jock makes a comment that the transmitter antenna "just microwaved" another pigeon. "That happens when we play a song with lots of bass!" "We apologize to the people walking past the Empire State Building (where the antennas are) for all those pigeon feathers floating down."

The part about the bass in songs boosting the transmitter power is just the jock goofing on us tech types (FM is essentially constant power, to a 1st order approx). But I wonder if VHF and UHF transmitting antenna arrrays do occasionally nuke pigeons? Though to make the station drop a second of broadcast time, a pigeon probably shorted across the feedline or some such.

Of course, it's quite possible the jock made a mistake and caused a second of dead air in the studio. And he's goofing on me :-)

So, how often do you need to clean dead pigeons from your antenna array?

This is not a sales pitch or anything like one!

I produce a public radio program called "BodyTalk." "BodyTalk" is a medical call-in program with six doctors that we produce here in Columbus, OH and distribute to public stations around the world.

Anyhow, about the t-shirt. Every year during the summer we take a much deserved month of vacation, but we have to provide programs during that time. Each year we recruit "faux" callers to ask medical questions during our programs we produce for air during that break.

If anyone in this group is willing and available to help us out as a "faux" caller for one of these programs, we'll send you a BodyTalk tee shirt as a thank you.

Here is how it works, you can e-mail me and indicate your interest. Make sure to leave me a phone number where you will be at and WE WILL CALL YOU during the taping. If you don't have a medical question for one of our doctors, we can provide one - we just need warm bodies to ask questions.

Following are the doctors we feature and the times we will be taping with each. If you are interested and able to help, please make sure you indicate in you message which doctor you want to speak with. Then, on recording night, we'll give you a call, you ask your question, and we send you out a tee shirt. Also, if you are interested in a little more info on BodyTalk, check out our Web site at "http://wosuwww.wosu.ohio-state.edu/bodytalk.html"

Have you tried Dan Churchill at Radio Corporation of America (yes, that's the name of his company) in Cavendish, Vermont? Dan used to work for the company of the same name that made your transmitter, and he stocks quite a few parts for RCA transmitters and those of several other manufacturers as well.

We have one of those transmitters on the air at this very minute (our other transmitter is a Harris FM-25K).

RDS is a data signalling service used throughout Europe on FM (ie VHF, Band II) radio. It utilises a sub carrier on 76kHz (ie 4 x pilot tone frequency). It enables suitably equipped radios to display station IDs (8 characters max), time, and programme details entered by the station. It carries 'alternative frequency' information, so that if you are listening to a national network (eg BBC Radio Four here in the UK), when you drive out of the service area of one transmitter, the radio will automatically move to the frequency of the next one, virtually instantaneously.

It also includes a programme type flag; if you want, say, classical, tell the radio that and it'll tune to a station whose set that flag. If you drive out of their area, it'll retune to another one.

The best known use at the moment here in the UK is the traffic service which the BBC does. More detailed traffic news is carried on local stations; so if you're listening to a national one you might miss out on hearing about those traffic lights that are out two miles down the road. So, when the local DJ plays a traffic cart, it signals back to London, and alerts all the national transmitters that, say, Radio Leicester is about to do a travel flash. If you're listening to Radio Four, and you're in the area served by Radio Leicester, your radio retunes to that station for the travel, then goes back to R4 once it's finished. Even if you're listening to a cassette, you can set the system to interrupt that if you want. Obviously, this sort of system only works when you've got local and national stations owned by the same operator.

The system was developed under the auspices of the European Broadcasting Union, who can supply technical details if required.

Up & down the dial in the #40 market:

*Don & Mike are back in the Buffalo market-sort of. WLVL (1340,Lockport;talk)picked up the show as of Monday. 'LVL runs at 1 kw round the clock,but as a poster from the area noted in the alt.fan.don-n-mike newsgroup,"the station's signal is SO WEAK that it can barely be heard by anyone outside the local Lockport area." Probably,but my car radio can pick it up adequately.

*WWWS(1400,Buffalo)made the switch to urban oldies earlier this week. It is,as far as I can tell,satellite delivered,but I don't know which company has the format(the best guess I can make is ABC/SMN Urban Gold).

*In Toronto:Darryl Henry will step into PM drive at CJEZ (97.3;classic hits;Z 97.3)on June 5,replacing Charlie O'Brien. Henry was doing middays at Mix 96(CJFM)in Montreal,and was at CHTZ(97.7 HTZ FM)in St.Catharines before that.
CJEZ is also in the process of hiring new announcers for most other dayparts. Once completed,there probably will be a repositioning of the station with a new slogan & format-
I'd say probably by early summer.

3931. Burlington Plattsburgh Radio Watch-Morning shake up

Newsgroup: rec.radio.broadcasting
Date: 1995-05-18 00:00:00 UTC
From: jtymecki@aol.com
Message-ID: <3pf3hr$grg@vixen.cso.uiuc.edu>
Source record: 31831

Reply-To: jtymecki@aol.com (JTymecki)

Burlington, VT Plattsburgh, NY Radio Watch

It has been a while since I've posted here - there is some catching up to do...

WIZN's (106.7 / AOR) number one rated (12+) morning team of Corm and the Coach was split up the other week when "coach" Tom Brennan resigned. He cited pressure from the University of Vermont (UVM) - where Brennan IS the coach of the men's basketball team - and a memo from the University about racial, ethnic, homophobic, and sexist remarks. The memo went on to read that he should be removed as coach at UVM. Brennan claims he is none of the things stated in the memo. His last show was last Friday (5/12). WIZN's PD Steve Cormier (Corm) is still on in the morning with the Rocker (Bill Corbiel). Rumors are running rampant about the WIZN bring in the Howard Stern show - we'll have to wait and see.

Across town at CHR 95-triple-X (95.3 WXXX), morning co-host Lana Wilder received her walking papers after Monday Morning's show. "They said it was no reflection on my work, they just wanted a change," Wilder said in an article in the Burlington Free Press on Tuesday 5/16. Overnighter Chantal Baril moves up and joins John Brooks on the A.M. drive show. Keith Rice moves into the overnight spot.

WEXP (105.1 / AAA), still operating under an LMA with Hall Communications (WOKO / WJOY), has been running out of their auxiliary / production studio since Monday (5/15) evening while the main studio is being moved over to Hall's building in South Burlington. This will likely be the situation for the next few weeks until the new location is up and running.

Hometown Broadcasting finally sold WNWX last month. The station, now owned by Barry Lunderville, changed calls to WZBZ and is running "Baby Boomer" oldies... pretty brave for a stand alone AM daytimer. Hometown still own's (1390 /TALK) WKDR in Burlington.

Regards for now, Joe.

Hi...a few questions...
Is it possible CFGO may do what CFTR did...announce a change on a Friday, spend the weekend doing a commercial-free farewell retrospective of the old format (back to the years they were on 1440), then actually do a flip to talk the following Monday?
Or is it also possible they'll do what Rawlco did when it got an FM license in Toronto, and try modern country? It's working pretty well for them in T.O...haven't checked out the FM competition in Ottawa in a while, so I don't know if there is already a country station on FM there. (Toronto didn't have one until CISS signed on about three years ago.)
Say, are any of the deleted AM facilities (540, 920, 1250 just to name a few) potentially available to a new, adventurous and enterprising operator? Has the CRTC killed them in the Ottawa Valley forever? And if so, might they be available to US-based operators in New York and New England, presuming they can convince the American FCC they can at least make the nut financially and not get seriously in any other station's way?
This is an interesting turn of events...
Bob Smith, middays WXXI-AM 1370 Rochester NY

In the early 70's I was PD at WKRC, 550 in Cincinatti. I haven't been back in years. I went to the Dayton Hamvention this year and had a chance to scan the AM dial. KRC is gone (?), WLW is still there, WSAI (the old "Thrill on the Hill") on 1360 is now 1530, the 550 is WCKY, which used to be 1530 and I couldn't get the 1360 in Dayton to figure out what it was now, or dark?

I gather that J Core bought the 550, but I thought they were calling it WLWA or some such.

Anybody have a handle on all this. I'd like to get up to date.

Shame about KRC. We used to kick some tail with two short towers on a hotel!

Thanks!

>all stations had in a sealed envelope.

I was also around for this "test". As I recall from reading
about it afterwards, most stations ignored the alert. I think the
terminating message over the wire came with the wrong authenticator word,
so it was invalid. Took them a while to get it straightened out. I
think there was also a station in Texas that opened the authenticator
woord envelope and found it empty.
It's interesting to note that the new EAS rule 11.54(a)(2) states
that for EAS operation during a national emergency, stations must "Verify
the authenticity of the EAN message with the current Red Envelope
Authenticator List (broadcast stations only)." So much for automation!

I remember that day very well but not the exact date. I think it was between February and April. I used to hang out at WICH, Norwich CT and happened to stop in that night. My friend was the engineer on duty (yes, remember the days when a Ist Phone was required to be on duty when the station was on the air?) and he told me about it when I walked into the transmitter room. My response was something like > that happened and I didn't hear it? One of the few times I didn't have a radio on!< (I also miss the attempted assassination of Pres. Reagan - but I had major surgery that day so I GUESS I can be excused on that one.)
My friend told me that some stations - CPCS-1's like WTIC, Hartford and WBZ, etc., weren't sure just what the real situation was, while other stations left the air until things were figured out.
Reminds me of a cartoon I saw at WDEA, Ellsworth ME. Guy in a suit and tie (possibly one of the last of the "staff announcer" breed?) siting at a mike, slumped back and obviously bored out of his gourd. Does the closing tag of the EBS test thusly, "This has been a test. If this was an actual emergency, you'd never know what hit you."
The line I've always wanted to use isn't quite as good but I wonder if anyone would have noticed.
"If this had been an actual emergency, I wouldn't be talking to you. This station would be on auto and I'd be looking for a safe harbor, baby!"
Nah, the cartoon was better.
Peace.

In a previous posting, Barry Mishkind writes:

:Scott ... Please tell your PTB that this is not legal. You can not
:avoid drive time tests if you want to comply with the Rules. This is
:almost as bad as the Sunday 6:05 AM testing you mentioned at another
:station.

:Harold quoted the Rules... you might show this to your
:scheduler (secretary).

> Under the current rules (which are being phased out as EAS comes
> in), all stations are required to run an EBS test once a week on a
random
> basis between 8:30am and local sunset (73.961(c)).

:The FCC has amplified that "random" does not allow a station to
:narrow the 8:30AM to sunset parameter. It is no longer truly random
:as intended by the Rule to do it between ten and two.

While you might not get your EBS time changes approved by your GM, you owe it to yourself to at least inform him (in writing - keep a copy in your file) that the station is not in compliance with FCC rules.

I do this on a regular basis whenever I discover my station is shooting itself in the foot. In about half the cases, I'm able to convince my GM that we're screwing up and get a policy or procedure changed. In other instances (labor violations like overtime pay in excess of all hours worked over 40, ultra-liberal interpretations of other labor law, commercial use of copyrighted music, etc.) nothing changes. But at least if we ever get slam-dunked by whatever regulatory agency, I can at least prove to the station's owner that I was aware of the problem and tried to get something done about it. A paper trail is the best trail to leave to protect yourself against incompetent management when you've got your act together.

Just remember...cover the bases, then CYA!

Good Luck

TALK-SHOW HOST FLEES, SAYS HE IS IN 'EXILE'

St. Petersburg Times, May 17, 1995

TAMPA - Sonny Bloch, the flashy financial adviser whose radio talk show is broadcast nationwide, has packed up his Tampa radio studio and his belongings and fled to the Dominican Republic.

He is in political exile, he said Tuesday.

"This is the first time I know of that a broadcaster has left the country to avoid government persecution. . .and I emphasize persecution--not prosecution," Bloch said in a telephone interview while preparing to broadcast his shows to stations across the United States via electronic hookup.

He said he was calling from a mountain community at the northern end of the Caribbean island.

He has been accused of everything from selling unlicensed securities to tax evasion to cheating listeners who bought investments advertised on his radio talk show.

Bloch hasn't been charged with any crime.

But authorities have subpoenaed his financial records, taken testimony from advertisers on his radio show and searched is condominium home on Tampa's Harbour Island--twice.

The entertainer-turned-radio host and his New York attorney said they think it's only a matter of time before Bloch is charged with a crime.

"If they don't charge me with something, there are going to be a lot of people who lose their jobs, and there are going to be a lot of lawsuits," Bloch said defiantly.

Bloch's radio show is carried six nights a week on more than 170 radio stations across the country, including Brandon's WBDN-AM 760 and New York city giant WOR-AM 710. [...]

Since fleeing to the Dominican Republic in March (Bloch's current wife, Hilda Cabrera Bloch, is from that country), Bloch said he has continued to broadcast six nights a week from there.

He said that if he is charged with a crime, he will refuse to return to the United States.

He isn't worried that the Federal Communications Commission might keep him off the air. When he left Tampa, he said, he took shortwave broadcasting equipment with him.

"I'm going to keep broadcasting until they send the CIA over to assassinate me," Bloch said.

Hello all!

* John O'Rourke has left WDJB Radio (B-106) for Salt Lake City
Scott Thomas is the new Program Director. He came from
Utah (no bio available)

* Bob and Tom, those DJ's from WFBQ - Indianapolis, who are
locally syndicated on WFWI - 92.3 FM have released a new
Double-Cassette (CD also) set called "Checkered Past". I picked
it up yesterday and it's pretty good. Most of their new stuff
and some old songs and skits are on there too.

* If anyone still wants a WOWO bumper sticker, e-mail:

Phredd@grfn.org

That's all for now.

Blaine

I don't know what the original poster had in mind, but I'll tell you how I feel about Morning Edition and All Things Considered. They talk about Washington all the time. Sorry, but there is a big world outside Washington, and national politics encompasses far more than just the view from Capitol Hill. I wake up to M.E. each morning, but there are times I can't handle it for more than 5 minutes -- it's a lot of hot air from Crongresscritters and not much else. Luckily, we have BBC news at the top of the hour during M.E. so we can get a more well-rounded view.

I've seen it happen on a 1kw AM tower. The guy wires at the top of the tower were hot to compensate for the tower being short. Every year these ugly black birds would migrate (this was in Greece) and on thier way by they would land on our tower and completely cover it. It would get so bad that it would sometimes stut off our transmitter (Harris SX-1A). I never saw it happen, but there were little carsases to be found every time I cleaned up the ATU. On an FM station especially on an external-fed antenna with 10kw or more on it I bet it would really fry em' up. Hard telling what really happened, but I would suspect the jock screwed up. (They never do you know)

Radio has been a serious snooze around here lately. Here's one story I've been sitting on, hoping more would come along. But today's the day I clean off my desk, darnit, and this is one of the scraps of paper that's cluttering it!

***WXLW To Be Sold -- Bill Shirk, owner of several minor radio and TV properties in the Indianapolis area, has agreed to sell WXLW-AM (950) to a group of local investors. The group, headed by the Rev. Gene Hood and WXLW GM Ed Sears, wants the station to continue its Christian-oriented programming. The investors felt that programming on Shirk's low-power TV station, W53AV (Ch. 53), caused WXLW to lose credibility. W53AV had been airing adult-oriented shows, such as bikini contests and sex-talk shows, during its late-night hours. Even though W53AV has stopped airing these programs, Shirk agreed to sell WXLW so it would be free from any fallout from his other activities.

--
Do YOU live in or near Indianapolis and know radio happenings I've not reported? This is not an exclusive report. Please, post your information to Airwaves!

Last night... (5/15/95) I ran into some history at The Ball Park in Arlington, where the Texas Rangers were playing the Toronto Blue Jays... The first announcer for the Rangers was on hand for some good ol' fashion story telling.

His name is Bill Mercer. Now some of you might remember Bill as the voice of the Chicago White Sox in the mid '70's.. others might remember him as the voice of the Dallas Cowboys, and his call of the '67 ICE BOWL GAME in Green Bay.. but when the Washington Senators were brought to Texas in 1972, the team looked to fill the space of radio announcer, and hired Bill.

Along with Don Drysdale and later Dick Risenhoover as partners, Bill Mercer called the 1972 thru 1974 seasons... Ironically... both of his broadcast partners have passed away... Risenhoover died in '78 of lung cancer and Drysdale passed a few years ago from a heart attack...

Bill now teaches (and has been teaching since 1966) at the Univeristy of North Texas in Denton,Texas (just north of Dallas/Ft. Worth)... his courses are broadcasting and jounralism... BUT!!! the fun thing about Bill Mercer is not the fact that he was the Rangers or the Cowboys broadcaster... it was in the mid '60's that a local TV station use to do Wrestling in the studio.. and Bill Mercer along with another sports caster of the station.. Wes Wise would do these matches... (Wes Wise later became the Mayor of Dallas... go figure)... Bill then went on to become a staple of doing the wrestling shows back when that sport became so popular in the '80's...

Bill also worked for Gordon McClendon when he owned the Mighty 1190 KLIF as a news reporter and anchor... and later he would work for KVIL as their sports director. Bill is looking good and sounding as good as ever... and as he puts it... "will travel anywhere... anytime... to do baseball"...

It was a pleasure to see him and talk to him... he was elected to the Texas Sport Hall of Fame not too long ago... I saw him speak with the current radio broadcast team of the Rangers.. Eric Nadel and Brad Sham and the former radio voice now with Prime Sport.. Mark Holtz.. and it seemed fitting that the torch.. so to speak.. was passed on.. they all seemed to really enjoy talking with Bill and hearing how it was in the "Old days".

Dave Michaels

RE: What happened in Cincy?
Answer: JACOR

Jacor is responsible for the shake ups and strange station changes.
It really started back when they purchased bought WLW and had to also buy
96 Rock. From there, they went crazy and bought 55KRC (which by the way
has towers across the river now on the hilltop near Fort Thomas KY.
Your two original towers are still up on the Hotel Alms building - they
are used by WAIF-fm 88.3.)

Anyway, to answer your ? - 1360AM is now Radio Aahs for kids - you've
probably heard of it by now, it's a satellite radio network aimed at
kids, and from what I can see in the ratings from around the country,
it's not performing well. By the way, Cincinnati has no real Top 40
radio now that Q102 has """"grown up"""" as they say. Like Cinci needed
more radio aimed at """Grown Ups"""

Things don't sound real good right now on the airwaves of Cincy, but I
guess Jacor thinks things are great because they have moved all of the
pieces on the board until they are now their own competition. All of
this should be against FCC regs. but from what our moderator Bill tells
us....watch out, it's only going to get worse.

Reporting from Dallas (that's in Texas)
DJRON

John,

I'm new to the internet, and the rec.radio.broadcasting group. I'm also new to syndicated radio. I'm a physician who for the last 7 months or so has been doing a short-form (90 second) preventive medicine feature. The program is on about 20 stations.

Since I noticed you seem to have a helpful attitude to newcomers in the business, I was wondering if you could give me some input. Specifically, we sent a mass mailer to PDs in Michigan a while ago and got absolutely no interest in the program. We did not send a demo tape, but offered a free tape if a request was faxed in. This was very different than what happened in mailings to the Northeast, and Southeast where we got many responses.

Any ideas on why this might be? Are you interested in listening to a demo and giving me feedback from a Michigan perspective?

NATIONTALK!

A new public policy and political radio talk show is now available nationwide by satellite. It runs Saturday afternoons, 4 p.m. Eastern, 3 p.m. Central, 2 p.m. Mountain and 1 pm. Pacific.

Hosted by Wayne G. Walker, PhD in public policy studies from RAND Graduate School, the program looks at the hard issues from all perspectives. The thrust of the program is to motivate increased deliberation of the hard issues.

You can tune in locally on KAVC-FM in the high desert area of Southern California on 105.5. Nationally, you can pick up the program on Satcom F1, Transponder 15. This is a sports channel. To get the program, you tune the audio to 7.56 Mhz and switch to narrow band.

The program has an active FirstClass based online information service at 805-948-4900. In addition, you can visit the web-site at http://www.rolnet.com/~wwalker/nt/nt.html

The site has links to the software for the online service.

In a message dated 95-05-16 20:55:07 EDT, Mike Cuthbert writes
(In response to my criticism of NPR Morning Edition)

>Could you specify what you mean? If you mean that ME talks about
>foreign issues, assumes some education on the part of the audience, does
>longer pieces in order to establish a context for a story, does sports in
>depth and still allows for local news, I don't know what you mean. What is
>"elitist" in your frame of reference? For what it's worth, public radio,news
and talk oriented, has >been #1 in Boston in afternoon drive for some time
now. Not exactly elitist or Inside the Beltway. >How do you explain that give
conservative alternatives?

I knew you'd ding me on this one, Mike, so let's give it a try, item by item:

Putting on my news editor hat for a moment, Morning Edition is very heavy on
covering Washington insider power games. It focuses more on what politicians
say, than on what they actually do. Its reporters and writers often (but not
always, I grant you) seem condescending when presenting
other-than-Administration points of view. Recently, NPR reporting has seemed
to assume that anyone who is "anti-government" (a shorthand term that is much
over- and mis-used in recent weeks) is in league with wacko bombers, or at
least in sympathy with them. When was the last time you heard NPR cover a
sport like stock car racing? Our local NPR affiliate does no local news. (
Lucky for me, I guess. <g>) Also, I am very troubled by NPR's practice of
accepting underwriting for covering specific subject matter.

Now, to put on my reporter hat, it is "elitist" in my frame of reference to
approach stories from the point of view that government has the solutions to
all problems, to assume that political elites are the best source of wisdom
or expertise on a given subject, or to assume that the governing class
(Democrat and Republican) has pure motives.

Having said all this, I do give NPR credit for doing some excellent work.
Otherwise, I wouldn't keep listening!

I don't know anything about Boston radio, except what I read posted here.
What are the conservative alternatives, and how entertaining are they?

>Latest indications of some changes, albeit in "liberal" DC: 25-54 Rush
>Limbaugh has gone to a 4 share. WAMU, public radio, with a moderate host
>against him and no ad budget is at a 3.2.

I wouldn't boast about either of those numbers. Rush is down substantially
here. It goes to what I've been saying about being entertaining. I'm far
from the first to notice that Rush now seems to be a lot less entertaining
than he was before his side won the election. Still, even though Rush has
lost a third of his share in the past year in this market, he still pulls in

about a 15 or 16. The closest competitor in the format only does a 3 with a much bigger signal...and did only a 1 before dumping its midday talk line-up for the O-J trial.

: don't use some kind of call screening process?
: -------------

There IS a show on the 50000W KFI here in LA that doesn't screen calls.
The announcer/talk show host runs sort of an off-beat comedic show called
"Ask Mr. KFI". All calls are answered on the air, there is NO
screening.

Given the nature of the show, and the lack of screening, you'll get a few
dumped callers each hour.

Jay Marvin often takes unscreened calls at the beginning of his show... sometimes they are hang-ups...sometimes the caller thinks he's talking to the producer...sometimes Jay pulls the caller's leg and pretends to be the producer...or another station... sometimes he has to use the delay...sometimes it's damned funny. He also does an unscreened segment called the "shootout" which is *supposed* to be rapid fire funny calls from listeners... some listeners don't cooperate with the concept or just get really nasty...they get hung up on fast...it's kind of reminiscent of John "Records" Landecker's BOOGIE CHECK from WLS in the '70s. Oh, BTW Jay is on WLS FM 94.7 in Chicago... normally from 2-6pm but from 7-11 until the O.J. circus is over.

One time a caller got on unscreened...and told Jay "Hey! Put the fucking delay on!" Oops...

NEWS RELEASE
Contact: Dick Ross, Publisher, 516-681-2922
For Release: Immediate (May 16, 1995)

CHANGES IN STORE AT "POPULAR COMMUNICATIONS"

(Hicksville, New York) -- CQ Communications, Inc., of Hicksville, NY, which publishes "Popular Communications" magazine, announced two major staff changes today.

Publisher Richard A. Ross has announced that Tom Kneitel, the founding Editor of "Popular Communications" magazine, has elected to take a newly-created position of Senior Editor under a newly appointed editor, Chuck Gysi.

Citing personal reasons for his decision, Kneitel expressed his intent to remain an active part of the popular magazine. In his new role, Tommy will continue to do what he does best and enjoys most - write - while shedding the day-to-day burdens of running a monthly magazine.

Kneitel, K2AES, has been the soul of the magazine since it was first conjured up in his living room in the Summer of 1982. The first issue was dated September 1982, and bore a cover photo shot by Ross in the Kneitel family dining room. Over 150 consecutive issues have since been delivered, every one on time and chock full of great reading for the communications enthusiast. Countless "scoops" are attributable to Kneitel over the years, with letters of acclaim coming from practically every government agency in the United States, and

dozens of military leaders here and abroad thanking Kneitel for providing them with critical information often weeks in advance of their normal sources.

Tommy's "nose for news" has developed over a forty year career as a journalist and electronic communications expert spanning the fields of broadcast radio, broadcast TV, film, CB Radio, Amateur Radio, scanning, shortwave radio, cellular and cordless phone communications, satellite communications, surveillance, survivalist communications, marine radio, pirate radio and military communications.

His new position will enable him to cut back on his daily work load while still allowing him to provide conceptual, editorial, technical, and literary input to the magazine he's been identified with for thirteen years. He'll be working closely with Gysi to ensure not only an orderly transition to the new Editor, but also the continuance of the character and spirit of Popular Communications that have made it a special part of the lives of its 70,000 readers world-wide every month.

Gysi, N2DUP, has served as a contributing editor on scanning topics since shortly after the magazine's inception and has been a professional journalist for 21-years. Most recently he served as news editor of a daily newspaper in the Midwest. He has been writing articles on radio since his days in junior high school and has served as editor of several radio organizations' journals.

Like Kneitel, Gysi also has an extensive knowledge of and interest in the various aspects of the radio hobby and is active in monitoring and/or transmitting on almost all bands from "DC to daylight."

"I'm excited about being associated with 'Popular Communications' in my new role as editor and look forward to learning a lot from Tommy as he continues to be associated with the magazine," Gysi said. "I look forward to hearing from our readers so that we can continue to offer a monthly package that is timely, of interest and is accurate as

well as being fair. The readers of 'Popular Communications' are the best resource for our editors, columnists and writers."

From: ag365@freenet.Buffalo.EDU
Message-ID: <3pkho7$12o@vixen.cso.uiuc.edu>
Source record: 31778

Reply-To: ag365@freenet.Buffalo.EDU (Carl K. Gorney)

*Well,finally the Buffalo News deigned to publish the winter Arbitrons (in an article written by Tony Violanti on Wednesday),and only the top 10 at that. It made note of WMJQ(Q102)'s huge jump in the book;when PD Rob Lucas (also half of its AM drive show)was asked why,he said it was "consistency... We've had the same staff for a year and a half. People know what to expect when they tune in." Lucas also called Q102 "the mommy station...We want all the moms out there,and we try to be a reality-based station with an edge. We won't put you to sleep."(BTW,Tony,Q102 is hot AC,_not_ AC as you put it. They do play those artists you mentioned,but also have a good amount of recent hits-which,odds are,might also be heard on WKSE(Kiss 98.5)). Also,Q102 placed #2 in 18-34,with 10.4(up 2.5).
-Also of note:CKEY(FM 101 The Planet)tracked up in 18-34 with a 6.4(up 1.8),despite lousy audio processing and a staff that sounds(with 1 or 2 exceptions)like MTV rejects.

*Items from WWKB(1520;The Big 1520):
-Alan Pergament reported in his Sports on the Air column in last week's News that a number of New York Yankees fans are still complaining to GM Terry Rodda about his decision to drop the games as of the end of last season. Rodda says it was an economic decision,noting that even though the Yanks charge $100/game,KB wasn't able to recoup the money from advertisers-plus it lost out on selling $1,500 in ads during the 3 hours the games were on. One more thing: they also got poor ratings. KB is contracted to carry Tom Leykis' show through August(which has been tracking upward slightly through the last 2 books 12+), and it has to carry several Buffalo Bisons(American Association-triple A) games,so as not to saddle WGR with the burden.
-The city's lone championship team,the Buffalo Stampede(Roller Hockey International)will have their away games broadcast on KB. No idea if home games will be heard. Last year,the team had no radio coverage-period.(Then again,neither does the Buffalo Bandits of the Major Indoor Lacrosse League-at least,not full-time.)

*The rights to the Buffalo Sabres are now offically up for grabs,as the team's 5 year deal with WGR(NewsRadio 55)ran out with the Sabres' ouster from the playoffs at the hands of the Philadelphia Flyers. Sabres President/CEO Doug Moss has said that all departments will be looked at-and that includes the broadcast department. One plan being looked at is moving radio play-by-play man Rick Jeanneret to the TV side,replacing John Gurtler.

Radio coverage looks as follows:

Bills-WBEN(NewsTalk 930)has them for 3 more seasons,paying about $1.2 million/season.
Bisons-most games are on WGR,and will probably reamin so as long as the

Rich family owns them. WWKB is used as a "shadow" station for
conflicts and some daytime games.
Sabres-up for grabs. Rich and River City(WBEN/WMJQ & WWKB/WKSE)would seem
to be the major-maybe the only-bidders.
Bandits-none
Blizzard-the city's NPSL indoor soccer team has had its games on WWWS-AM(1400;
now urban oldies)
Stampede-see above.

*Finally,WKSE is having their "Kiss the Summer Hello" bash Memorial Day
at The Pier(a downtown bar,located on the waterfront-or what exists of it).
Among those performing:Blessid Union of Souls,Stevie B,Little Susie,Nicki
French,Firehouse,and Jamie Walters(of 90210). Also,the wrapup of the Free
Money,Free Wheels contest-where one person gets a new Ford Mustang convertible.

From: chris@terminus.wccs.saic.com
Message-ID: <3pkho8$12p@vixen.cso.uiuc.edu>
Source record: 31779

Here's the latest in radio waves for San Diego:

Tanks for the memories: Wednesday night, an unemployed plumber [and wacko] stole an army tank, and as scripted for television, did a 23-minute rampage on the streets of San Diego.

Where I live in North County [Oceanside] the best reception of San Diego base AMers is KFMB and KOGO. KFMB did, in my view, the best news reporting. While I can report that KSDO [1130] covered the event as well, their night time signal is confined to San Diego proper. Radio w/pictures KUSI showed the body of the man being lifted out of the tank -- and his 'privates' were displayed on tv. [well, it was a army tank . . . .]

A fellow listner pointed out the following to me: XETV, Ch. 6, from Baja California, Mexico, is filing a "protest" against KSDS 88.3 FM. The jazz station wants to increase ERP, but with cross-nation station XETV near the same frequency, it could be years before this could happen. The same agreement that could allow KKOS [Carlsbad] to move from 95.9 to 95.7 also binds border stations in radio and television. This could take an extra long time: dealing with the FCC, and also a bi-nation committee. then again, it could happen fast.

As reported last week, Ted Leitner's smiling face for his afternoon radio show is on billboards in SD county. Now, Ted has T-shirts available. The popular KFMB AM/TV and Padres sports announcer has been on the air for three [3] months.

Web hunting: Try the KCBQ homepage:
ftp://ftp.cts.com/pub/lipis/kcbq.html

It's good, no under construction signs, and all links WORK! Hats off to Bill Lipis for having and hosting a good page.

Please note my new e.mail address: chris@terminus.wccs.saic.com

This past week radio station WVRV (The River 101.1 FM) has made a few changes in air staff. JC Corcoran was let go after the station was said to have not picked up the option on a new contract. What does this have to do with Chicago DJ's? Well... one of the new air personalities at the River is Debbie Armstrong who apparently comes from the Chicago area. I would like to know where she was working in Chicago and how she did. It was mentioned that she had worked in Cape Girardeau MO in the past as well and for an odd reason I think she might have been a class mate at Southeast Missouri State University as well as an air personality on KRCU the campus radio station. Oh yes, I did try and call her during her shift but was met with a busy single almost everytime. She is doing midday at the River for those that might know her and want to know what she is doing here in St. Louis.

Dear Shaun...
For a start on listing non-commercial FMs, try your local public radio station or the Corporation For Public Broadcasting for a copy of the annual CPB directory. This will give you all the CPB-qualified public radio stations (NPR, PRI and non-net affiliated). There are 500+ of them around the country.

This will NOT get you the non-CPB stations, of which there are at least five in the Rochester, New York market alone...but it's a start. Most of the non-commercial, non-CPB stations are owned by school districts, colleges and universities (like WRUR and WITR here at the University of Rochester and the Rochester Institute of Technology). Maybe college catalogs might be a place for you to start?

RE: ENERGY 1200 Death Watch

Over the past 2 years, the AM Market in Ottawa has died. (Just Like every other major city in North America!). I spent 2 years doing Afternoon Drive at CIWW (Oldies 1310) and during that time I saw 580 CFRA switch from Oldies to Talk. CKCH 970 go dark. 54 Rock flip to FM and Oldies 1310 turning on the sattleite at 10am! It's amazing that ENERGY 1200 has hung on this long! Since CKKL (KOOL FM) has starting playing "The Hits" on FM, it has killed ENERGY's TOP 40 Format!

And you talk about rumours! When I was working at Oldies, we we ere sure they would go country. And yes, there is a Country FM in Ottawa. CKBY, Today's Hot New Country, which usualy places 1st or 2nd in the Market. Then the rumour of talk surfaced, Hot Talk, Oldies, Polka, Christian... You name it, it's been talked about! My guess is ENERGY will change format soonThey may have been waiting to see what happened To CIWW. If they dropped Oldies, maybe ENERGY would have picked it up. There's talk about an alternative talk format, and maybe that's what will happen. But then again, who know's!

You know what's interesting about this entire dialogue?
We're talking about Morning Edition, a program that (whatever subjective impressions we may have about the unspoken political allegiances of its participants) bends over backwards to give airtime to all parties and all sides of an issue...and we're calling it liberal.
Since when did fairness become somehow left of center?
If you can fault Morning Edition for anything, it is a refusal even to challenge some of the most mendacious statements of the people it interviews and invites to comment, on purely factual grounds, for fear of being perceived as having a viewpoint. Their other signature shows, like Talk of the Nation and All Things Considered, are on an equally tight leash. Whatever those who want to try to commercialize public broadcasting and pick it up for a song may try to tell you, bias is NOT one of their problems. Then again, when radical conservatives have a virtual monopoly of commercial talk radio, I suppose anything that isn't radical-right sounds left by comparison, just by refusing to advance a consistent viewpoint at all.
(Fairness and balance drives the radical right nuts by breaking their monopoly of the dialogue, but that's another story...)

: show...
: sometimes he has to use the delay...sometimes it's damned funny.

When I did talkshows I often didn't have a screener because there wasn't anyone available from the broadcast school we used. I took them totally hot. Only once did I have to use the delay, but only because of a slip of the tongue on a *screened* caller. I could actually have let it slide because it was just vernacular, not cursing. I had no problem with people trying to pull stuff on me, once they realized I'd play fair with them, and dump them instantly if they tried anything nasty. From what I've heard I think most talkshows are over-screened.

Minnesota Public Radio announced today (including on-air news reports beginning at 3:00 PM CDT) that it will cut 36 staff positions, 13% of its employee force, effective immediately.
The 28-station chain of public radio stations throughout Minnesota, (and also affiliates in Iowa, Wisconsin and South Dakota) survived efforts in the state legislature to cut its funding earlier this year, but president Bill Kling said in today's announcement that the reasons for the layoffs are
1) expected cuts in federal funding that will mean a $500,000 loss in operating revenue,
2) Higher postage costs (wait...)
3) Higher costs of paper, expected to rise by 55% for MPR's profitable printing and catalog subsidiary, Greenspring.

Greenspring puts out upscale mail-order catalogues including A Prairie Home Companion catalog, Seasons, Wireless and Signals, and the postage and paper costs are expected to cut the amount of financial support from Greenspring from its current $5 million a year to $3 million, according to today's announcement.
Kling said, in a statement broadast this afternoon, that this is the first time in Minnesota Public Radio's 28-year history that it has had to lay off employees. Some of the jobs are at affiliate stations, but many are at its downtown St Paul headquarters.
Earlier this year during the state budget debate, it was a source of some controvery that president Kling's known salary is modest for his position, a published $67,000 (according to a report in February 26 St Paul Pioneer Press newspaper) but he gets compensation from Greenspring estimated at "at least" $200,000. He doesn't have to report that non-public revenue, but according to February's newspaper profile, the only stockholder in for-profitGreenspring is the Minnesota Communications Group, "an umbrella entity created by the nonprofit MPR to protect the name, tax exempt status and revenue-raising ability of the radio station by separating it from Greenspring."

For immediate release
May 19, l995
Contact: Ginger Sisco (612) 290-1240

MPR ANNOUNCES WORKFORCE REDUCTION

St. Paul, MN ... Facing a major reduction in contributions from the Greenspring Company and cuts in federal support, Minnesota Public Radio (MPR) announced today a 13 percent reduction in staff as part of a significant belt-tightening for its l996 fiscal year (FY 96) beginning July 1. MPR will reduce its workforce by 36 positions due to a decline of nearly ten percent in MPR's annual budget.

"As an organization which has enjoyed tremendous growth and community support for 28 years, these workforce reductions are very painful," said MPR President Bill Kling. "However, we have a long history of balanced budgets at MPR and it was clear that if we tried to postpone these budget measures, employees, listeners and the entire MPR network would face even more serious consequences in the future."

The Greenspring Company is an independent for-profit company established by MPR in l987 and includes businesses involved in catalog marketing, publishing and broadcast services. "The Greenspring Company has contributed more than $34 million to MPR since l987 and is a national example of how public broadcasting can diversify its revenue base," said MPR Board Chair Susan Boren. "In the last year, however, the catalog and publishing companies of

-more-

Greenspring have experienced industry wide cost increases in paper and postage of 55 percent and 15 percent, respectively. While paper costs are cyclical and will eventually stabilize, these significant cost pressures have forced cost control measures at Greenspring and a reduction of the contribution to MPR from $5 million to $3 million for FY 96."

The well publicized congressional proposals to reduce federal funding of public broadcasting will mean an estimated $500,000 cut in the FY 96 MPR budget. Congressional leaders are still calling for a total elimination of federal funding for public broadcasting in FY 98. While support from members and program underwriters is up for this year and is projected to increase in FY 96, the reductions in other revenue will result in a net decline of $2.2

million.

"If experienced individually, an increase in paper costs or postage or revenue reductions by Congress would be a lot more manageable," said Kling. "However, it is the combination of all these factors at the same time that requires MPR to reduce staff in addition to the other cost containment measures we have implemented."

MPR is the largest public broadcasting radio system in the United States and will continue to rank as the largest system, even after FY 96 budget reductions. Over the years, MPR has won hundreds of awards for the quality of its classical music programming and in-depth news coverage. "Even in this difficult funding environment, we are absolutely committed to doing everything possible to protect the high quality of programming which has been built through the loyal support of our members and funders," Kling concluded.

Salty Brine is a legend in Rhode Island radio but he also became famous for TV shows.

When I was a kid in the early 60's Salty broadcast a cartoon show called "Salty's shack" or something like that on channel 12 in Providence.

He was the host of the show and would introduce the cartoons: Popeye and the like.

Ch. 12's signal boomed into Massachusetts in those pre-cable days.

He was a great announcer and personality. In fact, I have a picture of me and Salty at the now defunct Edaville Railroad Museum which was taken around 1959 when I was six.

His son is a well know radio personality on country station 105.7 which was formerly known as WVBF in Boston. He is Wally Brine and is paired with big voiced jock Loren Owens (loren and wally show).

The thing I remember most about Salty's tv show was that it came on around 5pm every day when I would be starving. the show was sponsored by Hostess Cupcakes and Salty made a big deal out of opening the cupcakes, Twinkies, etc. in front of the camera and oohing and aahing about how good they were !

In the 1970's I was an announcer in Providence on All News 79 WEAN and many of my fellow announcers fondly remembered Salty as being a great guy. His newsman was a big voiced guy named Bud Thaves who legend has it, continually was offerred news jobs at the Big 68 WRKO in Boston, but always turned it down ! Not too many people turned down Bill Drake in those days.

Greetings from the City That Never Sleeps!!!!

The first Arbitrend is out! Here's a look:

1. KISS-FM/WRKS Down slightly Urban A/C
2. Hot 97/WQHT up slightly Dance CHR
3. WCBS-FM Up a half a point Oldies
4. WABC Up slightly Talk/Yankees
5. Z-100/WHTZ Steady Modern CHR
6. WSKQ down slightly Spanish
7. Lite FM/WLTW steady Lite A/C
8. WINS down slightly News
9. WPLJ steady Hot A/C
10. WCBS-AM down slightly News

25-54 - KISS-FM, WCBS-FM, WSKQ, WLTW, WPLJ, WXRK
AM Drive - Stern, WINS, WCBS-AM & KISS-FM tied

Nothing else noteworthy in the Trends.

As has been posted recently, Sonny Bloch's financial talk show has been bounced from WOR-AM. It's been picked up by Westchester station WRTN-FM.

WBLS has made some on-air changes--Sergio Dean is back to PM Drive, and WRKS alum Chris Welch moves to 7-10 'Night Moods' slot. Geronimo's future has yet to be determined, Hollywood has left, and John Robinson moves from early afternoons to weekends.

WNEW-FM newsperson Donna Fiducia is bounced in favor of Shadow News Service. She's moving to Channel 4 for helicopter traffic in the mornings.

That's all for now--

Tripp Rogers

Q102 is claiming in their TV ads to have "grown up", but I'm not sure what they mean by that. Aside from their time-honored tradition of adding records months (or even years!) after they have reached the national top 10, they have phased in a newer policy of heavily editing records in a rather arbitrary way. I have been all around the country and have never heard a station edit a good 25% to 30% of the songs on its playlist the way they do. Aside from deleting some minor sex and drug references (and leaving others in), they remove anything even approaching rap or guitar-rock. For example, Sheryl Crow's "This ain't no disco..." intro is deemed rap. Does anyone here *not* see the distinction between Sheryl Crow and Ice Cube? The edits are often accomplished via a very bad splice, throwing off the rhythm of the entire song (and certainly confusing anyone who was singing along)!

I question whether "grown-ups" really care to hear their favorite songs sliced to bits with this amateurish technique. (If Q102's recent ratings are any indication, they don't.) Maybe it's just par for the course here in Censornati, but I hope that it doesn't spread to other cities.

> Things don't sound real good right now on the airwaves of Cincy,
> but I guess Jacor thinks things are great because they have moved
> all of the pieces on the board until they are now their own
> competition.

Jacor is currently attempting to force its hated classic-rock rival "The Fox" out of the format by putting "The Point" up against it. So far, the ratings show the tactic is working -- the Fox and the Point were both at a 2.7 last quarter. If they succeed in doing this, they will have total control over rock radio in Cincinnati. (They own WEBN (AOR) and WPPT (The Point/rock oldies) and LMA WAQZ (Channel Z/alternative). Q102 is now out of the picture as far as rock is concerned.) Jacor's stations are generally entertaining and competitive, but I worry that this will change after they achieve their goal.

With rock, N/T, country, and AC stations all co-owned, there is no longer any room for the "little guy" in Cincinnati radio and that is sad.

WKRQ sparks my interest quite a bit. I'm looking at their playlist's top 30 songs in Billboard Top 40 Radio Monitor from about a month ago...and it seems they actually ran/are running songs like Brownstone's "If You Love Me", Real McCoy's "Another Night", Van Halen's "Can't Stop Loving You", and even Green Day's "When I Come Around"! Although we've got a sort of "Rhythmic Hot AC" here in Philly (they'll play MoTown and disco stuff, and the usual sappy '80s Whitney Houston type of stuff, right along side of Real McCoy, 2 Unlimited, Black Box, and C+C Music Factory!!), it would be interesting to see one of our stations do a more adult-leaning/Mainstream CHR/Hot AC type of format. I'm extremely interested to see just how far an "Adult" radio station will go... Live's "Lightning Crashes" on Washington's Mix 107.3? Corona's "The Rhythm Of The Night" on WKDD Akron (a station designated as "AC")? VERY VERY interesting!! Though, I guess it just depends upon whether a particular record tests well in local research, or not.

I can just hear it now: "It's 'When I Come Around'...Here comes Green Day... on B.101-point-1"

I better be careful what I 'wish' for -- I've already called too many format/ focus-changes in the past (2 of which happened just a few weeks after I posted
about them here)! Coincidence?...Or, were they really *that* obviously impending?? Find out on the NEXT "X-Files"!! :)

Well, if anyone noticed you'd be in hefty-fine city.

At WBAI in NYC we used to have a jokester who snuck in to do an EBS test or two and instead of reading the "if this had been an actual....." script played a cart, which had the entire script - but it was sung by a chorale. The result was rather amusing. But it turned out to be legal and although the FCC "frowned" on this they couldn't move on it.

The ever jittery station management told him to knock it off.

Reply-To: jeff560@aol.com (Jeff560)

The accidental activation of the Emergency Broadcast System, which has been discussed here recently, occurred Saturday morning, Feb. 20, 1971. Here's a newspaper article with some details. --Jeff Miller

'NUCLEAR ALERT' PROVES FALSE
by Paul L. Montgomery
New York Times, Feb. 21, 1971

A "human error" yesterday put Americans on an emergency alert of the type that would be used in a nuclear attack.

It was 40 minutes before the error was cleared up at the National Emergency Warning Center at Cheyenne Mountain, Colo.

An employe at the center, in a confusion over punched tapes that are prepared in advance, put on the wire to the country's radio and television stations at 9:33 A. M. a message saying that the President had declared a national emergency and that normal broadcasting was to cease "immediately."

The message contained the code word "hatefulness," which was to be used only in the event of a real alert.

In the subsequent turmoil, a number of stations around the country went off the air after telling listeners of the "emergency." Others quickly checked and found that the transmission was an error and continued normal broadcasting.

"I saw the authenticated message and thought, 'My God! It's Dec. 7 all over again!'" said Chuck Kelly of WWCM in Brazil, Ind., who took his station off the air for 22 minutes.

The National Emergency Warning Center frantically tried to cancel the message several times, but it was not until 10:13 A. M. that it found the proper code word--"impish"--to indicate that the cancellation was authentic.

The false alert did not affect any of the country's military arms because the error originated with the office charged with informing civilians of impending disaster. However, Secretary of Defense Melvin R. Laird ordered an immediate investigation.

Louis I. Smoyer, chief of the warning center, said that the error occurred when a civilian operator at the center put on the wire a tape for a real alert instead of a test tape.

The operator, W. S. Eberhardt, who has worked 15 years at the center, said afterward: "I can't imagine how the hell I did it."

Because the false alert looked exactly like the real one, and because many broadcasting stations did not follow the procedures called for in a real emergency, the incident raised questions about the effectiveness of the civilian warning system.

A spokesman for the Office of Civil Defense in Washington, asked if the system would work in a real emergency as it did yesterday, replied, "That's one of the things I've always wondered about."

The warning center is part of the nuclear alert complex in the base of Cheyenne Mountain, 10 miles south of Colorado Springs. The center, protected by thick concrete and mounted on springs to allay nuclear shock, is operated by the Office of Civil Defense. Communications in the center are staffed by civilian employes of the Army Strategic Communications Command.

In an actual nuclear alert, the warning of impending attack would come from the North American Air Defense Command (NORAD) in the mountain, which operates the radar warning systems ringing the United States and Canada.

The warning would then be transmitted to the American and Canadian Joint Chiefs of Staff to the Governments of the two countries, to the Polaris missile fleet, to the Strategic Air Command, and to the National Emergency Warning Center, which is the link with the civilian population.

Under Civil Defense strategy, the radio and television stations are the primary means of warning civilians that an attack is impending.

The warning center is directly connected into the Associated Press and United Press International radio news wires, which go to the country's stations. The circuit is tested at least twice a week, and there is an elaborate system of codes so that what happened yesterday supposedly could not happen.

Every three months, each radio station is sent a list of the code words for each day that must be included in a message from the warning center if an actual alert is in progress. There are also coded words to be used in unscheduled tests; the word for this month is "elated" and the word for last month was "undressed."

For authentic messages, there are two code words--one to begin a message announcing an alert and another to end it. The pair for Feb. 20 was "hatefulness-impish." Others from the last few weeks include "lindberg-measure," "puttyroot-barbizon," "wingfooted-grahamflour" and "manhole-sergeant."

There are two tests of the wire scheduled each week--at 9:30 A. M. Saturday and 8:30 P. M. Sunday. These messages are preceded by the words "Testing Emergency Action Notification System" and are followed

by a message announcing the test.

To keep the stations on their toes, other unscheduled tests are also sent using the test code word--"elated" this month--instead of the authentic one.

Apparently, the messages for both tests and real alerts are prepared in advance at the warning center on punched tapes--paper strips with perforations that reproduce message on teletype machines connected to a transmitter. What happened yesterday was that the operator sent the tape prepared for a real alert instead of the test.

On receipt of a real alert, stations are supposed to announce immediately that the President has directed an "emergency action notification" and to go off the air unless they are "key" stations. These stations, one in each area, are supposed to keep broadcasting news bulletins, emergency instructions and the like.

What happened yesterday was mostly confusion. Many stations apparently did not know the procedure, others listened to see if competitors had gone off the air, some used independent means of checking the authenticity of the alert and some, realizing that a test was scheduled for 9:30, ignored the warning.

"I thought I was going to have a heart attack trying to open that damn envelope [containing the code words]," said David Skinner, news director of WEVA in Emporia, Va. "I haven't felt that way since John Kennedy was killed."

"This made us just angry as hell," said a spokesman for KIXL in Dallas, which did not go off the air. "You can't play around with things like this. If we had gone on the air and broadcast the alert as being from the President of the United States, some old people would have checked in right then."

At least two stations in New York--SYSL [sic] in Buffalo and WBNR in Newburgh--went off the air. Most, including the network stations, continued normal broadcasting after checking the alert. WQXR here did not receive the alert because the paper in its teletype machine was jammed.

Larry Best of KXEL in Waterloo, Iowa, gave this account:

"I knew it [the test] was coming across. But I didn't pay much attention to it until I went to rip it off the wire. Then I noticed the message authenticator. It was the right one, all right. It kind of shook us up a little.

"We immediately left the air and went into the instructions for emergency programming and played the tape we have of it. Immediately, in seconds, all three telephones in the office were jangling like mad."

The Office of Civil Defense said it had no estimate of how many of the nation's 5,000 radio and 800 television stations had responded to the alert.

For those listening to stations that did respond to the "national emergency," its seemed that the moment of ultimate dread had arrived.

"I was absolutely terrified," said Mrs. Peter Ori of Chicago. "It was so authentic. I just knew we were at war and the President would come on and say what had happened."

In Melbourne, Fla., a woman was driving when she heard the alert. She pulled her car to the side of the road. "I didn't do anything," the woman said. "I just sat there being scared."

Many stations and civil defense offices were overloaded with telephone inquires from anxious callers. Col. Gordon Ockenden, command director of NORAD for the day, said he had had many calls from generals in Washington asking about the alert.

A back-up part of the warning system--a direct link from "key" stations through their networks to the White House Communications Center--came into play during the crisis. Stations using the link were told, "Nothing has come from the President." This is how many network stations were saved from responding to the "emergency."

Kenneth Miller, chief of he emergency communications division of the Federal Communications Commission, said it was optional for stations to shut down without White House confirmation through the key stations.

Apparently, soon after the alert was sent out, the National Warning Center realized the error. A message was sent saying "This is the National Warning Center--Cancel EAN (Emergency Action Notification) tape sent at 9:33 EST." However, since the message did not have a code word, stations should have ignored it.

At 9:59, the center tried again with "Message authenticator: Hatefulness/Hatefulness--Cancel message sent at 9:33 EST." However, since hatefulness was the code word to initiate the alert, not end it, stations should have ignored that message, too.

At 10:13, the center at last found the right formula: "Message authenticator: Impish/Impish--Cancel message sent at 9:33 EST."

When the crisis was over, the Pentagon released this statement:

"The Office of Civil Defense is currently investigating the circumstances surrounding the transmittal of the erroneous message. The National Emergency Warning System is located within the NORAD Cheyenne Mountain complex but is not a NORAD function. It is operated by the U. S. Army's Strategic Communications Command. this is a civil defense action and not a military one."

Mr. Smoyer, the chief of the warning center, who was besieged with calls at the center, later reflected on the day.

"We just didn't see that an erroneous message could be transmitted," he said. "It damn sure won't happen again. I've got to have time to sit up here and figure out how to make this thing fail safe."

MESSAGE AUTHENTICATOR: HATEFULNESS/HATEFULNESS
THIS IS AN EMERGENCY ACTION NOTIFICATION (EAN) DIRECTED BY THE PRESIDENT. NORMAL BROADCASTING WILL CEASE IMMEDIATELY. ALL STATIONS WILL BROADCAST EAN MESSAGE ONE PRECEDED BY THE ATTENTION SIGNAL, PER FCC RULES. ONLY STATIONS HOLDING NDEA MAY STAY ON AIR IN ACCORD WITH THEIR STATE EBS PLAN.

[Caption: The original message, as transmitted by national warning center in Colorado.]

Well, no changes occurred yesterday. It appears that what they were counting down to was a "more music weekend", with 120 songs in a row Friday, Saturday, Sunday, and Victoria Day Monday, starting at 3:00pm each day.

The promotion for it seems to have been strangely done (very low-key and vague).

Still, the rumours abound about Energy 1200, but I think they may just hold out for digital radio. The first tests of L-band digital radio in Ottawa will be taking place this summer, and it is expected to be made available to the general public early next year (although the radios are expected to be expensive to start). Every current AM and FM station will have a spot on L-band, and that will eventually give them all a level playing field.

4004. Tuesday 5/23 OKC Federal Bldg. IMPLOSION - RADIO SILENCE

Newsgroup: rec.radio.broadcasting
Date: 1995-05-21 00:00:00 UTC

Source record: 31712

On Tuesday, May 23rd, 1995 The Federal Building in Oklahoma will be 'imploded' sometime during the morning possibly 10AM.

ACTION> As a tribute to victims and memorial - US radio could organize itself and unilaterally observe a moment of silence during the exact moment of implosion. As a special tribute to the United States that we all love, "GOD BLESS THE USA" by Lee Greenwood could be played simutaneously on AM - FM - SHORTWAVE immediately following the implosion.

The world will be watching and listening. This would be a historic show of unity for everyone to witness.

Everyone is talking about the INTERNET Good or Bad. Radio has been taking some hits recently and this would be a display of co-operation and unity that had it's roots right here on the Internet.

We havent much time until Tuesday 5/23. LET'S DO IT!

THE WORLD WILL BE LISTENING.....

Hi. I am a NYC based jazz musician with a recent jazz piano trio CD
just released on a small independent label in Nashville. I would like
to have the trio CD played on as many stations as possible and would like
to do a radio interview to promote my CD and band...perhaps even a live
concert on the radio. Is there any one out there interested in showcasing
this idea. Also, if you would like a CD for radio airplay please leave
message. Thanks. Michael J. Stevens

>Are there many (if any) talk shows outside of small markets that
>don't use some kind of call screening process?

I don't know if we fit your criterion, but at WBAI in NYC, a "community radio station" at 50KW erp, we just trust the on-air person, or the engeineer on duty, to hit the delay button in time. We not only don't have personnel for doing the screening, we don't even have any kind of a set up that would allow screening to be done.

So everybody who takes calls on WBAI takes them "raw."

4009. RE: Limbaugh's screening process

Newsgroup: rec.radio.broadcasting

Reply-To: bblomgren@aol.com (B Blomgren)

Several of the voices on WBT here in Charlotte go without screening.
However, it looks like some of the callers abused the process a tad, and
will end up getting screened as a result. (They ask people to call at
most once a week... but some folk insist on calling 4-5 times a week..
sometimes 2-3 times in one day...)

Historically, the attitude has been "if you get in, you get on".. but that
is changing because of the problem callers.

>severe weather hits.

The weather bureau it seems to me has been taken over by old women.

It it rains, they warn you about floods; if there's a wind, they warn
you about trees and wires falling down; if there's thunder, they warn
you about dangerous lightning and taking shelter in the basement; if
there's cold they warn you about frostbite; if there's heat they warn
you about drinking liquids.

They do this EVERY DAY.

If you listen very attentively, _sometimes_ you can hear a forecast,
albeit a useless one. They give you the measurements that the computer
is forecasting, like pressure, not whether it will rain in an hour.

About the only reason to listen to them any more is the guy giving
the agricultural outlook (warnings about heat cold dryness and wetness) who
thinks that foliage is foilage when he reads it, on the tape loop.

The same calls can't be used on the same band (although they can be used in separate cities on separate bands - viz: WMAX-FM Irondequoit NY and WMAX(AM) Bay City MI). But...Cleveland's 107.9 is legally WENZ(FM). Amazingly, the WEND calls were sitting there unused when Charlotte went after them.

>Bob - I believe WTHT-AM was on 1230. A friend of mine once had a radio
>with push buttons and stickers for WTHT, WTIC and three others. I never
>knew there was a WTHT-FM. The Hartford Times went belly-up almost 20
>years ago.

I once knew the story...sorry I no longer remember it all. Here are the fragments I do recall...

WTHT combined with another station (I believe at 1410) and merged into what became WPOP. The station was owned by the Hartford Times, which was the afternoon paper in the Insurance City. The morning daily, the Courant, is still publishing.

Bill's guess at 1230 is probably accurate because WINF in Manchester (are they still around...) later took that frequency. There might have been a bit of a problem with WWCO in Waterbury at 1240 (where Bill and I worked together ten years ago) but if memory serves me, WWCO was then at another spot on the dial.

Hope that helps...

hi, there! i'm currently working on a project with other stanford students regarding music and the internet. is there anyone out there who can answer the following questions, or perhaps refer me to the approriate people and resources?....
* How do radio stations acquire their libraries?
(I understand that radio stations work with record companies' radio promotions people, but does that relationship apply for both old and new music? In other words, if a radio station is starting from scratch how can it get all of its music?)
* Do/can the music sources give pre-digitized music?
* Do pre-made lists exist concerning how much of what kind of music to buy when buying a large number of titles?
* Does a cataloging system exist for sale?
* How do radio stations pay royalties and to whom?

thank you for your time.
sincerely,
ardith ibanez

I realize that our ASCAP/BMI/SESAC licenses allow us to use licensed
music as entertainment but not for commercial beds. I have seen
conflicting opinions as to whether we may use licensed music as
background for public service announcements and as theme music for
specific programs. Can someone help us out here?
My gut feeling is that it is technically a violation but everybody does
it anyway. I don't really like that answer; as an educator I am
uncomfortable with telling my students to something that is illegal.

The shakeup began when Jacor Communications, owners of WLW-AM 700 and WEBN-FM 102.7, purchased WKRC-AM 550 in the latter part of 1992. Disregarding the historic WKRC call letters, which were over 70 years old,

Jacor changed the calls to WLWA. They planned to operate 550 as a sort of "WLW Lite", with lighter topics, and they actually identified the station on the air as "550 WLW". Ratings were unimpressive. In April of 1994, a three- way deal was worked out with Jacor, Pathfinder Communications, and Chuck Reynolds, a local attorney. Jacor would purchase Pathfinder's WIMJ-FM 92.5, and Reynolds, who had previously purchased WSAI-AM 1360, would purchase Pathfinder's WCKY-AM 1530. Reynolds would also purchase WAQZ-FM 107.1, which had been operated by Jacor. Jacor would have first rights to all of WCKY's programming and the WCKY call letters. Jacor would also enter into a "joint sales agreement" with Reynolds, whereby Jacor would handle all advertising and promotion of sports programming on Reynolds' stations. This deal resulted in the WCKY calls and most of its programming moving from 1530 AM to 550 AM. The WSAI calls and its adult standards format moved to 1530 AM. 1360 AM became WAOZ-AM, a Radio AAHS affiliate. I don't know what the problem with their signal is, but it is just barely audible here, even in the daytime. The deal also resulted in 92.5 FM changing to WPPT-FM with an ARRO format. Three competing stations contested Jacor's purchase of WPPT with the FCC, but the sale was approved last week. Regarding 96.5 FM, this station no longer has anything to do with Jacor. WYGY-FM 96.5, "Young Country", is owned by the owners of WUBE-FM 105.1. BTW, the WKRC calls survive on TV as the calls of channel 12. I hope this clears up the very confusing Cincinnati radio situation.

RG223U 50 3.1 16.5 66 " 1.9
RG225U 50 7.5 5
RG9U 51 1.6 66 " 5
ethernet 50 1.2 78 (foam) 0.6
22B/U 95 twisted pair 2.1 66 (poly) ?
twin lead 300 0.8 <-worse when wet! 80 (poly) ?
8281 75 9.2 2.9
9913 50 4.5 0.6
9914 50 6 0.6
8218 75 20 0.6

these are all the RG#'s I found. The attenuation curves generally follow a straight line when drawn on log-log graph paper. The slope is such that a coax with 2dB at 50Mhz will be 0.8 at 10Mhz. Most coaxes have about the same slope. So, one need only look at the same freq when comparing attenuations when selecting which coax you're gonna use from under the shack table (not strictly true, but close enough for "goverment" work! :-)). Voltage ratings: note that foam dielectric cannot take as much voltage as solid dielectric.

4023. Re: Cuban Radio

Newsgroup: rec.radio.broadcasting
Date: 1995-05-22 00:00:00 UTC
From: "Seifert, Rick" <rseifert@usia.gov>
Message-ID: <3ppf88$3b8@vixen.cso.uiuc.edu>
Source record: 31730

>Can anyone tell me what is the station ID and frequency of a station
that
>broadcasts what sounds like Cuban national news.... I picked it up
around
>the low 800-khz region at 9:15 pm EDT in Chapel Hill, NC.... anyone
heard of
>this station?

I periodicaly monitor Cuban radio status remotely from Washington, D.C.
via receivers in Marathon, Florida. The three main Cuban networks are
Radio Rebelde, Radio Progresso and Radio Reloj. All operate exclusively
below 1mhz. The closest stations to 800khz are:

Radio Progresso 730khz 10kw Isla de Juventud
Radio Progresso 740khz 125kw Camaguey
Radio Reloj 760khz 5kw Havana
Radio Progresso 880khz 30kw Pinar Del Rio

A regional station, Radio "W" operates on 840khz from Santa Clara with
5kw.

The Radio Reloj transmitter on 760khz is the most likely candidate. This
station is often reported in eastern US..

Be advised that Trans World Radio still operates their 500kw transmitter
on 800khz from Bonaire. While they are a religous operation, they
occasionaly carry news .

The Radio Reloj transmitter on 760khz is the most likely candidate. This
station is often reported in eastern US..

Be advised that Trans World Radio still operates their 500kw transmitter
on 800khz from Bonaire. While they are a religous operation, they

occasionaly carry news bulletins in various languages, including spanish.

This transmitter is an easy "catch" in the eastern and central US,

except the Detroit area.

I noticed this weekend that XTRA-104 (the "new Seventies" station") has changed the call letters of its recently-acquired Fredrick, Md. "half".

What used to be WZYQ (103.9) is now "WXVR, Braddock Heights-Fredrick".
Does anyone know if the co-owned "82Q" (Satellite-delivered country format) still holds the "WZYQ" calls?

Also: XTRA-104 has extended its popular afternoon drive feature "Car-Tunes" to mornings and middays. Listeners using cellular telphones from their cars deliver short traffic reports from wherever they are, and in return, get to request a song.

Source record: 31733

Your last remark about L-Band digital is intriguing, but I wonder
if it's going to happen.
It's becoming increasingly clear that the US broadcast industry
will push the FCC to go to in-band, on-channel digital radio using
the current AM and FM bands. Among other things, IBOC allows
you, first, to convert to digital at very low cost, a few grand for a
digital exciter installed in your existing transmitter for starters, then
digital studio equipment on your own schedule. It also permits
simultaneous transmission of digital and analog signals out of the
same transmitter on the same channel, since the two do NOT
interfere with each other. This means you stay where you are, on
the dial position where everyone knows you, and your analog lis-
teners stay with you indefinitely---while people can buy digital re-
ceivers and pick you up where they've always found you, but with
crystal clarity and no interference, whatever band you're on. (Like
FM, digital signals are either here or they're not...when two signals
on the same channel clash, the stronger one is the only one you
get, unlike the hash you get with AM.)
That's the future of digital radio in the US. The unqualified suc-
cess of the in-band, on-channel trials at the NAB convention in
Las Vegas pretty much sealed the deal. And I think it's VERY
unlikely that Canada's broadcasting industry will be willing to go
its own way, although you may decide to add ANOTHER broad-
cast band where the digital trials have been taking place (and
so might the US). Sure, Energy 1200 will go digital...but don't be
surprised if it's still on 1200.
Bob Smith, middays WXXI-AM 1370 Rochester NY

From: DrMilo@directnet.com
Message-ID: <3ppf8d$3bd@vixen.cso.uiuc.edu>
Source record: 31735

FYI: I just picked up a great book by the editors of FAIR called "The Way Things Aren't: Rush Limbaugh's Reign of Error." It includes a forward by Molly Ivins; the original FAIR report on Limbaugh; Limbaugh's less than convincing "point-by-point" reply; and various other tidbits about the world's most powerful and influential talk-show host. It also includes a tear-out postcard to send to Limbaugh complaining about his inaccuracies. I have already sent mine in.

Happy to report that real Rock & Roll radio is alive and well on the gulf coast. I just finished a transmitter delivery/installation odessy that let me take a listen to most of the rock & rollers from Panama City, FL over to Biloxi, MS. Of perticular note Pensacola seemed to have a couple of great rockers. Installed a new 20KW at WMMK in Destin, FL and then went over and picked up a flooded 5KW in Mobile. It was a real nice drive with lots of sceinic interludes. Does anyone know who's BIG towers are located on I-10 between Pensacola and Mobile? Looked like TV towers with FM's down below.

Later,

While listening to the Mets Radio Network broadcast of the Mets-Phillies game last Saturday evening, Gary Cohen said words to effect of, "We would like to apologize for the circumstances which prevented our New York listeners from hearing the first few innings of last night's game; circumstances which should _never_ (his emphasis) have happened..." or something similar....

There was no further explanation, other than his partner, Bob Murphy, remarking, "You shouldn't have to apologize, it wasn't your fault..."

Can anyone listening to Friday night's broadcast in New York fill me in? I know the Mets agreed to move the broadcast from the flagship, WFAN 660 AM, to WEVD 1050 AM to make way for the Knicks-Pacers game six...did WEVD fail to pick up the broadcast? Did Gary's somewhat harsh apology indicate that the Mets will no longer offer to move their broadcasts from the flagship?

Naah...I think I'd just rather carry the explosion live against a backdrop of Bill Clinton whining about
those people who have the nerve to exercise the same freedom of speech he exercised when he demonstrated against the war in Viet Nam wheile he happened to be overseas.

My audience is bigger than ever because the people are smart enough to know the difference between free speech and political opportunism. And, just between us, I think they're sick of tributes
and memorials and just want to get on with life.

From: stano@halcyon.com
Message-ID: <3ppf8k$3bm@vixen.cso.uiuc.edu>
Source record: 31743

I posted out here some time ago asking for some thoughts on the RealAudio technology. Never did see any follow up. Maybe I missed it.

At any rate...Today is Sunday(5-21). On Wednesday(5-24) I will give a presentation to our department heads. It's in response to a conversation I had with our GM regarding the RealAudio product. That conversation was prompted by some letters he had received from reps and other GM's concerned that this technology is a threat to 'regular radio broadcast'.

What I'm looking for here are some thoughts on this, the Net as a whole, and anything else any of you might feel regarding the Net as an emerging medium...another platform for info providers to sell our wares.

For those not familiar with RealAudio:

http://www.realaudio.com

This software, free for the download, allows for real time distribution of audio on the Net. The quality is close to a bad AM receiver. But the potential is awesome. Video is sure to follow.

I'd appreciate any and all comments...in a hurry since my presentation is just a few days away. E-mail or follow ups would be appreciated.

4037. "The River" by Dame Media

Newsgroup: rec.radio.broadcasting
Date: 1995-05-22 00:00:00 UTC
From: Halem@aol.com
Message-ID: <3ppf8l$3bn@vixen.cso.uiuc.edu>
Source record: 31744

Question:

I am wondering how many of "The River"s that are out there are owned by Dame Media. I know of two (Harrisburg, PA and Troy, NY). They use the following for IDs (this is Harrisburg's):

"This is the River 97.3 WRVV Harrisburg York Lancaster Lebanon. Rock 'n Roll Without the Hard Edge."

They play a mix of 60's to 90's and it is really good. Just the right amount of each type music. The Broadcasting YearBook lists their format as Adult Rock Aimed Toward Baby Boomers. Good Station.

How many of the other "River"s out there are owned by Dame and do they use the "Rock 'n Roll Without the Hard Edge" positioner? Anyone who has heard either of the about mentioned stations, I'd love to hear what you think of them. WRVV in Harrisburg, PA has been battling it out with the Top 40 and Country station for #1 since it went on and is consistenly in the Top 3 with 8.5ish shares (I think). Number One in last book was a 10, I beleive.

Thanks for any help.

Dave,

I suspect you made the show available to the following stations in Chicago: WMAQ, WGN, WBBM-AM, WLS-AM and FM and WJJD. While I haven't heard your tape, I would suspect the following barriers may have contributed to the lack of interest.

The two news stations (WMAQ and WBBM) run very very tight programs. MAQ is currently running the OJ trial and has a sports talk program in the evening. They run few features, preferring to concentrate on gimmicky type things like traffic on the ones, sports on 13 and 43 business on 23 and 53 etc. Add in weather reports and headlines, and I would suspect that they don't feel they can afford a 90 second cut. Although I am sure you could fill up 120 seconds pretty easily, the 90 second spot may be too much for them.

BBM, as you probably know, is CBS owned and operated. They do have a few more "features" things, but I have noticed that they are mostly locally produced or CBS network produced. I believe they currently run a "healthy minute" feature. Perhaps they felt your spot was similar to that program and wouldn't be interested in anything else.

WLS is a talk station. They don't run any features that I am aware of. WJJD is syndicated talk except for mornings when they have a local program. Again, their format really doesn't lend itself to a feature such as yours.

WGN might be your best hope. I would suspect your feature is targetted to older people (younger people tend to think they are infallible). If so, GN is the place for you as older people flock to there. Unfortunatley for you, I don't believe GN runs many features with the exception of Paul Harvey news and comments. The station tends to pretty much do most things local. However, perhaps they would be interested in your show-you might try them again with a tape.

There are some lower wattage stations in the area; let me know if you want the low down on them. Maybe it would be worthwhile to try to break the market in a smaller station and then, things are going well, try a bigger station.

I would be happy to give your tape a listen. E-mail me with your address (for some reason, my mail to you is being returned as undeliverable)

Joe Bonk

In a message dated 95-05-20 07:36:48 EDT,Alan L. Cassell writes:

>KMOX once earned its local dominance by serving its community well in thepast. But I ask you, as >a news director, when tornados are in the area and confirmed down on the ground, wouldn't you >rather go full-time with live, local announcers than have to work around Limbaugh and his format?

You bet I would. Whenever a similar situation arises in this market (although we seldom have tornadoes, we do have earthquakes, floods and fires), KUZZ-FM, a locally programmed country music station, will break format to get the full story on the air, live and from the scene(s). Then we make sure we promote the hell out of the fact that we did, and the so-called "news-talk" stations would not.

We own the news image in this market, in part because our news-talk competitors are all tied to airing packaged, satellite-delivered programming. Unlike them, we can and will break into programming any time, day or night, weekday or weekend, for a breaking story. If it's big enough, we'll dump SMN's "Real Country" from our AM and simulcast. I believe that to carry Rush, or any national programming, at a time of local emergency is a disservice to the community. As a former CBS'er, I'm surprised to hear KMOX would do that. BTW, who's the CPSC-1 EBS station for St. Louis?

***Indy hockey to air on WMYS next season: The Indianapolis Ice have signed a two-year agreement with WMYS (1430), allowing them to air games starting next season. WMYS wilil air all regular season games, adding a 15-minute pregame show and an hour-long postgame show that accepts calls from listeners.

***Lehr temporarily steps down from top WIBC news spot: WIBC (1070) News Director Stan Lehr is taking a 60-day break from his position for personal reasons, according to WIBC General Manager Tom Severino. Lehr will continue his morning news duties. Leigh DeNoon, who shares morning news with Lehr, assumes News Director duties in the interim.

4044. Pioneer Station W9XBY

Newsgroup: rec.radio.broadcasting
Date: 1995-05-23 00:00:00 UTC
From: Mark Roberts <mrobert2@mail.coin.missouri.edu>
Message-ID: <3ps68c$cmo@vixen.cso.uiuc.edu>
Source record: 31652

A Kansas City station was a pioneer in high-fidelity broadcasting
in the mid and late 1930s.

The Variety Radio Directory for 1937-38 lists a start date of
12-31-34 for KXBY at 1530 kHz. The station originally began as high-fidelity
station W9XBY, owned by First National Television, Inc., also the owner
of an experimental TV station in Kansas City.

W9XBY was one of four high-fidelity AM stations in the United States
operating between 1500 and 1600 kHz from 1934 to 1941. These stations,
one of which was the ancestor of New York's WQXR(AM), now WQEW(AM),
operated with a legal bandwidth of 20 kHz, allowing an audio frequency
response of up to 10 kHz without interference from adjacent stations.

A pamphlet published by W9XBY in 1935 makes reference to the station's
studios on the 29th floor of the Kansas City Power and Light Building, and
also describes the station's "latest type 'Vertical Radiator' antenna"
operating with a 1,000-watt transmitter at a location in south Kansas
City,
Missouri. Based on the description, I estimate this tower was located
somewhere along 85th Street, the southernmost Kansas City limits at the time.

A scrapbook of Kansas City Journal-Post articles contains frequent reference
to the "unusual" programming heard on W9XBY and KXBY. According to the 1935
W9XBY pamphlet, it had "full commercial privileges and accepts
sponsored programs."

Everett L. Dillard, later the founder of FM pioneers KOZY(FM) in Kansas
City and WASH(FM) in Washington, D.C., was the chief engineer for KXBY in its
early years, but not by 1937. The October 1938 Radio Index (RaDeX) and
the 9-15-40 Broadcasting list of NARBA reallocations list the station as
KITE(AM), with 1 kW fulltime.

The station changed to standard broadcast operation with its move to
its NARBA frequency of 1590 kHz on 3-29-41. At some indeterminate point
after 1943, the station left the air.

Urelated station KPRS went on-air from the Johnson County, Kansas suburb
of Olathe in 1949, with 1 kW daytime. Kansas City advertising agency owner
Andrew Carter bought KPRS and subsequently moved it to Kansas City, probably
in 1951, making KPRS one of the nation's first Black-owned radio stations.

The Carter family still owns the station, now KPRT(AM), at 1590 kHz, 1 kW-D,
47 watts-N, as well as KPRS(FM).

XEMO .9 .7 espanol talk
KPRZ .8 .6 Christain talk
KKOS .6 .6 AAA

Duops:

Par Broadcasting:
KKLQ A/F, KIOZ, and KOGO: 10.5
KFMB AM & KFMB-FM 5.5 [KFMB-FM has a 2.5 share]
KYXY and KMKX: 10.0. Rock Mix 103 better than expected, and`
on ads for format change of ex-KJQY to KyXy 96 improved overall
ratings.
Nobel: XETRA & XETRA-FM: 6.0. The sports station dip expected
because the football season over, and no base-a-ball on station.

Surprised at: KOWF-FM 93.1 Escondido: The country FMer plays to
a north county market. KSON IS the country station in SD -- but
look out for KOW-FM. Tiny at 1.6, but in north county for country,
```

it's 93.1!

I note KOGO`s rise to 2.9 -- but I say this is on the tails of the trial in Los Angeles. The mostly syndicated talk outlet still has to prove a force against KSDO and KFMB. Weissbach is sounding tired on air -- and is the only local live show on KOGO.

Who to watch for: KKOS. I know, past readers will say, "There he goes again," but this station at 95.9 will improve when/if the change happens to 95.7 -- plus make reception of KLOS/LA impossible.
Also: The one-two punch of Stacy Taylor and Ted Leitner. The KFMB gurus know they have something with Taylor; and are using "Ted Sez" effectively on 760.
And: KMKX: after a shaky start, the `new` Rock Mix 103 didn`t disappear in the ratings and held at 3.0. Hmmmmm.

Where is? no shows to KBNN, Julian. I like this statio because of local high school sports. With basketball season over . . . . .

Thanks to all who contributed to this report!

In this case, the release means what it says. Tom -- who as someone else pointed out, is no teenager -- wanted to be relieved of the day-to-day responsibilities of editor-hood while still writing and maintaining his connections with the magazine that he founded along with publisher Dick Ross. It was completely voluntary and he was in no way fired.

Thanks for your concern, though.

I still have a photocopy of the original UPI copy....just can't find it at the moment, so all this will be from memory. It occurred on a Saturday morning, February 12, 1971. The wire-service tests ran every Saturday morning at 9:33 AM, and on that date, as has been noted elsewhere in this thread, the NORAD operator picked up the wrong paper tape.

The correct authenticator("hatefulness") was used, followed by a row of X's, ten bells, and the message "This is a national emergency........"

Immediately afterwards, UPI's Chicago bureau moved a national advisory, saying that they were checking into it.....that this was not the "normal test message."

The NORAD operator tried to cancel the activation, but the first time, used the activation word to cancel it. The second time he tried, he got it right.

4050. L-Band digital radio in Canada (was: Re: Energy 1200: death watch?)

Newsgroup: rec.radio.broadcasting
Date: 1995-05-23 00:00:00 UTC
From: bl058@freenet.carleton.ca
Message-ID: <3ps68h$cmv@vixen.cso.uiuc.edu>
Source record: 31658

Talk1370 (talk1370@aol.com) writes:
> Your last remark about L-Band digital is intriguing, but I wonder
> if it's going to happen.
> It's becoming increasingly clear that the US broadcast industry
> will push the FCC to go to IBOC (in-band, on-channel digital radio using
> the current AM and FM bands).

IBOC is apparently not being considered here in Canada. L-Band isn't an option in the U.S. though, since the U.S. government was unwilling to free up those frequencies for commercial broadcasters.

> you, first, to convert to digital at very low cost, a few grand for a
> digital exciter installed in your existing transmitter for starters, then
> digital studio equipment on your own schedule. It also permits
> simultaneous transmission of digital and analog signals out of the
> same transmitter on the same channel, since the two do NOT

> teners stay with you indefinitely---while people can buy digital re-
> ceivers and pick you up where they've always found you, but with
> crystal clarity and no interference, whatever band you're on. (Like

The Canadian L_Band proposal has its own advantages, not possible with IBOC. For one, datacasting on L-band opens up new sources of revenue. This is a concept where text can be transmitted on a sub-carrier, to be used as a specialty service, or advertising revenue. For example, a chain-store could advertise a special, and a listener could punch a button to find the nearest location.

As part of the ongoing L-band testing here, there was a car at the recent Toronto Auto Show equipped with an L-band receiver which included a guidance system co-developed with Ontario's Transportation ministry. This is a system that can be linked to a digital radio to receive real-time traffic updates. The driver can key in his location and destination and get step-by-step instructions provided via a synthesized voice. A video screen displays traffic problems and the audio explains how to best get around them.

It's this ability to process huge amounts of data that has Canadian broadcasters excited about the l-band. Not only will the radios be able to receive CD-quality audio from both land and satellite-based transmitters, but it will get them onto the so-called "information highway".

> FM, digital signals are either here or they're not...when two signals
> on the same channel clash, the stronger one is the only one you
> get, unlike the hash you get with AM.)

> That's the future of digital radio in the US. The unqualified suc-
> cess of the in-band, on-channel trials at the NAB convention in
> Las Vegas pretty much sealed the deal. And I think it's VERY

Many experts here believe the IBOC system is a compromise that in the end could cost more to operate than L-band, which allows 5 channels to share a single transmitter. But that won't likely change the course the U.S. is following for IBOC.

> unlikely that Canada's broadcasting industry will be willing to go
> its own way, although you may decide to add ANOTHER broad-
> cast band where the digital trials have been taking place (and
> so might the US).

Actually it seems very likely. I just wonder how the receiver manufacturers will handle it when it does. I presume that with the number of people living near the border (& Mexico too?) we 'll hopefully get 3-band radios, AM / FM / L.

In article <3ppf8r$3bt@vixen.cso.uiuc.edu> KUZZ1@aol.com writes:

>I believe that to carry Rush, or any national programming, at a time of local
>emergency is a disservice to the community.

Hi Mark,

Especially so if the station is indeed the CPCS-1 for the local community. We at KFBK are perhaps tied more to the Rush Limbaugh show than any station this side of WABC in New York (remember, he launched out of our station)... but we will not hesitate to interrupt his program to activate EBS alerts, and to inform in the event of a serious local emergency.

In fact, during the January floods here in Sacramento, I believe we preempted his program pretty much all of January 10th and most of the 11th, to concentrate on providing needed information about the flooding that was spread all over our broadcast area. The Rush dittoheads weren't left out - we informed them that the show would be carried late at night in its normal replay time.

Is your news/talk competitor the CPCS-1 station for the Bakersfield area, and if so, did they refuse to interrupt Rush during emergencies?

Mike (reporter/editor/anchor for KFBK, but doesn't speak for them)

A few posts back, someone complained about NPR being "beltway" oriented. I have found the same problem, to greater or lesser extents, with other news organizations.

For five years I worked as a news director at a small station in Indiana. The attitude of the AP bureau in Indianapolis at that time was "If ain't happening in Indianapolis, or if nobody's dead, it ain't news." If the mayor of Indianapolis (then Republican senator and presidential candidate Richard Luger) opened a stretch of freeway, it was state-wide news, and often the lead story in the state roundup. But if the mayor of Wabash opened a stretch of freeway, it wasn't. On those slow news days that we all have, feature stories were always from Indianapolis, never any from outstate.

The AP in Michigan does not suffer from this quite as much - perhaps because the bureau is not in the state capitol, but in Detroit. In addition, Michigan is much less homogenous than Indiana culturally. The Upper Peninsula is almost an entirely different social experience than what we know here down south.

Perhaps if NPR was based in New York, or Chicago, or LA instead of Washington the beltway bias would disappear. But I suspect that a "left coast" or "Second City" or "Gotham" bias would be there to replace it.

Reply-To: lpreece@aol.com (LPreece)

Does anyone know where I can obtain a complete listing of all FCC licensed
stations in the U.S.?

Greatly appreciate it!

Jeremy Preece lpreece@aol.com

[Moderator's Note: I dont usually do this, but I am attatching a FAQ
on this subject for the benefit of the many others who are also
looking... Bill

============================== BEGIN FAQ FILE ==========================

==
FAQ: Where can I find a free database of US radio stations?
Where can I get information on radio station facilities?
==

The information on radio stations in the US changes constantly.
New call signs and owners, along with changes in facilities are
constantly being updated in the FCC files. Consulting engineers and
communications attorneys need accurate, up-to-date information,
information more accurate than the FCC's database itself.

Often the question is raised as to where on the Internet one can
find such a database of US radio stations. Usually the one
asking means "free".

Since the maintenance of such a database requires *daily* attention
to the information pouring out of the FCC, it is easy to understand that
it is a labor (and therefore money) intensive endeavor. Several companies
do exist to supply such data. Some distribute it by mail, others by
on-line computer. Such access has costs, and the data compilation is
copyrighted.

Is there a source for data on stations? Yes, several.

==

1. M Street Directory. One of the best annuals, this book contains
station listings for the US and Canada, format information,
and several ratings reports. Current cost is $42.95 & $3 S&H
It can be ordered by phone at 800-248-4242.

2. NRC AM Radio Log. Put out by the National Radio Club, a
DXer organization, the AM Radio Log lists all the AM

stations in the US and Canada. It costs $ 19.95 & $ S&H.

The NRC also produces a book of directional patterns for
the AM stations in the country. This book is not available
at the moment ... apparently it is being updated.

The main publication of the NRC is the DX News, a magazine
listing changes in AM stations, and information about how to
enjoy the hobby of DX listening. A one year subscription is
$24; a sample issue is available for $1.00. There is also a
monthly cassette version, with some of the news, and several
features including a dial scan from a different city, an
historical feature, and taped questions and reports from the
field; a one year subscription is $25, a sample issue is
available for $3.00.

A catalogue of all current products is $1.00.

Contact the NRC at:
National Radio Club
PO Box 164
Mannsville NY 13661-0164 USA.

3. The Broadcasting Yearbook. Put out by Broadcasting Magazine.
This heavy book lists all the radio and TV stations in the
US, Canada and Mexico, listing personnel as well as other
station data. Allied and Trade orgranizations are included.
This publication is expensive, well over $100, but can
often be found at public library and university library
reference desks.

4. On-line services such as Communications Data Services or Dataworld
provide current information on stations, emphasizing the
the technical facilities and current applications.

Cost is usually by "record" request, and can be set up for
remote interrogation or reports mailed to clients. CDS is
at 800-441-0034. CDS also provides free access to registered
Ham Operators for part of their topo database. (email to
rich\@comm-data.com).

5. PRS, licensors of the ID LOGIC radio system (a superset to RDBS,
which identifies every AM/FM station in the country by call,
location and format), use the M Street Directory information
on stations and formats, and have created a shareware
simulator of a car radio. The current version, id_na4a2.zip,
is available via ftp from ftp.hk.net in the /shareware/prs
directory and should be available via Fido shortly.
The shareware fee is $45.00, good for one year of updates.

6. CD-ROMs

a) the Ham Call Directory, by Buckmaster is reported as
having lists of the AM stations in the country. About $50

b) PerCon sells a Master Frequency File for $40. This contains
all the freqs/calls/licensees name/transmitter loc/ for
over three million assignme. (713-387c6-6015)

While you would probably do well to consult an entertainment lawyer, as a singer/songwriter, AND a former broadcaster (25 years), it is my impression that licensed music can be used for commercial beds, so long as the station's ASCAP/BMI license is current.

Licensed music was certainly used as commercial beds at every station I worked.

I know that our synchronization contract specifically includes the right to use our beds for PSAs. I would assume that it is a violation of your ASCAP agreement to use commercial music without first obtaining sync rights.

My thinking is that you can't stand in the way of technology. If your GM doesn't like it, maybe he
should get a job at a buggy whip factory.

Nonody is going to protect broadcast stations. If we are not good information providers, our licenses
won't be worth the paper they are laser printed on. If your GM wants proof, he should look at some AM
stations that used to be legands and are close to silent now.

Use the new technology or your competition will. I sure am.

> What I'm looking for here are some thoughts on this, the Net as a whole, and
> anything else any of you might feel regarding the Net as an emerging
> medium...another platform for info providers to sell our wares.

Yes it's a threat the the status quo of broadcasting...and a
tremendous opportunity.

First, it's going to force broadcasters to redefine the business
they're in: is the use of electromagnetic radiation really essnetial
to what they're doing, or are they creating programs in order to sell
listeners to advertisers?

Newspapers are facing the same question: are they in the information
business, or the business of grinding up trees and spraying ink on
them?

Second, RealAudio (or whatever emerges as the eventual audio over the
Net standard) will make program distribution directly to potential
listeners much cheaper, and it will bypass the need for local
transmitters. Even more than satellite-to-cable services, it will make
special-interest program services (all bluegrass music, say)
practical.

Will it replace broadcast radio? Probably not any more than DBS
will. It will fragment the audience, and it might force the sort of
station that is little more than a spigot for satellite syndication to
re-think their programming. But for a station (like KOMO once was)
that is committed to local service, there's no real need to have
world-wide distribution. And given the proportion of radio's audience
that is mobile--cars, portables, out in the back yard--the need for a
wireless transmission medium won't go away.

I bet that the NSA, among others, will dislike this technology. Sending audio via packets takes a fair bit of bandwidth and slows everything else down (like when you load a graphic on an html).

I have heard of a lot of stations 'broadcasting' on the net and several others that use net hookups for sending audio files to and fro.

I wouldn't worry about it too much. Until everyone has a net hookup, it won't be a challenge to open air. Even then, think about the miserable outcome of cable radio.

: I posted out here some time ago asking for some thoughts on the RealAudio
: technology. Never did see any follow up. Maybe I missed it.

: At any rate...Today is Sunday(5-21). On Wednesday(5-24) I will give a
: presentation to our department heads. It's in response to a conversation I had
: with our GM regarding the RealAudio product. That conversation was prompted by
: some letters he had received from reps and other GM's concerned that this
: technology is a threat to 'regular radio broadcast'.

I don't think the technology is a threat to Broadcast Radio. It's Poor Audio at very expensive prices, Computer, High Speed Modem, Software and Internet connection. Not very portable or mobile.

Though I would like to hear what others think. I have listened to several feeds of Read Audio and though it's interesting the technology just is not there yet.

I would rate the audio quality more like a bad phone call. The 8-bit 8 Khz sampled audio is marginal in quality. If you AM station sounds like this it need to be fixed.

I see promotional and Sales opertunities in the Net. Our Sales department can't operate today without a Fax machine. Something that's only been here a couple of years. Perhaps Encripted E-Mail could be used to place orders from Advertising Agencies. One agency is using a Computer to Fax system to place orders and changes, E-Mail would seem like a possible enhancment. Send the Broadcast Order with the Audio file attached. It would require a better Internet connection but it's possible. Look at the DGS System.

There's at least one that's not a Dame Media station...the
classic rock-slanted "The River" which used to be CKLW-FM
in Windsor/Detroit, owned by the CHUM group.
It's heavy on the 70s, pre-empting CBS's attempt to install
an "Arrow" format on its FM O&O in Detroit, and it has worked
well up to now.
The "River" designation seems to crop up in any large to
major market where a river is a prominent geographical feature
in the city of license, and I've heard of some that are classic
rock, some that are gold, and some that are country...it may
well be no-one's property.

|: uncomfortable with telling my students to something that is illegal.

The license allows you to broadcast from their disc, or make a copy for engineering convenience, but absolutely not use it recorded in sync with an announcer or any other spot elements... and certainly not edit it to fit your spot's copy.

That being acknowledged, _almost_ everybody does it.

Major, well-run stations and almost all commercial production houses use music from other sources, usually libraries that are created and licensed for spot production purposes.

The reasons are as much creative as legal: if you use a piece of pop music under a spot, you're running a very high risk that listensers will bring a different message and a different association than what you want for the spot. Generic music is psychologially a lot safer.

There are exceptions, of course -- a well-chosen pop song with just the right lyric can be perfect for a particular sell, as the national advertisers have frequently demonstrated. But in those cases they always get copyright clearance (and pay a hefty fee), as well as usually produce their own version of the song.

I did a quick DX check in the expanded AM band Sunday morning between 300-400 UTC and heard a Christian Science station on AM 1650. I heard the call, but I had to keep it down for my wife's sake and missed it. It was from South Carolina and apparently is aimed at an international audience. It sounded like WSHE, except I believe that call is already taken. If anybody can tell me the call and location, I can add South Carolina to my reception list for here. Thanks.

BTW, has anyone gotten their veries from KUSA yet?

--

[Moderator's Note: You were receiving WSHB in Cypress Creek S.C. . A Monitor Shortwave station. I dont believe they are on 1650, you were probably recieving some kind of image of their shortwave signal. We have several Monitor people on this group, maybe one can explain further. Bill]

4067. WCRZ Flint Mich tower topples

Newsgroup: rec.radio.broadcasting
Date: 1995-05-24 00:00:00 UTC
From: "Christopher J. Bessert" <343GRPW@CMUVM.CSV.CMICH.EDU>
Message-ID: <3pv534$2sp@vixen.cso.uiuc.edu>
Source record: 31550

Sorry I couldn't get to this earlier...

Quoted directly from _The Flint Journal_, 5/16/95:
"BURTON--Police have arrested a Burton man, 17, and expected to arrest a second person today in the vandalizing of a radio station tower Sunday that knocked two popular FM stations off the air.
Acting on a tip and evidence found near the suspects house, police arrested the man as he drove a vehicle on Dort Highway near E. Court Street.
Police began looking for the man after they found utility pole guy wires cut near the man's home. They later found wire cutters believed used in the vandalism at the Flint home of a friend of the suspect, police said.
Toppling the 370-foot radio tower on S. Vassar Road knocked WCRZ-FM (107.9) and WWBN-FM (101.7) off the air about 3 a.m. Sunday. Engineers moved temporary equipment into a motor home to allow WWBN, The Bananna, to begin broadcasting Sunday afternoon from Millington Township.
WFNT-AM 1470 was not affected, but the crash did affect the tower's co-tenant, Power Phone, a cellular phone company that built the towers with Faircom Flint Inc, owner of the three statins, in January.
John E. Risher, vice-president/general manager of Faircom said he hopes to have No. 1-rated Cars and its mix of soft rock and oldies back on the air by Friday or Saturday.
Its return will depend on whether a new tower can be shipped to the transmitter site by today. If not, the station will resurrect the old tower it replaced four months ago. Reinstallation will cost about $150,000, Risher said.
Risher said it is too early to tell how much revenue the station will lose during the critical ratings period. Advertisers and listeners are shocked by the crash, Risher said, but supportive.
"We've gotten more calls of empathy from people who have been very upset that somebody would do this to us," said Risher."

WCRZ-FM 107.9 "Cars 108" (AC) was to be back on the air Monday 5/22. WWBN-FM 101.7 (CR/AOR) "The Banana" was back on the air the day the tower went down. The DJs broadcast from the Cars 108 motor home from a site right next to WWBNs tower with only a pair of CD players, a cart machine and a microphone. There was a delay this weekend getting the tower ready due to high winds. When I drove by Sunday, there were a couple people about 2/3 the way up and an assortment of vehicles around the base.

THE KEY TO ORGANIZING YOUR HEALTH RECORDS

"If you care about yourself and your children, you will do everything you can to know your family's medical history. It can save your life, and the lives of those who are dear to you." -- Dr. Aubry Milunsky, Director, Boston University's Center for Human Genetics (Life Magazine, March, 1995).

Your Lifetime Health Planner offers the simplest, most effective way to take charge of your health. Enter important facts about your health history, keep a record of the names of medications and their effects, document each doctor visit and diagnosis. You will have the information you need, and in the event of an emergency, so will your family.

Your Lifetime Health Planner, 198 pages in a compact, loose-leaf binder, contains a variety of sections which include "Doctor Visits," "Medications," "Family Health History," and "Doctors and Specialists." The Planner is a must for the busy executive who needs to stay organized, for seniors who are receiving care and for newborns who need a record of their health care.

Parents Magazine recommended the Planner to its readers (April, 1994) and MCI called it "a useful resource in managing your personal health records." Margie Smotherman, Coordinator, Employee Health and Wellness, Blue Shield/Blue Cross of Iowa, said: "The employees felt that these (Planners) were great tools to not only record their pertinent numbers, but to plan for doctor's visits."

To get your copy, send a check or money order for $19.95 (plus shipping and handling) to :

Reply-To: ag365@freenet.Buffalo.EDU (Carl K. Gorney)

Up & down the dial in the #40 market:

*Bryan Scott,who was just released from his contract as half of WBLK's AM drive team,popped up on WGR(NewsRadio 55)in a tryout as its midday talker. Ironically,Don Allen Jr.did the same stint a couple of weeks ago before coming on board WBLK.

*Jesse Dylan & Gene Valaitis,AM drivers at CHOG(640;CHR/talk/Argos;AM 640), were nominated for the New York Festivals International Radio Competition,to be held on June 15. They were nominated in the breaking news category for its live on-air coverage-with night jock Kenny Caughlin(aka Kenny the Hit Man)-of the January 6th fire in a North York(one of Toronto's suburbs)apartment high rise fire that killed 6. Not able to see what he was dialing,the Hit Man hit the redial button,and got Jesse,who kept him on the air. Nice to see that the duo-who use phones for some pretty weird stuff(i.e.pranks,waking up neighbors)-found something else to use it for. :)

*Talk is cheap-especially this type.

In Rochester,WHAM(1180;News Radio 1180)gave a 2 day tryout last week to Gordon Urlacher. Normally,this wouldn't raise a problem. But,Urlacher is the Flower City's ex-police chief,who spent nearly 3 years in prison on conspiracy and embezzlement charges-relating to the theft of over $300,000 in police department funds. A number of people called in Bob Lonsberry's midday show(in which Urlacher got the tryout)to complain,and even Rochester Mayor Bill Johnson called the station to register his disapproval. Station manager Jeff Howlett defended the tryout,saying that Urlacher has served his time and deserved a new start. He added that the only reason he was in was because WHAM felt he had potential as a talk show host.
Johnson also criticized the choice during commencment ceremonies over the weekend at Geneseo State,asking "Is it any wonder people are disengaged? There has to be some connection between what we say and what we do." Jack Jones also took issue with the tryout in his Democrat & Chornicle column on Sunday.
Look at it this way:If Urlacher does get a position in talk radio,he'll join an elite group of convicted felons:G.Gordon Liddy,Pete Rose,Larry King, Denny McLain,etc.:)

*Some thoughts on the WBFO broadcast 2 weeks ago on talk radio & its effects-and I'll be brief. This reminded me of an overlong edition of CNN's Crossfire-all heat,no light. Both Tony Violanti and WBEN's Gary McNamara had very few good points,if any,that came out-the hour,half the time,sounded more like two 4th graders tossing out insults and trying to get the last word in on a particular point. I had to sympathize with host Mark Scott(also its ND)-IMO,he had too much patience at times,but he did keep his cool and did what he

could to keep from straying too far off topic.
Here's something they could have brought up,but didn't:Is it possible that they could be faking(i.e.not being that extreme)? Mike Siegel of Seattle's KVI is a good case in point-flipflopping his ideology when he jumped to a competiting station. Also,station management may tell a particular host to use inflammatory talk to get attention drawn to themselves.

What you heard was probably WSHB, one of the two shortwave stations owned by Monitor Radio International, the international broadcasting service of the Christian Science Monitor. They are *not* broadcasting on 1650; if it's not a spur or a subharmonic, their powerful signal may have overwhelmed the circuits of your AM radio. WSHB mostly broadcasts to the Americas, Europe, Africa, and the Caribbean. They also have a station with the call of KHBI, which is on Saipan in the Northern Mariana Islands in the Pacific; this station is mostly to reach the Asia/Pacific area, eastern Africa, and some of eastern Europe. Most of their programming is news, although they have religious programs on the weekends with hourly news bulletins. If you'd like to try them on shortwave so you can get them reliably, let me know by e-mail and I'll send you their schedule, which is also posted every so often on the rec.radio.shortwave newsgroup.

Bonjour!

If you work for a radio station that features French-language programming, please take a moment to read on...

The Francophone Broadcasting Corporation was founded last November to assist producers of French-language programs in every aspect of radio production. Our non-profit organization aims to provide training, help in launching a show, and distribution and exchanges of music, news, and magazines. We receive assistance from the French government as well as logistical support from Radio France Internationale, but we are a fully independent corporation run by member stations for the purpose of serving their interests.

Our current membership includes 16 stations from around the US which broadcast to the diverse French, Canadian, Cajun, Franco-American, Haitian and other communities around the country.

The FBC is pleased to announce its first annual meeting Sunday, June 18th at the Renaissance Hotel in Washington, DC, as part of the Public Radio Conference (note however that PRC registration is NOT required to attend our meeting.) The meeting is tentatively scheduled for 1 to 4 pm.

The tentative agenda will include a presentation of the FBC, projects of member stations, and a forum for current and new members to exchange programming. A complimentary light buffet will be available.

If your station would like to join, or just find out about the opportunities the FBC can provide you, just drop in! If a representative of your station needs financial assistance in getting to the meeting, we may be able to provide a limited amount of funding. Please talk to us.

Please look at our WWW page for frequently-updated information:

4080. RE: House Of Voices Announcers

Newsgroup: rec.radio.broadcasting
Date: 1995-05-24 00:00:00 UTC
From: name@mitre.org
Message-ID: <3pv52p$2s2@vixen.cso.uiuc.edu>
Source record: 31687

A few weeks ago a message was posted here asking for people to e-mail their interest to a fellow in Florida concerning announcing jobs. I was wondering if anyone has gotten any work and what their experience was. I found it curious that before any signed job offer was sent to me that my name address, phone number and social security number was requested "so that i could get paid". What was I going to get paid? No one ever said or even offered a signed letter. Gee, if the social security number is need for Uncle Sam how come their was no IRS witholding form in the mail?? Needless to say, when I sent all info but my SSN I got a note back saying it was noticed missing. When I wrote back saying I wanted an offer in writing, the correspondance stopped. Is this on the up and up or what? It sounds strange or is it just me? Whats your opinion/experience etc???

4081. Picking Up Out of Town Ra Stations: Interviewees Wanted

Newsgroup: rec.radio.broadcasting
Date: 1995-05-24 00:00:00 UTC
From: amccoy@delphi.com
Message-ID: <3pv52q$2s4@vixen.cso.uiuc.edu>
Source record: 31688

I'm working on a feature story on radio stations in other markets
that come in clearly at night in Pittsburgh and surrounding areas.
The story will appear in the Pittsburgh Post-Gazette.

I'm looking for interview subjects in the Pgh. area - people who tune
in other stations around the country, whether to hear a talk show
they can't get here, or pick up a favorite team's game broadcasts.
I'm also looking for people who just enjoy seeing what faraway stations
they can pull in.

If you're willing to be interviewed for this story, respond
to amccoy@delphi.com with name and daytime phone number.

We'd also like to hear from any DXers who've picked up Pittsburgh
stations during their travels

Your help will be much appreciated.

Adrian McCoy
amccoy@delphi.com

4082. New Program Available

Newsgroup: rec.radio.broadcasting
Date: 1995-05-24 00:00:00 UTC
From: WMOT's Joe Legge <wmot@frank.mtsu.edu>
Message-ID: <3pv52r$2s5@vixen.cso.uiuc.edu>
Source record: 31689

There is a new program that is in the works called "45 Funk D." It is targeted at those interested in funk music - including Jazz, R & B, etc. Specific artists included are Maynard Ferguson, Prince, etc.

If interested email me at wmot@frank.mtsu.edu

I'm not doing the program, but attempting to help the producer out so I'll have him give you the full run down. The program may be free, not real sure though.

4085. Pioneer Station W1XBS, later WBRY/WTBY in Conn.

Newsgroup: rec.radio.broadcasting
Date: 1995-05-24 00:00:00 UTC
From: mikedow@gate.net
Message-ID: <3pv52t$2s8@vixen.cso.uiuc.edu>
Source record: 31692

My father tells me that W1XBS in Waterbury, Connecticut was the first hi-fi experimental station of it's kind. The dial position was 1590.

They became a highly directional 5k station as WBRY in 1939 with a CBS affiliation, but the dial position at 1590 was too far from the two (and later three) other local stations at 1240, 1320 and 1380.

The station later became WTBY in the sixties and finally WQQW in the mid seventies. Oddly, they finished first in the rating for the first time in 1989, but the station went dark shortly after (even though they were the top local station) after a major political scandal sent some of the station's owners to jail.

4086. prep services

>RDS is a data signalling service used throughout Europe on FM (ie VHF,
>Band II) radio.

>[Expalnation of traffic announcement over two networks deleted]
>Obviously, this sort of system only works when you've got local
>and national stations owned by the same operator.

You mean that the two have to share the signalling of 'begin traffic report'
and 'end traffic report', or do they need some more sharing, like
frequency, region, station ID etc...
Could it be done with a modem connetion of does it need more compicated
signalling?

>The system was developed under the auspices of the European Broadcasting
>Union, who can supply technical details if required.

Do you have any address?

Thanks
Matija

4089. Re: Real Audio Radio Stations

Newsgroup: rec.radio.broadcasting
Date: 1995-05-24 00:00:00 UTC
From: "G. J. Goldwyn" <gj@irock.com>
Message-ID: <3pv531$2sf@vixen.cso.uiuc.edu>
Source record: 31696

Stan Orchard (stano@halcyon.com) wrote:

: I posted out here some time ago asking for some thoughts on
: the RealAudio technology. Never did see any follow up. Maybe
: I missed it.

I run a RealAudio Radio Station at http://www.irock.com. It's called
iRock(TM) Internet Radio on Computer.

: At any rate...Today is Sunday(5-21). On Wednesday(5-24) I will give a
: presentation to our department heads. It's in response to a
: conversation I had with our GM regarding the RealAudio product. That
: conversation was prompted by some letters he had received from reps and
: other GM's concerned that this technology is a threat to 'regular radio
: broadcast'.

My hopes are to be an alternative to broadcast commercial radio. I
can format iRock well beyond the bounds of conventional radio. This
makes iRock and RealAudio (C) exciting.

: This software, free for the download, allows for real time distribution
: of audio on the Net. The quality is close to a bad AM receiver. But the
: potential is awesome. Video is sure to follow.

The beta player software is free, but the server software (allows one to
broadcast) is about $10,000 or more, plus about 5K a year for support.
This prices it out for the "non-serious". As far as it sounding like bad
AM radio...that's extra cool! It gives me chills to be able to recreate
the sound of radio as it was exciting once before. If it sounded any
better, I'd be dissapointed.

: I'd appreciate any and all comments...in a hurry since my presentation
: is just a few days away. E-mail or follow ups would be appreciated.

Check out http://www.irock.com for what radio of the future sounds like.
Just to make it fun, we'll be on and off the net airways in the next few
days as we get our pipe enlarged to T1 and change our backbone
connection. You'll either find a test pattern, or dead air, or a browser
error, or iRock rocking.

G. J. Goldwyn
General Manager - iRock.Com(TM)

4090. DAB over the net (was: Re: RealAudio - Good idea or bad?)

Newsgroup: rec.radio.broadcasting
Date: 1995-05-24 00:00:00 UTC
From: wollman@ginger.lcs.mit.edu
Message-ID: <3pv532$2sh@vixen.cso.uiuc.edu>
Source record: 31697

In article <3ps68q$cnd@vixen.cso.uiuc.edu>,
Andrew Paul Dickens <apd2c@virginia.edu> wrote:

>Sending audio via packets takes a fair bit of bandwidth and slows
>everything else down (like when you load a graphic on an html).

Well, yes and no. Modern equipment is just starting to come to market with the capability to enforce ``traffic rules'' as it were on data coming over the net. The effect which you see is a result of the fact that real-time traffic (like audio and video) and data streams are not logically separated in today's Internet. Also unlike data, real-time traffic is typically sent at a fixed rate with no retransmission. The practical upshot of this is that data connections, when they run into congestion on the net, are ``nice'' and back off, whereas audio (and video) exchanges generally just degrade in quality while still putting the same load on the net. The two new technologies that are just starting to get deployed in the net at large will provide mechanisms to keep real-time and bulk traffic from bumping into each other, as it were, so that each gets its `fair share' of the network resources, as well as a means to define (and pay for) just what precisely is a `fair share'.

What this really means is that the technology to do broadcast-quality audio over the net just isn't there yet for most people, and probably won't be for ten years or so. (Longer if the telcos have anything to do with it.) In any case, it's unlikely to have any significant effect on the main source of radio listeners -- people who are moving from one place to another and thus aren't connected conveniently to the net. The one application where this technology may have significant short-term effects is in providing additional outlets to international broadcasters and national networks outside of their usual service areas.

>I wouldn't worry about it too much. Until everyone has
>a net hookup, it won't be a challenge to open air. Even then,
>think about the miserable outcome of cable radio.

I think it's unarguable that cable radio failed because it was primarily a music service, rather than something that would actually have been useful, and because it's hard to listen to cable radio in your car. For the price most cable outlets wanted for a year of DCR or DMX, I could have gone out and bought my entire year's supply of compact discs, and I'd be able to listen to my favorite music when and where I wanted it rather than being tied down to the cable box. I suspect that if (1) more businesses had cable service and (2) the licensing terms were favorable, cable radio might have made some

inroads in the background music market. It's pretty well dead now.

>if it's going to happen.
> It's becoming increasingly clear that the US broadcast industry
>will push the FCC to go to in-band, on-channel digital radio using
>the current AM and FM bands. Among other things, IBOC allows

What I really, really want to know, seeing all this discussion about digital radio/etc., is -- Are we ever going to see a time when FM stations will be broadcast on something other than what they're on now? In other words, are we ever going to be able to tighten up the band a little, and be able to have stations in the same local area spaced *less than* 0.8 MHz apart? I'd like to see something nice and clean and smooth that will allow at least twice as many stations in this city...with the way format fragmentation is going, we're definitely going to need more stations soon! It would be nice to have, maybe, a station on *every* frequency, *everywhere* you go!!

Ehhh, I'm dreamin'!

sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the themes of
OTR programs?
Q16. Is there a World Wide Web page (URL) or FTP address that I can
```

access for more info?
Q17. How do I subscribe to the OTR electronic newsletter?
Q18. Can I get archived copies of old issues of the OTR newsletter?
Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?
Q22. What is the best radio / antenna to get distant OTR stations?
Q23. Is there a group for modern radio drama ("new-time radio")?
Q24. I have only email access to the Net. Can I still get the files at your FTP site?

Q1. What is "OTR"?
A1. OTR is an abbreviation for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the early 1950's. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures.

Q2. You haven't mentioned OTR music, why not?
A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. There is no restriction to discussing OTR music in the OTR Newsletter.

Q3. Where can I buy recordings of old radio shows?
A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from my OTR WWW page or FTP address listed later.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?
A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR newsletter to learn of their experiences, then check with potential vendors.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is ongoing, and is summarized at the archive site, and my FTP / WWW sites.

Q5. Are OTR shows rebroadcast? If so, where and when?
A5. Yes, several AM and FM radio stations, three satellite feeds and a shortwave station rebroadcast OTR. Check my OTR WWW page or FTP site for current info. If you learn of other sources, leave a note!

Julian A. Smith (jsmith@blues.epas.utoronto.ca), Frank Passage (passage@pluto.dss.com) and Bill Pfeiffer left the following information:

For AM listening, try the brand-new National Radio Club's _AM Radio Log, 15th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price range: $20.00]

For FM listening, I'd suggest Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at 800-248-4242 or +1 212 473 4668 voice, or +1 212 473 4626 fax. The address is M Street Corp., 304 Park Ave S Floor 7, New York, NY 10010 USA. costs $29.95 + p/h,

Those lucky listeners living near Boston can have a periodic update of local OTR programming by sending email to Noah Schaffer, at nschaff@k12.oit.umass.edu. Noah will send you monthly OTR & Radio Drama updates, including program titles and station/frequency/time data.

Q6. I remember a great show called (x). When was it aired?
A6. Check with subscribers to OTR newsletter, or look through the program database (WWW or FTP). Also see answer A14 below.

Q7. Are there any books about OTR?
A7. Yes, there are several books related to OTR. See my WWW page or FTP site for a list of some of them.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch <henry@g0gku.demon.co.uk> related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

Q8. Does anybody trade tapes of OTR shows?
A8. Yes. Check with subscribers to the OTR newsletter. We hope to get a database of private traders as well. Leave a note in the

OTR newsletter if you want to trade, or send email to me if you want your library to be listed in the on-line database.

Q9. What's this stuff about Copyright?
A9. The copyrights on most OTR shows have expired. A few copyrights have been renewed. Examples of the latter include The Shadow and some of Arch Oboler's productions. See my WWW site for both "common sense" and legal citations.

Q10. How can I get my local radio station to broadcast OTR programming?
A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us: "The days of radio being ruled by the artisians is over, and for some time now it has been in the hands of people who only look at the bottom line, so to reach them you must talk through public radio pledges, or through sponsors on commercial stations."

Q11. I have some old transcriptions and tapes, how can I make them sound better?
A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables and sound processing units that can dramatically improve old recordings. Their sound processing unit runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all their material at the following site: ftp.atd.ucar.edu. Log on with the usual anonymous then, your routine password. head on over to /pub/dat-heads/ You will find a wealth of info up there. All the digests to the current day, and mike

faqs, as well as market postings on equipment. Highly recommendable for anyone to get their feet wet in this media. Happy taping

Q12. Are there any OTR clubs near me?
A12. Check the two club listings in my WWW page, and leave a note in the OTR Newsletter asking about local clubs for your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?
A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mis-typopgoof.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program serial?
A14. Some of the larger vendors / collectors may have this data. If you find such a publicly available source, we can make it available in the Internet OTR file repository.

Some of the OTR Newsletter subscribers have contributed Program Logs for several well-known series. The logs are available at my FTP/WWW site.

The "logs and publications" entry in my WWW page gives names and addresses of several vendors of these items. It can be FTP'd as sou_pub.otr. (Thanks to RadioJoe5@aol.com (Joe Coleman))

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of -The Ultimate History of Network Radio Programming and Guide to All Circulating Shows- (last supplemented in Oct 94). Jay's address is:

Jay Hickerson
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?
A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR newsletter for inclusion in one of our databases.

Jim Widner has contributed some synopses / introductions to various programs. They are on file at his and my WWW/FTP sites.

Q16. Is there a World Wide Web page (URL) or FTP address that I can access for more information?

A16. Yes, there is a growing number of WWW sites, as well as FTP sites and a Gopher. Each site contains different information, so you might want to visit them all. The sites listed below are good places to start. If you learn of any other sites, I'd appreciate your informing me via email!

(1) My site (note change from earlier FAQs):

World Wide Web URL:
http://www.crl.com/~lgenco/otr.html

FTP:
Anonymous FTP to ftp.crl.com
directory: users/lg/lgenco

(2) AIRWAVES E-Publishing's Site (courtesy of Bill Pfeiffer):

FTP:
Anonymous FTP to radio.aiss.uiuc.edu,
directory: misc/rec.radio.b-cast/OTR.

GOPHER:
gopher radio.aiss.uiuc.edu 7070
(select "OTR")

World Wide Web URL:
http://radio.aiss.uiuc.edu/~rrb

For subscribers without normal FTP access, there is a FTP-by-mail server that will automagically send you a copy of the latest OTR FAQ. To receive a FAQ, send email in -exactly- this format (the case of the file name IS important):
To: lgenco@crl.com
Subject: Request otr.faq
(the body of the message is ignored)

Q17. How do I (un)subscribe to the OTR electronic newsletter?
A17. To subscribe, send email
To: old.time.radio-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: old.time.radio-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

Q18. Can I get archived copies of old issues of the OTR newsletter?
A18. Yes. The OTR Digests and Index are updated three times a week, and are accessible through the first two WWW pages mentioned above, or from the AIRWAVES anonymous FTP site mentioned above.

Q19. What is the best way to archive OTR programs?
A19. The most popular way seems to be reel-reel tapes, using each of the four tracks to record monophonically. Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction.

Some subscribers have mentioned Talking Book tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind
1839 Frankfort Ave.
Louisville, Kentucky 40206
Tel. (502) 895-2405
Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to Visually Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines, Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

Q20. My old reels squeak. Why does this happen, and can I fix it?
A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will

respond. Send your request to: Fred Korb, c/o
Oldtime Radio Collectors and Traders Society, 725
Cardigan Court, Naperville, Illinois 60565-1202.
I am willing to help you preserve the sounds of
radio days gone by.

[Editor's note: Fred's method consists of a kit by which a
lubricating film can be automatically applied to the tape as it
is played. I tried it. Although temporary, it does indeed work!
I'd recommend it for those squeaky tapes that you wish to
re-record onto newer reels.]

Richard Fish <lodeston@bluemarble.net> also left this helpful
info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the
backing, or the binder compound used to stick the
magnetic particles to the plastic backing -- has absorbed
water from the air. The water molecules actually make
the tape expand a bit, so it doesn't fit the machined
tape-guides properly anymore; and they can interfere with
the lubrication impregnated into the tape; and it is
theorized they can even interfere with the polished
smoothness of the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the
formulation of the plastic backing and binder. In the
mid-70's, both 3M (Scotch) and Ampex, the two major tape
manufacturers, started experimenting with their formulas.
They thought they were introducing major improvements,
but instead created a tape much more prone to
hydrolization than anything had ever been. The problem
did not show up for years, and the formulas did not get
corrected until sometime in the mid-80's. Theoretically
any tape could get hydrolyzed over a long period of time,
especially if stored in a high-humidity situation, but in
practice most squeaky tapes were made (roughly speaking)
between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and
entreprenurially successful producer of radio drama in
the US today) gave me his formula and I've done it many
times now and it works:

Bake the tapes in a convection oven for 8 hours at 130
degrees Fahrenheit. It is entirely possible to bake a
tape twice if the first time doesn't do the trick. You
get about a three-week "window", sez Tom, before the tape
starts to re-absorb water. So the best deal is to bake
the tape and immediately make a copy. But if you forget
to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?
A21. An excellent place for discussions about antique radios, phonographs and accessories is the rec.antiques.radio+phono newsgroup, created by Bill Robie. His FAQ may also be found at my WWW site.

The WWW site, "The Bellingham Antique Radio Museum" is also available through my WWW site, or directly via URL <http://www.pacificrim.net:80/~radio/> This site contains info and GIFs on old radio hardware, as well as soundclips (.au files) of OTR show intros. Well worth visiting!

Q22. What is the best radio / antenna to get distant OTR stations?
A22. Several readers have been acclaiming the GE SuperRadio III as an excellent choice for picking up distant stations that carry OTR programming. Although the tuning dial has notoriously poor calibration, the sensitivity and selectivity seem superior to other radios. A SuperRadio FAQ is available at my WWW / ftp site.

-Some- readers have had good success with the Select-A-Tenna antenna advertised in several magazines, and the Grove Catalog. The S-A-T seems to be rather directional, and may eliminate off-axis interference. Ham Radio magazines sometimes carry information about small loop antennas for AM DX-ing.

Dan Hughes <dhughes@prairienet.org> left this note:

Several years ago one of the electronic magazines ran plans with dimensions and number of turns, etc to build one of these antennas. I have built several and I'm no mechanic. If you (or anyone else reading this) would like a copy of the article and plans, drop me a stamped, self-addressed envelope: Dan Hughes, P.O. Box 933, Urbana IL 61801.

If you are interested in AM Broadcast Band reception, and technical artlcles related thereto, send a SASE to the following address for their product catalog:

National Radio Club
Publications Center
PO Box 164
Mannsville, NY 13667-0164

Q23. Is there a group for modern radio drama ("new-time radio")?
A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you. Meanwhile, johnsd@logica.com (DJ) tells us that there's a new mailing list has been set up for anyone interested in the technical aspects of radio drama production. To subscribe to the new discussion list send a "subscribe radiodrama" message to radiodrama-request@world.std.com.

Q24. I have only email access to the Net. Can I still get the files at
your FTP site?
A24. Yes. There are several FTP-by-email servers. Contact one of
them for instructions.

ftpmail@decwrl.dec.com

Greetings all...more intermittant news from the Southlands...

According to this morning's Atlanta Journal/Constitution, Washington, DC-based Radio One will launching a new radio station in suburban Fayetteville to battle market leader WVEE-FM.

The new station, Hot 97.5, will be buying Griffin-based WQUL-FM (97.7) and utilizing their facilities to produce the signal for the as-yet without-call-lettered station. The new station will target the 13-34 black listener with lots of rap & hip-hop music - a musical genre that is, up to now, not represented on mainstream-Atlanta radio.

General Manager Mary Catherine Sneed plans to have the station on the air sometime next month.

Radio One, as most people know, is a minority broadcasing group headed by Kathy Hughes, and owns six stations in the Washington/Baltimore area.

Take care folks...I will be back with more news later....

I was playing around with the windows based software that comes with the Sound Blaster card the other day and found that the editor they provide is not bad. I ran it on a Pentium and found it worked fast enough for almost any application. It doesn't have a lot of advanced features like audio "scrubbing", but it can decompress a variety of files to PCM, edit them and re-compress them again to the desired format. You probably will have to analog dub the final product out to whatever digital system you are using, or to carts. It;s the poor man's editor, but not bad.

A slightly more expensive route is "The Saw". I know a lot of stations use this software and are happy with it. Yet another option is an Akai Digital Editor. This is a unit that retails for around 2,500 dollars. It is not a pc based system but works more llike a conventional tape deck. A scrub wheel allows for precise editing. You can mix 4 tracks digitally. A SCSI hard drive holds the data, but it is not in a DOS format. Again, you need to do an analog dub to get it out of the machine.

Norm N. Nite returns to full time-Max Kinkel is out.

PD Joe McCoy announced in the NY Daily News that Nite returns to the station June 5th to the night slot, and will also do the Top 20 Countdown shows on the weekends. Bobby Jay and Don K. Reed are bumped to late nights and overnights respectively and long time overnighter Max Kinkle is out. Kinkle's been the overnight personality for more than a decade.
McCoy says the move to bring Nite back has been something talked about for a couple of years. The sad part is losing Kinkle in the process.
This will be Nite's third regular stint with the station. He came to NY from Cleveland in the early 70's as the station's overnight air personality. He worked with PD Joe McCoy at WNBC during the mid 70's, and returned to CBS-FM part-time in the 80's, when he originated the weekend staple, 'the Top 20 Countdown'.
Jay has been the night personality and hosted the countdown for the past several years. Reed has been with the oldies station since it's inception, working late nights for most of the time. He also hosts the Sunday Night Doo-Wop shop.

tedb@nexus.msfc.nasa.gov wrties:

>I did a quick check of the expanded AM band Sunday morning between
>300-400 UTC and heard a Christian Science station on AM 1650....

Bill is correct that what you heard was indeed WSHB, our SW
station here in South Carolina. At 0300, we have a broadcast on bearing
315 deg on 5850 kHz, and on 72 deg on 9455 kHz. I suspect that our 5850
broadcast may have been causing a "front-end overload" on your receiver,
(both transmitters are 500 KW), thus giving you a false signal at 1650 kHz.
As for our location, we are roughly 40 miles due north of Savannah,
Georgia - 032.41.02N , 081.07.51W.

You bring back lots of memories. I was working in a station in Litchfield, Illinois when the same message came through. There were some anxious moments, and it resulted in a major change in the way the EBS tests were run. Up until that point they were always on Saturday morning. Most stations ignored the activation and remained with normal programming. The FCC sent letters to every station asking them to justify their failure to respond, then changed the EBS tests to a random pattern, since most stations said that they figured it had to be a botched test because of the time of the week. The Ruskies had a golden opportunity! All they had to do was attack at 10 am on Saturday and the EBS system would have been in shambles!

}Are we ever going to see a time when FM stations will be
}broadcast on something other than what they're on now? In other words, are
}we ever going to be able to tighten up the band a little, and be able to have
}stations in the same local area spaced *less than* 0.8 MHz apart? I'd like
}to see something nice and clean and smooth that will allow at least twice as
}many stations in this city...with the way format fragmentation is going, we're
} definitely going to need more stations soon! It would be nice to
} have, maybe, a station on *every* frequency, *everywhere* you go!!
}
} Ehhh, I'm dreamin'!

The real dreams, Darius, are..

1) What will we program on them??? All the hits from 1976 beginning
with the letter J?

2) ... and this is the real big one... WHO WILL PAY FOR THEM?
We already have stations going bust and going to inexpensive
programming alternatives like satellite and automation to stay alive.
What you are proposing sounds nice but there are already too damned
many signals in most areas to be supported by ad dollars. I live in a
market of 250 - 300,000 (depending on how far out you are counting)
and we are served with some 20 + stations (again depending on how far
out you go). We have 7 country stations, 4 oldies (2 classic
rock, 1 60's, 1 classic hits) outlets, 3 EZ outlets, several
religious, one NPR, one talk, one CHR and one AC.

Other places are similar.

Where are the revenues going to come from? Well there is always
Duopoly, tri-opoly and mega-opoly... <G>

A quick presentation of FERUE

History

The European Federation of Student and University-based Radio Station was
born under a bus shelter! Whilst he was in Brussels, the head of
Campus Radio Strasbourg (France) caught sight of a poster
advertising the radio station of the Free University of Brussels (ULB).
Contact was made and an association set up. To start with the association
began to grow in French-speaking Europe only. But soon, radio stations
from outside France and Belgium came knocking on the door. They
came talking about student television, the internet and so in
the light of this, FERUE decided to take these changes into account.

Plans

Welcome to the European Federation of Student and University-based Electronic
Media!

This name is provisional and a competition is open if you wish to make
suggestions. The new FERUE, by jan 1996 at the latest, will☐
include student and university groups who run or aim to run a radio
or TV station, an audio or video workshop or internet-based distribution
outlet, all operating in a non-profit making manner.

Services

FERUE has begun to make inroads with the european commission to make
itself known and to access european funds for its members. A bilingual
(french and english) newsletter is produced five time a year
and mostly distributed to the members. By organising themed meetings
FERUE encourgaes bi- and multilateral exchanges and collaborations.
Transeuropean partnerships with tour organisers and festival promoters
are also proposed. A fulltime secretariat presently exists based in Dijon,
France. Programme exchange should soon be possible using the internet.
A technical and financial study is underway.

4105. WCRZ Flint MI back on air

Newsgroup: rec.radio.broadcasting
Date: 1995-05-26 00:00:00 UTC
From: "Christopher J. Bessert" <343GRPW@CMUVM.CSV.CMICH.EDU>
Message-ID: <3q46o3$a47@vixen.cso.uiuc.edu>
Source record: 31563

Apparently WCRZ-FM 107.9, "Cars 108", the AC station licensed to
Burton and serving the Flint MI area went back on the air today (Thurs
5/25), The story was featured on several local television newscasts.
I posted here earlier in the week about how one or two area teens alleg-
edly cut some of the guy wires and the tower toppled. WCRZ is the num-
ber one station in the market. WWBN-FM 101.7, whose signal is relayed
from the WCRZ tower via microwave to its tower in Tuscola was also
knocked off the air for 14 hrs on Sunday, 5/14. It, however, was back
on the air later that day broadcasting from it's transmitter site.
It is not known how much this off-air time will affect the WCRZs rat-
ings, something the station management is worried about.

or what? It>sounds strange or is it just me?What
syouropinion/experience etc? >G P Brefini
>Voice Talent/Broadcast Engineer/Consultant
>GPMJ DJ Services
>E-mail: GBREFINI@AOL.COM
When I wrote the guy and encouraged another voiceover talent from
this forum to send tape (pbyme@voicebox.com) I got back a feeling
that this guy would not be happy with a max of 15% commission on the
talent fee . His target was to offer small tv stations all the station
breaks on a retainer . They might go for it actually but I don't think
the guy knows how to sell it . Major point is that for every 1k we paid
people at a college owned station there was an additional $300 paid out
in taxes/bennifits . Our stipulation to this guy would have been the
same that we have with talent agents :A copy of the gross check from
the client and another cashable check minus the commission .

My idea for you G P would be to contact a local cable company and do
those insert commercials - A couple of people in our voiceover group
did them for then continental cable within parts of LA for $100ea . The
producer was an inhouse guy the really liked . He also would pay a
arranger/composer $100 for a music background . his total budget was
about $1000 . They obviously produced a commercial at a loss for a
longterm time buy . They don't do it anymore . Just get on the phone
and gravel --good Luck Les

Reply-To: R.D.Mee@loughborough.ac.uk (R.D. Mee)

Hi,
I have recently come across a grave problem when replacing a broken fader on a Chilton 10-2 mono mixing desk(10 channels). The faders fitted were made by Ruwindo. They are 10K Log. Ruwindo no longer make them (agrrrrrrrrrg!) So, finding a replacement is proving to be a HUGE problem!.

Has anyone in the biz got a Chilton desk, and if so, what make of faders do they contain?

Note, the only distributor for Ruwindo that I know of, Future Film Developments, does not have any stock left of this fader.... The first place I checked!

HELP!

*Please reply to me by mail *

Thanks,
Richard. (R.D.Mee@lut.ac.uk)

4110. Morris Levy: Strawberries Records

Newsgroup: rec.radio.broadcasting
Date: 1995-05-26 00:00:00 UTC
From: jgallagh@interserv.com
Message-ID: <3q46o8$a4e@vixen.cso.uiuc.edu>
Source record: 31568

Recently I posted about Morris Levy, the former owner of
Strawberries Records who died in jail a few years ago.

Morris was very well known to many in radio as he interacted a great
deal with dj's, radio sales people and others in broadcasting
positions in Boston and NY.

He was always rumored to be part of the "Mafia" but of course such
talk is common.

I thought of him when a discussion in this newsgroup began
concerning Payola. Since he was a (very big) record retailer, he was
very concerned with airplay, and what the labels were pushing, etc.

I was wondering exactly why he went to jail when last week I was
browsing through a bookstore and in the cut-out section (cheap
books that never sold) I saw a book called "Stiffed".

This is a fascinating book and is must reading for anyone who deals
in music radio and records.

It details the full store of MCA Records hiring of Irving Azoff (the former
manager of the Eagles, Jimmy Buffet, etc) and how the Mob became
involved in the record industry.

There is a great deal of discussion of Independent Promo people
and the accusations of Payola.

This book is written by a former LA Times Reporter and is very well
researched.

Morris Levy was a legend in the music business but also was
apparently a major force in the underworld.

He ultimately was convicted of defrauding record companies and
died in jail after serving a few years.

Since I knew him fairly well from the days he was building the
Strawberries Records chain, I was quite shocked to learn of his
conviction. but I guess he got away with such behavior for many
years before the Feds could catch up with him.

The power of independent promo people (the network as they are
called) is a rather interesting study. It might be nice to hear from
some of the PD's and Music Directors as to why these people are so
successful at getting radio stations to add songs.

John Gallagher/Boston

a>
>singer/songwriter, AND a former broadcaster (25 years), it is my
>impression that licensed music can be used for commercial beds, so long
>as the station's ASCAP/BMI license is current.

>Licensed music was certainly used as commercial beds at every station I
>worked.

I, too have used licensed (popular) music as commercial beds, until recently. While a small market station might get away with it on a regular basis, an ASCAP/BMI/SESAC license is not intended for blanket (including commercial) use. According to Ben Ivins, assistant general counsel with the NAB's legal department, "When a station purchases a blanket license from BMI, ASCAP or SESAC, it has secured the rights to publicly perfrom the works in the music libraries of those organizations. These public performance rights do not include the right to re-record portions of a song for inclusion in a commercial or to probuce a 'derivative' version of the work, which is normally involved when portions of a copyrighted song are included in a commercial."

While you'd probably get a C & D (cease and desist) order before being sued, it's not a guarantee. It's better to explain to a client the potential liability and the time and expense involved in obtaining commercial rights for music (it varies according to market size and length of time the commercial will run) than to run the risk of financial exposure for the client and the station. If the client's willing, go for it. If not, better find a good cut on your production library.

Charlie Ross

ASCAP/BMI is only one factor here. Their purview is the copyright of the composition itself. Secondly, there is the copyright of the performance. That is usually owned by the record label. If you use the performance for something other than entertainment without permission (fees usually involved here), you are not in legally safe territory. Another factor here, is that if the record uses union musicians, as most do, neither the labels or you are in a position to legally use those performances. The contract between the label and musicians is only for entertainment purposes, and does not include any synchronization rights. The musicians union code for commercials calls for new payment for EACH syncronizaton of music to a commercial (just like AFTRA wants seperate talent payment for each new spot). They (the musicians union) do not even acknowledge the category of production library music in their codes - which is why most library music is not from the US.

Be safe. Don't use commercial discs as commercial music.

Message-ID: <3q46o9$a4j@vixen.cso.uiuc.edu>
Source record: 31571

I don't have a lot of time right now, but here are some
generic type answers:

Usually, music reps will give copies of their latest
stuff to radio stations to drive sales. We're a Classic Rock
station, and we still get more discs than you can shake a stick
at. If you are nice, you can sometimes get extra copies to
give out to listners, etc.

For the older stuff, you usually have to buy it. There
are some companies that offer entire music libraries on CD
collections. They take the most popular songs within a format
and slap them on custom CDs. This is sometimes cheaper than
buying the albums themselves.

When we switched formats, we got real friendly with a
local CD store. We gave them a list of all the titles we
wanted, and a budget. They had to special order a lot of the
titles, but it worked out pretty well. It saved us the trouble
of tracking down the titles ourselves. Almost everything has
been converted to CDs by now.

To license our music for straight broadcast, we pay
ASCAP and BMI, the two big music licensing companies. To use
music as a bed for an advertisement requires more expensive
synchronization rights, and we have a seperate library for that.

Hope this gives you some place to start.

4114. Internet Radio on Computer

Newsgroup: rec.radio.broadcasting
Date: 1995-05-26 00:00:00 UTC
From: ggoldwyn@netcom.com
Message-ID: <3q46ob$a4l@vixen.cso.uiuc.edu>
Source record: 31572

First, sorry about my header... I'm G. J. Goldwyn of iRock.Communications.
I've posted recently about my new exciting Internet Radio Station called
iRock[TM]. Well, it's finally on the air...or should I say, the Net?

I worked in broadcast radio for many years. I lost interest in broadcasting
about the time I got interested in new technology. Now, I'm back in both.
If you're interested in hearing what can be done with $25K worth of software,
$25K worth of hardware and about $2K a month in online costs, check out
our station. Here's the skinny-poop:

iRock is a Progressive/Alternative-Alternative Rock Internet Radio
Station at: http://www.irock.com

Using the RealAudio[TM] Player for Windows, Mac or Unix, you can listen
to the ProgRock (including lots of Gentle Giant) that you never hear on
conventional radio. The files play in realtime as they stream down to
your WWW browser. You need at least the following to listen:

1. A 14.4 or better true SLIP or PPP connection to the Internet.
2. 16 bit sound playback capability.
3. A copy of the RealAudio Player (Available free from
http://www.realaudio.com)

The sound quality is like cheap AM radio, but the future potential is
promising. Check iRock[TM] out now and enjoy the music, right on
your computer while you surf the Net.

A 45 minute iRock show is only about 2.5 megs. And you can start listening
immediately as it comes down your pipe.

See ya there...

G. J. Goldwyn

I've got a question that goes the other way.
Has anyone heard of software that will take the spoken... or, in this case, broadcast, word... and transcribe it instantly, phonetically?
I've been asked to find out about the possibility of putting our air live on screen, scrolling at the top, or bottom of the screen, sort of like "Silent Radio" but live.
Thanks for any help...

4116. Re: RealAudio - Good idea or bad?

Newsgroup: rec.radio.broadcasting
Date: 1995-05-26 00:00:00 UTC
From: umar@tiac.net
Message-ID: <3q46oc$a4r@vixen.cso.uiuc.edu>
Source record: 31574

A number of people here have asked me what I think of the idea of broadcasting audio over the Internet, whether by RealAudio or some other standard. My reply, colored as it is by my experiences with local Internet service providers and NYNEX ("It's an easy call!") is this:

There are bandwidth issues that will limit the effectiveness of the Internet as an audio (or video!) distribution channel for quite a while. Yes, you can transmit voice-grade monophonic audio, but you'll only receive it in real-time if your Internet provider (and his provider) has the bandwidth to spare. Here in Boston during much of the day the demand on my provider is such that file transfers are very slow-- often less than 200 bytes/second. I don't think it's possible to send audio at 200 bytes per second and receive it in real time.

High-fidelity audio is likely to require ISDN service. ISDN is still too expensive for the average consumer in the Boston area, and were it to become generally available the Internet service providers would then become bottlenecks unless the bandwidths of their Internet connections increased by an order of magnitude at least. Therefore I don't see Internet broadcasting as serious competition to radio until the information infrastructure in this country is completely rebuilt, something likely to take many years. NYNEX people have told me that they've got a lot of money invested in what is now old technology and they won't be replacing that equipment for the foreseeable future because the cost would be too high.

When the bandwidth does become available everyone will be a broadcaster. The Internet, presumably including wireless links, will allow high-quality digital broadcasting of sound, video and data all over the world with no FCC license needed. It'll be a totally different world.

Of course, there are a lot of companies in the entertainment and communications businesses that (IMHO) have a vested interest in seeing that it never happens-- what becomes of your investment in satellites, cable, or broadcasting facilities when several million individuals with personal computers can create and broadcast their own TV and radio programs all over the world?

I am therefore somewhat skeptical that Internet broadcasting will become a reality any time soon.

GP- I had the same thing happen to me. I thought it was also curious that House of Voices didn't see my social security number the first time also. I thought that I was being a little paranoid until I saw you post. My attitude is "what can it hurt". My SSN is no good to anybody else. My credit rating couldn't even get a phone installed. I'm just putting my faith on the line and hoping this guy is on the up and up! If he isn't, I have kept detailed transaction summaries that may be used in case he's up to no good. I would hate to think he had bad intentions. Perhaps I think people are good natured when they aren't.

"When I sent all info but my SSN I got a note back saying it
was missing."
An interesting sidelight which may or may not have any-
thing to do with this...a lot of credit card companies are
reporting an upsurge in theft. Here's how it works. Someone
will get hold of your social security number somehow, and
call out to all the credit card companies saying "I've lost my
card." Then, when they ask for some form of ID, the scam
artist will have a name and SSN that match, a new card will
be issued, and the scammer starts racking up charges. You
may not even be stuck with the bill, especially if you catch
it with the first billing cycle and call it to the issuer's atten-
tion...but the credit card company often will be stuck unless
it can find the thief. That's one of many reasons credit card
interest rates are so high.
You may end up helping a thief by innocently supplying
the SSN for a purpose that looks legitimate. They may get
it anyway by hacking into a credit firm's computer data base
(it's been done recently) but often a victim ends up making
the thief's job a lot easier by unwittingly supplying him with
what he needs.
Now, I have NO specific knowledge that this particular or-
ganization is anything other than what it appears to be, and
I don't intend what I've said, to be interpreted as a comment
on their intent or business practices . It is entirely possible
that the company in question is just trying to get all its data-
bases front-loaded before it assigns any work.
But there are people out there who want this information for
other than legitimate purposes. Even if this company does not
have those intentions, it's clear they ought to take more care in
their data-keeping processes when it comes to the confiden-
tiality of their contractors' personal information. While they
may have no intention of misuising the information themselves,
they may be very vulnerable to others who do. So if they ask
again, call them and tell them that for EVERYONE's protec-
tion, including theirs, you don't want to supply certain personal
ID information until you are actually assigned work.
I've done freelance work on a number of occasions over the
last couple of years, and anyone I do business with has re-
quested the SSN data only when the contracts are signed, or
in one case, only after the work was actually done and my in-
voice handed in. They SHOULD understand if you insist on
doing business that way as well, for everyone's protection.

BBC's Radio 4's longest-running magazine programme sets the agenda for women each day with a mixture of politics and people, fashion, food, finance and philosophy. For 49 years Woman's Hour has monitored the progress of women in parliament, in employment, internationally as well as at home. The programme regularly covers education, childcare and health, combining up-to-date research and advice from leading authorities with the emotions and experiences of women and men.

In September Woman's Hour are hoping to visit Beijing and would like to know if any other women's radio stations or programme-making teams are also attending. If so then the team would welcome the chance to meet with fellow broadcasters from round the world, and perhaps share technical facilities which may be at a premium in China.

If you would like to contact the team please e-mail:

Sally.Feldman@bbc.co.uk

For more information about the conference in Beijing and Woman's Hour please visit our Web pages at:

No doubt, everyone is wondering what the software engineer formerly known as Prince...er...the Liberal Avenger thinks of the new book, "The Way Things Aren't"... I've bought it, I've browsed through it, I find it fascinating and not one bit surprising. But here's the question: when a commentator consistently provides disinformation, does not correct his mistakes (except on the rare occaision that his error is somehow "left" of the truth) and appears to do so deliberately (I suppose this could be debated), can an argument be made that he is not operating in the public interest?

Isn't giving false information akin to yelling "fire" in a crowded theater? Could some highly motivated individual in the FCC find a reason to censure (not *censor*) Mr. Limbaugh? or Mr. Liddy, for that matter, who has gone beyond disinformation to exhortation to serious criminal acts?

Be aware that the FCC is at the wrong end of a very congested 56K
link, so it will take several hours to retrieve the data. I'm looking
at making the information available by a mail server on one of my
machines. In the mean time, for those true junkies out there, I offer
a selection of Perl scripts (which work under version 4 or 5) which I
created over the past couple of days to read this database and do some
interesting things with it at:

ftp://radio.lcs.mit.edu/radio/fcc-fm-fb/

You will also find the copies of the database files that I FTPed a
couple of days ago. (Please be aware that I am not keeping this
up-to-date and it will probably disappear the next time I need disk
space.)

Hello all from Las Cruces, New Mexico. I work at a SMN/Classic Rock station here (KSNM-FM) as operations manager and all around good-joe (my title does not reflect my duties, but no else I know does either).

Question: Is any one else out there using EWC's AXS system? I'd like to compare note with you (and share with the rest).

Please respond to the group, so we all can be informed...

As to what is going on in the market, well the latest book came out and which is a waste of time in this market....only 315 in the sample and they only track 12+! Small markets are a drag...

That's it from here,

Regards,

Larry Little, KSNM-FM

My views are my own, and even I'm not sure about them.

One of those experimental AM hi-fi stations in the 30's was W1BRS at 1530 in Waterbury/New Haven CT. The tower was located half way between the two cities, and the station had studios in both cities. The station went on the air in 1934 and later became strictly a Waterbury station called WBRY at 1590. The station became WQQW in 1972 and went dark in 1992.

Well since I started this string of postings, I guess I will add to it ... and I guess since I am a big fan of the TOP 40 God - I'll ask anyone on here in Salt Lake City to aircheck him ... I know a bunch of people who love to hear him and trade the tape for one of him on Alice or B-96 or even older stuff like WLOL, etc...

Hey, Chris Davis (my formar KS-104 PD) - good seening you on hear, welcome! Keep us informed from the inside of Denver Radio ...

Alice has been alternating the Aft Drive between PD Greg Cassidy and a few others ... best sounding (in my opinion is Kelly Michaels <is that the right name> I can't think - just got home from IHL hockey Finals - kinda out of it) also on the air most offen is KMJI (sister All 70's station), opps, I mean KIMN's Paul Vincent ... sounds like he is slowley getting the hang of the audience, good on the phones ... who ever Secret gets for this shift will be great - there is a certain style that you only hear on Alice (KALC) - Chris Davis (Middays) shows some of it ... even Cha-Cha who has been doing nights has it.

Also rumar has it that Tre King (spelling?) will be back from her back problems soon to due overnights, but in the mean time Ethan continues doing it (there is someone who has come a very long way - and is sounding HOT!)

ALSO - GOINGS ON in MARKET # 24 -- KS-104's sister station continues to add more staff - 92X (KNRX) ... I don't think they are fully staffed yet .... they still are airing the IHL Denver Grizzlies Hockey games on the station - identifing themselves as former station - "This is Denver Grizzlies Hockey on K-Big 92.1 FM" ... their AM is still KYBG 1090, but they don't mention 92x during the game ... al-right-ty then.

On the Yahoo web I noticed Denver's Classic Rock "103.5 the Fox" has a home page.

Enough for now...

I missed the beginning of this thread.

Does anyone know of any major stations on the East Coast still
carrying the program and at what time?

I would like to listen to it and hear what he has to say.

<kathyk@PrimeNet.Com> wrote:

|: Has anyone heard of software that will take the spoken... or, in this case,
|: broadcast, word... and transcribe it instantly, phonetically?

There are a few, expensive systems that will do a pretty accurate job of transcribing broken speech, even pretty quick speech (as long as there's a distinct stop between words). But. Your. Disk. Jockeys. Don't. Talk. Like. This.

There are some even more expensive systems that can transcribe continuous speech after being trained for a particular voice. Each DJ would have to spend five or six hours teaching the system how they talk. Figure considerably over $1k for the software.

There aren't any systems available yet that can transcribe real radio, with multiple voices, on-the-fly. But this may be changing in about a year, thanks to some new programs on the horizon.

I had to research this recently for an article in Digital Video magazine. Check the August issue for the results.

Mike - WWCO was alway on 1240. The station went on the air in 1946 with only 240 watts. I don't know where WTHT 1230 was located in Hartford, but both cities are far enough apart for the 2 stations to exist at that time.

Somebody asked me about WBIB-FM and WELI-FM in New Haven. He said both stations merged to become one. I don't know anything about the stations, but a 1957 New Haven phone book lists a "WBIB Building Barber Shop". Until I saw that book, I had never heard of WBIB.

Previously, Edward Janik <janik@spss.com> said:
>I wonder...did this guy have a problem with the station(s)
>for some reason or was this just an act of random idiocy?

There have been a few rumors that a rival station wanted to get revenge, but the suspect in question has been arrested previously for cutting utility pole guy wires for no reason other than it might be a fun thing to do. Interestingly enough, WWCK-FM/AM, the local CHR station (105.5/1570) had their news director doing live remotes from the site of WCRZs toppled tower. Almost seems like they were rubbing it in. Other than some gawkers, not much else was happing at that site. But, it's most lilkely "just an act of random idiocy."

Cross-posted to: cle.misc,rec.radio.broadcasting

It is my pleasure to announce that the brand-new Cleveland Radio/Television Web Page is open for business. This page contains links to:

-- AIRWAVES, a web page operated by Bill Pfeiffer, the publisher of the "Airwaves" cyber-newsletter and the moderator of Usenet's rec.radio.broadcasting. (Incidentally, if you are interested in any facet of commercial radio, check out r.r.b. There are a lot of people from the industry online!) Lots of great links and some interesting and educational info here.

-- CWRUvideo, Case Western Reserve's web page for the campus cable television system.

-- The following radio and television stations, with a short writeup for each:

** WKYC Channel 3 (E-mail)
** 107.9, The End (Web)
** Jammin' 92 (Web)
** WKSU 89.7 (Web)
** Q104 (E-mail)
** Lite Rock 106 1/2 (E-mail)

** More links/information to be added as they become available! **

This page is available thru my home page (URL listed below) or directly at ftp://ftp.apk.net/pub/users/sjsobol/broadcasting.html
